Briefing on How To Use the Federal Register
For information on briefing in New York, NY, see
announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche format and magnetic tape. The annual subscription price for the **Federal Register** paper edition is \$375, or \$415 for a combined **Federal Register**, **Federal Register Index** and **List of CFR Sections Affected (LSA)** subscription; the microfiche edition of the **Federal Register** including the **Federal Register Index** and **LSA** is \$353; and magnetic tape is \$37,500. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is \$4.50 for each issue, or \$4.50 for each group of pages as actually bound; or \$1.50 for each issue in microfiche form; or \$175.00 per magnetic tape. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 58 FR 12345.

**THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT**

- FOR:** Any person who uses the Federal Register and Code of Federal Regulations.
- WHO:** The Office of the Federal Register.
- WHAT:** Free public briefings (approximately 3 hours) to present:
 1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
 2. The relationship between the Federal Register and Code of Federal Regulations.
 3. The important elements of typical Federal Register documents.
 4. An introduction to the finding aids of the FR/CFR system.
- WHY:** To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

NEW YORK, NY

- WHEN:** November 23, 9:00 am—12:00 pm
- WHERE:** National Archives—Northeast
Region, 201 Varick Street, 12th Floor,
New York, NY
- RESERVATIONS:** 1-800-347-1997

Rules and Regulations

Federal Register

Vol. 58, No. 204

Monday, October 25, 1993

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 906

[Docket No. FV93-906-2 IFR]

Oranges and Grapefruit Grown in the Lower Rio Grande Valley in Texas; Temporary Relaxation of Minimum Size Requirements for Texas Grapefruit

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule with request for comments.

SUMMARY: This interim final rule temporarily relaxes the minimum size requirements for certain Texas grapefruit for the entire 1993-94 season. The Texas Valley Citrus Committee (committee) met July 15, 1993, and unanimously recommended this action. This rule is expected to help the Texas citrus industry successfully market the 1993-94 season grapefruit crop.

DATES: This interim final rule becomes effective: October 25, 1993. Comments which are received by November 24, 1993, will be considered prior to any finalization of this interim final rule.

ADDRESSES: Interested persons are invited to submit written comments concerning this rule to: Docket Clerk, Fruit and Vegetable Division, AMS, USDA, PO Box 96456, room 2523-S, Washington, DC 20090-6456. Three copies of all written material shall be submitted, and they will be made available for public inspection at the office of the Docket Clerk during regular business hours. All comments should reference the docket number, date, and page number of this issue of the Federal Register.

FOR FURTHER INFORMATION CONTACT: Charles L. Rush, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, PO Box 96456, Room

2523-S, Washington, DC 20090-6456; telephone: 202-720-2431; or Belinda G. Garza, McAllen Marketing Field Office, USDA/AMS, 1313 East Hackberry, McAllen, Texas 78501; telephone: 210-682-2833.

SUPPLEMENTARY INFORMATION: This interim final rule is issued under Marketing Agreement and Marketing Order No. 906, as amended (7 CFR Part 906), regulating the handling of oranges and grapefruit grown in the Lower Rio Grande Valley in Texas, hereinafter referred to as the order. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the Act.

This interim final rule has been reviewed by the U.S. Department of Agriculture (Department) in accordance with Departmental Regulation 1512-1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule. This interim final rule has been reviewed under Executive Order 12778, Civil Justice Reform. This action is not intended to have retroactive effect. This interim final rule will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 9c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and requesting a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after date of the entry of the ruling.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are about 15 citrus handlers subject to regulation under the marketing order covering oranges and grapefruit grown in Texas, and about 750 producers of oranges and grapefruit in Texas. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than \$500,000, and small agricultural service firms are defined as those whose annual receipts are less than \$3,500,000. The majority of these handlers and producers may be classified as small entities.

The committee, which administers the order locally, meets prior to and during each season to review the handling regulations effective on a continuous basis for each citrus fruit regulated under the order. Committee meetings are open to the public, and interested persons may express their views at these meetings. The Department reviews committee recommendations, information submitted by the committee and other information, and determines whether modification, suspension, or termination of the handling regulations would tend to effectuate the declared policy of the Act.

Minimum size requirements for fresh grapefruit grown in Texas are in effect under § 906.365 (7 CFR 906.365). This action amends § 906.365 by revising paragraph (a)(4) to permit shipment of grapefruit measuring at least 3 5/8 inches in diameter (pack size 112) for the entire 1993-94 season ending July 31, 1994, provided such grapefruit grade at least U.S. No. 1.

This relaxation is expected to help the Texas citrus industry successfully market its 1993-94 season grapefruit crop and have a positive effect on producer returns. Permitting shipment of pack size 112 grapefruit grading at least U.S. No. 1 for the entire 1993-94 season will enable Texas grapefruit

handlers to meet market needs and compete with similar sized grapefruit expected to be shipped from Florida. This action is based on the current and prospective crop and market conditions for Texas grapefruit. Fresh Texas grapefruit shipments are expected to begin in early October this season.

This action also removes paragraph (c) of § 906.365. That paragraph sets forth quality requirements for oranges and grapefruit which were in effect through February 15, 1992. Thus, the provisions in that paragraph are obsolete.

Texas grapefruit shipments to fresh markets in the United States, Canada, and Mexico are subject to handling requirements effective under this order. Exempt from such handling requirements are shipments made: (1) Within the production area in Texas; (2) in individually addressed gift packages aggregating not more than 500 pounds which are not for resale; (3) under the 400 pound minimum quantity exemption provision; and (4) for relief, charity, and home use. In addition, fruit shipped to approved processors located outside of the production area may be exempted from the handling requirements.

This action reflects the committee's and the Department's appraisal of the need to issue the relaxed requirements. The Department believes that this action will have a beneficial impact on producers and handlers because it will permit 1993-94 season grapefruit shipments consistent with anticipated crop and market conditions. The application of handling requirements to Texas grapefruit over the years has been beneficial to the Texas citrus industry in marketing its crops.

Based on the above, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matter presented, the information and recommendations submitted by the committee, and other information, it is found that the relaxation set forth below will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined, upon good cause, that it is impracticable, unnecessary and contrary to the public interest to give preliminary notice prior to putting this rule into effect, and that good cause exists for not postponing the effective date of this action until 30 days after publication in the Federal Register because: (1) This action relaxes size requirements currently in effect for Texas grapefruit; (2) shipment of the

1993-94 season Texas grapefruit crop is expected to begin in early October; (3) Texas grapefruit handlers are aware of this action which was unanimously recommended by the committee at a public meeting, and they will need no additional time to comply with the relaxed requirements; and (4) the rule provides a 30-day comment period, and any comments timely received will be considered prior to any finalization of this interim final rule.

List of Subjects in 7 CFR Part 906

Grapefruit, Marketing agreements, Oranges, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 906 is amended as follows:

PART 906—ORANGES AND GRAPEFRUIT GROWN IN THE LOWER RIO GRANDE VALLEY IN TEXAS

1. The authority citation for 7 CFR part 906 continues to read as follows:

Authority: 7 U.S.C. 601-674.

2. Section 906.365 is amended by removing paragraph (c), and by revising paragraph (a)(4) to read as follows:

§ 906.365 Texas Orange and Grapefruit Regulation 34.

(a) * * *

(4) Such grapefruit are at least pack size 96, except that the minimum diameter limit for pack size 96 grapefruit in any lot shall be 3³/₁₆ inches: *Provided*, That any handler may handle grapefruit, except during the period November 16 through January 31 each season, which are smaller than pack size 96, if such grapefruit grade at least U.S. No. 1 and they are at least pack size 112, except that the minimum diameter limit for pack size 112 grapefruit in any lot shall be 3³/₁₆ inches: *Provided further*, That for the period beginning October 25, 1993, and ending July 31, 1994, any handler may handle grapefruit if such grapefruit grade at least U.S. No. 1 and they are at least pack size 112, except that the minimum diameter limit for pack size 112 grapefruit in any lot shall be 3³/₁₆ inches in diameter.

BILLING CODE 3410-02-P

7 CFR Parts 911, 915, 927, and 929

[Docket Nos. FV92-911-1FIR, Amdt. 1; FV93-927-1FIR; and FV93-929-1FIR]

Finalization of Interim Final Rules for Specified Marketing Orders (Limes, Avocados, Winter Pears, and Cranberries)

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department of Agriculture (Department) is adopting as a final rule, without change, the provisions of three interim final rules that authorized expenses and established assessment rates for the Florida Lime Administrative Committee, Florida Avocado Administrative Committee, Winter Pear Control Committee, and Cranberry Marketing Committee (Committees) under Marketing Order Nos. 911, 915, 927, and 929, respectively.

Authorization of these budgets enables the Committees to incur expenses that are reasonable and necessary to administer their respective programs. Funds to administer these programs are derived from assessments on handlers.

EFFECTIVE DATES: Sections 911.232 and 915.232 are effective April 1, 1993, through March 31, 1994; § 927.233 is effective July 1, 1993, through June 30, 1994; and § 929.233 is effective September 1, 1993, through August 31, 1994.

FOR FURTHER INFORMATION CONTACT:

Britthany E. Beadle (§ 929.233), Marketing Order Administration Branch, F&V, AMS, USDA, P.O. Box 96456, room 2522-S, Washington, DC 20090-6456; telephone: (202) 720-5127; William J. Pimental (§§ 911.232 and 915.232), Southeast Marketing Field Office, Fruit & Vegetable Division, AMS, USDA, PO Box 2276, Winter Haven, Florida 33883-2276; telephone (813) 299-4770; or Teresa Hutchinson (§ 927.233), Northwest Marketing Field Office, 1220 SW Third Avenue, room 369, Portland, Oregon 97204, telephone: (503) 326-2724.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Agreement and Marketing Order No. 911 (7 CFR part 911) regulating the handling of fresh limes grown in Florida; Marketing Agreement and Marketing Order No. 915 (7 CFR Part 915) regulating the handling of fresh avocados grown in Florida; Marketing Agreement and Marketing Order No. 927 (7 CFR Part 927) regulating the handling of winter pears grown in Oregon, Washington, and California;

and Marketing Agreement and Marketing Order No. 929 (7 CFR Part 929), regulating the handling of cranberries grown in the States of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York. The marketing orders are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the Act.

This final rule has been reviewed by the Department in accordance with Departmental Regulation 1512-1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. Under the marketing order provisions now in effect, limes and avocados grown in Florida, winter pears grown in Oregon, Washington, and California, and cranberries grown in the States of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York are subject to assessments. It is intended that the assessment rates specified herein will be applicable to all assessable limes, avocados, winter pears, and cranberries handled during the 1993-94 marketing year, which began April 1, 1993, through March 31, 1994 (M.O.'s 911 and 915), July 1, 1993, through June 30, 1994 (M.O. 927); and September 1, 1993, through August 31, 1994 (M.O. 929). This final rule will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and requesting a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after date of the entry of the ruling.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities. The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 20 handlers of limes and 40 handlers of avocados grown in Florida, 90 handlers of winter pears grown in Oregon, Washington, and California, and 30 handlers of cranberries grown in the States of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York who are subject to regulation under the respective marketing orders. There are approximately 260 producers of limes, 300 producers of avocados, 1,850 producers of winter pears, and 950 producers of cranberries in the regulated areas. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than \$500,000, and small agricultural service firms are defined as those whose annual receipts are less than \$3,500,000. The majority of the lime, avocado, winter pear, and cranberry producers and handlers may be classified as small entities.

The respective marketing orders require that the assessment rates for a particular marketing year shall apply to all assessable limes, avocados, pears, and cranberries handled from the beginning of such year. An annual budget of expenses is prepared by each Committee and submitted to the Department for approval. The members of the Committees are producers of the regulated commodities. They are familiar with the Committees' needs and with the costs for goods, services, and personnel in their local areas and are thus in a position to formulate appropriate budgets. The budgets are formulated and discussed in public meetings. Thus, all directly affected persons have an opportunity to participate and provide input.

The assessment rates recommended by the Committees are derived by dividing anticipated expenses by

expected shipments of limes, avocados, winter pears, and cranberries. Because these rates are applied to actual shipments, they must be established at rates which will produce sufficient income to pay the Committees' expected expenses. The recommended budgets and rates of assessment are usually acted upon by the Committees shortly before a season starts, and expenses are incurred on a continuous basis. Therefore, the budget and assessment rate approval must be expedited so that the Committees will have funds to pay their expenses.

The Florida Lime Administrative Committee (FLAC) and the Florida Avocado Administrative Committee (FAAC) met on December 9, 1992, and unanimously recommended total expenses for the 1993-94 fiscal year of \$106,346 and an assessment rate of \$0.16 per bushel for their respective Committees. This action was published as an interim final rule in the Federal Register (58 FR 8533, February 18, 1993) and provided a 30-day comment period which ended March 18, 1993.

The FLAC and FAAC met again February 11, 1993, and unanimously recommended to increase budgeted expenses for both limes and avocados to \$108,346. As a result, the FLAC and FAAC submitted a comment to the Department to increase their budgeted expenses by \$2,000.

The \$2,000 increase in expenditures for each Committee will finance an aerial survey on which a tree count can be conducted, scheduled for March 1994. This survey is necessary due to the hurricane that hit the production area in August 1992. The strong winds uprooted many lime and avocado trees. The aerial survey will give a better idea of crop size for assessment and estimating purposes by the Committees.

The FLAC's and FAAC's 1993-94 fiscal year expenses and assessment rate approvals, including the recommended increase in expenses, were adopted in a final rule and published in the Federal Register (58 FR 33757, June 21, 1993).

The FLAC and FAAC met again on June 9, 1993, and unanimously recommended to increase their budget of expenses from \$108,346 to \$113,846, representing an increase of \$5,500 for each Committee. Each Committee deemed the increase necessary in order to finance additional research on the impact of increased water supplies on the water table in the lime and avocado production areas. Adequate funds are available from the Committees' reserves to cover these expenses.

The Winter Pear Control Committee (WPCC) met on June 4, and June 24, 1993, and unanimously recommended

total expenses of \$6,933,615 for the 1993-94 fiscal year. In comparison, the 1992-93 fiscal year expense amount was \$6,716,983, which is \$216,632 less than the recommended amount for this fiscal year.

The WPCC also unanimously recommended an assessment rate of \$0.45 per standard box, or equivalent and a supplemental assessment rate of \$0.04 per standard box, or equivalent for Anjou variety pears. In comparison, the 1992-93 pear assessment rate was \$0.43 per standard box, or equivalent and \$0.09 for the supplemental assessment rate on Anjou variety pears. This represents a \$0.02 increase and \$0.05 decrease, respectively, in the assessment rates recommended for this fiscal year. These rates, when applied to anticipated pear shipments of 13,167,475 standard boxes and Anjou pear shipments of 10,570,650, will yield a total of \$6,348,190 in assessment income. The supplemental assessment will be used to fund Ethoxyquin data research.

Assessment income, along with \$190,000 from other income, and \$395,425 from the Committee's authorized reserve, will be adequate to cover budgeted expenses. The \$395,425 withdrawal of funds from the Committee's authorized reserve will result in no reserve remaining at the end of the 1993-94 fiscal period.

Major expense categories for the 1993-94 fiscal year include \$4,937,803 for advertising, \$566,433 for contingency, \$422,828 for Ethoxyquin data research, and \$174,775 for salaries and benefits. Comparable 1992-93 budgeted expenses are \$4,562,500, \$490,578, \$855,000, and \$160,905, respectively.

The Cranberry Marketing Committee (CMC) conducted a mail vote and unanimously recommended total expenses for the 1993-94 fiscal year of \$155,000 and an assessment rate of \$0.03 per 100-pound barrel. In comparison, the 1992-93 fiscal year expense amount was \$146,600, which is \$8,400 less than the \$155,000 recommended for this fiscal year and the assessment rate has remained unchanged.

Assessment income for the 1993-94 fiscal year is expected to amount to \$124,350 based upon an estimated domestic production of 4,145,000 barrels. This, along with the anticipated \$4,500 in interest income and the transfer of \$26,150 from the CMC's authorized reserve fund, will be adequate to cover budgeted expenses. Funds in the reserve at the end of the fiscal year will be within the maximum permitted by the order of one fiscal year's expenses.

Major expense categories for the 1993-94 fiscal year include \$68,174 for operating and compensation expenses, \$32,512 for administrative and office expenses, and \$34,500 for travel and meeting expenses. Comparable 1992-93 budgeted expenses are \$67,640, \$44,245, and \$37,500, respectively.

While the application of assessments will impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to producers. However, these costs will be offset by the benefits derived from the operation of the marketing orders. Therefore, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

This action finalizes three interim final rules published in the *Federal Register* (58 FR 42187, August 9, 1993), for 7 CFR parts 911 and 915, (58 FR 42491, August 10, 1993), for 7 CFR part 927, and (58 FR 42493, August 10, 1993), for 7 CFR part 929. Each interim final rule provided a 30-day comment period for interested persons. No comments were received.

It is found that the specified expenses for each marketing order specified in the interim final rules are reasonable and likely to be incurred, and that authorizing such expenses and establishing assessment rates to cover such expenses will tend to effectuate the declared policy of the Act.

It is further found that good cause exists for not postponing the effective date of this action until 30 days after publication in the *Federal Register* (5 U.S.C. 553) because the committees need to have sufficient funds to pay their expenses which are incurred on a continuous basis.

The 1993-94 fiscal years for the programs began on April 1, 1993, for Florida limes and avocados, August 1, 1993, for winter pears, and September 1, 1993, for cranberries. The respective marketing orders require that the rates of assessment for each fiscal year apply to all assessable limes, avocados, pears, and cranberries handled during their respective fiscal year. In addition, handlers are aware of these actions which were recommended by the Committees at public meetings and published in the *Federal Register* as interim final rules. No comments were received concerning the three interim final rules that are adopted in this action as a final rule without change.

List of Subjects

7 CFR Part 911

Lime, Marketing agreements, Reporting and recordkeeping requirements.

7 CFR Part 915

Avocados, Marketing agreements, Reporting and recordkeeping requirements.

7 CFR Part 927

Marketing agreements, Pears, Reporting and recordkeeping requirements.

7 CFR Part 929

Cranberries, Marketing agreements, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR parts 911, 915, 927, and 929 are hereby amended as follows:

1. The authority citation for 7 CFR parts 911, 915, 927, and 929 is revised to read as follows:

Authority: 7 U.S.C. 601-674.

PART 911—LIMES GROWN IN FLORIDA

2. The interim final rule amending § 911.232 of 7 CFR part 911 which was published at 58 FR 42187 on August 9, 1993, is adopted as a final rule without change.

PART 915—AVOCADOS GROWN IN SOUTH FLORIDA

3. The interim final rule amending § 915.232 of 7 CFR part 915 which was published at 58 FR 42187 on August 9, 1993, is adopted as a final rule without change.

PART 927—WINTER PEARS GROWN IN OREGON, WASHINGTON, AND CALIFORNIA

4. The interim final rule adding § 927.233 to 7 CFR part 927 which was published at 58 FR 42491 on August 10, 1993, is adopted as a final rule without change.

PART 929—CRANBERRIES GROWN IN STATES OF MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW JERSEY, WISCONSIN, MICHIGAN, MINNESOTA, OREGON, WASHINGTON, AND LONG ISLAND IN THE STATE OF NEW YORK

5. The interim final rule adding § 929.233 to 7 CFR part 929 which was published at 58 FR 42493 on August 10, 1993, is adopted as a final rule without change.

Dated: October 18, 1993.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

BILLING CODE 3410-02-P

FEDERAL RESERVE SYSTEM

12 CFR Parts 207, 220, 221 and 224

[Regulations G, T, U, and X]

Securities Credit Transactions; List of Marginable OTC Stocks; List of Foreign Margin Stocks

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule; determination of applicability of regulations.

SUMMARY: The List of Marginable OTC Stocks (OTC List) is composed of stocks traded over-the-counter (OTC) in the United States that have been determined by the Board of Governors of the Federal Reserve System to be subject to the margin requirements under certain Federal Reserve regulations. The List of Foreign Margin Stocks (Foreign List) is composed of foreign equity securities that have met the Board's eligibility criteria under Regulation T. The OTC List and the Foreign List are published four times a year by the Board. This document sets forth additions to and deletions from the previous OTC List and the Foreign List.

EFFECTIVE DATE: November 8, 1993.

FOR FURTHER INFORMATION CONTACT:

Peggy Wolfrum, Securities Regulation Analyst, Division of Banking Supervision and Regulation, (202) 452-2781, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. For the hearing impaired only, contact Dorothea Thompson, Telecommunications Device for the Deaf (TDD) at (202) 452-3544.

SUPPLEMENTARY INFORMATION: Listed below are the additions to and the deletions from the OTC List. This supersedes the last OTC List which was effective August 9, 1993. Additions and deletions to the OTC List were last published on July 26, 1993 (58 FR 39639). A copy of the complete OTC List is available from any Federal Reserve Bank.

The OTC List includes those stocks that meet the criteria in Regulations G, T and U (12 CFR parts 207, 220 and 221, respectively). This determination also affects the applicability of Regulation X (12 CFR part 224). These stocks have the degree of national investor interest, the depth and breadth of market, and the availability of information respecting

the stock and its issuer to warrant regulation in the same fashion as exchange-traded securities. The OTC List also includes any OTC stock designated under a Securities and Exchange Commission (SEC) rule as qualified for trading in the national market system (NMS security). Additional OTC stocks may be designated as NMS securities in the interim between the Board's quarterly publications. They will automatically become marginable upon the effective date of their NMS designation. The names of these stocks are available at the Board and the SEC and will be incorporated into the Board's next quarterly publication of the OTC List.

Also listed below are the additions to and the deletions from the Foreign List, which was last published on July 26, 1993 (58 FR 39640), and effective August 9, 1993. Stocks on the Foreign List are eligible for margin treatment at broker-dealers pursuant to a 1990 amendment to Regulation T (12 CFR part 220). The Foreign List includes those securities that meet the criteria in Regulation T and are eligible for margin treatment at broker-dealers on the same basis as domestic margin securities. A copy of the complete Foreign List is available from any Federal Reserve Bank.

Public Comment and Deferred Effective Date

The requirements of 5 U.S.C. 553 with respect to notice and public participation were not followed in connection with the issuance of this amendment due to the objective character of the criteria for inclusion and continued inclusion on the Lists specified in 12 CFR 207.6(a) and (b), 220.17(a), (b), (c) and (d), and 221.7(a) and (b). No additional useful information would be gained by public participation. The full requirements of 5 U.S.C. 553 with respect to deferred effective date have not been followed in connection with the issuance of this amendment because the Board finds that it is in the public interest to facilitate investment and credit decisions based in whole or in part upon the composition of these Lists as soon as possible. The Board has responded to a request by the public and allowed approximately a two-week delay before the Lists are effective.

Public Comment and Deferred Effective Date

List of Subjects

12 CFR Part 207

Banks, Banking, Credit, Margin, Margin requirements, National Market System (NMS Security), Reporting and recordkeeping requirements, Securities.

12 CFR Part 220

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 337

RIN 3064-AA80

Unsafe and Unsound Banking Practices

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Final rule.

SUMMARY: This final rule revises definitions used in FDIC regulations governing the acceptance of brokered deposits to conform those definitions to the definitions used in regulations

implementing section 38 of the Federal Deposit Insurance Act (FDI Act). As a result of these revisions, the capital category definitions used in FDIC regulations governing the acceptance of brokered deposits will have the same meaning as provided under regulations implementing section 38 of the FDI Act. **EFFECTIVE DATE:** November 24, 1993.

FOR FURTHER INFORMATION CONTACT:

Valerie Jean Best, Counsel, Legal Division, (202) 898-3812 or William G. Hrindac, Examination Specialist, Division of Supervision, (202) 898-6892, FDIC, 550 17th Street NW., Washington DC 20429.

SUPPLEMENTARY INFORMATION:

Discussion

Statutory Provisions Governing Brokered Deposits and Proposed Rule

Section 301 of the Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA) amended section 29 of the FDI Act and added a new section 29A. 12 U.S.C. 1831f, 1831f-1. Section 301 of FDICIA regulates the acceptance of funds obtained, directly or indirectly, by or through any "deposit broker" for deposit into one or more deposit accounts (*i.e.*, brokered deposits). "Well capitalized" insured depository institutions may accept, renew, or roll over brokered deposits without restraint. "Adequately capitalized" insured depository institutions are prohibited from accepting, renewing, or rolling over brokered deposits without first obtaining a waiver from the FDIC. "Undercapitalized" insured depository institutions are prohibited from accepting, renewing, or rolling over brokered deposits. Section 301 of FDICIA also imposes certain interest rate restrictions on insured depository institutions that are not well capitalized.

The terms "well capitalized" and "adequately capitalized" are not defined in section 301 of FDICIA, but those same terms are used in section 38 of the FDI Act dealing with prompt corrective action (PCA). 12 U.S.C. 1831o. Moreover, section 301 of FDICIA indicates that the term "undercapitalized" is to have the same meaning provided in section 38 of the FDI Act. When the FDIC adopted a final rule on May 29, 1992, implementing section 301 of FDICIA, however, the regulatory definitions of the different capital levels identified in section 38 of the FDI Act were not available. The FDIC indicated that it intended to adopt those definitions once they became available. 57 FR 23933, 23935 (June 5, 1992). Thereafter, those definitions became available and, consistent with

its earlier statements, the FDIC issued for comment a proposed rule (58 FR 26705, May 5, 1993) conforming the capital category definitions used in its brokered deposit regulations to the definitions used in the PCA regulations promulgated by the federal banking agencies. The FDIC received comment letters from three trade associations representing financial institutions, three bank holding companies, and two banks. The comment letters uniformly supported the FDIC's proposed action. One commenter stated: "[T]he change is * * * important in order to achieve consistency throughout the complex banking regulations prompted by FDICIA and the FDI Act". Another commenter stated that "consistency in these two different regulatory areas will contribute to overall compliance with these laws by the banking industry". A third commenter agreed with the FDIC that the proposed amendment "does not broadly change the range of institutions affected by the brokered deposits regulation".

Although the comment letters supported the FDIC's proposed action, a few letters asked that certain provisions be added. One comment letter asked that the revisions be made retroactive to June 16, 1992, the date when the brokered deposit regulations implementing FDICIA first became effective. This commenter noted that the capital category definitions in the brokered deposit regulation impact the availability of "pass-through" deposit insurance coverage for employee benefit plan deposits. Pass-through insurance is not provided for any such deposit accepted by an insured institution which, at the time the deposit is accepted, may not accept brokered deposits. 12 U.S.C. 1821(a)(1)(D); 58 FR 29952, 29964 (May 25, 1993) (to be codified at 12 C.F.R. 330.12(b)). This commenter argued that retroactive application "would allow greater certainty as to the deposit insurance coverage of deposits made by certain employee benefit plan depositors".

The FDIC does not agree that retroactive application is warranted in this case. A very small class of institutions stand to benefit from retroactive application. In order to benefit from retroactive application, an institution would have to be one that satisfied the stated percentages of leverage and risk-based capital applicable to well capitalized institutions but was classified as adequately capitalized because it was in "troubled condition". Further, it would have to have been in "troubled condition" for a reason other than having been subject to an order, written

agreement, capital directive, or PCA directive to meet and maintain a specific capital level for any capital measure. Any such institution already had available to it an alternative method of preserving pass-through deposit insurance coverage for employee benefit plans.¹ That is, the institution could have given the depositor written notification (*i.e.*, "self-certification") that the deposits were entitled to insurance coverage on a pass-through basis. See FDIC Advisory Opinion 92-94 (Dec. 17, 1992); 58 FR 29952, 29964 (May 25, 1993) (to be codified at 12 CFR 330.12(b)). Adequately capitalized institutions other than the small class described above would not benefit from retroactive application of this rule. Undercapitalized institutions would not benefit from retroactive application. Moreover, we are not persuaded that retroactive application would allow greater certainty as to insurance coverage. The term "troubled condition" is clearly defined in the current brokered deposit regulations; its inclusion in the capital category definitions did not create uncertainty as to an institution's capital status. In summary, a very small class of depository institutions would benefit from retroactive application; those institutions already had available to them a method for preserving pass-through insurance coverage; inclusion of the "troubled condition" criteria did not create uncertainty as to the availability of pass-through insurance coverage; there is some potential for confusion to depositors if this rule is applied retroactively. The FDIC therefore declines to apply this rule retroactively.

It should be noted that the burden of determining pass-through coverage will be eased through this final rule in the following respect: An institution's capital status will be determined less frequently than under the previous brokered deposit regulations. The availability of pass-through coverage for employee benefit plans is dependent on an institution's capital status at the time any deposit is accepted. Under the earlier brokered deposit regulations, an institution's capital status was determined on a day-to-day basis. This final rule provides that an insured institution shall be deemed to be within a given capital category, for purposes of the brokered deposit regulations, as of

¹ The reduction in pass-through insurance coverage did not go into effect until December 19, 1992, six months after the brokered deposit rule implementing FDICIA went into effect. Consequently, the capital category requirements were available six months before insurance coverage was affected by the statute.

the date the institution is notified of, or is deemed to have notice of, its capital category under regulations implementing PCA. In turn, the PCA regulations generally provide that an institution is deemed to have been notified of its capital category as of the most recent date:

(1) A Consolidated Report of Condition and Income or Thrift Financial Report is required to be filed with the appropriate federal banking agency;

(2) A final report of examination is delivered to the institution; or

(3) Written notice is provided by the appropriate federal banking agency to the institution of its capital category.

Another comment letter asked that a "grace period" of at least one calendar-quarter be included for institutions that are reclassified from well-capitalized status to adequately-capitalized status. They argued that a grace period was needed to give the institution time to increase its capital levels or, alternatively, obtain a waiver, thereby avoiding funding disruptions and speculation regarding the institution's financial condition.

