This proposed rule also would increase the amount of assessment on all of the imported pork and pork products subject to assessment as published in the Federal Register as a final rule September 8, 1994, and effective on October 11, 1994 (59 FR 46323). This adjustment would reflect the increase in the assessment rate to 0.45 percent and would be consistent with the decrease in the annual average price of domestic barrows and gilts for calendar year 1994 as reported by USDA, AMS, Livestock and Grain Market News (LGMN) Branch. This adjustment in assessments would make the equivalent market value of the live porcine animal from which the imported pork and pork products were derived reflect the recent decrease in the market value of domestic porcine animals, thereby promoting comparability between the importer and domestic assessments.

The methodology for determining the per-pound amounts for imported pork and pork products was described in the supplementary information accompanying the Order and published in the September 5, 1986, Federal Register at 51 FR 31901. The weight of imported pork and pork products is converted to a carcass weight equivalent by utilizing conversion factors which are published in the USDA Statistical Bulletin No. 616 "Conversion Factors and Weights and Measures." These conversion factors take into account the removal of bone, weight lost in cooking or other processing, and the nonpork components of pork products. Secondly, the carcass weight equivalent is converted to a live animal equivalent weight by dividing the carcass weight equivalent by 70 percent, which is the average dressing percentage of porcine animals in the United States. Thirdly, the equivalent value of the live porcine animal is determined by multiplying the live animal equivalent weight by an annual average market price for barrows and gilts as reported by the USDA, AMS, LGMN Branch. The annual average price, which was based on price data from six major markets, is now based on only five markets as one of the six markets-St. Louis-closed in 1994. This average price is published on a yearly basis during the month of January in the LGMN Branch's publication "Livestock, Meat, and Wool Weekly Summary and Statistics." Finally, the equivalent value is multiplied by the applicable assessment rate of 0.45 percent due on imported pork and pork products. The end result is expressed in an amount per pound for each type of pork or pork product. To determine the

amount per kilogram for pork and pork products subject to assessment under the Act and Order, the cent-per-pound assessments are multiplied by a metric conversion factor 2.2046 and carried to the sixth decimal.

The formula in the preamble for the Order at 51 FR 31901 contemplated that it would be necessary to recalculate the equivalent live animal value of imported pork and pork products to reflect increases in the rate of assessments or changes in the annual average price of domestic barrows and gilts to maintain equity of assessments between domestic and porcine animals and imported pork and pork products.

Substituting the proposed assessment rate of 0.45 in the formula and using the 1994 average annual five market price for domestic barrows and gilts of \$39.57 per hundredweight would result in an increase in assessments for all the Harmonized Tariff Systems (HTS) numbers in the table in §1230.110, 59 FR 46323; September 8, 1994, of an amount equal to two- to fourhundredths of a cent per pound, or as expressed in cents per kilogram, four- to nine-hundredths of a cent per kilogram. Based on Department of Commerce, Bureau of Census, data on the volume of imported pork and pork products available for the period January 1, 1994, through September 30, 1994, the proposed increases in the assessment amounts would result in an estimated \$175,000 increase in importer assessments over a 12-month period.

List of Subjects in 7 CFR Part 1230

Administrative practice and procedure, Advertising, Agriculture research, Marketing agreement, Meat and meat products, Pork and pork products.

For the reasons set forth in the preamble, it is proposed that 7 CFR part 1230 be amended as set forth below:

PART 1230—PORK PROMOTION, RESEARCH, AND CONSUMER INFORMATION

1. The authority citation for 7 CFR Part 1230 continues to read as follows:

Authority: 7 U.S.C. 4801-4819.

Subpart—[Amended]

2. Subpart B—Rules and Regulations is amended by revising § 1220.110 to read as follows:

§1230.110 Assessments on Imported Pork and Pork Products.

(a) The following HTS categories of imported live porcine animals are subject to assessment at the rate specified.

