## FDIC TO PAY OFF INSURED DEPOSITORS IN FIRST STATE BANK & TRUST COMPANY, EDINBURG, TEXAS

The Board of Directors of the Federal Deposit Insurance Corporation today approved paying off insured depositors in the First State Bank & Trust Company, Edinburg, Texas. The bank, which had total assets of \$133.7 million, was closed on Friday, May 23, 1986, by James L. Sexton, Texas Bank Commissioner, and the FDIC was named receiver.

The FDIC Board of Directors determined that a payoff of insured depositors was required because no bids were received for the failed bank.

Mr. Sexton said: "The bank was closed as a result of liberal lending practices, a depressed border economy and excessive expenditures related to investment in fixed assets."

Deposits in First State Bank & Trust Company amounted to about \$118.8 million in 11,700 accounts. The FDIC estimates that all but about \$1.8 million of the deposits, in 143 accounts, are within the federal insurance limit of \$100,000, or are otherwise secured. Owners of such uninsured deposits will share proportionately with the FDIC in the proceeds realized from liquidation of the bank's assets.

The Board also voted to make a prompt advance payment to uninsured depositors, based on the estimated present value of assets to be liquidated, equal to 15 percent of the uninsured claims.

If actual collections on the assets, on a present value basis, exceed this estimate, uninsured depositors ultimately will receive additional payments on their claims. The estimate for the advance is believed to be conservative, and it is hoped that actual collections will be higher. If, however, the present value of actual collections should be less than 15 percent, the FDIC insurance fund will absorb the shortfall.