The FDIC believes it is not necessary to delay the effective date of any reclassification for purposes of the brokered deposit regulations because the PCA regulations and the brokered deposit regulations already give an institution sufficient time to react to any proposed reclassification. Before any reclassification under the PCA regulations goes into effect, an institution is provided prior written notice of the proposed reclassification, an opportunity to file a written response, and an opportunity for an informal hearing. See, 57 FR 44866, 44876-77 (Sept. 29, 1992).² Under the brokered deposit regulations, any properly authorized FDIC official may grant a temporary waiver based upon a preliminary review for a short period in order to facilitate the orderly processing of an application for a waiver. 12 CFR 337.6(e)(1). Moreover, any application filed by an institution that is CAMEL or MACRO rated 1 or 2 by its appropriate federal banking agency is deemed approved for the period requested 21 days after filing unless the institution is notified otherwise in the interim. 12 CFR 337.6(e)(2). In light of the procedural safeguards preceding any reclassification under the PCA regulations and the fact that an

² The reclassification procedures can generally be found in the following sections. FDIC—12 CFR 308.202. Board of Governors of the Federal Reserve System—12 CFR 263.203. Office of the Comptroller of the Currency—12 CFR 19.221. Office of Thrift Supervision—12 CFR 565.8.

institution may seek a temporary waiver should circumstances warrant, it is not necessary to delay imposition of the brokered deposit regulations.

Several of the comment letters raised issues that were not the subject of the rulemaking. One letter objected to the proliferation of capital definitions, citing such terms as equity capital, core capital, tangible capital, Tier 1 capital, Tier 2 capital, risk-based capital, leverage capital, well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized. It should be recognized that many of these terms are required by statute. For example, the five capital category terms—well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized—were established by section 131 of FDICIA governing PCA. Section 131 also specifies a leverage limit and a risk-based capital requirement as “relevant capital measures”. Section 305 of FDICIA refers to risk-based capital standards and specifies the components that the federal banking agencies must take into account when setting such standards. Various sections of FDICIA refer to tangible capital (e.g., sections 141, 461, 475). Although many of the terms complained of are necessitated by statute, the FDIC will continue to work with the other federal banking agencies to attain consistency and clarity and to minimize any burden on insured depository institutions.

One comment letter objected to the fact that an institution may be excluded from the well-capitalized category by virtue of the fact that it is under a capital directive to maintain a specific capital level. However, it is not the purpose of this rule to revisit the definitions adopted by the federal banking agencies in the PCA regulations. Another letter objected to the fact that the capital categories used for risk-based assessment purposes were not consistent with the capital categories used for the PCA provisions and the proposed brokered deposit provisions. For purposes of the risk-based assessment system, the definition of “well capitalized” reflects only the capital-ratio standards of the PCA definitions; it does not refer to written agreements, orders, capital directives, or PCA directives. Although the risk-based assessment regulation does not refer to such capital agreements and directives in the definition of “well capitalized”, these elements are considered as part of the supervisory subgroup determinations employed in the

assessment regulation. 57 FR 45263, 45280–81, 45285 (Oct. 1, 1992).

Summary of Final Rule

This final rule provides that, for purposes of the brokered deposit statute and implementing regulations, the terms “well capitalized”, “adequately capitalized”, and “undercapitalized”, shall have the same meaning as provided under regulations implementing section 38 of the FDI Act issued by the appropriate federal banking agency for that institution. For purposes of section 38 of the FDI Act, an institution is deemed to be:

* * * “Well capitalized” if the institution: (1) Has a total risk-based capital ratio of 10.0 percent or greater; (2) Has a Tier 1 risk-based capital ratio of 6.0 percent or greater; (3) Has a leverage ratio of 5.0 percent or greater; and (4) Is not subject to any written agreement, order, capital directive, or prompt corrective action directive to meet and maintain a specific capital level for any capital measure.

* * * “Adequately capitalized” if the institution: (1) Has a total risk-based capital ratio of 8.0 percent or greater; (2) Has a Tier 1 risk-based capital ratio of 4.0 percent or greater; (3) Has a leverage ratio of 4.0 percent or greater (or a leverage ratio of 3.0 percent or greater if the institution is rated composite 1 under the CAMEL or MACRO rating system in its most recent report of examination, subject to appropriate federal banking agency guidelines); and (4) Does not meet the definition of a well capitalized institution;

* * * “Undercapitalized” if the institution: (1) Has a total risk-based capital ratio that is less than 8.0 percent; or (2) Has a Tier 1 risk-based capital ratio that is less than 4.0 percent; or (3) Has a leverage ratio that is less than 4.0 percent (or a leverage ratio that is less than 3.0 percent if the institution is rated composite 1 under the CAMEL or MACRO rating system in its most recent report of examination, subject to appropriate federal banking agency guidelines).

Unlike section 38 of the FDI Act and its implementing regulations, the brokered deposit regulations do not contain specific definitions for “significantly undercapitalized” and “critically undercapitalized” institutions. This is because section 29 of the FDI Act restricts all undercapitalized institutions from accepting, renewing, or rolling over brokered deposits; it is irrelevant into which of the three lower capital categories the depository institution falls (i.e., “undercapitalized”, “significantly undercapitalized”, or “critically undercapitalized”).

This final rule incorporates the capital categories adopted in the PCA regulations for insured branches of foreign banks. These definitions exclude an insured branch of a foreign bank from the well capitalized category if it has received written notice from:

(1) The Office of the Comptroller of the Currency to increase its capital equivalency deposit pursuant to 12 CFR 28.6(a) or to comply with asset maintenance requirements pursuant to 12 CFR 28.9; or

(2) The FDIC to pledge additional assets pursuant to 12 CFR 346.19 or to maintain a higher ratio of eligible assets pursuant to 12 CFR 346.20.

Reclassification Under PCA Regulations

Section 38 of the FDI Act provides that the appropriate banking agency may, under certain circumstances, reclassify a well capitalized insured depository institution as adequately capitalized. The statute provides, in part, that if the appropriate federal banking agency determines (after notice and opportunity for hearing) that an insured depository institution is in an unsafe or unsound condition or, pursuant to section 8(b)(8),³ deems the institution to be engaging in an unsafe or unsound practice, the agency may reclassify the institution as adequately capitalized if the institution is well capitalized. 12 U.S.C. 1831o(g)(1)(A). The PCA regulations adopted by each agency track, for the most part, the statutory language described above.⁴ As a result of conforming the definitions used in the brokered deposit regulations to the definitions used in the PCA regulations, a well capitalized institution that is reclassified as adequately capitalized pursuant to section 38 of the FDI Act, will be subjected to the brokered deposit provisions applicable to adequately capitalized institutions.

Section 38 of the FDI Act permits the appropriate federal banking agency to require an adequately capitalized or undercapitalized institution to comply with the supervisory provisions as if the institution were in the next lower category (but not treat a significantly undercapitalized institution as critically undercapitalized) based on supervisory information other than the capital levels of the institution. These provisions are not strictly a reclassification. 57 FR 44866, 44876 (Sept. 29, 1992). The FDIC has determined that, if the appropriate federal banking agency subjects an

³ Section 8(b)(8) of the FDI Act provides that if an insured depository institution receives, in its most recent report of examination, a less-than-satisfactory rating for asset quality, management, earnings or liquidity, the appropriate federal banking agency may (if the deficiency is not corrected) deem the institution to be engaging in an unsafe or unsound practice. 12 U.S.C. 1818(b)(8).

⁴ FDIC—12 CFR 325.103(d). Board of Governors of the Federal Reserve System—12 CFR 208.33(c). Office of the Comptroller of the Currency—12 CFR 6.4(d). Office of Thrift Supervision—12 CFR 565.4(c).

adequately capitalized insured depository institution to the supervisory actions applicable to a lower capital category pursuant to section 38, the institution will not be subjected to the provisions applicable to such lower (*i.e.*, undercapitalized) capital category under the brokered deposit rule. The basis for this determination is that an adequately capitalized institution's access to brokered deposits is already strictly regulated by the brokered deposit statute and regulations. An adequately capitalized institution is prohibited from accepting brokered deposits unless it first obtains a waiver from the FDIC. A waiver is granted only if the FDIC concludes that the acceptance of brokered deposits does not constitute an unsafe or unsound practice with respect to the applicant. 12 U.S.C. 1831f(c); 12 CFR 337.6(c). Since the acceptance of brokered deposits by adequately capitalized institutions is controlled, little would be achieved by subjecting an adequately capitalized institution to the prohibitions applicable to undercapitalized institutions.

For the reasons outlined above, this final rule adopts the amendments outlined in the proposed rule without change.

Paperwork Reduction Act

This final rule does not impose any new information-collection requirements. Consequently, no information has been submitted to the Office of Management and Budget for review.

Regulatory Flexibility Act

The Board of Directors of the FDIC hereby certifies that these amendments to part 337 will not have a significant economic impact on a substantial number of small business entities within the meaning of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) In light of this certification, the Regulatory Flexibility Act requirements (at 5 U.S.C. 603, 604) to prepare initial and final regulatory flexibility analyses do not apply.

List of Subjects in 12 CFR Part 337

Banks, Banking, Reporting and recordkeeping requirements, Savings associations, Securities.

For the reasons set forth in the preamble, the Board of Directors of the FDIC hereby amends Part 337 of Chapter III of title 12 of the Code of Federal Regulations as set forth below.

PART 337—UNSAFE AND UNSOUND BANKING PRACTICES

1. The authority citation for part 337 continues to read as follows:

Authority: 12 U.S.C. 375a(4), 375b, 1816, 1818(a), 1818(b), 1819, 1821(f), 1828(j)(2), 1831f, 1831f-1.

2. Section 337.6 is amended by removing paragraphs (a)(1), (a)(9), and (a)(10), by redesignating paragraphs (a)(2) and (a)(3) as paragraphs (a)(1) and (a)(2), respectively; and by adding a new paragraph (a)(3) to read as follows:

§ 337.6 Brokered deposits.

(a) * * *

(3) *Capital categories.* (i) For purposes of section 29 of the Federal Deposit Insurance Act and this § 337.6, the terms *well capitalized*, *adequately capitalized*, and *undercapitalized*,¹¹ shall have the same meaning as to each insured depository institution as provided under regulations implementing section 38 of the Federal Deposit Insurance Act issued by the appropriate federal banking agency for that institution.¹²

(ii) If the appropriate federal banking agency reclassifies a well capitalized insured depository institution as adequately capitalized pursuant to section 38 of the Federal Deposit Insurance Act, the institution so reclassified shall be subject to the provisions applicable to such lower capital category under this § 337.6.

(iii) An insured depository institution shall be deemed to be within a given capital category for purposes of this § 337.6 as of the date the institution is notified of, or is deemed to have notice of, its capital category, under regulations implementing section 38 of the Federal Deposit Insurance Act issued by the appropriate federal banking agency for that institution.¹³

¹¹ The term *undercapitalized* includes any institution that is *significantly undercapitalized* or *critically undercapitalized* under regulations implementing section 38 of the Federal Deposit Insurance Act and issued by the appropriate federal banking agency for that institution.

¹² For the most part, the capital measure terms are defined in the following regulations: FDIC—12 CFR part 325, subpart B; Board of Governors of the Federal Reserve System—12 CFR part 208; Office of the Comptroller of the Currency—12 CFR part 6; Office of Thrift Supervision—12 CFR part 565.

¹³ The regulations implementing section 38 of the Federal Deposit Insurance Act and issued by the federal banking agencies generally provide that an insured depository institution is deemed to have been notified of its capital levels and its capital category as of the most recent date: (1) A Consolidated Report of Condition and Income or Thrift Financial Report is required to be filed with the appropriate federal banking agency; (2) A final report of examination is delivered to the institution; or (3) Written notice is provided by the appropriate federal banking agency to the institution of its capital category for purposes of section 38 of the Federal Deposit Insurance Act and implementing regulations or that the institution's capital category has changed. Provisions specifying the effective date of determination of capital category are generally published in the following regulations:

* * * * *

By order of the Board of Directors.

Dated at Washington, DC this 19th day of October 1993.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6714-01-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 91-ANE-42; Amendment 39-8693; AD 93-18-08]

Airworthiness Directives; Pratt & Whitney Canada JT15D Series Turbofan Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD), applicable to Pratt & Whitney Canada (PWC) JT15D-4B series turbofan engines, that currently requires initial and repetitive borescope inspections of the high pressure turbine (HPT) assembly and removal of the HPT assembly if forward blade movement exists. This amendment includes the initial and repetitive borescope inspection requirements of the existing AD, but also extends its effectivity to include all PWC JT15D-1, -1A, -1B, -4, -4B, -4C, and -4D series engines. This amendment also requires the incorporation of a new or reworked HPT stator assembly and new HPT blade retention rivets as terminating actions to the inspection program. This amendment is prompted by reports of two recent contained HPT blade failures that occurred on PWC JT15D-4D series engines. The actions specified by this AD are intended to prevent an HPT assembly failure, and an inflight engine shutdown or loss of engine power.

DATES: Effective November 24, 1993.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 24, 1993.

ADDRESSES: The service information referenced in this AD may be obtained from Pratt & Whitney Canada, Box 10, Longueuil, Quebec, Canada J4K 4X9.

FDIC—12 CFR 325.102. Board of Governors of the Federal Reserve System—12 CFR 208.32. Office of the Comptroller of the Currency—12 CFR 6.3. Office of Thrift Supervision—12 CFR 565.3.

This information may be examined at the FAA, New England Region, Office of the Assistant Chief Counsel, 12 New England Executive Park, Burlington, MA; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Richard Woldan, Aerospace Engineer, Engine Certification Office, FAA, Engine and Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803-5299; telephone (617) 238-7136; fax (617) 238-7199.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations by superseding AD 91-06-01, Amendment 39-6911 (56 FR 7802, February 26, 1991), which is applicable to Pratt & Whitney Canada (PWC) JT15D-4B series engines, was published in the Federal Register on June 18, 1992 (57 FR 27195). That action proposed to require initial and repetitive borescope inspections of the high pressure turbine (HPT) assembly on all PWC JT15D-1, -1A, -1B, -4, -4B, -4C, and -4D series engines. That action also proposed to require the incorporation of a new or re-worked HPT stator assembly and new HPT blade retention rivets as terminating actions to the inspection program.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comment received.

The commenter agrees with the rule as proposed.

Since publication of the NPRM, PWC has issued Service Bulletin (SB) No. JT15D 72-7297, Revision 1, dated May 25, 1991; PWC SB JT15D 72-7296, Revision 3, dated October 18, 1991; and PWC SB JT15D 72-7307, Revision 2, dated December 19, 1991. The AD has been changed accordingly to reference these new SB revisions. For the purpose of this AD, accomplishment of the actions described in earlier revisions of these SB's constitutes accomplishment of the actions described in the SB's referenced in this final rule.

The NPRM proposed to require borescope inspections in accordance with procedures described in the Temporary Revisions to the applicable maintenance manuals. This final rule incorporates the borescope inspection procedures described in those Temporary Revisions to the applicable maintenance manuals into Appendix 1 of this AD.

In addition, there was a typographical error in paragraph (a)(1)(iv) of the NPRM that mistakenly required removal from service of HPT assemblies with

evidence of forward blade movement in excess of the 0.020 inch limit. The correct value is 0.020 inch, and this final rule has been changed accordingly.

After careful review of the available data, including the comment noted above, the Federal Aviation Administration (FAA) has determined that air safety and the public interest require the adoption of the rule with the changes described previously. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

The FAA estimates that 1,400 PWC JT15D-1, -1A, -1B, and -4 engines and 1,700 PWC JT15D-4B, -4C, -4D engines are installed on aircraft of U.S. registry, that it will take approximately 4 work hours per engine to accomplish the inspection requirements of this AD, and 11 work hours per engine to incorporate the HPT blade retention rivets. An additional 8 work hours per engine is required to incorporate the new or reworked HPT stator on approximately 1,700 affected PWC JT15D-4B, -4C, and -4D engines. The average labor rate is \$55 per work hour. The total material cost will be approximately \$50 per engine for new rivets on all engines. There is no additional parts cost due to the new or reworked HPT stator. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be \$3,460,500. The manufacturer has advised the FAA that it may reimburse operators for some labor and material costs, thereby reducing the economic impact on U.S. operators.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing Amendment 39-6911 (56 FR 7802, February 26, 1991) and by adding a new airworthiness directive, Amendment 39-8693, to read as follows:

93-18-08 Pratt & Whitney Canada:

Amendment 39-8693. Docket 91-ANE-42. Supersedes AD 91-06-01, Amendment 39-6911.

Applicability: Pratt & Whitney Canada (PWC) Model JT15D-1, -1A, -1B, -4, -4B, -4C, and -4D series turbofan engines installed on but not limited to Cessna Citation I, Citation II/SII and Citation 500, Aerospatiale Corvette, Mitsubishi Diamond 1/1A and Agusta S211 aircraft.

Compliance: Required as indicated, unless accomplished previously.

To prevent a high pressure turbine (HPT) assembly failure, and an inflight engine shutdown or loss of engine power, accomplish the following:

(a) For PWC JT15D-4B, -4C, and -4D series engines for which the requirements of PWC Service Bulletin (SB) JT15D 72-7297, Revision 1, dated May 25, 1991, and either PWC SB JT15D 72-7296, Revision 3, dated October 18, 1991, or PWC SB JT15D 72-7307, Revision 2, dated December 19, 1991, have not been accomplished as of the effective date of this AD, accomplish the following:

(1) Borescope inspect the HPT assembly for HPT blade shift in accordance with the inspection requirements outlined in Appendix 1 of this AD, as follows:

Appendix 1

1. Inspect high pressure turbine (HPT) blades for evidence of blade shift using a 3 or 4 mm flexible borescope. Blade forward movement in excess of 0.020 inch is reason for removal of the HPT for repair.

2. Inspection with a 5 or 6 mm borescope has proven to be extremely difficult and is not recommended.

3. Borescope access is achieved by passing the borescope probe between the blades of the low pressure turbine (LPT) assembly. With the borescope in position, rotation of

the high pressure rotor via the accessory gearbox starter-generator driveshaft allows all HPT blades to be inspected. The extent of blade shift may be assessed by comparing with the HPT blade serration to serration pitch, which is 0.090 inch.

(i) Within 25 hours time in service (TIS) or 30 days after the effective date of this AD, whichever occurs first, for those engines which have accumulated on the effective date of this AD, greater than 275 hours TIS since the last inspection performed in accordance with AD 91-06-01, or since the last hot section inspection (HSI), or since new, if not previously inspected.

(ii) Prior to accumulating 300 hours TIS since the last inspection performed in accordance with AD 91-06-01, or since the last HSI, or since new if not previously inspected, for those engines which have accumulated on the effective date of this AD 275 hours or less TIS since the last inspection performed in accordance with AD 91-06-01 or since the last HSI, or since new, if not previously inspected.

(iii) Thereafter, reinspect the HPT assembly for HPT blade shift in accordance with Appendix 1 of this AD at intervals not to exceed 300 hours TIS since the last inspection.

(iv) Remove from service prior to further flight, and replace with a serviceable assembly those HPT assemblies with evidence of forward blade movement in excess of the 0.020 inch limit as provided in Appendix 1 of this AD. Serviceable assemblies include HPT assemblies removed from engines which have completed an HSI, or that portion of the HSI requiring deblading and re-riveting the turbine assembly in accordance with the applicable JT15D Maintenance Manuals.

(2) Incorporate high turbine (HT) blade retaining rivets in accordance with PWC SB

JT15D 72-7297, Revision 1, dated May 25, 1991, at the next shop visit when the engine is disassembled sufficiently to afford access to the HPT assembly.

(3) Incorporate the new or reworked HT stator assembly in accordance with applicable PWC SB JT15D 72-7307, Revision 2, dated December 19, 1991, or PWC SB JT15D 72-7296, Revision 3, dated October 18, 1991, at the next shop visit when the engine is disassembled sufficiently to afford access to the HPT assembly.

(4) Initial and repetitive borescope inspections performed in accordance with paragraphs (a)(1) of this AD are not required once the new HPT blade retention rivets and the new or reworked HT stator assembly are incorporated in accordance with paragraphs (a)(2) and (a)(3) of this AD.

(b) For PWC JT15D-1, -1A, -1B, and -4 series engines for which the requirements of PWC SB JT15D 72-7297, Revision 1, dated May 25, 1991, have not been accomplished as of the effective date of this AD, accomplish the following:

(1) Borescope inspect the HPT assembly within 300 hours TIS after the effective date of this AD for HPT blade shift in accordance with the inspection requirements outlined in Appendix 1 of this AD.

(i) Thereafter, reinspect at intervals not to exceed 300 hours TIS since last inspection.

(ii) Remove from service prior to further flight HPT assemblies that exhibit forward blade movement in accordance with paragraph (a)(1)(iv) of this AD.

(2) Incorporate HT blade retaining rivets in accordance with PWC SB JT15D 72-7297, Revision 1, dated May 25, 1991, at the next shop visit when the engine is disassembled sufficiently to afford access to the HPT assembly.

(3) Initial and repetitive borescope inspections in accordance with paragraph

(b)(1) of this AD are no longer required once the new HPT blade retention rivets are incorporated in accordance with paragraph (b)(2) of this AD.

(c) For the purpose of this AD, accomplishment of the actions described in the following earlier revisions of these SB's constitutes accomplishment of actions described in the current revisions of these SB's referenced in this final rule:

(1) PWC SB JT15D 72-7297, Original, dated December 18, 1990;

(2) PWC SB JT15D 72-7296, Revision 2, dated September 5, 1991; Revision 1, dated May 15, 1991; and Original, dated February 8, 1991;

(3) PWC SB JT15D 72-7307, Revision 1, dated October 18, 1991; and Original, dated May 15, 1991.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Engine Certification Office. The request should be forwarded through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Engine Certification Office.

Note: Information concerning the existence of approved alternative methods of compliance with this airworthiness directive, if any, may be obtained from the Engine Certification Office.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(f) The inspections, replacement, and modification shall be done in accordance with the following service documents:

| Document No. | Pages | Issue | Date |
|---|-------|--------------|----------------|
| PWC SB JT15D 72-7297R1 Total pages: 8. | 1-8 | Rev. 1 | May 25, 1991. |
| PWC SB JT15D 72-7307R2 Total pages: 9. | 1-9 | Rev. 2 | Dec. 19, 1991. |
| PWC SB JT15D 72-7296R3 Total pages: 8. | 1-8 | Rev. 3 | Oct. 18, 1991. |

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Pratt & Whitney Canada, Box 10, Longueuil, Quebec, Canada J4K 4X9. Copies may be inspected at the FAA, New England Region, Office of the Assistant Chief Counsel, 12 New England Executive Park, Burlington, MA; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(g) This amendment becomes effective on November 24, 1993.

Issued in Burlington, Massachusetts, on September 16, 1993.

Mark C. Fulmer,

Acting Manager, Engine and Propeller Directorate, Aircraft Certification Service.

[FR Doc. 93-26147 Filed 10-22-93; 8:45 am]

BILLING CODE 4910-13-P

14 CFR Part 39

[Docket No. 93-NM-29-AD; Amendment 39-8687; AD 93-18-02]

Airworthiness Directives; Airbus Industrie Model A320 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Airbus Industrie Model A320 series airplanes, that requires modification of the nose landing gear (NLG) wheels. This amendment is prompted by reports of deteriorating NLG wheel bearings; such deterioration caused damage to the sliding tube/integral axle assembly of the NLG wheel. The actions specified by this AD are intended to prevent reduced directional control due to loss of the NLG wheel during taxiing or landing.

DATES: Effective November 24, 1993.

The incorporation by reference of certain publications listed in the regulations is approved by the Director

of the Federal Register as of November 24, 1993.

ADDRESSES: The service information referenced in this AD may be obtained from Airbus Industrie, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Stephen Slotte, Aerospace Engineer, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055-4056; telephone (206) 227-2797; fax (206) 227-1320.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain Airbus Industrie Model A320 series airplanes was published in the Federal Register on April 29, 1993 (58 FR 25954). That action proposed to require modification of the nose landing gear (NLG) wheels.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

Several commenters support the rule as proposed.

One commenter requests that the applicability statement of the AD be revised from the proposed "Model A320-111, -211, and -231 series airplanes, as listed in Airbus Industrie Service Bulletin No. A320-32-1061, Revision 3, dated October 19, 1992" to "Model A320 series airplanes equipped with BFGoodrich NLG wheels part number 3-1470, on which Airbus Industrie Modification 22098 has not been accomplished." The commenter feels that the applicability statement as proposed in the notice is not clear and could confuse operators. The FAA does not concur with the commenter's request. The FAA considers that the effectivity listing of the service bulletin accurately describes which airplanes are currently known to be affected by the subject unsafe condition, and, thus, which airplanes are subject to this AD. The FAA notes that the phrase "unless accomplished previously" in the compliance section of the rule provides credit to any operator that has accomplished the modification prior to the effective date of this AD.

One commenter, the manufacturer of the NLG wheels, requests that the

compliance time for modification of the NLG wheels be extended from the proposed 4 months. The commenter states that, by establishing a compliance time of no sooner than February 15, 1994, all operators of Airbus Model A320 series airplanes would have sufficient time (during routine shop visits for tire change) to accomplish the modification. The commenter states that all operators, with the exception of one, are in the final stages of modifying the BFGoodrich NLG wheels. Since the commenter currently performs all maintenance of the NLG wheels for this lone operator, the bearings for these wheels would be closely inspected during the extended period prior to compliance, and any discrepant wheel would be readily detected. In addition, the commenter states that there is a problem with the availability of wheel spacers to modify all of the nose wheels for this lone operator within the proposed compliance time, and that it will take approximately six months from receipt of the wheel spacers to modify all of the NLG wheels. The FAA does not concur with the commenter's request to extend the compliance time. The FAA's policy is that specific calendar dates should be used to express compliance times only when engineering analysis establishes a direct relationship between that date and airworthiness. Additionally, in developing an appropriate compliance time for this action, the FAA considered not only the degree of urgency associated with addressing the subject unsafe condition, but the availability of required parts and the practical aspect of accomplishing the required modification within a maximum interval of time allowable for all affected airplanes to continue to operate without compromising safety. The FAA notes, however, that, based on the effective date of this AD, the compliance time will fall close to February 15, 1994. Moreover, under the provisions of paragraph (b) of the final rule, the FAA may approve requests for adjustments to the compliance time if data is submitted that substantiates that such an adjustment would provide an acceptable level of safety.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

The FAA estimates that 52 airplanes of U.S. registry will be affected by this AD, that it will take approximately 5 work hours per airplane to accomplish the required actions, and that the average labor rate is \$55 per work hour. Based on these figures, the total cost

impact of the AD on U.S. operators is estimated to be \$14,300, or \$275 per airplane. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

93-18-02 Airbus Industrie: Amendment 39-8687. Docket 93-NM-29-AD.

Applicability: Model A320-111, -211, and -231 series airplanes, as listed in Airbus Industrie Service Bulletin No. A320-32-1061, Revision 3, dated October 19, 1992; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent reduced directional control due to loss of the nose landing gear wheel during taxiing or landing, accomplish the following:

(a) Within 4 months after the effective date of this AD, modify the nose landing gear wheels in accordance with Airbus Industrie Service Bulletin No. A320-32-1061, Revision 3, dated October 19, 1992.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM-113.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM-113.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The modification shall be done in accordance with Airbus Industrie Service Bulletin No. A320-32-1061, Revision 3, dated October 19, 1992, which contains the following list of effective pages:

| Page No. | Revision level shown on page | Date shown on page |
|-----------|------------------------------|--------------------|
| 1-4 | 3 | October 19, 1992. |
| 5-7 | 1 | June 10, 1991. |

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Airbus Industrie, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment becomes effective on November 24, 1993.

Issued in Renton, Washington, on September 8, 1993.

David G. Hmiel,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 93-26148 Filed 10-22-93; 8:45 am]

BILLING CODE 4910-13-P

14 CFR Part 39

[Docket No. 93-NM-157-AD; Amendment 39-8702; AD 92-16-12 R1]

Airworthiness Directives; British Aerospace Model DH/BH/HS/BAe 125 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment revises an existing airworthiness directive (AD), applicable to certain British Aerospace Model DH/BH/HS/BAe 125 series airplanes, that currently requires the installation of fluid vent masts on the undercarriage fairing. The actions specified in that AD are intended to prevent a fire in the tail cone. This amendment revises the applicability of the rule to specify which series of airplanes are affected by the AD, and includes reference to a later revision of the applicable service bulletin as an additional source of appropriate service information.

DATES: Effective September 28, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of September 28, 1992 (57 FR 38266, August 24, 1992).

The incorporation by reference of certain other publications listed in the regulations is approved by the Director of the Federal Register as of September 28, 1992 (57 FR 38266, August 24 1992).

The incorporation by reference of certain other publications listed in the regulations is approved by the Director of the Federal Register as of October 25, 1993.

ADDRESSES: The service information referenced in this AD may be obtained from British Aerospace, PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041-0414. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: William Schroeder, Aerospace Engineer,

Standardization Branch, ANM-113, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2148; fax (206) 227-1320.

SUPPLEMENTARY INFORMATION: On July 14, 1992, the FAA issued AD 92-16-12, Amendment 39-8321 (57 FR 38266, August 24, 1992), applicable to British Aerospace Model DH/BH/HS/BAe 125 series airplanes, to require the installation of fluid vent masts on the undercarriage fairing. That amendment was prompted by reports indicating that fluid leaking from the overboard drains under the wing can stream back along the outside of the fuselage and re-enter the fuselage tail cone. The actions specified by that AD are intended to prevent a fire in the tail cone.

Since the issuance of that AD, the FAA has received several questions concerning the applicability of the rule. Operators have indicated confusion as to whether the rule is applicable to the newer models in the Model 125 series, namely Model 125-1000 and Model 125-800 series airplanes.

Apparently, during the time of the previous rulemaking action, British Aerospace had released a revision to the service bulletin referenced in AD 92-16-12 that changed the airplane effectivity listing (and included some additional set-up procedures in certain of the accomplishment instructions): Revision 1 to British Aerospace Service Bulletin SB.53-74-3193C&D, dated March 12, 1992, specifies that affected airplanes include "all Model 125 series, up to, and including Model 125-800 series, equipped with a long range ventral tank or baggage pannier (pre-Mod 253193B, production embodiment of drain masts); and all series without a long range ventral tank (pre-Mod 255640) and pre-Mod 253193B." In effect, the revised effectivity listing excludes the Model 125-1000 series, and specifies that the Model 125-800 series is indeed affected. The Civil Aviation Authority of the United Kingdom classified this revised service bulletin as mandatory in order to assure the continued airworthiness of these airplanes in the United Kingdom.