Live porcine animals	Assessment	
0103.10.0000	0.45 percent Customs En- tered Value.	
0103.91.0000	0.45 percent Customs En- tered Value.	
0103.92.0000	0.45 percent Customs En- tered Value.	

(b) The following HTS categories of imported pork and pork products are subject to assessment at the rates specified. Assessment

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 325

RIN 3064-AB54

Capital Maintenance

AGENCY: Federal Deposit Insurance Corporation (FDIC). ACTION: Proposed Rule.

SUMMARY: The FDIC is proposing to amend its risk-based capital guidelines to modify the definition of the OECDbased group of countries. Claims on the governments and banks of this group generally receive lower risk weights than corresponding claims on the governments and banks of non-OECDbased countries. The FDIC is proposing this amendment on the basis of an announcement, made on July 15, 1994, by the Basle Committee on Banking Supervision (Basle Committee) that, subject to national consultation, the Basle Committee plans to introduce a change to the Basle Accord in 1995. The effect of the proposed modification would be to exclude from the OECDbased group of countries which are eligible for the lower risk weights any country that has rescheduled its external sovereign debt within the previous five years.

DATES: Comments on the proposal must be received by March 17, 1995. ADDRESSES: All comments should be submitted to Robert E. Feldman, Acting Executive Secretary, Attention: Room F-402, Federal Deposit Insurance Corporation, 550 17 Street NW., Washington, D.C. 20429. Comments may be hand delivered to Room F-402, 1776 F Street NW., Washington, DC, on business days between 8:30 a.m. and 5:00 p.m. [Fax number: (202)898-3838.] Comments will be available for inspection at the FDIC's Reading Room, Room 7118, 550 17th Street NW., Washington, D.C. between 9:00 a.m. and 4:30 p.m. on business days.

FOR FURTHER INFORMATION CONTACT: For supervisory purposes, Stephen G. Pfeifer, Examination Specialist, Accounting Section, Division of Supervision (202/898–8904); for legal purposes, Dirck A. Hargraves, Attorney, Legal Division (202/898–7049).

SUPPLEMENTARY INFORMATION:

I. Background

In 1988 the central bank governors of the G–10 countries endorsed international capital standards (the Basle Accord)¹ establishing a risk-based

framework for measuring the capital adequacy of internationally-active banks. Under the framework, riskweighted assets are calculated by assigning assets and off-balance-sheet items to broad categories based primarily on their credit risk; that is, the risk that a banking organization will incur a loss due to an obligor or counterparty default on a transaction. Risk weights range from zero percent, for assets with minimal credit risk (such as U.S. Treasury securities), to 100 percent, which is the risk weight that applies to most private sector claims, including commercial loans.

While the Basle Accord primarily focuses on credit risk, it also incorporates country transfer risk considerations.² In addressing transfer risk, the Basle Committee members examined several methods for assigning obligations of foreign countries to the various risk categories. Ultimately, the Basle Committee decided to use a defined group of countries considered to be of high credit standing as the basis for differentiating claims on foreign governments and banks. For this purpose, the Basle Committee determined this group as the full members of the Organization for Economic Cooperation and Development (OECD), as well as countries that have concluded special lending arrangements with the International Monetary Fund (IMF) associated with the IMF's General Arrangements to Borrow.3 These countries are referred to as the OECDbased group of countries and encompass

² Transfer risk generally refers to the possibility that an asset cannot be serviced in the currency of payment because of a lack of, or restraints on, the availability of needed foreign exchange in the country of the obligor.

³The OECD is an international organization of countries which are committed to market-oriented economic policies, including the promotion of private enterprise and free market prices; liberal trade policies; and the absence of exchange controls. Full members of the OECD at the time the Basle Accord was endorsed included Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, the United Kingdom, and the United States. In May 1994, Mexico was accepted as a full member of the OECD. In addition, Saudi Arabia has concluded special lending arrangements associated with the International Monetary Fund's General Arrangements to Borrow.

most of the major industrial countries, including all members of the G–10 and the European Union.

