SUPPLEMENTARY INFORMATION:

I. Information About the Workshop

Section 108(a) of the Clean Air Act directs the Administrator to identify certain air pollutants which, among other things, “cause or contribute to air pollution which may reasonably be anticipated to endanger public health or welfare”; and to issue air quality criteria for them. The air quality criteria are to “accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare which may be expected from the presence of [a] pollutant in the ambient air. . . .”. Under section 109 of the Act, EPA is then to establish NAAQS for each pollutant for which EPA has issued criteria. Section 109(d)(1) of the Act subsequently requires periodic review and, if appropriate, revision of existing air quality criteria to reflect advances in scientific knowledge on the effects of the pollutant on public health or welfare. EPA is also required to review and, if appropriate, revise the NAAQS, based on the revised air quality criteria (for more information on the NAAQS review process, see <https://www.epa.gov/naaqs>).

CPHEA is holding a workshop to inform the Agency’s evaluation of the scientific evidence for the review of Pb. The purpose of the workshop is to obtain input on the scientific content of preliminary draft materials that will inform the development of the draft ISA. Workshop sessions will include discussion of preliminary draft materials from subject areas which may include exposure assessment,

toxicokinetics, toxicology, epidemiology, air quality/exposure, fate and transport, biogeochemistry, plant and animal physiology, ecotoxicology, and ecological population biology. These preliminary materials are not being released as an external draft, but will be provided to the panelists to guide discussions and inform the development of the draft ISA for Pb. This workshop is planned to help ensure that the ISA, once developed, is up-to-date and focuses on the key evidence necessary to inform the underlying scientific basis for the review of the Pb primary and secondary NAAQS. EPA is planning to release the first external review draft of the Pb ISA for review by the Clean Air Scientific Advisory Committee (CASAC) and the public in early 2023.

II. Workshop Information

Members of the public may attend the teleconference as observers. Space in the teleconference may be limited, and reservations will be accepted on a first-come, first-served basis. Registration for the workshop is available online at <https://www.epa.gov/isa/integrated-science-assessment-isa-lead>.

SUPPLEMENTARY INFORMATION:

A. Purpose

The Federal Acquisition Regulation (FAR) Clause 52.222-8 Payrolls and Basic Records requires United States construction contracts in excess of \$2,000 to submit weekly for each week in which any contract work is performed a copy of all payrolls to the Contracting Officer. The clause allows contractors to submit the required weekly payroll information using the DOL WH-347 form or any other form desired. GSA is proposing to deviate from the FAR clause to require these construction contractors to use the GSA Electronic Payroll Template and its portal to submit the required weekly payroll data. The proposed revision will increase the efficiency of the weekly payroll certification process for the contractor, GSA and the contractor’s employee through the use of a standardized automated process. The current manual process for reviewing weekly certified payroll data requires an enormous amount of labor hours and has a large probability of human error *i.e.* non-identification or delayed identification of errors in pay for covered workers. Delays in identifying payroll errors are costly to the contractor who will need to pay retroactive wage adjustments and the employee will have suffered reduced economic purchase power due to the error in wages.

B. Annual Reporting Burden

GSA bases the following burden estimates for certified payrolls on SAM.gov reports for Fiscal Year 2021. The report indicated 182 construction contractors for GSA projects were subject to the Davis-Bacon or Related Act. GSA’s automation of the data collection process will not increase the existing data collection burden from the DOL Wage and Hour Division (WHD) the Office of Management and Budget (OMB) Information Control No. 1235-0008, Davis-Bacon Certified Payroll or 1235-0018, Records to be kept by Employers—Fair Labor Standards Act.

Respondents: 182 (170 prime contractors plus 12 subcontractors).

Responses per Respondent: 52 (1 for each week of the year).

Total Annual Responses: 9,464 (182 respondents × 52 responses).

Hours per Response: 33 minutes (weighted average of 56 minutes (DOL estimated time to input information plus 1 minute recordkeeping for initial entry) + 31 minutes (estimated time to certify payroll in new system plus 1 minute recordkeeping)).

Total Burden Hours: 5,205 ((9,464 annual responses × 33 minutes)/60 minutes).

C. Public Comments

Public comments are particularly invited on: Whether this collection of information is necessary, whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

Obtaining Copies of Proposals: Requesters may obtain a copy of the information collection documents from the Regulatory Secretariat Division by calling 202-501-4755 or emailing GSARegSec@gsa.gov. Please cite OMB Control No. 3090-XXXX, Payrolls and Basic Records Clause, in all correspondence.