This airplane model is manufactured in United Kingdom and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since confusion exists as to which airplanes are applicable to a rule that requires corrective action to address the unsafe condition presented by a potential fire in the tail cone, the FAA

has determined that AD 92-16-12 must be revised to clarify its applicability to exclude airplanes that are not affected by the addressed unsafe condition. This amendment revises the applicability statement of AD 92-16-12 by including a reference to the effectivity listing of the revised British Aerospace service bulletin, discussed previously. A note has been added to the applicability statement to specify that Model BAe 125-1000A airplanes are not affected by the AD.

This action also revises paragraph (a) of the rule by adding the revised British Aerospace service bulletin as an optional source of appropriate service information.

The effective date of the rule remains September 28, 1992.

The final rule is being reprinted in its entirety for the convenience of affected operators.

Since this action only clarifies the applicability of a rule to exclude certain airplanes and includes an optional service information source, it has no adverse economic impact and imposes no additional burden on any person. Therefore, notice and public procedures hereon are unnecessary.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39-8321 (57 FR 38266, August 24, 1994), and by adding a new airworthiness directive (AD), amendment 39-8702, to read as follows:

92-16-12 R1 British Aerospace: Amendment 39-8702. Docket 93-NM-157-AD. Revises AD 92-16-12, Amendment 39-8321.

Applicability: Model DH/BH/HS/BAe 125 series airplanes, as listed in British Aerospace Service Bulletin SB.53-74-3193C&D, Revision 1, dated March 12, 1992; certificated in any category.

Note 1: Model BAe 125-1000A airplanes are not affected by this AD.

Compliance: Required within 4 months after the effective date of this AD, unless accomplished previously.

To prevent fire in the tail cone, accomplish the following:

(a) Install fluid vent masts on the undercarriage fairing, and plug certain existing vent holes, in accordance with British Aerospace Service Bulletin SB.53-74-3193C&D, dated January 7, 1992; or Revision 1, dated March 12, 1992.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM-113.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM-113.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The installation shall be done in accordance with British Aerospace Service Bulletin SB.53-74-3193C&D, dated January 7, 1992; or British Aerospace Service Bulletin SB.53-74-3193C&D, Revision 1, dated March 12, 1992. (The issuance date of Revision 1 of this service bulletin appears only on page 1 of the document.) The incorporation by reference of the former service bulletin was approved previously by the Director of the Federal Register, in accordance with 5 U.S.C. 552(a) and 1 CFR part 51, as of September 28, 1992 (57 FR 38266, August 24, 1992). The incorporation by reference of the latter service bulletin was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from British Aerospace, PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041-0414. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment is effective on September 28, 1992.

Issued in Renton, Washington, on September 27, 1993.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[Docket No. 92-NM-179-AD; Amendment 39-8703; AD 93-19-05]

Airworthiness Directives; Boeing Model 767 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD), applicable to all Boeing Model 767 series airplanes, that currently requires functional checks of the leading edge slat shutoff valve, the trailing edge flap drive bypass valve, the leading edge slat long term shutoff control, and the leading edge slat drive mechanical rigging. This amendment adds repetitive functional checks of the leading edge slat long term shutoff control and the leading edge slat drive mechanical rigging; requires installation of terminating modifications for the functional checks; and limits the applicability of the rule. The actions specified by this AD are intended to prevent uncommanded deployment of the leading edge slats, which could result in structural damage to the wing and consequent degradation of flight control.

DATES: Effective November 24, 1993.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 24, 1993.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124-2207. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: David Herron, Aerospace Engineer, Seattle Aircraft Certification Office, Systems and Equipment Branch, ANM-130S, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055-4056; telephone (206) 227-2672; fax (206) 227-1181.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations by superseding AD 89-26-04, Amendment 39-6423 (54 FR 51195, December 13, 1989), which is applicable to all Boeing Model 767 series airplanes, was published in the

Federal Register on May 3, 1993 (58 FR 26074). The action proposed to add repetitive functional checks of the leading edge slat long term shutoff control and the leading edge slat drive mechanical rigging; require installation of terminating modifications for the functional checks; and limit the applicability of the rule only to airplanes having line numbers 001 through 402.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the proposal.

One commenter, the airframe manufacturer, requests that the currently required repetitive interval of 400 hours time-in-service for the functional checks of the leading edge slat shutoff valve and the trailing edge flap drive bypass valve be extended to 4,000 flight hours. This commenter submitted empirical data indicating that a 4,000-hour check interval will provide an acceptable level of safety. Additionally, such extension will allow this check to be conducted concurrently with the proposed functional checks of the leading edge slat long term shutoff control and the leading edge inboard and outboard slat drive mechanical rigging, and thus minimize the burden on affected operators. The FAA concurs with the commenter's request. The FAA considers that, once the initial inspections are completed, the probability of the event occurring (uncommanded deployment or inoperative components) is not greater or lesser whether the inspection is repeated at 400 hours or 4,000 hours; a shorter inspection interval will not serve to limit or prevent the event from occurring any more than a longer inspection interval. In light of this, the FAA finds nothing to warrant the additional economic burden of the shorter inspection interval. Additionally, the FAA finds no reason to support why the functional check of the leading edge slat shutoff valve and the trailing edge flap drive bypass valve should be conducted any more frequently than the functional check of the leading edge slat long term shutoff control and the leading edge inboard and outboard slat drive mechanical rigging. The final rule has been revised to change the repetitive interval for the checks of the leading edge slat shutoff valve and the trailing edge flap drive bypass valve to 4,000 hours time-in-service as of the effective date of the rule.

One commenter requests that the compliance time for installing the terminating modifications be extended from the proposed 12,000 flight hours to 16,000 flight hours. By extending the compliance time, operators can avoid special scheduling outside of normal maintenance service intervals. The FAA does not concur with the commenter's request. In developing an appropriate compliance time for this action, the FAA considered the safety implications, parts availability, and normal maintenance schedules for timely accomplishment of the modifications. In consideration of these items, the FAA has determined that 12,000 flight hours represents the maximum interval of time allowable wherein the modifications can reasonably be accomplished by the affected fleet and an acceptable level of safety can be maintained. Further, based on average utilization rates of the U.S. fleet, the FAA finds that 12,000 flight hours equals approximately 3 years for most affected operators. During that time period, most operators would have scheduled at least two to three heavy maintenance services for the subject airplanes; operators could schedule the installation of the modifications during one of these services, and thereby avoid any additional costs associated with special airplane scheduling. However, under the provisions of paragraph (g) of the final rule, the FAA may approve requests for adjustments to the compliance time if data is submitted to substantiate that such an adjustment would provide an acceptable level of safety.

One commenter requests that the proposed rule be revised to give "credit" to operators that have used earlier versions of the cited service bulletin to accomplish work previously. The commenter indicates that allowing such "credit" would prevent unnecessary rework and/or documentation changes on the part of operators. The FAA concurs. A note has been added to the final rule to indicate that any work done previous to the effective date of the rule in accordance with earlier versions of the referenced service bulletin is considered to be in compliance with the rule.

Several commenters request that the FAA not make the terminating modifications mandatory. These commenters request that terminating action be optional instead, and that operators be allowed to continue indefinitely with the repetitive functional checks. These commenters consider that an adequate level of safety can be maintained by the currently required repetitive checks. One

commenter points out that, although there has been one failure that has occurred since issuance of the AD 89-26-04, there have been at least 1.5 million flights without incident since the effective date of that AD; this indicates that the functional checks are sufficient for maintaining continued operational safety. One commenter notes that, since the proposed checks would be conducted at 4,000-flight hour intervals, it is difficult to justify the expense of the terminating action, considering the lack of economic burden associated with performing the checks. Finally, these commenters note that, based on the recommendations of the Airworthiness Assurance Task Force (AATF), indefinite continuation of inspections/checks should be permitted, in lieu of mandatory terminating action, if (1) the area is easily accessible, (2) the problem is easily detectable, and (3) the consequences of the problem are not likely to be catastrophic. These commenters believe that these criteria should be applied to the proposed AD action as well.

The FAA does not concur with the commenters' request. It is first important to point out that the task of the AATF is to deal specifically with structural issues of aging airplanes, especially those issues relative to fatigue cracking and corrosion—how to detect it and effectively deal with it. Further, there are important differences to consider in reviewing structure and systems:

1. Most primary structure is designed with a fail-safe concept that provides a "window of opportunity" that will ensure continued operation even if the primary structure fails. However, such a fail-safe provision does not always exist with systems.

2. Inspection of structure can identify a problem, such as fatigue cracking, in an early stage, and corrective action then can be taken not only to prevent that crack growth, but to prevent cracking from occurring in other areas. Inspection of systems, however, only limits the likelihood of the unwanted event from occurring during the interval of exposure (that is, the interval between inspections); inspections do not prevent the event from occurring, however.

It was for these reasons that the FAA-sponsored Systems Review Task Force (SRTF) did not recommend the same criteria as the AATF relative to the issue of allowing indefinite inspections in lieu of terminating modifications. The modifications required by this AD action are in consonance with the position taken by the SRTF.

In light of this discussion, and the fact that other problems have occurred recently in other transport category airplanes to highlight the adverse effect on airworthiness that occurs when high lift devices inadvertently deploy, the FAA has determined that continued operational safety will be better assured by actual modification of the subject components to remove the source of the problem, rather than by repetitive checks.

One commenter notes that the word "Alert" should be dropped from the references to Boeing Service Bulletins 767-27-0096 and 767-27-0108, since these documents were not issued as "alert service bulletins." The FAA concurs and has changed the references to these service bulletins in the final rule accordingly.

This commenter also notes that, in the preamble to the notice, one of the terminating design modifications contained in Boeing Alert Service Bulletin 767-27-0108 was described as "a modified flap/slat electronic unit (FSEU) to monitor new equipment and to initiate a maintenance level message, 'SLAT ISLN VAL,' if the slat shutoff valve does not operate properly." This commenter requests that the proposed rule not make the "SLAT ISLN VAL" message mandatory. The commenter states that this message is not supported by all versions of the engine indication and crew alerting system (EICAS) computer installed on the affected airplanes; it is a fault isolation aid only. This commenter indicates that, when the modifications specified in Boeing Service Bulletin 767-27-018 are installed, a failure of the slat shutoff valve will result in the display of the maintenance level EICAS message, "FLAP/SLAT ELEC;" this message is a no-dispatch message, requiring corrective action. The FAA concurs, and acknowledges that the description of the subject modification in the preamble to the notice may have been misleading. It was not the FAA's intent to require that airplanes with certain EICAS equipment be modified to enable the use of the "SLAT ISLN VAL" maintenance message. However, it is the FAA's intent to require the enablement of the "FLAP/SLAT ELEC" message, which is implemented when the modifications described in the referenced service bulletin are installed. No change to the final rule itself is necessary to clarify this item, however.

Several commenters state that the economic impact information contained in the preamble to the notice grossly underestimated the cost of the required modifications. These commenters indicate that, although the airframe

manufacturer has stated that the modification kits will cost \$4,000 per airplane and will require 60 work hours to install, the actual costs will include additional work hours and modifications that must be accomplished prior to installing the required kits. The commenters estimate that the full cost of accomplishing the modification requirements of the proposed rule actually could range between \$14,827 and \$21,087 per airplane. The FAA concurs that some adjustment of the applicable cost information is necessary. The commenters are correct in pointing out that the installation of the proposed terminating modifications can be accomplished only if other work is performed previously. This "pre-work" is described in several Boeing and Shimadazu service bulletins and entails installation of new and modified parts on the airplane, modification of the airplane itself, and shop modification of components. The work hours required to perform this pre-work range from 2 to 12, and costs of pre-work modification kits range from \$580 to \$6,827 per airplane. In light of this, the economic impact information, below, has been revised to include the additional costs of the pre-work associated with the required modifications. The FAA does not consider that this revised estimate significantly increases the economic burden on affected operators, in consideration of the consequences of the unsafe condition being addressed. The specified 12,000-flight hour compliance time for installing the required modifications should allow ample time for the installation to be accomplished coincidentally with scheduled major airplane inspection and maintenance activities, thereby minimizing the costs associated with special airplane scheduling.

The formatting of the final rule has been revised for clarity.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 402 Model 767 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 143 airplanes of U.S. registry will be affected by this AD.

The functional checks that are currently required by AD 89-26-04 require approximately 6 work hours to accomplish, at an average labor charge

of \$55 per work hour. Based on these figures, the total cost impact of the functional checks required by the previously issued AD on U.S. operators is estimated to be \$47,190, or \$330 per airplane, per cycle. Since this new AD action requires that these functional checks be repeated less frequently, the associated economic burden on affected operators is reduced.

The functional check procedures that are added by this new AD action will require approximately 6 work hours to accomplish, at an average labor charge of \$55 per work hour. Based on these figures, the total cost impact of the functional checks added by this new AD on U.S. operators is estimated to be \$47,190, or \$330 per airplane, per cycle.

The terminating modification procedures that are added by this new AD action will require 62 work hours to install the pressure switch and to replace the rotary variable differential transformer (RVDT) and the flap/slat electronic unit (FSEU), and 2 work hours to replace the bypass valve motor. The average labor charge is \$55 per work hour. Required parts will cost approximately \$4,200 per airplane. Based on these figures, the total cost impact of the modification requirements of this AD on U.S. operators is estimated to be \$1,103,960, or \$7,720 per airplane.

The total cost figures discussed above assume that no operator has yet accomplished any of the actions required by this AD.

Operators should note that the Boeing service bulletins containing procedures for installing the terminating modifications required by this AD also refer to additional work that must be accomplished prior to installing those modifications. Therefore, it may be necessary for some affected operators first to accomplish certain procedures (which entail installation of new and modified parts on the airplane, modification of the airplane itself, and shop modification of components) that are described in the following service bulletins:

| Service bulletin | Number of work hours | Parts cost |
|---|----------------------|------------|
| Boeing (Shop) Service Bulletin 285T0049-27-06 | 12 | \$580 |
| Boeing Service Bulletin 767-27-0058 | 6 | 911 |
| Shimadazu Service Bulletins 732-18550-27-3 and 732-18600-27-1 | 7.5 | 6,287 |
| Total | 25.5 | 7,778 |

In light of this information, the additional costs associated with installing the required terminating modifications could entail as much as 25.5 additional work hours at a labor charge of \$55 per work hour, and \$7,778 in additional required parts, for some operators. Based on these figures, the total cost of additional work that may be required of some operators is estimated to be \$9,180.50 per airplane. Some or all of this work may have been accomplished previously on some airplanes, but the FAA is unable to ascertain at this time specifically which airplanes those are.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action: (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

\$39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39-6423 (54 FR

51195, December 13, 1989), and by adding a new airworthiness directive (AD), to read as follows:

93-19-05 Boeing: Docket 92-NM-179-AD. Supersedes AD 89-26-04, Amendment 39-6423.

Applicability: Model 767 series airplanes, line positions 001 through 402, inclusive; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

Note 1: Paragraph (a) of this AD restates the requirements of paragraph B. of AD 89-26-04. As allowed by the phrase, "unless accomplished previously," if the requirements of paragraph B. of AD 89-26-04 have been accomplished previously, paragraph (a) of this AD does not require that they be repeated.

To prevent uncommanded deployment of the slats and to ensure trailing edge flap shutdown protection and trailing edge flap alternate mode availability, accomplish the following:

(a) Within the next 25 days after December 27, 1989 (the effective date of AD 89-26-04, amendment 39-6423), conduct a functional check of the leading edge slat long term shutoff control and the leading edge inboard and outboard slat drive mechanical rigging in accordance with Boeing Alert Service Bulletin 767-27A0094, dated September 28, 1989.

(b) Within the next 25 days after December 27, 1989, conduct a functional check of the leading edge slat shutoff valve and the trailing edge flap drive bypass valve in accordance with Boeing Alert Service Bulletin 767-27A0094, dated September 28, 1989; or Revision 4, dated October 22, 1992. Repeat this functional check thereafter at intervals not to exceed 400 landings until the functional check required by paragraph (c) of this AD is accomplished.

Note 2: Accomplishment of the functional check prior to the effective date of this AD in accordance with any revision of Boeing Alert Service Bulletin 767-27A0094 prior to Revision 4, dated October 22, 1992, is considered acceptable for purposes of compliance with this paragraph.

(c) Within 4,000 hours time-in-service after the last functional check performed in accordance with paragraph (b) of this AD, conduct a functional check of the leading edge slat shutoff valve and the trailing edge flap drive bypass valve in accordance with Boeing Alert Service Bulletin 767-27A0094, Revision 4, dated October 22, 1992. Accomplishment of this functional check terminates the repetitive functional check requirements of paragraph (b) of this AD. Repeat this functional check thereafter at intervals not to exceed 4,000 hours time-in-service.

(d) Within 4,000 flight hours after the effective date of this AD, conduct a functional check of the leading edge slat long term shutoff control and the leading edge inboard and outboard slat drive mechanical rigging, in accordance with Boeing Alert Service Bulletin 767-27A0094, Revision 4, dated October 22, 1992. Repeat this functional check thereafter at intervals not to exceed 4,000 hours time-in-service.

(e) If any failed parts are detected by the functional checks required by paragraphs (a), (b), (c), or (d) of this AD, prior to further flight, replace the failed part in accordance with the Boeing 767 Maintenance Manual.

(f) Within 12,000 flight hours after the effective date of this AD, accomplish the requirements of paragraphs (f)(1) and (f)(2) of this AD. Accomplishment of these requirements constitutes terminating action for the repetitive functional checks required by paragraphs (b), (c), and (d) of this AD.

(1) Install a pressure switch and replace the rotary variable differential transformer (RVDT) and the flap/slat electronic unit (FSEU) in accordance with Boeing Service Bulletin 767-27-0108, Revision 1, October 1, 1992.

(2) Replace the bypass valve motor (trailing edge flaps, control valve module) in accordance with Boeing Service Bulletin 767-27-0096, dated April 23, 1992.

(g) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(h) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(i) The functional checks shall be done in accordance with Boeing Alert Service Bulletin 767-27A0094, dated September 28, 1989; and Boeing Alert Service Bulletin 767-27A0094, Revision 4, dated October 22, 1992. The modifications shall be done in accordance with Boeing Service Bulletin 767-27-0108, Revision 1, October 1, 1992; and Boeing Service Bulletin 767-27-0096, dated April 23, 1992. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124-2207. Copies may be inspected at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(j) This amendment becomes effective on November 24, 1993.

Issued in Renton, Washington, on September 27, 1993.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 93-26109 Filed 10-22-93; 8:45 am]

BILLING CODE 4910-13-P

14 CFR Part 39

[Docket No. 93-NM-155-AD; Amendment 39-8701; AD 93-18-01]

Airworthiness Directives; Jetstream Model 4101 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This document publishes in the Federal Register an amendment adopting Airworthiness Directive (AD) 93-18-01 that was sent previously to all known U.S. owners and operators of Jetstream Model 4101 series airplanes by individual letters. This AD requires repetitive visual inspections of the aileron trim tab hinge pins for proper location and lock peening, and locking the hinge pins of the trim tabs by a more positive method, if necessary. This amendment is prompted by a report indicating that the aileron trim tab hinge pin (wire) had migrated inboard, out of the tab hinge on one airplane. The actions specified by this AD are intended to prevent the migration of the aileron trim tab hinge pins out of the hinge, which could impede the movement of the aileron control system and cause reduced controllability of the airplane.

DATES: Effective November 9, 1993, to all persons except those persons to whom it was made immediately effective by priority letter AD 93-18-01, issued on September 7, 1993, which contained the requirements of this amendment.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 9, 1993.

Comments for inclusion in the Rules Docket must be received on or before December 27, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 93-NM-155-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056.

The applicable service information may be obtained from Jetstream Aircraft, Inc., P.O. Box 16029, Dulles International Airport, Washington, DC 20041-6029. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT:

William Schroedef, Aerospace Engineer, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055-4056; telephone (206) 227-2148; fax (206) 227-1320.

SUPPLEMENTARY INFORMATION: On September 7, 1993, the FAA issued priority letter AD 93-18-01, applicable to all Jetstream Model 4101 series airplanes, which requires repetitive visual inspections of the aileron trim tab hinge pins for proper location and lock peening, and locking the hinge pins of the trim tabs by a more positive method, if necessary. That action was prompted by a report indicating that the aileron trim tab hinge pin (wire) had migrated inboard, out of the tab hinge on one airplane. Migration of the hinge pin was caused by improper lock peening of the ends of the hinge pin to retain it in the hinge. If the hinge pin were to migrate far enough out of the hinge, it could impede the movement of the aileron control system. This condition, if not corrected, could result in reduced controllability of the airplane.

Jetstream Aircraft Limited has issued Alert Service Bulletin J41-A27-020, dated August 13, 1993, which describes procedures for visual inspections of the hinge pins of the left and right aileron trim tabs to determine if the hinge pin has moved out of the hinge and if the ends of the pin are properly peen locked. The service bulletin also describes procedures for locking the hinge pins of the trim tabs by a more positive method. The Civil Aviation Authority (CAA), which is the airworthiness authority for the United Kingdom, classified this service bulletin as mandatory.

This airplane model is manufactured in the United Kingdom and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the CAA has kept the FAA informed of the situation described above. The FAA has examined the findings of the CAA, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since the unsafe condition described is likely to exist or develop on other airplanes of the same type design registered in the United States, the FAA issued priority letter AD 93-18-01 to prevent the migration of the aileron trim tab hinge pins out of the hinge, which

could impede the movement of the aileron control system and cause reduced controllability of the airplane. The AD requires repetitive visual inspections of the aileron trim tab hinge pins for proper location and lock peening, and locking the hinge pins of the trim tabs by a more positive method, if necessary. The actions are required to be accomplished in accordance with the service bulletin previously described.

Since it was found that immediate corrective action was required, notice and opportunity for prior public comment thereon were impracticable and contrary to the public interest, and good cause existed to make the AD effective immediately by individual letters issued on September 7, 1993, to all known U.S. owners and operators of Jetstream Model 4101 series airplanes. These conditions still exist, and the AD is hereby published in the Federal Register as an amendment to § 39.13 of part 39 of the Federal Aviation Regulations (FAR) to make it effective as to all persons.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption "ADDRESSES." All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped

postcard on which the following statement is made: "Comments to Docket Number 93-NM-155-AD." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

93-18-01 Jetstream Aircraft Limited: Amendment 39-8701. Docket 93-NM-155-AD.

Applicability: All Model 4101 series airplanes, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent the migration of the aileron trim tab hinge pins out of the hinge, which could impede the movement of the aileron control system and cause reduced controllability of the airplane, accomplish the following:

(a) Within 25 hours time-in-service after the effective date of this AD, conduct a visual inspection of the inboard and outboard ends of the hinge pin (wire) of the trim tab on the aileron to determine if the pin has moved or can be moved out of the hinge, in accordance with "Part 1—Initial Inspection Left and Right," of the Accomplishment Instructions of Jetstream Alert Service Bulletin J41-A27-020, dated August 13, 1993.

(b) If the pin has moved, or if the pin moves out of the hinge when the end of the wire is tapped, prior to further flight, accomplish the corrective procedures specified in "Part 3, Rectification, Left and Right," of the Accomplishment Instructions of Jetstream Alert Service Bulletin J41-A27-020, dated August 13, 1993. After accomplishment of this corrective action, no further action is required by this AD.

(c) If the pin is correctly positioned, within 50 hours time-in-service, conduct a visual inspection of the inboard and outboard ends of the hinge pin (wire) of the trim tab on the aileron to assure reliability, in accordance with "Part 2—Repeat Inspection Left and Right," of the Accomplishment Instructions of Jetstream Alert Service Bulletin J41-A27-020, dated August 13, 1993.

(1) If the pin is correctly positioned, no further action is required by this AD.

(2) If the pin has moved, or if the pin moves out of the hinge when the end of the wire is tapped, prior to further flight, accomplish the corrective procedures specified in "Part 3—Rectification, Left and Right," of the Accomplishment Instructions of the service bulletin. After accomplishment of this corrective action, no further action is required by this AD.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM-113.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM-113.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(f) The inspections and corrective procedures shall be done in accordance with Jetstream Alert Service Bulletin J41-A27-020, dated August 13, 1993. This incorporation by reference was approved by

the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Jetstream Aircraft, Inc., P.O. Box 16029, Dulles International Airport, Washington, DC 20041-6029. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(g) This amendment becomes effective on November 9, 1993, to all persons except those persons to whom it was made immediately effective by priority letter AD 93-18-01, issued on September 7, 1993, which contained the requirements of this amendment.

Issued in Renton, Washington, on September 27, 1993.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 93-26111 Filed 10-22-93; 8:45 am]

BILLING CODE 4910-13-P

14 CFR Part 39

[Docket No. 93-NM-05-AD; Amendment 39-8672; AD 93-17-02]

Airworthiness Directives; Boeing Model 737 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD), applicable to certain Boeing Model 737 series airplanes, that currently requires repetitive inspections of the wing main tank float switch electrical conduits for trapped water, and removal of the water, if found. This amendment requires installation of grease in the interior of the float switch conduits, which terminates the requirement for repetitive inspections of the conduits. This action also expands the applicability of the rule. This amendment is prompted by the development of a modification that precludes the possibility for water to accumulate in the conduits. The actions specified by this AD are intended to prevent fuel leakage from the wing main tanks, which could propagate down the wing leading edge cavity, onto the respective engine tail pipe, and cause an external fire under the wing.

DATES: Effective November 24, 1993.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 24, 1993.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane

Group, P.O. Box 3707, Seattle, Washington 98124-2207. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street NW., suite 700, Washington, DC. **FOR FURTHER INFORMATION CONTACT:** Stephen Bray, Aerospace Engineer, Propulsion Branch, ANM-140S, FAA, Transport Airplane Directorate, Seattle Aircraft Certification Office, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2681; fax (206) 227-1181.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations by superseding AD 91-20-11, Amendment 39-8045 (58 FR 50042, October 3, 1991), which is applicable to certain Model 737 series airplanes, was published in the Federal Register on March 4, 1993 (58 FR 12347). The action proposed to require installation of grease in the interior of the float switch conduits, which terminates the requirement for repetitive inspections of the conduits. The action also proposed to expand the applicability of the rule.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the proposed rule.

Several commenters request that the proposed requirement to install grease in the conduits terminate the proposed inspections in paragraph (b) of the proposal. Paragraph (c) of the proposal indicates that installation of the grease only terminates the inspections in paragraph (a) of the proposal. The FAA concurs. The inspections required by paragraph (b) are identical to those required by paragraph (a). In fact, the intent of paragraph (b) is merely to add airplanes to the existing AD; therefore, paragraph (b) merely restates the inspection requirements of paragraph (a) of the existing rule, but applies them to the additional airplanes. Installation of the grease in the conduit constitutes terminating action for the inspection requirements of both paragraphs (a) and (b). The FAA has revised paragraph (c) of the final rule to specify this.

One commenter requests that the final rule be revised to permit the installation of various other types of grease as terminating action for the proposed repetitive inspections. The FAA concurs. The service letter, referenced in the final rule as the appropriate

source of service information, specifies MIL-G-27617, Type I, grease as the appropriate type of grease to install in the conduits. However, since issuance of the proposal, FAA has reviewed and approved Boeing Service Letter 737-SL-28-42-a, dated July 15, 1993, that describes procedures for the installation of Types I, II, III, and IV of MIL-G-27617 grease in the interior of the float switch conduits. Therefore, paragraph (c) of the final rule has been revised to reference this service letter as an additional source of service information.

One commenter requests that the final rule be revised to permit operators to use other suppliers of the required grease in addition to Braycote, which is the supplier specified in the service letter referenced in the proposal. The FAA does not concur that revision of the rule is necessary. Although the service letter references Braycote as a supplier for obtaining the subject grease, it does not specify Braycote as the sole source for obtaining this grease. Further, the AD does not require the installation of only Braycote grease.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 2,132 Model 737 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 799 airplanes of U.S. registry will be affected by this AD, that it will take approximately 3 work hours per airplane to accomplish the required actions, and that the average labor rate is \$55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be \$131,835, or \$165 per airplane. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action: (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule"

under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39-8045 (58 FR 50042, October 3, 1991), and by adding a new airworthiness directive (AD), amendment 39-8672, to read as follows:

93-17-02 Boeing: Amendment 39-8672.

Docket 93-NM-05-AD. Supersedes AD 91-20-11, Amendment 39-8045.

Applicability: Model 737-300, -400, and -500 series airplanes, line positions through 2428, inclusive; and Model 737-200 series airplanes, equipped with DC powered fuel tank float switches; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent failure of the wing main tank float switch electrical conduits and subsequent fuel leakage resulting in an engine tail pipe fire, accomplish the following:

(a) For airplanes listed in Boeing Service Letter 737-SL-28-36, dated November 30, 1990: Within 90 days after November 7, 1991 (the effective date of AD 91-20-11, Amendment 39-8045), and thereafter at intervals not to exceed 1,500 flight hours, perform an inspection of the wing main tank float switch electrical conduits for fuel leakage and condensation build-up, in accordance with Boeing Service Letter 737-SL-82-36, dated November 30, 1990. If evidence of fuel leakage and/or water condensation is found while performing the initial or repetitive inspections, prior to further flight, purge and install a new vapor

seal assembly in accordance with the Boeing service letter.

Note 1: The installation of a new vapor seal assembly does not terminate the requirement for the 1,500 flight hour repetitive inspection.

(b) For airplanes listed in Boeing Service Letter 737-SL-28-42, dated December 15, 1992, that are not subject to paragraph (a) of this AD: Within 90 days after the effective date of this AD, and thereafter at intervals not to exceed 1,500 flight hours, perform an inspection of the wing main tank float switch electrical conduits for fuel leakage and condensation build-up, in accordance with Boeing Service Letter 737-LS-28-36, dated November 30, 1990. If evidence of fuel leakage and/or water condensation is found while performing the initial or repetitive inspections, prior to further flight, purge and install a new vapor seal assembly in accordance with the Boeing service letter.

Note 2: The installation of a new vapor seal assembly does not terminate the requirement for the 1,500 flight hour repetitive inspection.