Under both the Basle Accord and the FDIC's risk-based capital guidelines, claims on the governments and banks of the OECD-based group of countries generally receive lower risk weights than corresponding claims on the governments and banks of non-OECD countries. Specifically, the FDIC's riskbased capital policy statement provides for the following treatment:

• Direct claims on, and the portions of claims that are directly and unconditionally guaranteed by, OECDbased central governments (including central banks) are assigned to the zero percent risk weight category. Claims on central governments outside the OECDbased group are assigned to the zero percent risk weight category only if such claims are denominated in the national currency (i.e., local currency claims) and funded by liabilities in the same currency.

• Claims conditionally guaranteed by OECD-based central governments and claims collateralized by securities issued or guaranteed by OECD-based central governments generally are assigned to the 20 percent risk weight category. The same types of claims on non-OECD countries are assigned to the 100 percent risk category.

• Long-term claims on OECD banks are assigned to the 20 percent riskweight category. Long-term claims on non-OECD banks are assigned to the 100 percent risk category. (Short-term claims on all banks, whether they are members of the OECD-based group of countries or not, are assigned a 20 percent risk weight.)

• General obligation bonds that are obligations of states or other political subdivisions of the OECD-based group of countries are assigned to the 20 percent risk category. Revenue bonds of such political subdivisions are assigned to the 50 percent risk category. Both general obligation and revenue bonds of political subdivisions of non-OECD countries are assigned to the 100 percent risk category.

Recently, the OECD has taken steps to expand its membership. In light of these steps, the Basle Committee was urged to clarify an ambiguity in the Basle Accord as to whether the OECD members eligible for the lower risk weights include only those members that were in the OECD when the Basle Accord was endorsed in 1988 or all members, regardless of entry date into the OECD. The Basle Committee also reviewed the overall appropriateness of the criteria the Basle Accord uses to determine whether claims on a foreign government

¹The Basle Accord was issued in 1988 by the Basle Committee, which is comprised of

representatives of the central banks and supervisory authorities from the G–10 countries (Belgium, Canada, France, Germany, Italy, Japan, the Netherlands, Sweden, Switzerland, the United Kingdom, and the United States) and Luxembourg. In 1989 the FDIC adopted a Statement of Policy on Risk-Based Capital (Appendix A to Part 325) to implement the Basle Accord. This risk-based capital policy statement applies to the state nonmember banks for which the FDIC is the appropriate federal banking agency.

or bank qualify for placement in a lower risk category. As part of this review, the Basle Committee reassessed whether membership in the OECD (or the conclusion of special lending arrangements with the IMF) would, by itself, be sufficient to ensure that only countries with relatively low transfer risk would continue to be eligible for lower risk weight treatment.

On July 15, 1994, the Basle Committee made an announcement to clarify that the reference in the Basle Accord to OECD members applies to all current members of the organization. The announcement also stated that it is the Basle Committee's intention, subject to national consultation, to record a change to the Basle Accord in 1995 that would modify the definition of the OECD-based group of countries for riskbased capital purposes. The change, if adopted, would exclude from lower risk weight treatment any country within the OECD-based group of countries that has rescheduled its external sovereign debt within the previous five years. The Basle Committee announcement was endorsed by the G-10 Governors.

II. Proposed Rule

In view of the Basle Committee's announcement, the FDIC is proposing to amend its risk-based capital guidelines to modify the definition of the OECDbased group of countries. Under the proposal, the OECD-based group of countries would continue to include countries that are currently full members of the OECD, regardless of entry date, as well as countries that have concluded special lending arrangements with the IMF associated with the Fund's General Arrangements to Borrow, but would exclude any country within this group that has rescheduled its external sovereign debt within the previous five years. The effect of the proposed modification would be to clarify that membership in the OECD-based group of countries must coincide with relatively low transfer risk in order for a country to be eligible for differentiated capital treatment.

