Abstract

The Country Exposure Report (FFIEC 009) is filed quarterly with the agencies and provides information on international claims of U.S. banks and bank holding companies that is used for supervisory and analytical purposes. The information is used to monitor country exposure of banks to determine the degree of risk in their portfolios and the possible impact on U.S. banks of adverse developments in particular countries. The Country Exposure Information Report (FFIEC 009a) is a supplement to the FFIEC 009 and provides publicly available information on material foreign country exposures (all exposures to a country in excess of one percent of total assets or 20 percent of capital, whichever is less) of U.S. banks and bank holding companies that file the FFIEC 009 report. Reporting institutions must also furnish a list of countries in which they have lending exposures above 0.75 percent of total assets or 15 percent of total capital, whichever is less. No changes are proposed to the FFIEC 009 reporting forms or the FFIEC 009a reporting forms and instructions. However, minor

clarifications are proposed to the FFIEC 009 instructions.

Current Actions

The instructional clarifications to the FFIEC 009 report that are the subject of this notice have been approved by the Agencies for implementation as of the December 31, 1999, report date. The proposed clarifications involve classifying credit derivatives as guarantees. The affected sections are: C. "Guaranteed Claims", E. "Contingencies and Commitments", and the specific instructions for column 15.