(c) Within 3 years after the effective date of this AD, install grease in the interior of the wing main tank float switch electrical conduits in accordance with Boeing Service Letter 737-SL-28-42, dated December 15, 1992, or 737-SL-28-42-A, dated July 15, 1993. Installation of grease in the conduits constitutes terminating action for the inspections required by paragraphs (a) and (b) of this AD.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(f) The inspections shall be done in accordance with Boeing Service Letter 737-SL-28-36, dated November 30, 1990. The installation shall be done in accordance with Boeing Service Letter 737-SL-28-42, dated December 15, 1992, or Boeing Service Letter 737-SL-28-42-A, dated July 15, 1993. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124-2207. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(g) This amendment becomes effective on November 24, 1993.

Issued in Renton, Washington, on August 20, 1993.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 93-26112 Filed 10-22-93; 8:45 am]

BILLING CODE 4910-13-P

14 CFR Part 39

[Docket No. 92-NM-208-AD; Amendment 39-8681; AD 93-17-10]

Airworthiness Directives; Lockheed Model L-1011-385 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to all Model L-1011-385 series airplanes, that requires inspections of certain areas of the rear spar caps, web, skin and certain fastener holes; and repair of any confirmed crack findings. This amendment is prompted by reports of fatigue cracks in the caps of the wing rear spar inboard of inner wing station (IWS) 346. The actions specified by this AD are intended to prevent rupture of the rear spar, which could result in extensive damage to the wing and fuel spillage.

DATES: Effective November 24, 1993.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 24, 1993.

ADDRESSES: The service information referenced in this AD may be obtained from Lockheed Western Export Company (LWEC), Dept. 693, Zone 0755, 86 South Cobb Drive, Marietta, Georgia 30063. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at FAA, Small Airplane Directorate, Atlanta Aircraft Certification Office, suite 210C, 1669 Phoenix Parkway, Atlanta, Georgia; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Thomas Peters, Aerospace Engineer, Flight Test Branch, ACE-160A, FAA, Small Airplane Directorate, Atlanta Aircraft Certification Office, suite 210C, 1669 Phoenix Parkway, Atlanta, Georgia 30349; telephone (404) 991-3915; fax (404) 991-3606.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal

Aviation Regulations to include an airworthiness directive (AD) that is applicable to all Model L-1011-385 series airplanes was published in the Federal Register on December 4, 1992 (57 FR 57395). That action proposed to require (1) repetitive x-ray inspections of certain areas of the rear spar caps, web, and skin between inner wing stations (IWS) 231 and 343; (2) repetitive ultrasonic inspections of a certain fastener hole inboard of IWS 346; (3) eddy current inspections, if necessary; and (4) repair of any confirmed crack findings.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the proposed rule.

One commenter points out that the Discussion section of the preamble to the notice incorrectly referred to findings of cracks in the lower spar cap. The commenter states that there have been no findings of cracks in the lower spar caps on in-service airplanes. The FAA concurs and clarifies that it has received reports of cracking only in the upper caps of the wing rear spar web inboard of IWS 346. However, no change to the final rule itself is necessary.

One commenter suggests performing eddy current inspections in lieu of the x-ray inspections proposed in paragraph (a) because eddy current inspections are simpler and not as cost prohibitive to perform as the proposed x-ray inspections. The FAA does not concur because, currently, no approved method of performing eddy current inspections exists that adequately detects cracking in the upper and lower caps of the rear spar and the associated web and skin areas between IWS 231 and IWS 343. However, under the provisions of paragraph (e) of the final rule, the FAA may approve alternative methods of compliance if sufficient justification is presented to the FAA.

One commenter suggests that the proposal is unnecessary, since the requirements contained in the proposal would be incorporated more appropriately into the requirements of AD 91-05-05, amendment 39-6878 (56 FR 6556, February 19, 1991). That AD addresses structural modifications for Model L-1011 series airplanes and references Lockheed Service Bulletin 093-51-035, "Structures—Aging Aircraft Structural Modifications and Inspections—Collector Service Bulletin," dated June 28, 1990. The FAA infers from this comment that the commenter requests to have the

proposal withdrawn. The FAA does not concur. This AD addresses and references the inspections described in Lockheed Service Bulletin 093-57-203, Revision 3, dated October 28, 1991. Although this service bulletin was listed in the Collector Service Bulletin, paragraph A. of AD 91-05-05 specifically excluded the actions described in this service bulletin from the requirements of that AD because the FAA has determined that the compliance times in that AD are not stringent enough to detect cracking in a timely manner in the upper and lower caps of the rear spar and the associated web and skin areas between IWS 231 and 343. Therefore, the FAA has concluded that it is more appropriate to address cracking in those areas in a separate rulemaking action.

One commenter requests that, if the inspection required by proposed paragraph (a) was conducted prior to the effective date of the AD in accordance with Revision 2 of Lockheed Service Bulletin 093-57-203, dated January 25, 1991, then the next inspection be required within 2,000 flight cycles following accomplishment of that inspection. The FAA concurs. The FAA has reviewed and approved Revision 2 of Lockheed Service Bulletin 093-57-203, dated January 25, 1991, that describes procedures for inspections of the caps, web, skin, and certain fastener holes; and modification of the rear spars. Consequently, a note has been added to paragraph (a) of the final rule to state that inspections performed prior to the effective date of the AD in accordance with Revision 2 of the service bulletin are equivalent to inspections performed in accordance with Revision 3 of the service bulletin. Therefore, the next inspection would be required within 2,000 flight cycles following accomplishment of the inspection performed in accordance with Revision 2 of the service bulletin.

One commenter requests that the proposed AD be revised to permit repairs to be accomplished "in accordance with FAA-approved repair procedures." This would permit approval of repairs by Designated Engineering Representatives (DER) of the Lockheed Aeronautical Systems Company or by organizations that hold an SFAR 36 authorization. The FAA does not concur. While DER's and SFAR 36-authorized organizations are authorized to determine whether a design or repair method complies with a specific requirement, they are not authorized to make the discretionary determination as to what the applicable requirement is.

Finally, this same commenter requests that paragraph (d) of the proposal be revised to permit repairs to be performed in accordance with the structural repair manual, or to permit modifications to be accomplished in accordance with certain service bulletins. The FAA concurs. Paragraph (d) of the final rule has been revised to provide additional alternative methods of repairing confirmed findings of cracking. One of these methods is to modify the rear spar upper and lower caps between IWS 228 and 346 in accordance with Lockheed Service Bulletins 093-57-184, Revision 6, dated October 28, 1991; Lockheed Service Bulletin 093-57-196, Revision 5, dated October 28, 1991; or Lockheed Service Bulletin 093-57-203, Revision 3, dated October 28, 1991; as applicable. Each of these service bulletins describes modification of a specific configuration of Model L-1011 series airplane. Accomplishment of any one of these modifications would terminate the inspections required by this AD. Further, paragraph (d) of the final rule has been revised to add another alternative method of repairing crack findings: To repair in accordance with the Lockheed L-1011 Structural Repair Manual.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 241 Model L-1011-385 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 111 airplanes of U.S. registry will be affected by this AD, that it will take approximately 21 work hours per airplane to accomplish the required actions, and that the average labor rate is \$55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be \$128,205, or \$1,155 per airplane. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism

implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

93-17-10 Lockheed Aeronautical Systems Company: Amendment 39-8681. Docket 92-NM-208-AD.

Applicability: All Model L-1011-385-1, L-1011-385-1-14, L-1011-385-1-15, and L-1011-385-3 series airplanes, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent rupture of the rear spar, which could result in extensive damage to the wing and fuel spillage, accomplish the following:

(a) At the times specified in Table 1 of Lockheed Change Notification 093-57-203, R3-CN1, dated June 22, 1992, or within 6 months after the effective date of this AD, whichever occurs later, perform an x-ray inspection to detect cracks in the upper and lower caps of the rear spar, and of the associated web and skin areas between inner wing stations (IWS) 231 and 343, in accordance with Part II of the Accomplishment Instructions of Lockheed Service Bulletin 093-57-203, Revision 3, dated October 28, 1991.

Note 1: As allowed by the phrase, "unless accomplished previously," if the inspections

required by this paragraph were conducted prior to the effective date of this AD in accordance with Lockheed Service Bulletin 093-57-203, Revision 2, dated January 25, 1991, those inspections need not be repeated.

(1) Except as provided by paragraph (a)(2) of this AD, if no evidence of cracking is detected, repeat the x-ray inspections thereafter at intervals not to exceed 2,000 flight cycles.

(2) If no evidence of cracking is detected in the upper caps, skin, and web of the wing spar, the x-ray inspections of the lower cap assembly may be deferred to the next repetitive inspection interval of 2,000 flight cycles. Subsequent x-ray inspections of the lower cap assembly may be deferred by 2,000 flight cycles, if there is no evidence of cracking in the upper cap, skin, and web of the wing spar.

(b) At the times specified in Table 1 of Lockheed Change Notification 093-57-203, R3-CN1, dated June 22, 1992, or within 6 months after the effective date of this AD, whichever occurs later, perform an ultrasonic inspection to detect cracks in the 1½ inch diameter fastener hole located inboard of IWS 346 in accordance with Part II of the Accomplishment Instructions of Lockheed Service Bulletin 093-57-203, Revision 3, dated October 28, 1991. If no evidence of cracking is detected, repeat this inspection thereafter at intervals not to exceed 2,000 flight cycles.

(c) If cracking is detected or suspected as a result of the inspections required by paragraph (a) or (b) of this AD, prior to further flight, perform an eddy current inspection to confirm findings of cracks, in accordance with Part II of the Accomplishment Instructions of Lockheed Service Bulletin 093-57-203, Revision 3, dated October 28, 1991.

(1) If cracking is confirmed in the 1½ inch diameter fastener hole located inboard of IWS 346 as a result of the eddy current inspection required by paragraph (c) of this AD, prior to further flight, perform an eddy current inspection to detect cracking of the four ¾-inch diameter fastener holes.

(2) If the crack findings cannot be confirmed with eddy current inspection techniques, continue to reinspect as required by paragraphs (a) and (b) of this AD.

(d) If any finding of cracking is confirmed, prior to further flight, accomplish paragraph (d)(1), (d)(2), or (d)(3), of this AD.

(1) Repair the cracked area in accordance with a method approved by the Manager, Atlanta Aircraft Certification Office (ACO), FAA, Small Airplane Directorate. Or

(2) Repair the rear spar upper and lower caps between IWS 228 and 346 in accordance with the Lockheed Model L-1011 Structural Repair Manual. Or

(3) Modify the rear spar upper and lower caps between IWS 228 and 346 in accordance with Lockheed Service Bulletin 093-57-184, Revision 6, dated October 28, 1991; Lockheed Service Bulletin 093-57-198, Revision 5, dated October 28, 1991; or Lockheed Service Bulletin 093-57-203, Revision 3, dated October 28, 1991; as applicable. Accomplishment of this modification constitutes terminating action for the inspections required by this AD.

(e) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Atlanta Aircraft Certification Office (ACO), FAA, Small Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Atlanta ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Atlanta ACO.

(f) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(g) The inspections shall be done in accordance with Lockheed Service Bulletin 093-57-203, Revision 3, dated October 28, 1991; and Lockheed Change Notification 093-57-203, R3-CN1, dated June 22, 1992. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Lockheed Western Export Company (LWEC), Dept. 693, Zone 0755, 86 South Cobb Drive, Marietta, Georgia 30063. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at FAA, Small Airplane Directorate, Atlanta Aircraft Certification Office, Suite 210C, 1669 Phoenix Parkway, Atlanta, Georgia 30349; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(h) This amendment becomes effective on November 24, 1993.

Issued in Renton, Washington, on August 26, 1993.

David G. Hmiel,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 93-26113 Filed 10-22-93; 8:45 am]

BILLING CODE 4910-13-P

14 CFR Part 39

[Docket No. 92-NM-221-AD; Amendment 39-8680; AD 93-17-09]

Airworthiness Directives; McDonnell Douglas Model DC-10 Series Airplanes and KC-10A (Military) Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD), applicable to McDonnell Douglas Model DC-10 series airplanes and KC-10A (military) airplanes, that currently requires the implementation of a Structural Inspection Document (SID) program of structural inspections to detect fatigue cracking, and repair or replacement, as necessary, to ensure

continued airworthiness as these airplanes approach the manufacturer's original fatigue design life goal. This amendment requires, among other things, revising the existing SID sampling program to include some new inspection procedures for certain Principal Structural Elements (PSE). This amendment is prompted by new data submitted by the manufacturer indicating that certain revisions to the SID program are necessary in order to increase the confidence level of the statistical program to ensure timely detection of fatigue cracks in PSE's. The actions specified by this AD are intended to prevent fatigue cracking that could compromise the structural integrity of these airplanes.

DATES: Effective November 24, 1993.

The incorporation by reference of McDonnell Douglas Report No. L26-012, "DC-10 Supplemental Inspection Document (SID)," Volume I, Revision 3, dated December 1992; Volume II, Revision 3, dated December 1992; and Volume III-92, dated October 1992; as listed in the regulations, is approved by the Director of the Federal Register as of November 24, 1993.

The incorporation by reference of McDonnell Douglas Report No. L26-012, "DC-10 Supplemental Inspection Document (SID)," Volumes I, II, and III, Revision 1, dated May 1990, as listed in the regulations, was approved previously by the Director of the Federal Register as of March 9, 1992 (57 FR 3931, February 3, 1992).

ADDRESSES: The service information referenced in this AD may be obtained from McDonnell Douglas Corporation, P.O. Box 1771, Long Beach, California 90846-1771, Attention: Business Unit Manager, Technical Publications—Technical Administrative Support, C1-L5B. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90806-2425; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Maureen Moreland, Aerospace Engineer, Airframe Branch, ANM-121L, FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90806-2425; telephone (310) 988-5238; fax (310) 988-5210.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations by superseding AD 92-02-08, Amendment 39-8144 (57 FR 3931, February 3, 1992), which is applicable to McDonnell Douglas Model DC-10 series airplanes and KC-10A (military) airplanes, was published in the *Federal Register* on March 24, 1993 (58 FR 15813). The action proposed to require, among other things, revising the existing Structural Inspection Document (SID) sampling program to include some new inspection procedures for certain Principal Structural Elements (PSE's).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the proposed rule.

One commenter requests that proposed paragraph (c) be revised to permit repair of any cracked structure in a PSE found during any inspection to be accomplished in accordance with an FAA-approved method. The commenter states that it is illogical to have different approval procedures that are dependent upon how the crack was detected in that PSE: During a SID inspection or during other types of inspections. The FAA does not concur. While DER's and SFAR 36-authorized organizations are authorized to determine whether a design or repair method complies with a specific requirement, they are not authorized to make the discretionary determination as to what the applicable requirement is. Further, the SID program is based upon cooperation between aircraft operators, the FAA, and the manufacturer. The SID program functions most effectively in detecting fatigue cracks if all findings of fatigue cracking are reported to McDonnell Douglas as required by this AD. It is crucial for the FAA Aircraft Certification Office, as well as McDonnell Douglas, to be aware of all repairs made to PSE's. Damage tolerance analysis must be accomplished on all PSE repairs and an alternative inspection program must be developed to ensure that the repaired PSE is maintained at the same level of safety as the original PSE.

One commenter requests that the visual inspection techniques for PSE's in the Fleet Leader Operator Sampling (FLOS) be clarified as to how they are to be performed, since the referenced McDonnell Douglas Report No. L26-012, "DC-10 SID," Volume II, Section 4, Revision 3, dated December 1992, does not detail these inspections. The FAA concurs that the visual inspection techniques for all of the FLOS PSE's

were not adequately described in Volume II, Section 4, Revision 3, of the SID referenced in this AD. Therefore, a new paragraph (b)(1) has been added to the final rule to include instructions as to how those general visual inspections are to be performed for those PSE's.

This same commenter requests that the reporting requirement in proposed paragraph (b) be revised to avoid confusion. The commenter notes that reporting in accordance with Volume III-92, Section 2, Revision 3, of the SID would result in a reporting date of July 31; while reporting in accordance with Volume I, Section 1, Revision 3, of the SID would result in a reporting date of January 31. The FAA does not concur that the possibility for confusion exists. Paragraph (b) of the final rule clearly states that reports are to be submitted in accordance with Volume III-92, Section 2, of the SID, dated October 1992, which results in a reporting date of July 31.

One commenter requests that paragraph (b) of the proposal be revised to reconcile the differences in the ENDDATES for 3 PSE's specified in the previous revision of the SID (referenced in proposed paragraph (a) and required by AD 92-02-08, Amendment 39-8144, (57 FR 3931, February 3, 1992)) and the new revision of the SID (referenced in proposed paragraph (b)). The commenter notes that Volume III-90 of the SID, dated May 1990, specified an ENDDATE of October 1993, while Volume III-92 of the SID, dated October 1992, specified an ENDDATE of June 1993. The FAA concurs. The FAA's intent was that the inspections be conducted during a regularly scheduled maintenance visit for the majority of the affected fleet, when the airplanes would be located at a base where special equipment and trained personnel would be readily available, if necessary. Consequently, a new paragraph (b)(2) has been added to the final rule to specify that the ENDDATE for those PSE's remains October 1993 as specified in Volume III-90 of the SID, dated May 1990.

One commenter requests that the FAA delay issuance of the rule until the accuracy of all of the revised inspection procedures specified in Volume II, Revision 3 of the SID (referenced in proposed paragraph (b)) can be verified by the "lead airline" and the manufacturer. The FAA does not concur. However, the FAA does acknowledge that certain inaccuracies exist in some of the procedures specified in the revised SID. Consequently, the FAA is working with operators and McDonnell Douglas to resolve these inspection difficulties on a PSE-by-PSE basis. Since the difficulties

with these inspections differ with airplane configuration, operators should schedule their airplanes as early as possible to allow time for the resolution of any difficulties that may arise with these PSE inspections. Furthermore, the FAA finds that it is unnecessary to delay this action until after all of the inspection procedures have been refined. However, paragraph (d) of the final rule does provide affected operators the opportunity to request an adjustment of the compliance time by submitting data justifying such an extension.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 426 Model DC-10 series airplanes and KC-10A (military) airplanes of the affected design in the worldwide fleet. The FAA estimates that 269 airplanes of U.S. registry and 10 U.S. operators will be affected by this AD.

Incorporation of the SID program into an operator's maintenance program, as required by AD 92-02-08, is estimated to necessitate 1,250 work hours (per operator), at an average labor cost of \$55 per work hour. Based on these figures, the cost to the 10 affected U.S. operators to incorporate the SID program is estimated to be \$687,500.

The incorporation of the additional procedures required by this new AD action will require approximately 20 additional work hours per operator to accomplish, at an average labor cost of \$55 per work hour. Based on these figures, the cost to the 10 affected U.S. operators to incorporate these additional procedures into the SID program into an operator's maintenance program is estimated to be \$11,000.

The recurring inspection costs, as required by AD 92-02-08, are estimated to be 355 work hours per airplane per year, at an average labor cost of \$55 per work hour. Based on these figures, the recurring inspection costs required by AD 92-02-08 are estimated to be \$19,525 per airplane, or \$5,252,225 for the affected U.S. fleet.

The recurring inspection procedures added to the program by this AD action will require approximately 10 additional work hours per airplane per year to accomplish. The average labor charge will be \$55 per work hour. Based on these figures, the additional recurring inspection cost impact added

by this AD on U.S. operators is estimated to be \$550 per airplane, or \$147,950 for the affected U.S. fleet.

Based on the above figures, the total cost impact of this AD is estimated to be \$5,411,175 for the first year, and \$5,390,825 for each year thereafter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12812, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39-8144 (57 FR 3931, February 3, 1992), and by adding

a new airworthiness directive (AD), amendment 39-8680 to read as follows:

93-17-08 McDonnell Douglas: Amendment 39-8680. Docket 92-NM-221-AD. Supersedes AD 92-02-08, Amendment 39-8144.

Applicability: Model DC-10 series airplanes and KC-10A (military) airplanes, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To ensure the continuing structural integrity of these airplanes, accomplish the following:

(a) Within 6 months after March 9, 1992 (the effective date of AD 92-02-08, Amendment 39-8144), incorporate a revision into the FAA-approved maintenance inspection program which provides for inspection(s) of the Principal Structural Elements (PSE's) defined in Section 2 of Volume I of McDonnell Douglas Report No. L26-012, "DC-10 Supplemental Inspection Document (SID)," Revision 1, dated May 1990, in accordance with Section 2 of Volume III-90, dated May 1990, or Section 2 of Volume III-91, dated December 1991, of the SID. The non-destructive inspection (NDI) techniques set forth in Section 2 and Section 4 of Volume II, Revision 1, dated May 1990, of the SID provide acceptable methods for accomplishing the inspections required by this paragraph. All inspection results (negative or positive) must be reported to McDonnell Douglas, in accordance with the instructions contained in Section 2 of Volume III-90, dated May 1990; or Section 2 of Volume III-91, dated December 1991, of the SID. Information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.) and have been assigned OMB Control Number 2120-0056.

(b) Within 6 months after the effective date of this AD, replace the revision of the FAA-approved maintenance inspection program required by paragraph (a) of this AD, with a revision that provides for inspection(s) of the PSE's defined in Section 2 of Volume I of McDonnell Douglas Report No. L26-012, "DC-10 Supplemental Inspection Document (SID)," Revision 3, dated December 1992, in accordance with Section 2 of Volume III-92, dated October 1992, of the SID. The NDI techniques set forth in Section 2 and Section 4 of Volume II, Revision 3, dated December 1992, of the SID provide acceptable methods for accomplishing the inspections required by this paragraph. All inspection results (negative or positive) must be reported to McDonnell Douglas, in accordance with the instructions contained in Section 2 of Volume III-92, dated October 1992, of the SID. Information collection requirements

contained in this regulation have been approved by the OMB under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.) and have been assigned OMB Control Number 2120-0056.

(1) For those Fleet Leader Operator Sampling (FLOS) PSE's which do not have a Normal Maintenance Visual Inspection specified in Section 4 of Volume II, Revision 3, dated December 1992, of the SID, the procedure for general visual inspection is as follows: Perform an inspection of the general PSE area for cleanliness, presence of foreign objects, security of parts, cracks, corrosion, and damage.

(2) For PSE's 53.10.031E/.032E, 53.10.047E/.048E, and 57.10.029E/.030E: The ENDDATE for these PSE's is October 1993. (For these PSE's disregard the June 1993 ENDDATE specified in Section 2 of Volume III-92, dated October 1992, of the SID.)

(c) Any cracked structure detected during the inspections required by paragraph (a) or (b) of this AD must be repaired before further flight, in accordance with a method approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

Note 1: Requests for approval of any PSE repair that would affect the FAA-approved maintenance inspection program that is required by this AD should include a damage tolerance assessment for that PSE repair.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles ACO, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(f) The incorporation of the revision and reporting requirements shall be done in accordance with McDonnell Douglas Report No. L26-012, "DC-10 Supplemental Inspection Document (SID)," Volumes I, II, and III, Revision 1, dated May 1990; and McDonnell Douglas Report No. L26-012, "DC-10 Supplemental Inspection Document (SID)," Volume I, Revision 3, dated December 1992, and Volume III-92, dated October 1992; which contains the following list of effective pages:

| Volume number referenced and date | Page number | Revision level shown on page | Date shown on page |
|---|---|------------------------------|--------------------|
| I—All Series, Revision 3, December 1992 | List of Effective Pages A, B, C, D, E, and F | 3 | December 1992 |
| II—All Series, Revision 3, December 1992 | List of Effective Pages A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, and P. | 3 | December 1992 |
| III-92—All Series, Original, October 1992 | Entire Document | Original | October 1992 |

Note: The issue/publish date of Volumes I, II, III is indicated on the Record of Revisions page. The incorporation by reference of McDonnell Douglas Report No. L26-012, "DC-10 Supplemental Inspection Document (SID)," Volume I, Revision 3, dated December 1992, Volume II, Revision 3, dated December 1992, and Volume III-92, dated October 1992; is approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. The incorporation by reference of McDonnell Douglas Report No. L26-012, "DC-10 Supplemental Inspection Document (SID)," Volumes I, II, and III, Revision 1, dated May 1990, was approved previously by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51 as of March 9, 1992 (57 FR 3931, February 3, 1992). Copies may be obtained from McDonnell Douglas Corporation, P.O. Box 1771, Long Beach, California 90846-1771, Attention: Business Unit Manager, Technical Publications—Technical Administrative Support, C1-L5B. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90806-2425; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(g) This amendment becomes effective on November 24, 1993.

Issued in Renton, Washington, on August 25, 1993.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 93-26110 Filed 10-22-93; 8:45 am]

BILLING CODE 4910-13-P

14 CFR Part 71

[Airspace Docket No. 93-ASO-15]

Revocation of Class E5 Airspace; Cookeville, TN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action revokes the Class E5 airspace that extends upward from 700 feet above ground level (AGL) at Cookeville, TN. The Putnam County airport at Cookeville, TN will be permanently closed effective October 15, 1993. The Cookeville Non Directional Beacon (NDB) will be decommissioned on October 15, 1993. The standard instrument approach procedure (SIAP) based on the NDB will be canceled. Controlled airspace extending upward from 700 feet above the surface will no longer be needed to contain Instrument Flight Rules (IFR) operations at Cookeville, TN.

EFFECTIVE DATE: 0459 u.t.c. October 16, 1993.

FOR FURTHER INFORMATION CONTACT: Alfred P. Smith, Airspace Section, Airspace and Procedure Branch, Air Traffic Division, ASO-532, Federal Aviation Administration, P.O. Box 20636, Atlanta, GA 30320; Telephone (404) 763-7646.

The Rule

This amendment to part 71 of the Federal Aviation Regulation revokes the 700 foot Class E airspace area at Cookeville, TN. The Putnam County Government advised the Federal Aviation Administration (FAA) of its decision to deactivate the Putnam County Airport at Cookeville, TN, effective October 15, 1993. Concurrently with the closing of the airport, the Putnam County Government will decommission the NDB. The FAA will cancel the Standard Instrument Approach based on the NDB on October 15, 1993. Controlled airspace extending upward from 700 feet above the surface will no longer be needed to contain IFR operations at Cookeville, TN.

Since this action merely involves the revocation of Class E airspace area as a result of an airport closure and removal of a navigation aid by the Putnam County Government, notice and public procedure under 5 U.S.C. 553(b) are unnecessary, and since there will no longer be aviation activity at Cookeville, the Class E airspace area must be removed to avoid confusion on the part of the pilots flying in the vicinity of the closed Putnam County Airport and to promote safe and efficient handling of air traffic in the area. Therefore, I find that notice and public procedure under U.S.C. 553(b), are impracticable and good cause, pursuant to 5 U.S.C. 553(d), exists for making this amendment effective in less than thirty days.

Designations for Class E airspace extending upward from 700 feet or more above the surface are published in Paragraph 6005 of FAA Order 7400.9A dated June 17, 1993, and effective September 16, 1993, which is incorporated by reference in 14 CFR 71.1, effective September 16, 1993. The Class E airspace designation listed in this document will be removed subsequently from the Order.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a significant regulatory action under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a

regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Incorporation by reference, Navigation (Air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. app. 1348(a), 1354(a), 1510; E.O. 10854, 24 FR 9565, 3 CFR, 1959-1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9A, Airspace Designations and Reporting Points, dated June 17, 1993, and effective September 16, 1993, is amended as follows:

Para. 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

* * * * *

ASO TN E5 Cookeville, TN [Removed]

* * * * *

Issued in East Point, Georgia, on October 4, 1993.

Michael J. Powderly,

Acting Manager, Air Traffic Division, Southern Region.

[FR Doc. 93-26166 Filed 10-22-93; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 93-ASO-16]

Amendment to Class D Airspace Areas, Numerous Locations In Alabama, Florida and Georgia

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment changes the effective hours of the listed Class D airspace areas from full-time to part-time. When a control tower closes, the associated Class D airspace changes to Class E or Class G airspace. The operating hours of the air traffic control

towers at these locations is no longer full-time and the category of airspace will no longer be Class D when the control tower is closed. These Class D airspace areas will be effective during the specific days and times established in advance by Notice to Airman.
EFFECTIVE DATE: 0901 u.t.c., January 6, 1994.

FOR FURTHER INFORMATION CONTACT:
 Kenneth R. Patterson, Airspace Section, System Management Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 763-7646.

SUPPLEMENTARY INFORMATION:

History

On September 16, 1993, Airspace Reclassification became effective. Before the reclassification, when an air traffic control tower closed, the associated control zone remained a control zone. After reclassification became effective, when a control tower closes, the associated Class D airspace changes to Class E or Class G airspace. The listed Class D Airspace areas are presently described as full-time. This amendment will change them to part-time. Accordingly, since this action merely involves a change in the legal descriptions and does not involve a change in the dimensions or operating requirements of the airspace, notice and public procedure under 5 U.S.C. 553(b) are unnecessary. The coordinates for this airspace docket are based on North American Datum 83. Class D airspace areas are published in Para. 5000 of FAA Order 7400.9A dated June 17, 1993, and effective September 16, 1993, which is incorporated by reference in 14 CFR 71.1 in effect as of September 16, 1993 (58 FR 36298; July 6, 1993). The Class D airspace areas listed in this document will be published subsequently in the Handbook.

The Rule

This amendment to part 71 of the Federal Aviation Regulations changes the effective hours of the listed Class D airspace areas in Alabama, Florida and Georgia from full-time to part-time as a result of the part time operating hours of the control towers.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a significant regulatory action under Executive Order 12866 (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44

FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR Part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for 14 CFR part 71 continues to read as follows:
 Authority: 49 U.S.C. app. 1348(a), 1354(a), 1510; E.O. 10854, 24 FR 9565, 3 CFR, 1959-1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9A, Airspace Designations and Reporting Points, dated June 17, 1993, and effective September 16, 1993, is amended as follows:

14 CFR Part 71

[Airspace Docket No. 93-ASO-17]

Amendment to Class D Airspace Areas, Multiple Locations in Kentucky, Mississippi, North Carolina, South Carolina and Puerto Rico

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment changes the effective hours of the listed Class D airspace areas from full-time to part-time. When a control tower closes the associated Class D airspace changes to Class E or G airspace. The operating hours of the air traffic control towers at these locations are no longer full time and the category of airspace will no longer be Class D when the control tower is closed. These Class D airspace areas will be effective during the specific days and times established in advance by Notice to Airman.