For purposes of this proposal, an event of rescheduling of external sovereign debt generally would include renegotiations of terms arising from the country's inability or unwillingness to meet its external debt service obligations. Renegotiations of debt in the normal course of business generally do not indicate transfer risk of the kind that would preclude an OECD-based country from qualifying for lower risk weight treatment. One example of such a routine renegotiation would be a renegotiation to allow the borrower to take advantage of a change in market conditions, such as a decline in interest rates.

The FDIC invites comment on all aspects of this proposal.

III. Regulatory Flexibility Act

The Board of Directors of the FDIC hereby certifies that adoption of this proposed amendment to part 325 will not have a significant economic impact on a substantial number of small business entities (in this case, small banking organizations) within the meaning of the Regulatory Flexibility Act requirements (5 U.S.C. 601 et seq.). This amendment will not necessitate the development of sophisticated recordkeeping or reporting systems by small institutions nor will small institutions need to seek out the expertise of specialized accountants, lawyers, or managers to comply with this regulation. In light of this certification, the Regulatory Flexibility Act requirements (at 5 U.S.C. 603, 604) to prepare initial and final regulatory flexibility analyses do not apply.

IV. Paperwork Reduction Act

The FDIC has determined that the proposed amendment, if adopted, would not increase the regulatory paperwork burden of state nonmember banks pursuant to the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.). Consequently, no information has been submitted to the Office of Management and Budget for review.

List of Subjects in 12 CFR Part 325

Bank deposit insurance, Banks, Banking, Capital adequacy, Reporting and recordkeeping requirements, Savings Associations, State nonmember banks.

For the reasons set forth in the preamble, the Board of Directors of the Federal Deposit Insurance Corporation proposes to amend part 325 of title 12 of the Code of Federal Regulations as follows:

PART 325—CAPITAL MAINTENANCE

1. The authority citation for Part 325 continues to read as follows:

Authority: 12 U.S.C. 1815(a), 1815(b), 1816, 1818(a), 1818(b), 1818(c), 1818(t), 1819(Tenth), 1828(c), 1828(d), 1828(i), 1828(n), 1828(o), 1831o, 3907, 3909; Pub. L. 102–233, 105 Stat. 1761, 1789, 1790 (12 U.S.C. 1831n note); Pub. L. 102–242, 105 Stat. 2236, 2355, 2386 (12 U.S.C. 1828 note).

2. Appendix A to part 325 is amended by revising footnote 12 in section II.B.2. to read as follows: Appendix A to Part 325—Statement of Policy on Risk-Based Capital

Annual Independent Audits and Reporting Requirements

AGENCY: Federal Deposit Insurance Corporation (FDIC or Corporation). **ACTION:** Notice of proposed rulemaking.

SUMMARY: Section 314 of the Riegle Community Development and Regulatory Improvement Act of 1994 (RCDRIA) amends sections 36(i) and 36(g)(2) of the Federal Deposit Insurance Act (FDI Act). Section 36 of the FDI Act is generally intended to facilitate early identification of problems in financial management through annual independent audits, assessments of the effectiveness of internal controls and of compliance with designated laws and regulations, and more stringent reporting requirements. Section 314(a) provides relief from certain duplicative reporting under section 36 of the FDI Act for sound, well managed insured depository institutions with over \$9 billion in total assets which are subsidiaries of multibank holding companies. Section 314(b) requires the Corporation to notify a large insured depository institution in writing if it decides a review by an independent public accountant of such institution's quarterly financial reports is required.

¹² The OECD-based group of countries comprises all full members of the Organization for Economic Cooperation and Development (OECD), as well as countries that have concluded special lending arrangements with the International Monetary Fund (IMF) associated with the IMF's General Arrangements to Borrow, but excludes any country that has rescheduled its external sovereign debt within the previous five years. The OECD includes the following countries: Australia, Austria, Belgium, Canada, Denmark, Finland, France Germany, Greece, Iceland, Ireland, Italy, Japan, Luxembourg, Mexico, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, the United Kingdom and the United States. Saudi Arabia has concluded special lending arrangements with the IMF associated with the IMF's General Arrangements to Borrow.