EFFECTIVE DATE: 0901 u.t.c., January 6, 1994.

FOR FURTHER INFORMATION CONTACT:
 Kenneth R. Patterson, Airspace Section, System Management Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 763-7646.

SUPPLEMENTARY INFORMATION:

History

On September 16, 1993, Airspace Reclassification became effective. Before the reclassification, when an air traffic control tower closed, the associated control zone remained a control zone. After reclassification became effective, when a control tower closes, the associated Class D airspace changes to Class E or Class G airspace. The listed Class D Airspace areas are presently described as full-time. This amendment will change them to part-time. Accordingly, since this action merely involves a change in the legal descriptions and does not involve a change in the dimensions or operating requirements of the airspace, notice and public procedure under 5 U.S.C. 553(b) are unnecessary. The coordinates for

this airspace docket are based on North American Datum 83. Class D airspace areas are published in Para. 5000 of FAA Order 7400.9A dated June 17, 1993, and effective September 16, 1993, which is incorporated by reference in 14 CFR 71.1 in effect as of September 16, 1993 (58 FR 36298; July 6, 1993). The Class D airspace areas listed in this document will be published subsequently in the Handbook.

The Rule

This amendment to part 71 of the Federal Aviation Regulations changes the effective hours of the listed Class D airspace areas in Kentucky, Mississippi, North Carolina, South Carolina and Puerto Rico, from full-time to part-time as a result of the part-time operating hours of the control towers.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a significant regulatory action under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

14 CFR Part 71

[Airspace Docket No. 93–ASO–18]

Amendment to Class E Airspace Areas, Multiple Locations in Alabama, Georgia, Kentucky, Mississippi, North Carolina and Tennessee

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment changes the effective hours of the listed Class E airspace areas designated as surface areas for airports from full-time to part-time. Weather reporting and communications are required to establish Class E airspace areas designated as surface areas for airports. Weather reporting and/or communications at the listed locations are no longer full-time. These Class E airspace areas will be effective during the specific days and times established in advance by Notice to Airman.

EFFECTIVE DATE: 0901 u.t.c., January 6, 1994.

FOR FURTHER INFORMATION CONTACT: Kenneth R. Patterson, Airspace Section, System Management Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 763–7646.

SUPPLEMENTARY INFORMATION:

History

The below listed Class E Airspace Areas are presently described as full-time. This amendment will change them

to part-time. Accordingly, since this action merely involves a change in the legal descriptions and does not involve a change in the dimensions or operating requirements of the airspace, notice and public procedure under 5 U.S.C. 553(b) are unnecessary. The coordinates for this airspace docket are based on North American Datum 83. Class E airspace areas designated as surface areas for airports are published in Para. 6002 of FAA Order 7400.9A dated June 17, 1993, and effective September 16, 1993, which is incorporated by reference in 14 CFR 71.1 in effect as of September 16, 1993 (58 FR 36298; July 6, 1993). The Class E airspace areas listed in this document will be published subsequently in the Handbook.

The Rule

This amendment to part 71 of the Federal Aviation Regulations changes the effective hours of the listed Class E airspace areas as a result of part-time weather reporting and/or communications.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR Part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for 14 CFR part 71 continues to read as follows:

FEDERAL TRADE COMMISSION

16 CFR Part 305

[RIN 3084-AA26]

Rule Concerning Disclosures of Information About Energy Consumption and Water Use for Certain Home Appliances and Other Products Required Under the Energy Policy and Conservation Act

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: The Federal Trade Commission ("Commission") amends the Appliance Labeling Rule ("Rule") to add showerheads, faucets, water closets (i.e., toilets), and urinals as covered products. This action is being taken pursuant to the Energy Policy Act of 1992 ("EPA 92"), which directed the Commission to prescribe, by October 24, 1993, rules requiring such products to be marked and labeled with certain disclosures about their water use. EPA 92 also directed the Commission to prescribe a format and manner of display for any voluntary disclosures of estimated annual operating cost claims made for such plumbing products. The Commission has concluded that it is appropriate to defer the prescribing of a format and manner of display until such time as the manufacturers of these products elect to make such claims.

EFFECTIVE DATE: October 25, 1994. The incorporation by reference of certain

publications listed in the regulations is approved by the Director of the Federal Register as of October 25, 1994.

FOR FURTHER INFORMATION CONTACT:
 Terrence J. Boyle, Attorney, 202-326-3016, or James G. Mills, Attorney, 202-326-3035, Division of Enforcement, Bureau of Consumer Protection, Federal Trade Commission, Washington, DC 20580.

SUPPLEMENTARY INFORMATION:

I. Introduction

EPA 92 was enacted on October 24, 1992.¹ One subchapter of EPA 92 amends in several respects the Energy Policy and Conservation Act of 1975 ("EPCA").² That statute directed the Commission to issue the Appliance Labeling Rule, which requires certain products to bear labels that disclose information about the energy consumption and efficiency of the products.³

EPA 92 adds four categories of plumbing products, showerheads, faucets, water closets, and urinals, to EPCA's list of covered products.⁴ It establishes national standards governing maximum permissible water usage rates for each of these four plumbing product categories (e.g., all urinals manufactured after January 1, 1994, may use no more than 1.0 gallons per flush).⁵ It also adopts the testing protocols contained

¹ Pub. L. 102-486, 106 Stat. 2776, 2817-2832 (1992) (codified at 42 U.S.C. 6201, 6291-6307).

² 42 U.S.C. 6291 *et seq.* EPCA also has been amended by the National Energy Conservation Policy Act of 1978, Pub. L. 95-619, 92 Stat. 3258 (1978); the National Appliance Energy Conservation Act of 1987 ("NAECA 87"); Pub. L. 100-12, 101 Stat. 103 (1987); and the National Appliance Energy Conservation Amendments of 1988 ("NAECA 88"); Pub. L. 100-357, 102 Stat. 671 (1988).

³ 16 CFR part 305. EPCA established energy consumption standards for certain categories of major home appliances and directed the Department of Energy ("DOE") to devise similar standards for certain other categories of such products. 42 U.S.C. 6295. EPCA also directed the Commission for certain categories of products to prescribe rules, and for certain other categories of products to consider prescribing rules, requiring these appliances to be labeled with disclosures of the products' estimated annual energy cost of operation or another useful measure of energy usage. 42 U.S.C. 6294. EPCA also allowed the Commission to exempt some covered products or categories of covered products from labeling requirements if the Commission determined such labeling would not be technologically or economically feasible or not likely to help consumers in making purchasing decisions. 42 U.S.C. 6294(a)(1)-(2).

⁴ 106 Stat. 2821 (codified at 42 U.S.C. 6292(a)(15)-(18)). Besides these four plumbing products, EPA 92 adds fluorescent and incandescent lamps to EPCA. 106 Stat. 2821 (codified at 42 U.S.C. 6292(a)(14)). These products will be addressed in a subsequent rulemaking proceeding.

⁵ 106 Stat. 2826-27 (codified at 42 U.S.C. 6295(j)(1)-(2) and (k)(1)-(2)).

in two national standards of the American Society of Mechanical Engineers ("ASME") as the proper protocols for measuring the water usage of these plumbing products.⁶

EPA 92 directs the Commission, within one year, to prescribe rules requiring that all covered plumbing products, other than faucets,⁷ be permanently marked with legible disclosures of their water usage rates.⁸ The Commission also is directed to require that all covered plumbing products bear disclosures consistent with the marking and labeling requirements presently specified in the ASME standards.⁹ EPA 92 specifies that the new marking/labeling disclosures rule shall be applicable to covered plumbing products manufactured after the 12-month period beginning on the date of the publication of such rule.¹⁰ Further, the Commission must include in the rules the requirement that manufacturers of these products submit annually to the Commission relevant data about their products.¹¹ Lastly, EPA 92 directs the Commission to prescribe a format and manner of display for labels containing statements of annual operating costs for these plumbing products in the event a manufacturer should elect to make such claims.¹²

In accordance with sections 324(b) and 336(a) of EPCA, 42 U.S.C. 6294(b) and 6306(a), this proceeding was conducted pursuant to section 553 of the Administrative Procedure Act ("APA"), 5 U.S.C. 553. In addition, pursuant to section 324(b)(2) of EPCA, 42 U.S.C. 6294(b)(2), interested persons were afforded the opportunity to present oral, as well as written, data, views and arguments. On May 5, 1993, the Commission published a Notice of Proposed Rulemaking ("NPR") in the Federal Register¹³ seeking comment for 45 days on proposed amendments to the Appliance Labeling Rule. Specifically, the Commission sought comment on proposed amendments that would require that specific disclosures appear

⁶ 106 Stat. 2821 (codified at 42 U.S.C. 6293(b)(7)(A) and (8)(A)).

⁷ Faucets were exempted from the marking requirement to avoid marring the appearance of designer models. Aerators, which are flow restricting or controlling spout end devices that are inserted in faucets to create a water flow rate with a consistent spray, will be required to bear permanent legible markings. 106 Stat. 2822 (codified at 42 U.S.C. 6294(a)(2)(D)(i)).

⁸ 106 Stat. 2822-23 (codified at 42 U.S.C. 6294(a)(2)(D)(i) and (E)(i)).

⁹ *Id.*

¹⁰ *Id.*

¹¹ 106 Stat. 2829 (codified at 42 U.S.C. 6296(b)(4)).

¹² 106 Stat. 2823-24 (codified at 42 U.S.C. 6294(c)(8)).

¹³ 58 FR 26715.

on all covered plumbing products, other than faucets, and in the labeling, point-of-sale promotional materials, and catalog advertising for all covered plumbing products. In addition, the Commission solicited comment on its tentative decision not to prescribe a format and manner of display for estimated annual cost of operation claims for covered plumbing products until such time as manufacturers elect to make such claims. The Commission also sought comment on its proposal, in conformity with the Metric Conversion Act, 15 U.S.C. 205b, to require that the mandated water usage rate disclosures be stated both in gallons and in liters.

In the NPR the Commission tentatively concluded that the proposed amendments would not have a "significant economic impact" on a substantial number of "small entities" in the plumbing products industry, as those terms are defined in the Regulatory Flexibility Act, 5 U.S.C. 605. The Commission, however, sought comment concerning this industry and the impact the proposed amendments would have on small entities. In the NPR the Commission also tentatively concluded that the proposed amendments' requirements for "recordkeeping," as that term is defined in the Paperwork Reduction Act, 44 U.S.C. 3501, would be minimal. The Commission sought comment on its estimate of the paperwork burdens that the proposed amendments would impose. Lastly, as part of its ongoing regulatory review of existing and proposed regulations, the Commission sought comment about the overall costs and benefits of the proposed amendments.

No hearing was requested and none was held. The Commission received five timely written comments and they are summarized in Part II(C) of this notice. The amendments the Commission is adopting today are discussed in Part III. The text of the amendments appears at the end of this notice.

II. Background

A. EPCA and the Existing Appliance Labeling Rule

The Commission, pursuant to EPCA's directives, issued the Appliance Labeling Rule on November 19, 1979, to cover seven categories of EPCA's covered products.¹⁴ Since then the Commission has twice amended the Rule, to expand one category of covered products and to add an eighth and a ninth category of covered products.¹⁵

¹⁴ 44 FR 66468.

¹⁵ 52 FR 46888 (Dec. 10, 1987), adding pulse combustion furnaces and condensing furnaces to

The Rule now requires EnergyGuide labeling for all or most products sold in the United States in the following categories: Residential furnaces; refrigerators and refrigerator-freezers; freezers; water heaters; clothes washers; dishwashers; window and wall-mounted room air conditioners; and central air conditioners and heat pumps.¹⁶ Pursuant to the 1988 EPCA amendment, the Rule also now requires all fluorescent lamp ballasts to be labeled or marked with the symbol of a capital letter E enclosed in a circle, denoting that the ballast meets a DOE energy efficiency standard.¹⁷

Except for fluorescent lamp ballasts, the Rule also requires all point-of-sale promotional materials and certain catalog advertising to contain disclosures of required energy consumption and efficiency information.¹⁸ Further, the Rule requires disclosure of energy usage information for furnaces on fact sheets¹⁹ and for central air conditioners and heat pumps either on fact sheets or in industry directories.²⁰

EPCA authorizes the Commission to assess monetary civil penalties for violations of the Rule. 42 U.S.C. 6303(a) and (d). The Commission can assess penalties of not more than \$100 for each unit when: (1) Manufacturers or private labelers knowingly distribute covered products that are not properly labeled and (2) manufacturers, distributors, or retailers knowingly remove or make illegible required labels.²¹ The Commission also can assess penalties of not more than \$100 per day when: (1) Manufacturers or private labelers fail to include required disclosures in their catalog advertising and (2)

the furnace category and adding to the Rule's list of covered products an eighth product category—central air conditioners and heat pumps; and 54 FR 28031 (July 5, 1989), adding to the list of covered products a ninth product category—fluorescent lamp ballasts.

¹⁶ 16 CFR 305.11(a)-(c). The EnergyGuides required by the Rule are 5-5/16" by 7-3/8" labels with black type on a yellow background. 16 CFR 305.11(a)(1)-(3). Although alike in appearance, they vary somewhat by product in the "primary energy usage disclosure" that they must contain. Some have data on estimated annual operating costs; others have energy efficiency ratings. 16 CFR 305.11(a)(5)(i)(E) and .11(a)(5)(iii)(C). Both types disclose the product's energy consumption rate within a range of the rates known for other, similar-sized models of the product. 16 CFR 305.11(a)(5)(i)(F) and .11(a)(5)(ii)(D)-(E). For most of these products, the Rule also requires the EnergyGuides to give a "secondary energy usage disclosure," intended to help consumers estimate their own operating costs based on local utility rates. 16 CFR 305.11(a)(5)(i)(H).

¹⁷ 16 CFR 305.11(d).

¹⁸ 16 CFR 305.13 and .14.

¹⁹ 16 CFR 305.11(b).

²⁰ 16 CFR 305.11(c).

²¹ 16 CFR 305.4(a)(1)-(3).

manufacturers or private labelers fail to keep, or grant the Commission access to, records the Rule requires to be kept, fail to provide reports or product samples as specified by the Rule, or fail to permit testing to be observed.²² EPCA also states that it is an unfair or deceptive act or practice in or affecting commerce (within the meaning of section 5(a)(1) of the FTC Act, 15 U.S.C. 45(a)(1)), for any person to make unsubstantiated energy use or efficiency claims. 42 U.S.C. 6303(c). Thus, the Commission can issue cease-and-desist orders against violators. In addition, EPCA grants the United States District Courts the authority to enjoin violations of EPCA and the Commission's labeling requirements. 42 U.S.C. 6304.

B. EPA 92's Provisions Concerning Plumbing Products

EPA 92 establishes maximum permissible water use rates for all urinals, water closets (*i.e.*, toilets), showerheads and faucets sold in this country.²³ For all urinals and for most toilets, EPA 92 establishes maximum water use rates of 1.0 and 1.6 gallons per flush respectively.²⁴ Blowout toilets, the one exception to the 1.6 gallon per flush standard for toilets, are products for commercial use that are designed for a more powerful discharge. They will be allowed up to 3.5 gallons per flush.²⁵ For all showerheads and faucets other than metering faucets (but including aerators sold separately for use in faucets), EPA 92 establishes a maximum water use rate of 2.5 gallons per minute at 80 pounds of water pressure per square inch.²⁶ The one exception to the 2.5 gallon per minute standard is for metering faucets, devices that over a few seconds gradually turn themselves off. They will be limited to .25 gallons per cycle at 80 pounds of water pressure per square inch.²⁷ After January 1, 1994, no non-conforming product may be manufactured for sale in this country.²⁸

²² 16 CFR 305.4(b)(1)-(5).

²³ 106 Stat. 2826-27 (codified at 42 U.S.C. 6295(j)(1)-(2) and (k)(1)-(2)).

²⁴ 106 Stat. 2827 (codified at 42 U.S.C. 6295(k)(1)-(2)).

²⁵ 106 Stat. 2827 (codified at 42 U.S.C. 6295(k)(1)(A)).

²⁶ 106 Stat. 2826 (codified at 42 U.S.C. 6295(j)(1)-(2)).

²⁷ 106 Stat. 2826 (codified at 42 U.S.C. 6295(j)(2)).

²⁸ 106 Stat. 2826-27 (codified at 42 U.S.C. 6295(j)(1)-(2) and (k)(1)-(2)). Gravity tank-type white 2 piece toilets using no more than 3.5 gallons per flush have an exception to this deadline. They may be manufactured until January 1, 1997, if they bear an adhesive label conspicuous upon installation consisting of the words "Commercial Use Only." 106 Stat. 2827 (codified at 42 U.S.C. 6295(k)(1)(B)). These toilets are different from the blowout toilets that indefinitely will be allowed 3.5 gallons per flush.

EPA 92 adopts test protocols contained in two ASME national standards as the proper procedures for determining the water usage rates of the covered plumbing products.²⁹ These standards ("ASME A112.18.1M-1989, Plumbing Fixture Fittings" and "ASME A112.19.2M-1990, Vitreous China Plumbing Fixtures") previously have been recognized by all government jurisdictions with plumbing codes and therefore effectively govern the construction and performance of these fixtures and fittings throughout the United States. EPCA authorizes DOE to enforce EPCA's energy conservation standards, which now include the water usage standards established by EPA 92. 42 U.S.C. 6302(a)(5) and 6303(a). EPA 92 also authorizes DOE to modify, where appropriate, the test procedures specified for these plumbing products, if ASME revises its standards' test protocols for measuring water flow rates and the American National Standards Institute ("ANSI") approves those revisions.³⁰

EPA 92 directs the Commission to prescribe and enforce rules requiring disclosures of the products' water use rates as measured according to those standards.³¹ Specifically, the Commission must require that certain disclosures be permanently marked on all covered plumbing fixtures and fittings other than faucets and that other disclosures be made in the labeling of all covered plumbing products.³² EPA 92's provisions for product labeling incorporate by reference the existing labeling provisions of the two ASME standards.³³

The ASME standards presently require every plumbing product to be permanently marked with a legible disclosure of the manufacturer's identity "located where it can be seen after installation" (ASME A112.18.1M-1989, para. 8.1(a)) or "located so as to be visible after the fixture is installed, except for a fixture built into or for a counter or cabinet" (ASME

A112.19.2M-1990, para. 8.1.1). These standards also require every product either to be marked with a disclosure of the product's water use rate and the identity of the pertinent ASME standard or else to have its labeling bear the same information.³⁴ ASME A112.18.1M-1989, para. 8.1, and ASME A112.19.2M-1990, para. 8.1. EPA 92, however, expands the requirements of the ASME standards to require that the products themselves, except faucets, be permanently marked with legible disclosures of their water usage rates.³⁵

EPA 92 also directs the Commission to require that plumbing product manufacturers annually submit to the Commission relevant data about their products' water usage rates.³⁶ The term "relevant data" is not, however, defined in EPCA or EPA 92.

Lastly, EPA 92 directs the Commission to prescribe a format and manner of display for labels containing statements of estimated annual operating costs if a manufacturer elects to make such claim.³⁷ EPA 92 does not define the terms "format" and "manner of display" and the statute does not specify how the Commission is to prescribe them.

C. Identification of Comments Received

In response to the NPR the Commission timely received the five comments listed below.³⁸ This list includes the document number assigned to the comment on the public record and a general description of the commenter and its interests relating to this proceeding.³⁹ For the remainder of this notice each comment will be cited by the acronym given in parenthesis and the assigned document number.

1. D-1 Moen Incorporated ("MI"). MI is a manufacturer of showerheads, faucets and aerators.

²⁹ In the terminology of the ASME standards, labeling includes the product's "package," the "label on the product" and/or a "tag attached to the product." ASME A112.18.1M-1989, para. 8.1, and ASME A112.19.2M-1990, para. 8.1.1.

³⁰ 106 Stat. 2822-23 (codified at 42 U.S.C. 6294(a)(2)(D)(i) and (E)(i)).

³¹ 106 Stat. 2829 (codified at 42 U.S.C. 6296(b)(1) and (4)).

³² 106 Stat. 2823-24 (codified at 42 U.S.C. 6294(c)(6)).

³³ One other comment was received 23 days after the comment period closed and was not considered.

³⁴ All public documents are filed in the Commission's Rulemaking Record No. P934201. Industry comments are filed in category "D. Industry comments." Other comments are filed in category "E. Comments from other sources." Documents are numbered sequentially, such as Document No. D-1, Document No. D-2, in the order received. In this notice comments are cited by an identifying acronym of the commenter, the comment Document Number, and the relevant page number(s), e.g., "ACEEE, E-2, 2-3."

2. D-2 Price Pfister, Inc. ("PPI"). PPI is a manufacturer of showerheads and faucets.
3. D-3 Plumbing Manufacturers Institute ("PMI"). PMI is a national trade association representing firms that manufacture plumbing products.
4. E-1 California Energy Commission ("CEC"). CEC is the resources agency of the State of California.
5. E-2 American Council for an Energy-Efficient Economy ("ACEEE"). ACEEE is an environmental and conservation interest group.

These comments are discussed below.

III. Discussion of Rule Amendments Being Adopted

Each amendment the Commission is adopting today is identified below. The substantive revisions are described in detail. Minor, self-explanatory Rule changes are merely noted. Any comments about a proposed amendment are discussed with that amendment. If none of the comments discussed a proposed amendment, the Commission adopts the amendment without discussion.

In the NPR the Commission noted that there was then pending another NPR to amend numerous provisions of the Appliance Labeling Rule in response to a comprehensive review of the Rule.⁴⁰ In addition to making a few corrections to typographical errors in §§ 305.4(e) and 305.5(a), there was a substantive proposed amendment in that proceeding relevant to this proceeding. In § 305.8 the Commission proposed deleting the references to start-up reporting dates and rewording the paragraph to make it clearer. The NPR in this proceeding used the language that had been proposed for those provisions as the text to base the plumbing amendments. There was no comment on any of these minor revisions in either proceeding. The Commission is therefore today making the corrections to the typographical errors in §§ 305.4(e) and 305.5(a) and is amending § 305.8 as proposed in the two NPRs.

A. Section 305.1 Scope

This section summarizes the coverage of the Rule. The Commission is amending three pertinent subsections to include water usage.

B. Section 305.2 Definitions

This section contains definitions of seventeen terms used by EPCA and the Rule. The Commission is amending it to include (as five new subsections)

⁴⁰ 58 FR 28715, 28717 (referring to the comprehensive review NPR, 58 FR 12818 (Mar. 4, 1993)).

²⁹ 106 Stat. 2821 (codified at 42 U.S.C. 6293(b)(7)(A) and (8)(A)).

³⁰ 106 Stat. 2821-22 (codified at 42 U.S.C. 6293(b)(7)(B) and (8)(B)).

³¹ 106 Stat. 2822-23 (codified at 42 U.S.C. 6294(a)(2)(D)(i) and (E)(i)).

³² *Id.*

³³ 106 Stat. 2822-23 (codified at 42 U.S.C. 6294(a)(2)(D)(i) and (E)(i)). If ASME changes the marking and labeling requirements contained in the standards, and ANSI approves of the changes, EPA 92 directs the Commission to amend its Rule to be consistent with such revised ASME/ANSI requirements, unless such revisions are inconsistent with the purposes of EPA 92 or the requirement that covered plumbing fixtures and fittings other than faucets be permanently marked with disclosures of their water flow rates. 106 Stat. 2822-23 (codified at 42 U.S.C. 6294(a)(2)(D)(i) and (E)(i)).

definitions for five terms that EPA 92 uses for the plumbing fixtures and fittings that EPA 92 has added to EPCA (i.e., "water use," "ASME," "ANSI," "flushometer valve," "flow restricting or controlling spout end device").

C. Section 305.3 Description of Covered Products to Which This Part Applies

This section lists the ten categories of appliances now covered by EPCA and the Rule. The Commission is amending it to add (as four new subsections) the four categories of plumbing fixtures and fittings that EPA 92 has added to EPCA.

D. Section 305.4 Prohibited Acts

This section makes it unlawful to distribute in commerce any covered product not labeled and advertised as prescribed by the Rule. Failing to maintain and make available certain records and product samples as prescribed by the Rule is also prohibited. The Commission is amending four subsections of this section to specify that failure to comply with the Rule's requirements for covered plumbing products is unlawful.

The Commission is amending subsections (a) and (b) of this section to reflect that EPA 92 requires disclosures to be made on plumbing products themselves and not just on their labels and in certain of their catalog advertising. The Rule did not previously require any covered product itself to be permanently marked. Therefore, in this section where the expressions "label" or "labeled" were used (i.e., subsections (a)(1); (a)(2); and (b)(4)), the Commission is amending the provisions to say "marking and/or label" or "marked and/or labeled." Other language in the Rule makes clear which products are to be marked and labeled and which just labeled.

Subsection (d) states that it is an unfair or deceptive act or practice in violation of section 5(a)(1) of the FTC Act, 15 U.S.C. 45(a)(1), to represent the energy consumption of, or the cost of energy consumed by, a covered product unless the representation fairly discloses the results of tests conducted on the product in accordance with the applicable DOE test procedure. The Commission is amending subsection (d) to include these plumbing products and to indicate that for them it is representations of water usage, or of the cost of water used, that are subject to this subsection. This subsection is also being revised to state that for these plumbing products the relevant test procedures are statutorily established and not DOE prescribed. The amendment splits subsection (d) into

two paragraphs that are worded almost exactly the same as section 323(c) of EPCA, 42 U.S.C. 6293(c), as it has been amended by NAECA 87 and EPA 92.

Finally, in subsection (e), which identifies the Rule's effective date for each category of covered product, the Commission establishes the effective date of the plumbing products amendments. Congress directed the Commission to prescribe, by October 24, 1993, rules for marking and labeling covered plumbing fixtures and fittings and provided that such rules be applicable to those covered plumbing products manufactured after the 12-month period beginning on the date of their publication in final form. All plumbing products rule provisions are being made effective as of this date.

E. Section 305.5 Determinations of Estimated Annual Energy Cost and Energy Efficiency Rating and of Water Use Rate

This section specifies the test procedures to be used for measuring the energy consumption and efficiency of the various categories of products covered by the Rule. Consistent with EPA 92, the Commission is adding a subsection specifying the two ASME standards as providing the appropriate procedures for measuring water use rates.

F. Section 305.8 Submission of Data

This section requires manufacturers of covered products to submit to the Commission, in the form of annual reports, certain data concerning their products. Section 326(b)(1) of EPCA, 42 U.S.C. 6296(b)(1), requires manufacturers to notify the Commission of all their existing product model numbers within 60 days after a Rule covering them takes effect and all their future product model numbers prior to commencement of production. Section 326(b)(4) of EPCA, 42 U.S.C. 6296(b)(4), requires manufacturers to supply annually to the Commission, at times to be specified by the Commission, relevant data respecting their products' energy consumption. EPA 92 amended this provision to add relevant data respecting water use, but did not specify what "relevant data" means.⁴¹ The Commission is amending § 305.8 of the Rule to require plumbing products manufacturers to submit to the Commission by March 1, 1995, and annually thereafter, reports disclosing each company's name and address and the trade names, model numbers, and water usage rates of its covered

products. This amendment will require plumbing products manufacturers to submit the same type of information manufacturers of other products covered by the Rule submit.

Four comments addressed this issue. One comment objected to having to submit annual reports.⁴² Two comments said that, although the Rule should be specific as to what and how information must be submitted, having to report the manufacturing start-up dates and the discontinuance of particular models would be burdensome⁴³ and difficult.⁴⁴ Two comments suggested that industry directories or the records of trade associations or state regulatory bodies be accepted by the Commission in place of original reports from each manufacturer.⁴⁵ One comment, however, insisted that "[i]f the FTC imposes reporting requirements, these must be submitted by manufacturers and not by a third party or certification organization" and advised that states have different reporting requirements and not all manufacturers report on all their products to any one state.⁴⁶

The requirement that manufacturers submit model numbers, and other information, is one that EPA 92 has mandated. The Commission cannot excuse manufacturers from complying with that requirement. The Commission does, however, have discretion over the manner in which the information is submitted. The amended Rule permits manufacturers to satisfy the starting serial number and other reporting requirements by submitting individual company reports, industry directories, catalogs with cover letters, copies of reports filed with state regulatory authorities, or any other format that contains the required data.⁴⁷

G. Section 305.11 Labeling for Covered Products

This section contains specific labeling requirements for the Rule's covered products. The Commission is amending this provision by adding a fifth subsection to address the labeling and marking requirements that EPA 92 directs for plumbing products.⁴⁸ This new subsection (e) specifies that

⁴² PMI, D-3, 2.

⁴³ MI, D-1, 2.

⁴⁴ PMI, D-3, 2.

⁴⁵ CEC, E-1, 4; ACEEE, E-2, 2.

⁴⁶ PMI, D-3, 3.

⁴⁷ See discussion in Part III(J) of this Notice concerning the type of test data required to be submitted.

⁴⁸ The first subsection applies to all the covered products heretofore included in the Rule except fluorescent lamp ballasts; the second concerns only furnaces and central air conditioners; the third only central air conditioners; and the fourth only fluorescent lamp ballasts.

⁴¹ 106 Stat. 2829 (codified at 42 U.S.C. 6296(b)(4)).

covered plumbing fixtures and fittings must be marked and labeled consistent with the marking and labeling requirements of the two ASME standards presently in effect that EPA 92 adopts. These standards require every covered plumbing product to be permanently marked with a legible disclosure of the manufacturer's identity "located where it can be seen after installation" (ASME A112.18.1M-1989, para. 8.1(a)) or "located so as to be visible after the fixture is installed, except for a fixture built into or for a counter or cabinet" (ASME A112.19.2M-1990, para. 8.1.1).

In addition, the standards require every product to bear a disclosure identifying the ASME standard applicable to it. For showerheads and faucets, including aerators, this disclosure may be made by means of a permanent mark on the product, a label on the product, or a tag attached to the product. ASME A112.18.1M-1989, para. 8.1(b). For water closets and urinals, the disclosure must be on the product and be visible after installation, but need not be permanent. ASME A112.19.2M-1990, para. 8.1.2.

The standards also require disclosures about the products' water consumption. For showerheads and faucets, including aerators, this disclosure must be on the packaging or on any label attached to the packaging and must state the actual or maximum allowed water flow rate. ASME A112.18.1M-1989, para. 8.2(b). For water closets and urinals, the standards require the products to be marked with a label specifically identifying the fixture's water consumption classification and also require their maximum allowable water consumption rates to appear on the products themselves and on their packaging. The marking, however, need not be permanent. ASME A112.19.2M-1990, paras. 8.3.3 and 8.4.3.

Pursuant to EPA 92's directive, the new subsection (e) specifies the particular ASME labeling requirements regarding disclosures of water flow rates, manufacturers' identity, and standards designation that henceforth will be required under the Rule. This subsection, pursuant to EPA 92's directive, also requires all covered plumbing products (except for faucets, but including aerators) to be permanently and legibly marked with the products' water use rates. The Commission solicited comment on proposals regarding the legibility and permanence of the disclosures.

For plumbing products, EPA 92 mandates the wording of the disclosures and the Commission therefore did not seek comment on this issue. Two

comments, however, said the Commission should allow alternative disclosures.⁴⁹ One comment said it wanted to disclose the water usage rates of its showerheads and faucets (including aerators) in terms of gallons per minute at 60 pounds of water pressure per square inch and not at 80 pounds.⁵⁰ EPA 92, however, established a standard of 80 pounds. EPA 92 permits that national standard to be changed, if ASME, ANSI and DOE all agree on the changes; but until that occurs the Commission cannot allow under its Rule any disclosure other than that specified in EPA 92.⁵¹ Further, for comparison purposes, products should be measured by the same standard and the results disclosed according to that standard.

In terms of legibility, the Commission concluded in the NPR that a required disclosure is legible only if the purchaser can readily find the disclosure. Accessible placement not only allows code officials and other professionals to determine a product's water use rate, but also facilitates consumers' ability to comparison-shop for efficient plumbing products at retail. Further, in certain circumstances consumers may need to be able to ascertain after sale whether their plumbing fixtures and fittings comply with the EPA 92 water use standards. Some states, such as California, are considering legislation to require homeowners offering their homes for sale to certify that their plumbing meets these standards.

In the NPR the Commission noted that manufacturers of the plumbing products to be covered by this Rule are already required by state plumbing and building codes and by the ASME standards to mark their products permanently with the manufacturer's identity. The Commission's staff looked at dozens of different brands of covered plumbing products on display in local retail outlets and reported that at present manufacturers seem always to put their identifying marks in optimum locations (*i.e.*, in places readily findable after installation). Therefore, the Commission tentatively concluded that if

manufacturers placed the Rule's required disclosures near their own identifying markings, consumers should have little difficulty locating the required water use disclosures.

The Commission sought comment on a proposed Rule stating that disclosing the water use rate in a location near the manufacturers' identifying mark will suffice for purposes of legibility. The proposed Rule did not, however, require any particular location. The Commission used a similar "safe harbor" approach in setting the size specifications for the required disclosure for lamp ballasts when it last amended the Rule.⁵² No comment provided adequate or persuasive evidence against this approach.

One comment contended that requiring markings on decorative aerators would be impractical and would limit consumers' style choices.⁵³ An examination of a diagram of that commenter's decorative aerator showed, however, that there is space on it for non-defacing disclosures of the water use rate. Further, even if this were not the case, the requirement that every aerator be marked with its water flow rate is a statutory mandate that the Commission cannot waive.

Another comment contended that requiring markings on two-piece toilets at each of the two locations where the manufacturers' identifying marks are now appearing would not be practical. The comment stated that because the manufacturers' identifying marks put on the bowl components of such toilets between the two seat bolts are so large (and the space so confined) that there would not be enough space for additional disclosures there.⁵⁴

Although a manufacturer could reduce the size of its identifying mark between the seat bolts to accommodate the water usage rate disclosure, this is not required because the Rule does not require disclosures at any particular location on toilets or that two-piece toilets be marked on both the bowls and the tanks.⁵⁵ The Rule requires only that

⁴⁹ See 16 CFR 305.11(d).

⁵⁰ PFI, D-2, 1.

⁵¹ PMI, D-3, 1-2.

⁴⁹ MI, D-1, 2-3; PMI, D-3, 3.

⁵⁰ MI, D-1, 1.

⁵¹ Similarly, two comments urged that the Rule allow disclosures of testing standards other than the two ASME standards (*e.g.*, the Canadian Standards Association). PMI, D-3, 3; MI, D-1, 2-3. EPA 92, however, mandates that the Rule require all covered products to be labeled in conformity with the marking and labeling provisions of the two ASME standards. Those standards require that the products' labels disclose the pertinent ASME designation. EPA 92 provides for having different disclosure requirements, but only if ASME and ANSI first agree upon the new requirements.

⁵² The ASME standards' marking and labeling requirements, which EPA 92 directed the Commission to include in this Rule, require toilets to be permanently marked with the manufacturer's identifying mark, and specify that a 2-piece toilet must have that marking on each component. The ASME standards do not require permanent markings of the water usage rates. EPA 92 imposed an additional requirement. The Commission's Rule for disclosing water use rates follows the exact language used in EPA 92 and only requires that the toilet fixture be marked with its water usage rate. As a result, manufacturers can comply by marking

each fixture be permanently and legibly marked, while stating that a marking near the manufacturer's identifying mark would suffice for the placement aspect of legibility. Other locations that are readily findable and viewable by consumers also will comply with the legibility requirement.

In the NPR the Commission proposed not to set type size/style and color contrast specifications as part of the legibility requirement. The Commission tentatively concluded that it would be impractical to specify any particular disclosure format or even a safe harbor for all the covered products because plumbing fixtures and fittings (from nozzles to urinals) comprise so many shapes, sizes, colors and surface conditions. The Commission, however, solicited comment on these issues. One comment suggested the Rule require that disclosures of water usage rates on products be in type sizes no less than half the sizes used for the manufacturers' identifying marks so as to prevent the use of very small, illegible types.⁵⁶ Because the Rule addresses so many types of products and possible disclosure variations, the Commission has concluded that it is necessary to preserve manufacturer flexibility in meeting the legibility requirement.

In the NPR the Commission also tentatively concluded that it was unnecessary to define or specify how markings should be made permanent. The Commission noted that the state codes that require permanent marking of the manufacturer's identity, and the ASME standards that those codes are based upon, do not specify how the marking is to be done, instead leaving it to the manufacturer to decide. The Commission sought comment on this issue and no one objected to the Rule's specifying only that the markings must be permanent.

Finally, the Commission has decided that all disclosures must be made in terms of both gallons and liters per flush, minute, or cycle, except where the size of the product would make it impractical to disclose more than the gallons. Several comments addressed this issue and they are discussed below in Section VIII concerning metrication.

H. Section 305.13 Promotional Material Displayed or Distributed at Point of Sale

This section requires that all promotional materials for covered products that are displayed at the point

of sale bear the following statement: "Before purchasing this appliance, read important energy cost and efficiency information available from your retailer." The Commission's authority under section 324(c)(4) of EPCA, which requires that point-of-sale promotional materials for covered products contain the same disclosures as required on the products' labels, was not changed by EPA 92. 42 U.S.C. 6294(c)(4). In the NPR the Commission therefore proposed requiring that plumbing product point-of-sale materials also include a disclosure. At the same time, the disclosure statement that is now required by this subsection of the Rule for all those products heretofore covered by the Rule, is not one of those that EPA 92 would allow the Commission to require on plumbing product labels. The Commission therefore proposed adding to this section a clause that would require the disclosure of the water usage rates in all point-of-sale promotional materials for covered plumbing products.

Two comments addressed the proposal for point-of-sale promotional materials. One supported the proposal because it would increase consumer awareness of the importance of considering water use when purchasing plumbing products.⁵⁷ The other comment urged that the Rule state that only those materials printed one year after the Rule's effective date must be in compliance.⁵⁸ The Rule goes into effect one year after its publication today and only those materials disseminated after that date must comply with the amended Rule. Therefore, industry members will have ample time to use up existing promotional materials and to prepare conforming materials.

I. Section 305.14 Catalogs

This section requires advertising for covered products in all catalogs from which purchasers may order the items to disclose information about those products' energy consumption and efficiency. The Commission's authority under section 326(a) of EPCA to require this disclosure in catalog advertising for covered products was not changed by EPA 92. 42 U.S.C. 6296(a). In the NPR the Commission proposed amending the Rule to indicate that manufacturers of covered plumbing fixtures and fittings are required to disclose in pertinent catalog advertising their products' water usage rates, rather than energy cost and efficiency information. The Commission also proposed deleting, in existing 305.14(a), the specific reference to

payment "by cash, charge account or credit terms," because such a limitation in the payment method is not required by the statute and does not encompass all possible payment methods (e.g., checks or electronic funds transfers).

Two comments addressed the issue of catalog disclosures. One supported the proposal because it would increase consumer awareness of the importance of considering water use when purchasing plumbing products.⁵⁹ The other comment requested that the Rule state that only those catalogs printed one year after the Rule's effective date must be in compliance.⁶⁰ The Rule goes into effect one year after its publication today and only those catalogs disseminated after that date must comply with the amended Rule. Therefore, industry members will have ample time to use up existing catalogs and to prepare conforming ones.

J. Section 305.15 Test Data Records

This section requires energy consumption and efficiency test data to be maintained and made available to the Commission. In the NPR the Commission proposed amending subsection (b) to include water usage test data and solicited comment on this proposal. One comment asked whether a manufacturer's own test reports would suffice or whether only third party testing would be acceptable. The comment further stated that there was industry opposition to this provision's requirement that test data be made available within 30 days of a Commission request, asking that the Rule instead specify 90 days.⁶¹

EPCA does not specify who must conduct the tests on which submissions to the Commission are based and the Rule also does not contain requirements regarding this. The Commission has no objection to manufacturers submitting test data from tests conducted by manufacturers on their own products as long as the records are adequate to show the tests were performed properly.

The Commission has decided not to change the 30 days requirement. It applies to manufacturers of all products covered by the Appliance Labeling Rule, not just plumbing products manufacturers. No evidence was presented to show why the plumbing products industry would need more time than other industries to transmit to the Commission requested test data records that subsection (a) of this provision of the Rule would already require them to have in their possession.

the fixture on either the bowl or the tank component.

IV. Format and Manner of Display for Voluntary Disclosures of Estimated Annual Operating Cost Claims on Labels of Covered Plumbing Products

EPA 92 did not amend EPCA to require manufacturers of covered plumbing products to provide consumers with estimated annual operating cost disclosures. It does, however, envision that in the future some manufacturers might voluntarily make such claims. Specifically, EPA 92 has amended section 324(c) of EPCA to provide that:

If a manufacturer of a covered product specified in paragraph (15) or (17) of section 322(a) elects to provide a label for such covered product conveying the estimated annual operating cost of such product or the range of estimated annual operating costs for the type or class of such product—

(A) such estimated cost or range of costs shall be determined in accordance with test procedures prescribed under section 323;

(B) the format of such label shall be in accordance with a format prescribed by the Commission; and

(C) such label shall be displayed in a manner, prescribed by the Commission, to be likely to assist consumers in making purchasing decisions and appropriate to carry out the purposes of this Act. 106 Stat. 2823-24 (to be codified at 42 U.S.C. 6294(c)(8)).

In the NPR the Commission noted that its staff had consulted with industry representatives and interested consumer and environmental groups, who stated that they knew of no manufacturer that presently makes estimated annual operating costs claims or intends to do so. The NPR also stated that unlike other appliances covered by the Rule (e.g., refrigerators), for which EPCA has directed DOE to devise estimated annual cost of operation energy consumption data, DOE does not now have such data available for plumbing products.⁶²

Because EPA 92 does not specify any time frame by which the Commission must prescribe formats and manners of display for labels bearing such claims, the Commission proposed postponing doing so until informed that manufacturers have elected to make covered claims. At that time the Commission would evaluate the types of

claims the manufacturers were proposing to use and then prescribe a format and manner of display accordingly. In the meantime, any cost claims that might be made would be regulated by § 305.4(d) of the Rule, 16 CFR 305.4(d), which states that it is a violation of section 5(a)(1) of the FTC Act to make unsubstantiated water use claims.

The Commission solicited comments on the proposal to defer prescribing a format and asked whether, in fact, any firm is now making or intends to make such claims. Four comments addressed this issue. One comment noted that operating cost claims would necessarily be quite arbitrary.⁶³ A second comment agreed the matter should be postponed, stating that manufacturers would not likely make such claims because of the wide variety of rates and costs throughout the United States.⁶⁴ Another comment agreed with postponing prescribing a format and manner of display, saying the Commission should wait until there is publication of a national test procedure that includes a means of estimating annual operating costs, something that does not now exist.⁶⁵ The last comment also agreed with the postponement, saying that no manufacturers have plans to make such claims and contending that there is no need for such disclosures because consumers will have virtually no water usage options in buying plumbing products due to the new national standards.⁶⁶

In the NPR the Commission also sought comment on the method it should use when it prescribes the format and manner of display. EPA 92 does not specify how the Commission is to prescribe a format and manner of display for such claims. Wherever else in the statute Congress directs the Commission to "prescribe" requirements, it directs the Commission to "prescribe by rule." For these voluntary disclosures, however, Congress only directs that the Commission "shall prescribe" the format and manner of display. Therefore, the Commission could prescribe a format and manner of display for these claims by rule or through an enforcement policy statement or other similar means.

If the Commission were to prescribe display requirements by rule, those manufacturers that voluntarily disclose operating cost information could be liable for monetary civil penalties if

they did not follow the prescribed format and manner of display rules. Manufacturers therefore might be discouraged from voluntarily disclosing such information because even a minor violation of the prescribed format and manner of display could subject them to the possibility of a civil penalty action. In contrast, if the Commission were to prescribe display requirements through an enforcement policy statement, manufacturers who chose voluntarily to disclose operating cost information would not be subject to actions for monetary civil penalties (although section 5(b) administrative proceedings for cease and desist orders, 15 U.S.C. 45(b), and section 13(b) district court proceedings for permanent injunctive relief, 15 U.S.C. 53(b), are remedies that the Commission could pursue). In addition to noting the differences in remedies, the Commission in the NPR stated that an enforcement policy statement could probably be adopted more quickly than a rule and would be easier to amend, if necessary, as manufacturers in the future identified different proposed claims or as other circumstances changed.

The Commission therefore sought comment on whether it should adopt format and manner of display requirements by rule or through an enforcement policy statement or other means. Only one comment addressed this issue and it recommended that the Commission adopt these requirements, when it does so, by policy statement, rather than by rule, because this would allow for easier modifications as circumstances and product technology change.⁶⁷

The Commission has decided to defer prescribing a format and manner of display for voluntary estimated annual operating cost claims for covered plumbing products until it is notified that manufacturers have elected to make such claims. At that time the Commission will announce whether it will prescribe the requirements by rule or through an enforcement policy statement. Accordingly, until such time as the Commission prescribes such requirements, the Act prohibits manufacturers from making such claims. In order to ensure that advertisers have adequate notice of this prohibition, the Commission is amending the Rule to add § 305.11(e)(3). A manufacturer desiring to make a covered operating costs claim may petition the Commission to prescribe such requirements. See 16 CFR 1.25.

⁶² Further, there are many ways annual operating cost claims could be made. For example, claims could be made in terms of dollars and cents spent for water or in terms of amounts of water used. The claims could be based on typical household use (e.g., X number of showers a day by a family of Y number of people) or on a typical shower taking X minutes and using Y amount of water. Differently phrased claims would raise distinct questions regarding the statistical bases on which the claims rest (e.g., claims for showerheads and faucets, where hot water is involved, might involve energy consumption as well as water use costs).

V. Paperwork Reduction Act

The Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, requires government agencies, before promulgating rules or other regulations that would require "collection of information" (*i.e.*, recordkeeping or reporting requirements), to obtain approval from the Office of Management and Budget ("OMB"). Sections 305.8 and 305.15 of the Rule include requirements that plumbing manufacturers report certain data annually to the Commission and that certain records be retained. In the NPR the Commission estimated that the paperwork burden of these requirements on plumbing manufacturers would be approximately 60 hours and sought comment on this estimate.

Four comments addressed this issue. One comment objected to requiring annual reports.⁶⁸ Two comments recommended that the Rule specify exactly what information must be submitted and clarify how it should be submitted.⁶⁹ One comment said that the requirement to report manufacturing start-up dates and discontinuance of particular models would be particularly burdensome.⁷⁰ Another comment said that having to keep reports current with respect to discontinued and new models would be difficult.⁷¹ Two comments suggested that the Commission accept industry directories or the records of trade associations or state regulatory bodies as well as original reports from each manufacturer.⁷² One comment, however, insisted that "[i]f the FTC imposes reporting requirements, these must be submitted by manufacturers and not by a third party or certification organization."⁷³

The reporting requirements cited by the commenters were set by statute. The Rule provision that requires manufacturers to submit starting serial numbers, and other information, is mandated by EPCA and the Commission does not have the discretion to excuse plumbing products manufacturers from this obligation. The Commission, however, will accept manufacturers' reports in any format that contains the necessary information. These could be catalogs with cover letters, industry directories, copies of reports to state regulatory authorities, or original reports.

Because these requirements will involve "collections of information," as that term is defined by the OMB

regulations implementing the Paperwork Reduction Act, the Commission submitted the proposed amendments to OMB for clearance. OMB approved the request and assigned control number 3084-0068 to the information collection requirements. This approval will expire on February 28, 1996, unless it is extended before that date.

VI. Regulatory Flexibility Act

The Commission in the NPR stated that the provisions of the Regulatory Flexibility Act, 5 U.S.C. 603, 604, requiring a regulatory analysis were not applicable to the proposed amendments because the amendments did not appear to have "a significant economic impact on a substantial number of small entities." 58 FR 26720. Based on available information, the Commission in the NPR tentatively concluded that the proposed amendments would have a minimal effect on all business entities within the affected industries, regardless of their size. The Commission stated in the NPR that its staff had been informed by industry representatives that approximately 100 to 120 American companies manufacture the covered plumbing products, but that most of them are not "small entities," as that term is defined in section 601 of the Regulatory Flexibility Act and in the regulations of the Small Business Administration, found in 13 CFR part 121 (1992).

While there are some "small entities" among these companies, the Commission stated in the NPR that the impact of the proposed amendments on those small entities would be minimal. Specifically, the amendments would require manufacturers to submit annual reports to the Commission. Manufacturers, however, are already required by state plumbing and building codes to submit this information to state authorities, and it is contained in other documents routinely generated by manufacturers for their own business purposes. The amendments also would require products to be permanently marked with their water usage rates and require the labeling, certain catalog advertising, and point-of-sale promotional materials of those products to contain various disclosures. Those disclosures, however, are already required by industry standards to appear on product labels.

In the NPR the Commission tentatively concluded that the impact of requiring manufacturers to send to the Commission a duplicate copy of their state reports containing the information required by the amendments and of requiring those manufacturers to

disclose in their catalog and point-of-sale promotional materials the same short disclosures that are already appearing on product labels would be *de minimis* and not, therefore, significant. Further, the Commission stated that the principal economic costs to be imposed on small entities by these amendments are due to the statutorily mandated requirement that these plumbing products be permanently marked and that the proposed regulations would impose few, if any, independent additional costs. The Commission sought comment on these tentative conclusions.

No comments discussed the impact on small entities. Two comments stated that compliance with the amendments would cost hundreds of thousands of dollars per company.⁷⁴ Most of the estimated expenses cited in the comments appear to derive from the requirement that products themselves will have to be permanently marked. That, however, is a statutorily imposed requirement as to which the Commission has no discretion.

On the basis of all the information now available, including the written comments submitted in response to the NPR, the Commission has determined that the amendments will not have a significant impact on a substantial number of small entities. Consequently, the Commission concludes that a regulatory flexibility analysis is not required. In light of the above, the Commission certifies, pursuant to section 605 of the Regulatory Flexibility Act, that the amendments it is adopting will not have a significant impact on a substantial number of small entities.

VII. Regulatory Review

The Commission has implemented a program for regulatory review of all the Commission's current and proposed rules and guides. One of the purposes of the review is to minimize the economic impact of new regulatory actions. As part of that review, the Commission in the NPR requested comments on the costs and benefits of the proposed amendments to add these plumbing products to the Appliance Labeling Rule. No comments specifically addressed the general regulatory review questions the Commission asked. But, based on the discussion in Parts V and VI above of the comments received concerning the Regulatory Flexibility Act and Paperwork Reduction Act issues, the Commission concludes that these amendments will ensure that consumers receive important information about the water use of

plumbing products that can facilitate and encourage conservation efforts. Further, the Commission concludes that these amendments will not have a significant economic impact on covered parties.

VIII. Metric Conversion Act

Section 205b of the Metric Conversion Act, 15 U.S.C. 205b, states that the metric measurement system is the preferred system of weights and measures in the United States. It also requires federal agencies to use the metric system of measurement in all procurements, grants and other business-related activities (including rulemakings), except to the extent that such use is impractical or is likely to cause significant inefficiencies or loss of markets to United States firms. These requirements are also expressed in Executive Order 12770 of July 25, 1991.⁷⁵

EPA 92 specifies that the required disclosures of water usage rates be in terms of gallons. Nothing, however, in EPA 92 or its legislative history suggests that Congress intended to override the Metric Conversion Act for these plumbing products. The Commission in the NPR proposed requiring the water usage rate disclosures to appear in both gallons and liters unless the size of the product would make dual disclosure impractical (in which case only gallons would have to be disclosed).

The Commission solicited comments on this dual disclosure approach. One comment supported this approach, saying it would not be impractical and that it would enhance consumers' knowledge of the metric system.⁷⁶ Another comment took no position, but noted that the dual disclosure approach would be beneficial for North American markets even though in the United States market it would not likely enhance metrication knowledge because U.S. citizens do not normally relate to metric values.⁷⁷ One comment opposed the dual disclosure approach, preferring that one measurement system or the other be required because dual markings will be confusing to inspectors and do little to educate consumers.⁷⁸ Two comments opposed metric disclosures. One contended that consumer awareness and familiarity with metric measurements are insufficient to make their inclusion worthwhile and that requiring dual disclosures will likely result in disclosures in smaller type, rendering the rating information

difficult to read.⁷⁹ The other comment argued that dual disclosures are unnecessary and confusing, contending that plumbing inspectors and consumers do not want or need to know the metric measurements.⁸⁰

The Commission has decided that the amended Rule should require plumbing products disclosures of water usage rates in both gallons and liters unless the size of the product would make dual disclosure impractical. Dual disclosure can help make consumers aware of metric equivalents, and this goal is in accord with the Metric Conversion Act. Although dual disclosures will require that more space be given to the water usage rate data, both the gallons and the liters disclosures will have to be legible. The Rule provides that metric disclosures are not required where the size of the product would make it impractical.

List of Subjects in 16 CFR Part 305

Advertising, Energy conservation, Household appliances, Incorporation by reference, Labeling, Reporting and recordkeeping requirements, Water conservation.

Text of Amendments

For the reasons set out in the preamble, 16 CFR part 305 is amended as follows:

1. The heading of part 305 is revised to read as follows:

PART 305—RULE CONCERNING DISCLOSURES OF INFORMATION ABOUT ENERGY CONSUMPTION AND WATER USE FOR CERTAIN HOME APPLIANCES AND OTHER PRODUCTS REQUIRED UNDER THE ENERGY POLICY AND CONSERVATION ACT.

2. Further, the authority citation for part 305 is revised to read as follows:

Authority: 42 U.S.C. 6294.

3. Further, § 305.1 is amended by revising the heading and paragraphs (a), (b), and (d), to read as follows:

§ 305.1 Scope.

(a) Labeling and/or marking the products with information required by this part indicating their operating cost (or different useful measure of energy consumption) and related information, disclosing their water use rate and related information, or stating their compliance with applicable standards under section 325 of the Energy Policy and Conservation Act, 42 U.S.C. 6295;

(b) Including in printed matter displayed or distributed at the point of

sale of such products, or including in any catalog from which the products may be purchased, information concerning their water use or their energy consumption;

(d) Making representations, in writing or in broadcast advertising, respecting the water use, energy consumption, or energy efficiency of the products, or the cost of water used or energy consumed by the products.

4. Further, § 305.2 is amended by adding new paragraphs (r) through (v), to read as follows:

§ 305.2 Definitions.

(r) *Water use* means the quantity of water flowing through a showerhead, faucet, water closet, or urinal at point of use, determined in accordance with test procedures under section 323 of the Act, 42 U.S.C. 6293.

(s) *ASME* means the American Society of Mechanical Engineers and, as used herein, is the prefix for national standards and codes adopted by the Society.

(t) *ANSI* means the American National Standards Institute and, as used herein, is the prefix for national standards and codes adopted by the Institute.

(u) *Flushometer valve* means a valve attached to a pressured water supply pipe and so designed that, when actuated, it opens the line for direct flow into the fixture at a rate and quantity to operate properly the fixture, and then gradually closes to provide trap reseal in the fixture in order to avoid water hammer. The pipe to which this device is connected is in itself of sufficient size that, when opened, will allow the device to deliver water at a sufficient rate of flow for flushing purposes.

(v) *Flow restricting or controlling spout end device* means an aerator used in a faucet.

5. Further, § 305.3 is amended by adding new paragraphs (k) through (n), to read as follows:

§ 305.3 Description of covered products to which this part applies.

(k) *Showerhead* means any showerhead (including a handheld showerhead), except a safety shower showerhead.

(l) *Faucet* means a lavatory faucet, kitchen faucet, metering faucet, or replacement aerator for a lavatory or kitchen faucet.

(m) *Water closet* means a plumbing fixture having a water-containing receptor which receives liquid and solid

⁷⁵ 56 FR 35801 (July 29, 1991).

⁷⁶ CEC, E-1, 3.

⁷⁷ MI, D-1, 1.

⁷⁸ PPI, D-2, 1.

⁷⁹ ACEEE, D-2, 1-2.

⁸⁰ PMI, D-3, 2.

body waste and, upon actuation, conveys the waste through an exposed integral trap seal into a gravity drainage system, except such term does not include fixtures designed for installation in prisons.

(n) *Urinal* means a plumbing fixture which receives only liquid body waste and, on demand, conveys the waste through a trap seal into a gravity drainage system, except such term does not include fixtures designed for installation in prisons.

6. Further, § 305.4 is amended by revising paragraphs (a)(1), (a)(2), (b)(4), (d), (e) introductory text, (e)(2), and (e)(3), to read as follows:

§ 305.4 Prohibited acts.

(a) * * *

(1) For any manufacturer or private labeler knowingly to distribute in commerce any new covered product unless such covered product is marked and/or labeled in accordance with § 305.11 with a marking, label, flap tag, hang tag, or energy fact sheet which conforms to the provisions of the Act and this part.

(2) For any manufacturer, distributor, retailer, or private labeler knowingly to remove or render illegible any marking or label required to be provided with such product by this part.

* * * * *

(b) * * *

(4) Refuse, when requested by the Commission or its designated representative, to supply at the manufacturer's expense, no more than two of each model of each covered product to any laboratory designated by the Commission for the purpose of ascertaining whether the information in catalogs or set out on the label or marked on the product as required by this part is accurate. This action will be taken only after review of a manufacturer's testing records and an opportunity to revalidate test data has been extended to the manufacturer.

* * * * *

(d) (1) It shall be an unfair or deceptive act or practice in violation of section 5(a)(1) of the Federal Trade Commission Act, 15 U.S.C. 45(a)(1), for any manufacturer, distributor, retailer or private labeler to make any representation in or affecting commerce, in writing (including a representation on a label) or in any broadcast advertisement, with respect to the energy use or efficiency or, in the case of showerheads, faucets, water closets, and urinals, water use of a covered product to which a test procedure is applicable under section 323 of the Act, 42 U.S.C. 6293, or the cost of energy

consumed by such product, unless such product has been tested in accordance with such test procedure and such representation fairly discloses the results of such testing.

(2) Effective 180 days after an amended or new test procedure applicable to a covered product is prescribed or established under section 323(b) of the Act, 42 U.S.C. 6293(b), it shall be an unfair or deceptive act or practice in violation of section 5(a)(1) of the Federal Trade Commission Act, 15 U.S.C. 45(a)(1), for any manufacturer, distributor, retailer or private labeler to make any representation in or affecting commerce, in writing (including a representation on a label) or in any broadcast advertisement, with respect to the energy use or efficiency or, in the case of showerheads, faucets, water closets and urinals, water use of such product, or cost of energy consumed by such product, unless the product has been tested in accordance with such amended or new test procedures and such representation fairly discloses the results of such testing. This requirement is not limited to consumer appliance products covered by the labeling requirements of this Part.

(3) Any manufacturer, distributor, retailer, or private labeler may file a petition with the Commission not later than sixty (60) days before the expiration of the period involved for an extension of the 180 day period. If the Commission finds that the requirements would impose an undue hardship on the petitioner, the Commission may extend the 180 day period with respect to the petitioner up to an additional 180 days.

(e) This part shall not apply to:

* * * * *

(2) Any covered product, other than central air conditioners, pulse combustion and condensing furnaces, fluorescent lamp ballasts, showerheads, faucets, water closets, and urinals, if the manufacture of the product was completed prior to May 19, 1980. Any central air conditioner or any pulse combustion or condensing furnace if its manufacture was completed prior to June 7, 1988. Any fluorescent lamp ballast if its manufacture was completed prior to January 1, 1990. Any showerhead, faucet, water closet or urinal if its manufacture was completed prior to October 25, 1994.

(3) Any catalog or point-of-sale printed material pertaining to any covered products, other than central air conditioners, pulse combustion and condensing furnaces, fluorescent lamp ballasts, showerheads, faucets, water closets, and urinals, that were

distributed prior to May 19, 1980, and any catalog or point-of-sale printed material pertaining to any central air conditioners and pulse combustion and condensing furnaces that were distributed prior to June 7, 1988, and any catalog or point-of-sale printed material pertaining to any fluorescent lamp ballasts that were distributed prior to June 23, 1989, and any catalog or point-of-sale printed material pertaining to any showerheads, faucets, water closets and urinals that were distributed prior to October 25, 1994, except that if representations respecting the energy consumption or energy efficiency or water use of any covered product or other consumer appliance product or cost of energy consumed or water used by such product are included, they are subject to the requirements of paragraph (d) of this section.

* * * * *

7. Further, § 305.5 is revised to read as follows:

§ 305.5 Determinations of estimated annual energy cost and energy efficiency rating and of water use rate.

(a) Procedures for determining the estimated annual energy costs, the energy efficiency ratings, and the power and efficacy factors of covered products are those found in 10 CFR part 430, subpart B, in the following sections:

- (1) Refrigerators and refrigerator-freezers—§ 430.22(a).
- (2) Freezers—§ 430.22(b).
- (3) Dishwashers—§ 430.22(c).
- (4) Water heaters—§ 430.22(e).
- (5) Room air conditioners—§ 430.22(f).
- (6) Clothes washers—§ 430.22(j).
- (7) Central air conditioners and heat pumps—§ 430.22(m).
- (8) Furnaces—§ 430.22(n).
- (9) Fluorescent lamp ballasts—§ 430.22(q).

(b) Procedures for determining the water use rates of covered products are those found in the following standards:

- (1) Showerheads and faucets—ASME A112.18.1M-1989, Plumbing Fixture Fittings. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of ASME A112.18.1M may be obtained from the American Society of Mechanical Engineers, 345 East 47th Street, New York, NY 10017, or may be inspected at the Federal Trade Commission, room 130, 600 Pennsylvania Avenue NW., Washington, DC, or at the Office of the Federal Register, suite 700, 800 North Capitol Street NW., Washington, DC.
- (2) Water closets and urinals—ASME A112.19.2M-1990, Vitreous China

Plumbing Fixtures. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of ASME A112.19.2M may be obtained from the American Society of Mechanical Engineers, 345 East 47th Street, New York, NY 10017, or may be inspected at the Federal Trade Commission, room 130, 600 Pennsylvania Avenue NW., Washington, DC, or at the Office of the Federal Register, suite 700, 800 North Capitol Street NW., Washington, DC.

8. Further, § 305.8 (a) and (b) is revised to read as follows:

§ 305.8 Submission of data.

(a) (1) Each manufacturer of a covered product, except manufacturers of fluorescent lamp ballasts, showerheads, faucets, water closets or urinals, shall submit annually to the Commission a report listing the kilowatt-hour use per year (for refrigerators, refrigerator-freezers and freezers), the energy factor (for clothes washers, dishwashers and water heaters) or the energy efficiency rating (for room air conditioners, central air conditioners, heat pumps and furnaces) for each basic model in current production, determined according to § 305.5 and statistically verified according to § 305.6. The report must also list, for each basic model in current production: the model number; the total energy consumption, determined in accordance with § 305.5, used to calculate the kilowatt-hour per year, energy factor, or energy efficiency rating; the number of tests performed; and its capacity, determined in accordance with § 305.7. For those models that use more than one energy source or more than one cycle, each separate amount of energy consumption, or energy cost, measured in accordance with § 305.5, shall be listed in the report. Appendix J of this part illustrates a suggested reporting format. Starting serial numbers or other numbers identifying the date of manufacture of covered products shall be submitted whenever a new basic model is introduced in the market.

(2) Each manufacturer of a covered fluorescent lamp ballast shall submit annually to the Commission a report for each basic model of fluorescent lamp ballast in current production. The report shall contain the following information:

- (i) Name and address of manufacturer;
- (ii) All trade names under which the fluorescent lamp ballast is marketed;
- (iii) Model number;
- (iv) Starting serial number, date code or other means of identifying the date of manufacture (date of manufacture information must be included with only

the first submission for each basic model);

(v) Nominal input voltage and frequency;

(vi) Ballast efficacy factor; and

(vii) Type (F40T12, F96T12 or F96T12HO) and number of lamp or lamps with which the fluorescent lamp ballast is designed to be used.

(3) Each manufacturer of a covered showerhead, faucet, water closet or urinal shall submit annually to the Commission a report for each basic model of such products in current production. The report shall contain the following information:

- (i) Name and address of manufacturer;
- (ii) All trade names under which the product is marketed;
- (iii) Model number;
- (iv) Starting serial number, date code or other means of identifying the date of manufacture (date of manufacture information must be included with only the first submission for each basic model);

(v) The product's water use, expressed in gallons and liters per flush (gp/Lpf) or gallons and liters per minute (gpm/Lpm) or per cycle (gpc/Lpc) as determined in accordance with § 305.5.

(b) All data required by § 305.8(a), except serial numbers, shall be submitted to the Commission annually, on or before the following dates:

| Products | Deadline for data submission |
|---------------------------------|------------------------------|
| Refrigerators | Aug. 1 |
| Refrigerator-freezers | Aug. 1 |
| Freezers | Aug. 1 |
| Central air conditioners | July 1 |
| Heat pumps | July 1 |
| Dishwashers | June 1 |
| Water heaters | May 1 |
| Room air conditioners | May 1 |
| Furnaces | May 1 |
| Clothes washers | Mar. 1 |
| Fluorescent lamp ballasts | Mar. 1 |
| Showerheads | Mar. 1 |
| Faucets | Mar. 1 |
| Water closets | Mar. 1 |
| Urinals | Mar. 1 |

All revisions to such data (both additions to and deletions from the preceding data) shall be submitted to the Commission as part of the next annual report period. Serial number reports for new covered products are due sixty days after the annual effective mandatory labeling date for each product.

9. Further, § 305.11 is amended by revising the heading of paragraph (a) and by adding a new paragraph (e), to read as follows:

§ 305.11 Labeling for covered products.

(a) Labels for covered products other than fluorescent lamp ballasts, showerheads, faucets, water closets and urinals—* * *

* * * * *

(e) Plumbing fixtures—(1) Showerheads and faucets. Showerheads and faucets shall be marked and labeled as follows:

(i) Each showerhead and flow restricting or controlling spout end device shall bear a permanent legible marking indicating the flow rate, expressed in gallons per minute (gpm) or gallons per cycle (gpc), and the flow rate value shall be the actual flow rate or the maximum flow rate specified by the standards established in subsection (j) of section 325 of the Act, 42 U.S.C. 6295(j). Except where impractical due to the size of the fitting, each flow rate disclosure shall also be given in liters per minute (Lpm) or liters per cycle (Lpc). For purposes of this section, the marking indicating the flow rate will be deemed "legible," in terms of placement, if it is located in close proximity to the manufacturer's identification marking.

(ii) Each showerhead and faucet shall bear a permanent legible marking to identify the manufacturer. This marking shall be the trade name, trademark, or other mark known to identify the manufacturer. Such marking shall be located where it can be seen after installation.

(iii) Each showerhead and faucet shall be marked "A112.18.1M" to demonstrate compliance with the applicable ASME standard. The marking shall be by means of either a permanent mark on the product, a label on the product, or a tag attached to the product.

(iv) The package for each showerhead and faucet shall disclose the manufacturer's name and the model number.

(v) The package or any label attached to the package for each showerhead or faucet shall contain at least the following: "A112.18.1M" and the flow rate expressed in gallons per minute (gpm) or gallons per cycle (gpc), and the flow rate value shall be the actual flow rate or the maximum flow rate specified by the standards established in subsection (j) of section 325 of the Act, 42 U.S.C. 6295(j). Each flow rate disclosure shall also be given in liters per minute (Lpm) or liters per cycle (Lpc).

(2) Water closets and urinals. Water closets and urinals shall be marked and labeled as follows:

(i) Each such fixture (and flushometer valve associated with such fixture) shall

bear a permanent legible marking indicating the flow rate, expressed in gallons per flush (gpf), and the water use value shall be the actual water use or the maximum water use specified by the standards established in subsection (k) of section 325 of the Act, 42 U.S.C. 6295(k). Except where impractical due to the size of the fixture, each flow rate disclosure shall also be given in liters per flush (Lpf). For purposes of this section, the marking indicating the flow rate will be deemed "legible," in terms of placement, if it is located in close proximity to the manufacturer's identification marking.

(ii) Each water closet (and each component of the water closet if the fixture is comprised of two or more components) and urinal shall be marked with the manufacturer's name or trademark or, in the case of private labeling, the name or registered trademark of the customer for whom the unit was manufactured. This mark shall be legible, readily identified, and applied so as to be permanent. The mark shall be located so as to be visible after the fixture is installed, except for fixtures built into or for a counter or cabinet.

(iii) Each water closet (and each component of the water closet if the fixture is comprised of two or more components) and urinal shall be marked at a location determined by the manufacturer with the designation "ASME A112.19.2M" to signify compliance with the applicable standard. This mark need not be permanent, but shall be visible after installation.

(iv) The package, and any labeling attached to the package, for each water closet and urinal shall disclose the flow rate, expressed in gallons per flush (gpf), and the water use value shall be the actual water use or the maximum water use specified by the standards established in subsection (k) of section 325 of the Act, 42 U.S.C. 6295(k). Each flow rate disclosure shall also be given in liters per flush (Lpf).

(v) With respect to any gravity tank-type white 2-piece toilet offered for sale or sold before January 1, 1997, which has a water use greater than 1.6 gallons per flush (gpf), any printed matter distributed or displayed in connection with such product (including packaging and point of sale material, catalog material, and print advertising) shall include, in a conspicuous manner, the words "For Commercial Use Only."

(3) *Annual Operating Cost Claims for Covered Plumbing Products.* Until such time as the Commission has prescribed a format and manner of display for labels conveying estimated annual

operating costs of covered showerheads, faucets, water closets, and urinals or ranges of estimated annual operating costs for the types or classes of such plumbing products, the Act prohibits manufacturers from making such representations on the labels of such covered products. 42 U.S.C. 6294(c)(8). A manufacturer desiring that the Commission prescribe a label format and manner of display may petition the Commission to do so. See 16 CFR 1.25.

10. Further, § 305.13 is amended by revising paragraph (a), to read as follows:

§ 305.13 Promotional material displayed or distributed at point of sale.

(a) (1) Any manufacturer, distributor, retailer, or private labeler who prepares printed material for display or distribution at point of sale concerning a covered product (except fluorescent lamp ballasts, showerheads, faucets, water closets, and urinals) shall clearly and conspicuously include in such printed material the following required disclosure:

Before purchasing this appliance, read important energy cost and efficiency information available from your retailer.

(2) Any manufacturer, distributor, retailer, or private labeler who prepares printed material for display or distribution at point-of-sale concerning a covered showerhead, faucet, water closet, or urinal shall clearly and conspicuously include in such printed material the product's water use, expressed in gallons and liters per minute (gpm/Lpm) or per cycle (gpc/Lpc) or gallons and liters per flush (gpf/Lpf) as specified in § 305.11(e).

11. Further, § 305.14 is amended by revising paragraph (a) introductory text and by adding a new paragraph (d), to read as follows:

§ 305.14 Catalogs.

(a) Any manufacturer, distributor, retailer, or private labeler who advertises a covered product (except fluorescent lamp ballasts, showerheads, faucets, water closets or urinals) in a catalog, from which it may be purchased, shall include in such catalog, on each page that lists the covered product, the following information required to be disclosed on the label:

(d) Any manufacturer, distributor, retailer, or private labeler who advertises a covered showerhead, faucet, water closet or urinal in a catalog, from which it may be purchased, shall include in such

catalog, on each page that lists the covered product, the product's water use, expressed in gallons and liters per minute (gpm/Lpm) or per cycle (gpc/Lpc) or gallons and liters per flush (gpf/Lpf) as specified in § 305.11(e).

12. Further, § 305.15 is amended by revising paragraph (b), to read as follows:

§ 305.15 Test data records.

(b) Upon notification by the Commission or its designated representative, a manufacturer or private labeler shall provide, within 30 days of the date of such request, the underlying test data from which the water use or energy consumption rate, the energy efficiency rating, or the estimated annual cost of using each basic model was derived.

By direction of the Commission.

Donald S. Clark,

Secretary.

[FR Doc. 93-26195 Filed 10-22-93; 8:45 am]

BILLING CODE 6750-01-P

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 1

Prohibition on Insider Trading

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rule.

SUMMARY: The Commodity Futures Trading Commission ("Commission") has adopted amendments to its regulations necessary to effectuate section 214 of the Futures Trading Practices Act of 1992 ("FTPA"), which makes it a felony for employees and governing members of self-regulatory organizations ("SROs") to disclose or trade on inside information in violation of a Commission regulation and for tippees of such insiders to trade on inside information so disclosed. The amendments also modify the regulation's definitions of "material information," "linked exchange," and "non-public information."

DATES: The amendments will become effective on November 24, 1993. The SROs will have until January 24, 1994 to submit to the Commission any rule amendments necessary to conform their rules to revised Regulation 1.59.

FOR FURTHER INFORMATION CONTACT: Elizabeth A. Patterson, Special Counsel, 2033 K Street, NW., Washington, DC 20581. Telephone: (202) 254-8955.

SUPPLEMENTARY INFORMATION:

I. Introduction

On August 23, 1993, the Commission published for public comment in the *Federal Register* proposed amendments to existing Commission Regulation 1.59, 17 CFR 1.59.¹ The proposed amendments are responsive to Section 214 of the FTPA, Public Law No. 102-546, 106 Stat. 3590 (1992). Section 214 of the FTPA amends section 9 of the Commodity Exchange Act, 7 U.S.C. 13, by creating a felony prohibition of certain activities of futures industry insiders and their tippees. In particular, Section 214 makes it a felony for any person who is an employee of, a member of the governing board of, or a member of any committee of, a board of trade, a contract market, or a registered futures association, in violation of a regulation issued by the Commission, willfully and knowingly (1) to trade for such person's own account, or for or on behalf of any other account, in contracts for future delivery or options thereon on the basis of any material, non-public information obtained through special access related to the performance of such person's official duties as an employee or member or (2) to disclose for any purpose inconsistent with the performance of such person's official duties any material, non-public information obtained through special access related to the performance of such duties. Section 214 also makes it a felony for any person willfully and knowingly to trade in futures or options for such person's own account, or for or

on behalf of any account, on the basis of any material, non-public information that such person knows was obtained in violation of the aforementioned insider disclosure prohibition.²

The Commission proposed to amend Regulation 1.59 in four respects.³ First, the Commission proposed to create a new paragraph (e) to Regulation 1.59. This paragraph would have contained all the direct prohibitions on insider and tippee activity necessary to effectuate section 214 of the FTPA. Second, the Commission proposed to add to Regulation 1.59 a new paragraph (d), which would have required SROs to adopt rules prohibiting persons within their disciplinary jurisdiction from trading on inside information disclosed by SRO employees or governing board or committee members. This new SRO rulemaking requirement would have paralleled the new tippee liability provision contained in section 214 of the FTPA, but was intended to limit an SRO's obligation to persons within the scope of its jurisdiction as an SRO. Third, the Commission proposed to move the text of its existing prohibition on employee disclosures into the regulation's provision requiring SROs to promulgate rules prohibiting SRO employees from making disclosures of inside information. As a result of this revision, paragraph (b) would have contained only requirements directing SROs to maintain in effect rules governing conduct of SRO employees possessing inside information. Fourth, the Commission proposed to amend several of the definitions in paragraph

(a) of the existing regulation. These amendments, which would have revised the definitions of the terms "material information" and "linked exchange," would have taken into account several recent developments in the futures industry.

The Commission received nine written comments in response to the proposed amendments. The commenters comprised four contract markets (the Chicago Board of Trade ("CBT"), the Chicago Mercantile Exchange ("CME"), the Coffee, Sugar & Cocoa Exchange, Inc. ("CSC"), and the New York Mercantile Exchange ("NYMEX")), a futures clearing organization (the Board of Trade Clearing Corporation ("BOTCC")), three commodity industry associations (the Futures Industry Association ("FIA"), the National Grain and Feed Association ("NGFA"), and the National Grain Trade Council ("NGTC")), and a group of individuals representing various agricultural associations. The comments received on particular aspects of the Commission's proposal are discussed below in the context of the specific rule provision to which they pertain. The Commission has carefully reviewed each of these comments and, based upon that review and its reconsideration of the proposed amendments, has now adopted final amendments which it believes are responsive to the concerns raised by commenters and the statutory objectives of this rulemaking. The final revisions to Regulation 1.59 are summarized in the following table:

| Topic | Old section No. | New section No. | Final disposition |
|------------------------------------|-----------------|-----------------|-------------------|
| Definitions | (a) | (a) | Unchanged. |
| Self-regulatory organization | (1) | (1) | Unchanged. |
| Employee | (2) | (2) | Unchanged. |
| Material Information | (3) | (3) | Revised. |
| Non-public information | (4) | (4) | Unchanged. |
| Linked Exchange | (5) | (5) | Revised. |
| Commodity Interest | (6) | (6) | Unchanged. |
| Related Commodity Interest | (7) | (7) | Unchanged. |
| Pooled Investment Vehicle | (8) | (8) | Unchanged. |
| Employee conduct | (b) | (b) | Retitled. |
| SRO rules | (2)(i) | (1) | Deleted. |
| Employee trading | (A) | (i) | Unchanged. |
| Employee disclosures | (B) | (ii) | Revised. |
| Exemptions | (ii) | (2) | Unchanged. |
| Pooled investments | (A) | (i) | Unchanged. |
| Miscellaneous | (B) | (ii) | Unchanged. |
| Governing members; SRO rules | (c) | (c) | Retitled. |
| Prohibited conduct | | (d) | New. |

¹ 58 FR 44470 (August 23, 1993).

² Under the terms of section 214, any violation of the section's prohibitions is punishable by a fine of not more than \$500,000 plus any profits realized through the particular violation, or imprisonment for not more than five years, or both, together with the costs of prosecution.

³ Regulation 1.59, in its existing form, has been in effect since March of 1988. Existing Regulation 1.59 directly prohibits SRO employees from disclosing material, non-public information obtained through SRO employment where the employee has or should have a reasonable expectation that the information may assist another

person in trading. The regulation also directs SROs to maintain in effect rules proscribing disclosure of or trading based on inside information by SRO employees and governing members.

II. Discussion of Amendments

A. Prohibitions on Insider Trading

1. Proposed Paragraph (e)

As noted above, the Commission proposed to create a new paragraph (e) of Commission Regulation 1.59 which would have contained the prohibitory language necessary to effectuate section 214 of the FTPA. In particular, proposed paragraph (e)(1) would have provided that:

* * * No person who is an employee of, a member of a governing board of, or a member of any committee of [an SRO] shall: (i) trade for such person's own account, or for or on behalf of any other account, in any commodity interest, on the basis of any material, non-public information obtained through special access related to the performance of such person's official duties as an employee or member, or (ii) disclose for any purpose inconsistent with the performance of such person's official duties as an employee or member any material, non-public information obtained through special access related to the performance of such duties.

Proposed paragraph (e)(2) provided that:

* * * No person shall trade for such person's own account, or for or on behalf of any account, in any commodity interest, on the basis of any material, non-public information that such person knows was obtained in violation of paragraph (e)(1) from an employee of, a member of the governing board of, or a member of any committee of [an SRO].

The language of proposed paragraph (e) tracked very closely the language of the statute. However, the Commission omitted from the proposed regulation the words "willfully" and "knowingly" which modify the felony prohibitions in the statute. In addition, where the statute refers to employees and members of governing boards of and committees of boards of trade, contract markets, and registered futures associations, the Commission proposed to substitute references to employees and members of governing boards of and committees of self-regulatory organizations.⁴ Finally, the Commission proposed to replace the statute's references to trading "in contracts for future delivery or options thereon" with references to trading "in commodity interests."⁵

⁴ The term "self-regulatory organization," which is used in the existing regulation, includes not only boards of trade, contract markets, and registered futures associations, but also clearing organizations. See existing paragraph (a)(1) of Regulation 1.59.

⁵ Under existing paragraph (a)(6) of Regulation 1.59, the term "commodity interest" includes not only commodity futures and options traded on contract markets, but also commodity futures and options traded on linked exchanges and cash commodities traded on contract markets.

2. Comments Received

CBT, CME, BOTCC, FIA, NGFA, NGTC, and the group of individual agricultural representatives addressed the substance of proposed paragraph (e). In general, the commenters expressed concern about the breadth of the prohibitions as proposed, stating in particular that the language went beyond that used in delineating the criminal violation of section 214 of the FTPA.

The commenters mentioned particularly the absence of the statute's "willful and knowing" standard from the proposed prohibitions, which would be enforced through civil or administrative action by the Commission. BOTCC, CBT, and CME stated that the absence of the phrase "willfully and knowingly" could result in negligent or inadvertent conduct being encompassed by the prohibitions. The commenters argued that this was inappropriate in light of the relatively severe sanctions that the Commission can obtain in civil proceedings.⁶ CBT, BOTCC, and FIA contrasted the apparent negligence standard with the scienter standard used in securities insider trading cases, arguing that the same standard should be applied in both industries.

BOTCC, CBT, NGFA, NGTC, and FIA also contested the Commission's proposal to include the term "commodity interest" in the proposed language of paragraph (e). The commenters took particular exception to the fact that the term "commodity interest" defined in existing paragraph (a)(6), includes certain cash commodities. They stated that the inclusion of cash commodities would be in conflict with the intent of Congress, given that section 214 of the FTPA prohibits insider trading only in futures and options contracts.

In sum, the commenters stated that the absence of a willful and knowing standard, in combination with the broad range of persons and activities covered by the proposed paragraph (e) provisions, would result in an overly broad regulation. This, the commenters argued, in turn would discourage potential industry volunteers from serving on SRO governing boards and committees. NGFA expressed concern that the trading prohibitions, as proposed, would discourage persons who trade in both commodity futures

⁶ In this connection, the commenters pointed to sections 6 (c) and (d) of the Commodity Exchange Act, which permit the Commission, in civil actions, to impose a registration revocation or suspension, a trading ban, and/or a fine of \$100,000 or triple the monetary gain for each violation, plus restitution, and to issue a cease and desist order.

and related cash commodities from serving on SRO governing boards and committees because such service would put both the volunteers and their cash customers, potential tippees, in jeopardy of running afoul of Regulation 1.59.⁷

This result, they argued, would be at odds with the express intentions of Congress, voiced in section 206 of the FTPA, to encourage broader participation of non-SRO members on SRO governing boards and major disciplinary committees.

3. Disposition

Having thoroughly reviewed the various comments addressing the prohibitions contained in proposed paragraph (e), the Commission continues to believe that the scope of the proposed language is appropriate. Therefore, the Commission has determined not to revise proposed paragraph (e).⁸ The Commission believes that the language of paragraph (e), as proposed, is consistent with Congress' general intent to strengthen insider trading prohibitions in futures.

In particular, the Commission continues to believe that omitting the statute's "willfully and knowingly" standard from Regulation 1.59 is appropriate. As the Commission noted in the proposing release, the words "willfully" and "knowingly" in section 214 of the FTPA are required for the prohibited conduct to constitute a felony, but are not necessary where civil liability is sought for insider trading activities.⁹

As discussed above, the BOTCC, CBT and CME assert that the absence of the "willful and knowing" standard would mean that SRO insiders could be held liable in Commission civil or administrative actions for mere negligent or inadvertent conduct. The absence of "willful and knowing" from the final regulation will not have that result. As the Commission noted in its proposing release, the prohibitions of proposed paragraph (e) cover essentially the same conduct as does existing Regulation 1.59, which includes no "willful and knowing" standard. The

⁷ NGFA and NGTC also urged the Commission to delete the existing reference to "present or anticipated cash positions" from the existing definition of "material information" because they believed that the continued inclusion of this language likewise would have a chilling effect on cash market participants' involvement in SRO governance.

⁸ Due to the Commission's determination not to make final proposed paragraph (d), proposed paragraph (e) has been renumbered paragraph (d) of the final regulation. See footnote 18 below and the related text.

⁹ 58 FR 44471.

Commission is unaware of instances of SRO disciplinary or other actions against SRO insiders based on inadvertent conduct. Nor has the Commission brought any such action. The language of the regulation itself provides ample protection against the possibility of enforcement action based solely on inadvertent conduct.¹⁰ In any event, the Commission, for purposes of Regulation 1.59, intends to apply a scienter standard in evaluating whether SRO insiders or tippees disclosed or traded on the basis of material, non-public information. In so doing, the Commission will look at the facts of any case before it. The Commission believes that scienter is present where an individual commits a wrongful act intentionally or with reckless disregard for his duties under the Act.¹¹

The Commission also continues to believe that prohibiting insider trading in "commodity interests" is appropriate. As noted in the proposing release, the term "commodity interest" is used in existing Regulation 1.59 and, therefore, use of the term in paragraph (e) would provide internal consistency within the amended regulation. The Commission notes that the definition of "commodity interest" found in paragraph (a)(6) does not and would not result in the restriction of trading in *all* cash commodities, but only in those "traded on or subject to the rules of a board of trade which has been designated as a contract market."¹² Although Congress was fully aware of the existence of Regulation 1.59 and of its scope when it adopted section 214 of the FTPA, the legislative record is devoid of any

indication that Congress intended that the Commission delete the regulation or amend its definitions. Therefore, the Commission does not agree that existing Regulation 1.59 is inconsistent with Congressional intent.

The Commission is especially sensitive to the concern of FIA and others that the Commission's insider trading prohibitions might create a disincentive to service on SRO governing boards and committees. The Commission agrees that such a result would be at odds with the intention of Congress, expressed in Section 206 of the FTPA, to encourage SRO board participation by non-SRO-member futures experts and other qualified individuals. The Commission does not believe, however, that the regulatory prohibitions, as proposed and as intended to be interpreted by the Commission, should have a chilling effect on potential volunteers for SRO service.

The Commission notes that not all potential trading activities or disclosures would be prohibited under revised Regulation 1.59. SRO employees and governing members would be prohibited from trading on or disclosing only material, non-public information obtained in their official capacities.¹³

Thus an individual who obtained information through his or her duties at an SRO could disclose or trade on such information if it were generally available to the trading public or would not be considered important by a reasonable person in making a trading decision.

More importantly, the Commission wishes to underscore that, with respect to each provision identified by the commenters and discussed above, the conduct proscribed "is essentially the same as that prohibited under existing Regulation 1.59."¹⁴ No commenter has argued, and indeed the experience under existing Regulation 1.59 offers no basis to conclude, that the existing regulation has had a chilling effect on participation in SRO self-governance. Based on this record, the Commission has clarified the standard of proof in this discussion, but does not believe

¹³ For this reason the Commission believes that NGFA's and NGTC's concern about the continued inclusion in the "material information" definition of the phrase "present and anticipated cash positions" is misplaced. Under final Regulation 1.59, cash market participants serving on SRO governing boards would be prohibited from trading based on only that non-public cash market information which was obtained through their official duties at the SROs. The Regulation would not prohibit trading based on cash information obtained through other sources.

¹⁴ 58 FR 44474.

there is any basis to alter the provisions of existing Regulation 1.59.

B. Tippee Liability; SRO Rules

1. Proposed Paragraph (d)

In connection with paragraph (e)'s proposed prohibition on insider trading by tippees, the Commission proposed to create a new paragraph (d) of Regulation 1.59 which would have directed SROs to adopt rules prohibiting tippees of SRO insiders from trading on inside information. In particular, paragraph (d) would have required SROs to maintain in effect rules providing that no member of, employee of a member of, employee of, member of the governing board of, member of any committee of, or other person within the disciplinary jurisdiction of an SRO, could trade for such person's own account, or for or on behalf of any account, in any commodity interest, on the basis of any material, non-public information that such person knew was obtained in violation of newly renumbered paragraph (b)(1) or existing paragraph (c) of Regulation 1.59 from an employee of, a member of the governing board of, or a member of any committee of an SRO.¹⁵ The Commission believed that such a requirement would be consistent with both the intent of Congress to prohibit trading by tippees of SRO insiders and with the scheme of the existing regulations which is based on the principle that SROs, which are the first line of enforcement of rules relative to exchange operation, have a duty to the public and to their members to prevent misuse of material, non-public information.¹⁶

2. Comments Received

All four exchange commenters and BOTCC commented on the

¹⁵ Renumbered paragraph (b)(1) (existing paragraph (b)(2)(i)) provides, in pertinent part, that each SRO must maintain in effect rules that, at a minimum, prohibit: "Employees of the self-regulatory organization from trading, directly or indirectly, in any commodity interest traded on or cleared by the employing contract market or clearing organization, in any related commodity interest, and in any commodity interest traded on or cleared by contract markets or clearing organizations other than the employing self-regulatory organization where the employee has access to material non-public information concerning such commodity interest."

Existing paragraph (c) requires that each SRO adopt rules providing that: " * * * no member of such self-regulatory organization governing board or of a committee of such self-regulatory organization shall use or disclose, for any purpose other than the performance of such member's official duties as a governing board or committee member, material, non-public information obtained as a result of such member's participation on any committee or governing board of such self-regulatory organization."

¹⁶ 50 FR 24533, 24535 (June 11, 1985).

¹⁰ For example, as discussed elsewhere in this release, trading on or disclosing information would be prohibited only if the information were non-public, *i.e.*, had not been disseminated in a manner that made it generally available to the trading public, and material, *i.e.*, was such that a reasonable person would consider it important in making a trading decision. In addition, an SRO employee or governing member would be foreclosed from using information only if it were obtained through special access related to his or her official duties. Moreover, the regulation prohibits trading "on the basis" of insider information, not trades that otherwise would have been entered for legitimate purposes. *Cf. Freeman v. Decio*, 584 F. 2d 186, 197 (7th Cir. 1978) (in securities insider trading case, district court correctly considered evidence of past pattern and practices of trading in determining whether trading at issue was "on the basis" of inside information).

¹¹ See generally, *Sundstrand Corp. v. Sun Chemical Corp.*, 553 F. 2d 1033 (7th Cir. 1977), *cert. denied*, 434 U.S. 875 (1977); *Hollinger v. Titan Capital Corp.*, 914 F. 2d 1564 (9th Cir. 1990); *First Interstate Bank of Denver, N.A. v. Pring*, 969 F. 2d 891 (10th Cir. 1992), *cert. granted*, 113 S. Ct. 1042 (U.S. January 19, 1993) (No. 92-854).

¹² Currently, cash commodities are actively traded on the Minneapolis Grain Exchange. In addition, CBT is making its Project A automated trading system available for the listing of cash commodity products.

Commission's proposal to require SROs to maintain in effect rules addressing tippee liability. CSC and CBT argued that existing SRO rules addressing disclosure of material, non-public information by SRO employees and governing members are sufficient to discourage the use of inside information and are more readily susceptible than the proposed SRO tippee provision to surveillance and enforcement by SROs directly. All five commenters generally stated that SRO rules adopted pursuant to the paragraph (d) requirement would be difficult to enforce. The commenters contended that, as drafted, the provision would necessitate that each SRO develop programs to monitor not only for trading on that SRO based on the SRO's inside information but also for trading on other SROs based on information disclosed by other SRO's insiders. Moreover, stated CSC and CME, only employees and members of those exchanges fall within their disciplinary jurisdictions. Thus, argued CSC and CME, the scope of both the activities and persons required to be monitored under paragraph (d) would exceed the limitations of the regulatory capabilities and enforcement resources of the SROs. These commenters believed that "the responsibility for prohibiting tippee trading and enforcing violations thereof should reside with the Commission, which, unlike individual SROs, has both the ability to conduct surveillance across all commodity markets and the disciplinary jurisdiction over trading by any tippee in any commodity interest."¹⁷

3. Disposition

The Commission believes that the comments received on this point have merit. The Commission recognizes that the SROs have limited disciplinary jurisdictions. Moreover, the Commission recognizes that the enforcement resources of the SROs are most appropriately spent in monitoring the conduct of their members and employees as it pertains to activities on their own markets. The Commission also agrees that it is better situated than the SROs to monitor for tippee trading across the various markets. Accordingly, the Commission has determined not to make final the proposed requirement that SROs adopt rules prohibiting trading by tippees of SRO insiders.¹⁸

¹⁷ Letter of September 22, 1993 from Carl A. Royal, Senior Vice President and General Counsel, CME, to Jean A. Webb, Secretary of the Commission, at p. 4.

¹⁸ As a result of this deletion the "Prohibited Conduct" provision which had been denominated paragraph (e) in the proposed amendments has been renumbered paragraph (d) in the final regulation.

C. Activities of SRO Employees; SRO Rules

1. Proposed Amendments to Paragraph (b)

The Commission proposed several amendments to paragraph (b) of Regulation 1.59 for purposes of restructuring and clarifying that paragraph. First, the Commission proposed to delete existing paragraph (b)(1), which contains the Commission's current prohibition on disclosures of inside information by SRO employees, in favor of the new prohibition on employee disclosures required by the statute and included in new paragraph (e). Second, the Commission proposed to amend existing paragraph (b)(2)(i)(B), which requires SROs to adopt rules that prohibit disclosures of material, non-public information by SRO employees, by incorporating the text of the employee disclosure prohibition being deleted from paragraph (b)(1).¹⁹ Third, the Commission proposed to amend paragraph (b)(2)(i)(A), which requires SROs to adopt rules that prohibit certain trading by SRO employees where the employee has access to inside information, by adding a reference to "linked exchanges."²⁰

2. Comments Received

CBT commented that the provisions of paragraph (b) requiring SROs to maintain in effect rules prohibiting SRO employees from trading on or disclosing inside information should be modified to include the "willfully and knowingly" standard of the Section 214 of the FTIP.

3. Disposition

The Commission has determined not to further revise the paragraph (b) provisions. As discussed in greater detail above, the phrase "willfully and knowingly" is intended to address the degree of culpability necessary to prove

¹⁹ The existing language of paragraph (b)(2)(i)(B) incorporates the paragraph (b)(1) prohibition by reference. Because the Commission proposed to delete that prohibition, the Commission also proposed to delete the cross-reference to paragraph (b)(1). In place of the cross-reference, the Commission proposed to insert the text of the existing paragraph (b)(1) prohibition into the SRO requirement.

²⁰ "Linked exchange" is defined in paragraph (a)(5) of Regulation 1.59 and is discussed below.

The Commission also proposed to make several non-substantive revisions to paragraph (b). The Commission proposed to add the words "self-regulatory organization rules" to the title of paragraph (b) for ease of reference. (The same change was proposed for the title of paragraph (c).) In addition, the provisions of paragraph (b) which remained after the deletion of existing paragraph (b)(1) would have been renumbered to reflect the proposed amendments.

a felony and is not necessary for non-criminal liability.

D. Definitions

1. Linked Exchanges

a. *Proposed revisions to paragraph (a)(5).* The Commission proposed to revise the existing definition of the term "linked exchange" found in paragraph (a)(5) of Commission Regulation 1.59. The Commission proposed to revise the definition in order to take into account several recent developments in the futures industry. These developments are: the cross-margining of futures and non-futures positions cleared by various clearing organizations, the acceptance of additional types of assets as performance bond margin by certain futures clearing organizations, and the cross-exchange trading of products of foreign exchanges through electronic means.

Currently, the definition of "linked exchange" includes only an exchange outside the U.S. which has an agreement with an exchange within the U.S. for mutual offset of contracts.²¹ The Commission proposed to add to this definition, first: "any board of trade, exchange, or market outside the United States, its territories or possessions, the products of which are listed on a United States contract market or a trading facility thereof." This new language was intended to include a foreign exchange such as the Marche' a Terme International de France ("MATIF"), the products of which are available for trading by CME members through the Globex electronic trading system. As a result of this change and the fact that, as discussed further below, the Commission proposed to add references to "linked exchanges" to the definition of "material information," the definition of "material information," would have encompassed regulatory actions of foreign exchanges with products listed on U.S. trading facilities. Similarly, "material information" would have included information regarding the positions and financial condition, etc., of members of such foreign exchanges.

²¹ The term "linked exchange" is used in the existing regulation in the definitions of the terms "commodity interest" and "related commodity interest." The term "commodity interest" is defined as "any commodity futures or commodity option contract traded on or subject to the rules of a contract market or linked exchange, or cash commodities traded on or subject to the rules of a board of trade which has been designated as a contract market." (Existing paragraph (a)(6) of Regulation 1.59.) The term "related commodity interest" refers to a commodity interest traded on a contract market or linked exchange with respect to which an employing SRO has afforded special margin treatment between that commodity interest and one traded on the SRO. (Existing paragraph (a)(7) of Regulation 1.59.)

This modification of the term "linked exchange" also would have resulted in a prohibition on trading by SRO employees, SRO governing members, and tippees on certain inside information in futures and futures options listed on a foreign exchange which fell within the definition because a futures product traded on a "linked exchange" would be a "commodity interest" which such individuals would be prohibited from trading under new paragraph (e) of this regulation.

Second, the Commission proposed to amend the term "linked exchange" to include "any securities exchange, the products of which are held as margin in a commodity account or cleared by a securities clearing organization pursuant to a cross-margining arrangement." This new language was intended to encompass a securities exchange, such as the New York Stock Exchange ("NYSE"), the products of which are deposited as margin against futures positions, or a securities option exchange, such as the Chicago Board Options Exchange ("CBOE"), the products of which are held pursuant to a cross-margining arrangement. Again, this revision, in turn, would have modified the "material information" definition to include information concerning regulatory actions of such exchanges or information related to their members. This particular revision would not have resulted in the application of the regulation's trading prohibitions to additional markets because the term "commodity interest" does not include securities products and, therefore, the trading prohibitions of new paragraph (e) would not apply to such products.

Third, the Commission proposed to include in the definition of "linked exchange" clearing organizations of the exchanges listed in the definition. Thus, for example, the Options Clearing Corporation ("OCC"), which clears CBOE options held in cross-margining accounts, would have fallen within the definition of "linked exchange." As a result of this addition, information related to clearing organizations of the foreign exchanges and securities exchanges and their members mentioned above would have been considered "material" within the meaning of paragraph (a)(3), as would have information related to their members. Due to the definition of "commodity interest," the scope of the regulation's trading prohibitions would have been modified as a result of this amendment only to the extent that such a clearing organization cleared for a foreign exchange with a trading link to a U.S. exchange.

b. *Comments received.* BOTCC, CBT, CME, and NGFA commented regarding the Commission's proposal to include in the definition of "linked exchange" foreign exchanges the products of which are listed on U.S. exchanges or trading facilities thereof. These commenters stated that the proposed amendment would go beyond what Congress intended. NGFA believed that this revision would unnecessarily burden innovative systems such as Globex. CME believed that the previously-included reference to mutual offset arrangements in paragraph (a)(5) was appropriate because, for example, material inside information obtained by a CME official regarding a CME contract theoretically could be exploited by trading in a fungible SIMEX contract. CME argued, however, that the danger of insider trading which the Commission intended to address through the proposed language is "extremely remote" in the only existing program in which the products of a foreign exchange are listed on the facilities of a U.S. exchange (*i.e.*, the CME-MATIF Globex link). According to CME, only if a foreign market lists a contract that is fungible with one listed by the related U.S. contract market is there a significant risk of inside information being used to advantage. CME contended, moreover, that a CME insider would have access through Globex to no material information regarding MATIF contracts because MATIF contracts traded on Globex are matched on a European host computer by Reuters and cleared by MATIF.

With regard to the second proposed addition to the definition of "linked exchange," that which would take in securities exchanges, the products of which are accepted as margin by a commodity exchange or clearing house or cleared by a securities clearing organization pursuant to a cross-margining arrangement, BOTCC, CBT, and CME commented that the proposal went beyond what Congress intended in promulgating Section 214 of the FTPA. CME further stated that, because the proposed reference to "property deposited as margin" in the "material information" definition was inappropriate and therefore should be deleted, this reference to securities exchanges which trade those products deposited as margin was unnecessary.

c. *Disposition.* The Commission has determined to make final its proposed amendments to the definition of "linked exchange." The comments received on this matter notwithstanding, the Commission continues to believe that the proposed additions to paragraph (a)(5) are appropriate and necessary

acknowledgements of recent developments in the futures industry.

With respect to the first proposed addition, that is, the reference to foreign exchanges the products of which are listed on a domestic exchange or trading facility thereof, the Commission took special note of CME's comments, since that Exchange's affiliation with MATIF through Globex was intended to be addressed by the proposed revision. The Commission agrees with CME's contention that fungible contracts which form the basis for international exchange linkages give rise to greater risk with respect to insider trading issues than do non-fungible contracts traded on a shared trading system. The Commission continues to believe, however, that it is quite possible that an SRO insider might, through his SRO duties, become aware of some information related to the regulatory activities of a foreign exchange with which the SRO had a relationship or about the financial status of one of the foreign exchange's members which could be considered material in making a trading decision regarding a futures product of the SRO or the foreign exchange. The Commission further believes that it is important for both the Commission and the SROs to have express authority to take action in this area. The Commission therefore has determined to retain this proposed revision.

The Commission does not believe that this amendment should impede innovation with respect to foreign linkages. Here again, an SRO employee or governing member would be prohibited from disclosing or trading on the basis of inside information only if that information were "material," *i.e.*, if it would be considered important by a reasonable person in deciding whether to trade a particular commodity interest.²²

With respect to the proposal to include within the definition of "linked exchanges" securities exchanges the products of which are deposited as futures margin or cleared pursuant to a cross-margining arrangement, the Commission believes, as discussed below, that information regarding the regulatory actions of such exchanges or the financial condition of their members could, in certain circumstances, be material to a trading decision. For this reason, the Commission has determined to retain this provision.

2. "Material Information"

a. *Proposed revisions to paragraph (a)(3).* The Commission proposed to

²² See existing paragraph (a)(3).

amend paragraph (a)(3) by adding to the non-exclusive list of information that would be considered "material" in making a trading decision a reference to property deposited as margin by members. This addition was intended to make clear that information regarding a member's deposits of certain property as margin, in particular his deposits of stock, would be considered "material." The Commission intended to address, for example, a situation in which an exchange employee sought to trade in stock index futures based on knowledge, obtained through his position at the exchange, that a large number of clearing members had deposited a substantial number of shares of a particular stock as margin and that the stock price was likely to fall because those positions were being liquidated. In making this proposal, the Commission invited comment regarding the likelihood that an SRO employee or governing member possessing information concerning a member's margin assets would be able to profit from trading in related futures based on that information.

The Commission also proposed to amend the definition of "material information" by incorporating references to "linked exchanges." The inclusion of these references was intended to clarify that information regarding members of linked exchanges and information relating to regulatory actions or proposed regulatory actions of linked exchanges would be included in the definition.

b. *Comments received.* NYMEX, CBT, CME, and BOTCC responded to the Commission's particular request for comment regarding the addition of the phrase "property deposited as margin" to the "material information" definition. All four of these comments argued that it is highly unlikely that an SRO employee or governing member would be able to profit by trading based on information regarding a clearing member's margin assets or the proposed liquidation thereof. CBT, CME, and BOTCC believed it improbable that liquidation of stock deposited by a clearing member would have a material impact on the price of that stock and, in turn, on the price of a stock index futures contract. Moreover, the commenters noted that the amount of Treasury securities deposited as margin is small compared to the total volume of Treasury securities in the system and that therefore, an insider's knowledge of the liquidation of a clearing member's Treasury securities should not advantage that insider in his trading in Treasury securities. BOTCC also argued that the inclusion of the reference to

"property deposited as margin" in the "material information" definition would imply that such information would always be material in making a trading decision. Finally, BOTCC stated its belief that to the extent that information concerning a clearing member's margin assets would materially affect a reasonable person's trading decisions, the existing definition would take in such information.

With respect to the proposed addition of the term "linked exchange" to the "material information" definition, CBT and BOTCC argued that the addition would have an overly broad regulatory effect. They stated that it is questionable whether information regarding the positions or financial condition of members of foreign exchanges with which U.S. exchanges have trading relationships would be material to domestic trading decisions. Here again, BOTCC argued that any such information that would materially affect trading decisions would already be included in the general definition of "material information."

c. *Disposition.* The Commission has considered the extensive comments regarding the proposed addition of the phrase "property deposited as margin" to the "material information" definition. The Commission is persuaded that in most instances information regarding property deposited as margin by clearing members would be of little value in making futures-related trading decisions. Accordingly, the Commission has deleted the reference to such property from paragraph (a)(3). The Commission notes, however, that under particular circumstances such information could be considered important in making a trading decision. The Commission therefore, wishes to make clear that information about property deposited as margin would still be considered "material" within the meaning of paragraph (a)(3) if the information, "were it publicly-known, would be considered important by a reasonable person in deciding whether to trade a particular commodity interest on a contract market."

In contrast, the Commission does not believe that deletion of the reference to "linked exchanges" from the "material information" definition is warranted. As discussed in detail above, the Commission has determined to retain the proposed additions to the term "linked exchange" in paragraph (a)(5). As the Commission stated in that context, the additions are necessary in view of recent developments in the futures industry. The Commission believes that, given the nature of these developments, there is a meaningful

potential that an SRO employee or governing board member would come into possession of information related to foreign futures exchanges or domestic securities exchanges falling within the "linked exchange" definition or to the clearing houses or members of such linked exchanges and that such information could be considered important in making a trading decision under certain circumstances. As noted above, the Commission believes that it is important for both the Commission and the SROs to have clear authority to monitor for abuse in this area. Although the Commission has decided to retain the references to "linked exchanges" in paragraph (a)(3) in order to make clear that information related to the members or regulatory actions of such exchanges may be considered material, the Commission wishes to reiterate that information of this type would be considered "material" only if a reasonable person would consider it important in making a trading decision.

3. "Non-Public Information"

In the course of this rulemaking, the Commission did not propose to revise the definition of "non-public information" found in paragraph (a)(4) of existing Regulation 1.59. BOTCC, however, noted that the provision's phrase "through recognized channels of distribution" has become "practically meaningless" due to dramatic growth and rapid innovation in the information and communications industries. Accordingly, BOTCC urged the Commission to delete this phrase from paragraph (a)(4). The Commission believes BOTCC is correct in its assessment and, therefore, has deleted the words "through recognized channels of distribution" from the final version of Regulation 1.59.

III. Conclusion

The Commission believes that the final amendments to Commission Regulation 1.59 discussed above meet the mandate of section 214 of the FTPA to implement rules effectuating the insider trading prohibitions of the statute. Through this rulemaking, the statutory felony provisions will become effective. In addition, existing Regulation 1.59 will be amended so as to include parallel Commission prohibitions and to address recent industry developments.

IV. Related Matters

A. Regulatory Flexibility Act

The Regulatory Flexibility Act ("RFA"), 5 U.S.C. 601 *et seq.* (1988), requires that agencies, in adopting rules,

consider the impact of those rules on small businesses. The final Regulation 1.59 amendments would affect SROs, including registered futures associations, and individuals who (i) are employed by SROs, (ii) serve on governing boards of and committees of SROs, or (iii) obtain material, non-public information from SRO insiders. The Commission has previously determined that contract markets are not "small entities" for purposes of the RFA, and that the Commission, therefore, need not consider the effect of proposed rules on contract markets. 47 FR 18618, 18619 (April 30, 1982). Furthermore, the Acting Chairman of the Commission previously has certified on behalf of the Commission that comparable rule proposals affecting registered futures associations, if adopted, would not have had a significant economic impact on a substantial number of small entities. 58 FR 13565, 13569 (March 12, 1993).

The Commission therefore continues to believe that the final amendments would have a significant economic impact on SRO employees or governing members. The amendments prohibit SRO employees and governing members from trading on material non-public information. The trading prohibited under the amendments is essentially the same as that prohibited under SRO rules promulgated pursuant to existing Regulation 1.59. Accordingly, the individual employees and governing members affected by the rule should not be precluded from trading activity which is permitted currently.

Moreover, the Commission does not believe that the amendments would have a significant economic impact on persons to whom inside information is disclosed. The amendments prohibit tippees from trading on material, non-public information disclosed by SRO employees and governing members. Such disclosures by SRO insiders already are prohibited by existing SRO rules promulgated pursuant to Regulation 1.59. Accordingly, potential tippees currently should not have access to material, non-public information related to SROs.

B. Paperwork Reduction Act

The Paperwork Reduction Act of 1980 ("PRA"), 44 U.S.C. 3501 *et seq.* (1988), imposes certain requirements on federal agencies (including the Commission) in connection with their conducting or sponsoring any collection of information as defined by the PRA. The Commission believes the final amendments to Regulation 1.59 would not impose a paperwork burden on self-regulatory organizations.

List of Subjects in 17 CFR Part 1

Commodity futures, Contract markets, Clearing organizations, Registered futures associations, Members of contract markets, Self-regulatory organization employees, Self-regulatory organization governing board and committee members.

In consideration of the foregoing, and based on the authority contained in the Commodity Exchange Act and, in particular, sections 3, 4b, 5, 5a, 6, 6b, 8, 8a, 9, 17, and 23(b) thereof, 7 U.S.C. 5, 6b, 7, 7a, 8, 13a, 12, 12a, 13, 21 and 26(b), the Commission hereby amends title 17, chapter I, part 1 of the Code of Federal Regulations by amending existing Regulation 1.59 as follows:

PART 1—GENERAL REGULATIONS UNDER THE COMMODITY EXCHANGE ACT

1. The authority citation for part 1 continues to read as follows:

Authority: 7 U.S.C. 2, 2a, 4, 4a, 6, 6a, 6b, 6c, 6d, 6e, 6f, 6g, 6h, 6i, 6j, 6k, 6l, 6m, 6n, 6o, 7, 7a, 8, 9, 12, 12a, 12c, 13a, 13a-1, 16, 16a, 19, 21, 23, and 24, unless otherwise noted.

2. Section 1.59 is revised to read as follows:

§ 1.59 Activities of self-regulatory organization employees and governing members who possess material, non-public information.

(a) *Definitions.* For purposes of this section:

(1) *Self-regulatory organization* means "self-regulatory organization," as defined in Commission regulation 1.3(ee), and includes the term "clearing organization," as defined in Commission regulation 1.3(d).

(2) *Employee* means any person hired or otherwise employed on a salaried or contract basis by a self-regulatory organization.

(3) *Material information* means information which, if such information were publicly known, would be considered important by a reasonable person in deciding whether to trade a particular commodity interest on a contract market. As used in this section, "material information" includes, but is not limited to, information relating to present or anticipated cash, futures, or option positions, trading strategies, the financial condition of members of self-regulatory organizations or members of linked exchanges or their customers or option customers, or the regulatory actions or proposed regulatory actions of a self-regulatory organization or a linked exchange.

(4) *Non-public information* means information which has not been

disseminated in a manner which makes it generally available to the trading public.

(5) *Linked exchange* means: (i) any board of trade, exchange or market outside the United States, its territories or possessions, which has an agreement with a contract market in the United States that permits positions in a commodity interest which have been established on one of the two markets to be liquidated on the other market; (ii) any board of trade, exchange or market outside the United States, its territories or possessions, the products of which are listed on a United States contract market or a trading facility thereof; (iii) any securities exchange, the products of which are held as margin in a commodity account or cleared by a securities clearing organization pursuant to a cross-margining arrangement with a futures clearing organization; or (iv) any clearing organization which clears the products of any of the foregoing markets.

(6) *Commodity interest* means any commodity futures or commodity option contract traded on or subject to the rules of a contract market or linked exchange, or cash commodities traded on or subject to the rules of a board of trade which has been designated as a contract market.

(7) *Related commodity interest* means any commodity interest which is traded on or subject to the rules of a contract market, linked exchange, or other board of trade, exchange or market, other than the self-regulatory organization by which a person is employed, and with respect to which:

(i) Such employing self-regulatory organization has recognized or established intermarket spread margins or other special margin treatment between that other commodity interest and a commodity interest which is traded on or subject to the rules of the employing self-regulatory organization; or

(ii) Such other self-regulatory organization has recognized or established intermarket spread margins or other special margin treatment with another commodity interest as to which the person has access to material, nonpublic information.

(8) *Pooled investment vehicle* means a trading vehicle organized and operated as a commodity pool within regulation 4.10(d), and whose units of participation have been registered under the Securities Act of 1933, or a trading vehicle for which regulation 4.5 makes available relief from regulation as a commodity pool operator, *i.e.*, registered investment companies, insurance

company separate accounts, bank trust funds, and certain pension plans.

(b) *Employees of self-regulatory organizations; Self-regulatory organization rules.* (1) Each self-regulatory organization must maintain in effect rules which have been submitted to the Commission pursuant to section 5a(a)(12)(A) of the Act and Commission regulation 1.41 (or, pursuant to section 17(j) of the Act in the case of a registered futures association) that, at a minimum, prohibit:

(i) Employees of the self-regulatory organization from trading, directly or indirectly, in any commodity interest traded on or cleared by the employing contract market or clearing organization, in any related commodity interest, in any commodity interest traded on or cleared by contract markets or clearing organizations other than the employing self-regulatory organization, and in any commodity interest traded on or cleared by a linked exchange where the employee has access to material non-public information concerning such commodity interest; and

(ii) Employees of the self-regulatory organization from disclosing to any other person any material, non-public information which such employee obtains as a result of his or her employment at the self-regulatory organization where such employee has or should have a reasonable expectation that the information disclosed may assist another person in trading any commodity interest; *Provided, however,* That such rules shall not prohibit disclosures made in the course of an employee's duties, or disclosures made to another self-regulatory organization, linked exchange, court of competent jurisdiction or representative of any agency or department of the federal or

state government acting in his or her official capacity.

(2) Each self-regulatory organization may adopt rules, which must be submitted to the Commission pursuant to section 5a(a)(12)(A) of the Act and Commission regulation 1.41 (or, pursuant to section 17(j) of the Act in the case of a registered futures association), which set forth circumstances under which exemptions from the trading prohibition contained in paragraph (b)(1)(i) of this section may be granted; such exemptions are to be administered by the self-regulatory organization on a case-by-case basis. Specifically, such circumstances may include:

(i) Participation by an employee in pooled investment vehicles where the employee has no direct or indirect control with respect to transactions executed for or on behalf of such vehicles; and

(ii) Trading by an employee under circumstances enumerated by the self-regulatory organization in rules which the self-regulatory organization determines are not contrary to the purposes of this regulation, the Commodity Exchange Act, the public interest, or just and equitable principles of trade.

(c) *Members of self-regulatory organization governing boards and committees; Self-regulatory organization rules.* Each self-regulatory organization must maintain in effect rules which have been submitted to the Commission pursuant to section 5a(a)(12)(A) of the Act and Commission regulation 1.41 (or, pursuant to section 17(j) of the Act in the case of a registered futures association) which provide that no member of such self-regulatory organization governing board or of a committee of such self-regulatory

organization shall use or disclose, for any purpose other than the performance of such member's official duties as a governing board or committee member, material, non-public information obtained as a result of such member's participation on any committee or governing board of such self-regulatory organization.

(d) *Prohibited conduct.* (1) No person who is an employee of, a member of the governing board of, or a member of any committee of a self-regulatory organization shall:

(i) Trade for such person's own account, or for or on behalf of any other account, in any commodity interest on the basis of any material, non-public information obtained through special access related to the performance of such person's official duties as an employee or member; or

(ii) Disclose for any purpose inconsistent with the performance of such person's official duties as an employee or member any material, non-public information obtained through special access related to the performance of such duties.

(2) No person shall trade for such person's own account, or for or on behalf of any account, in any commodity interest, on the basis of any material, non-public information that such person knows was obtained in violation of paragraph (d)(1) from an employee of, a member of the governing board of, or a member of any committee of a self-regulatory organization.

Issued in Washington, DC on October 19, 1993, by the Commission.

Jean A. Webb,

Secretary of the Commission.

BILLING CODE 8351-01-M

**DEPARTMENT OF HOUSING AND
URBAN DEVELOPMENT**

**Office of the Assistant Secretary for
Housing-Federal Housing
Commissioner**

24 CFR Part 3280

[Docket R-93-1497; FR-2622-F-03]

RIN 2502-AE66

**Manufactured Home Construction and
Safety Standards**

AGENCY: Office of the Assistant
Secretary for Housing-Federal Housing
Commissioner, (HUD).

ACTION: Final rule.

SUMMARY: HUD is amending the Federal
Manufactured Home Construction and
Safety Standards (FMHCSS) to include
preemptive standards significantly
upgrading the existing energy
conservation requirements. The
ventilation and indoor air quality
standards for manufactured homes are
also being updated to provide for proper
ventilation of homes.

Other sections of the FMHCSS are
also being changed to update the
standards for components and products
that are used in manufactured homes.
Finally, certain changes have been made
based on the recommendations by the
Council of American Building Officials
(CABO) and the MHCSS Consensus
Committee (MCC).

DATES: *Effective date:* October 25, 1994.
The incorporation by reference of
certain publications listed in the
regulations is approved by the Director
of the Federal Register as of October 15,
1993.

FOR FURTHER INFORMATION CONTACT:
Philip W. Schulte, Chief, Compliance
Branch, Manufactured Housing and
Construction Standards Division,
Department of Housing and Urban
Development, 451 Seventh Street, SW.,
room B-133, Washington, DC 20410-
8000. Telephones: (voice) (202) 755-
7420; (TDD) (202) 708-4594. (These are
not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

I. Background

The National Manufactured Housing
and Construction and Safety Standards
Act of 1974, 42 U.S.C. 5401 et seq. (Act),
authorizes the Secretary of Housing and
Urban Development (Secretary) to
establish and amend the Federal
Manufactured Home Construction and
Safety Standards (FMHCSS), 24 CFR
part 3280 (Standards). The stated
purposes of the Act are to reduce the
number of personal injuries and deaths

and the amount of insurance costs and
property damage resulting from
manufactured home accidents and to
improve the quality and durability of
manufactured homes. In accordance
with the Act and these purposes, the
Department is issuing these changes to
the FMHCSS.

The Housing and Community
Development Act of 1987, amended the
Act to require preemptive energy
conservation standards. The new
subsection of section 604 of the Act is
as follows:

(i) (1) The Federal manufactured
home construction and safety standards
established by the Secretary under this
section shall include preemptive energy
conservation standards according to this
subsection.

(2) The energy conservation standards
established under this subsection shall
be cost-effective energy conservation
performance standards designed to
ensure the lowest total of construction
and operating costs.

(3) The energy conservation standards
established under this subsection shall
take into consideration the design and
factory construction techniques of
manufactured homes and shall provide
for alternative practices that result in
net estimated energy consumption equal
to or less than the specified standards.

Congress gave the Department further
guidance concerning the development
of these energy conservation standards
in the Energy Policy Act of 1992.
Section 104(c), Exception to Federal
Preemption, states that if the
Department has not issued thermal
insulation and energy efficiency
standards for manufactured homes that
take effect before January 1, 1995 by
October 24, 1993, the States may issue
separate standards for thermal
insulation and energy efficiency.

However, the state standards must be
at least as stringent as the Second Public
Review Draft of the BSR/ASHRAE 90.2
P entitled "Energy Efficient Design of
Low-Rise Residential Buildings." Secondly,
the State standards must take
into account all public reviews of
Independent Substantive Changes to
BSR/ASHRAE 90.2 P that have been
approved by October 24, 1993.

The Department believes that
Congress intended that these energy
conservation measures be issued
promptly so that consumers would be
able to purchase more energy efficient
homes. The Department is hereby
issuing this final regulation to establish
these energy conservation standards for
manufactured homes.

**II. Development of the Energy
Conservation Standards**

To comply with the Housing and
Community Development Act of 1987,
the Department contracted with the
Pacific Northwest Laboratories (PNL) to
assist in developing a revision to the
existing energy conservation
requirements in the FMHCSS. The
developed revision is based upon the
requirement to ensure the lowest total of
construction and operating costs. This
revision was published as a proposed
rule for public comment on February 24,
1992 (57 FR 6420).

The approach used in developing the
energy conservation standards revision
is a cost-benefit analysis (life-cycle cost
analysis) in which the costs of energy
conservation measures (ECMs) were
balanced against the benefits of energy
savings. The life-cycle cost (LCC)
compares the total long-run (present
value) dollar costs for an objective
achieved through several alternative
courses of action and selects the course
of action that achieves the objective for
the least cost.

For this LCC analysis, the benefit is
the energy savings from the ECMs; the
major cost is the ECM cost, including
the associated mortgages, fees, and
payments. Maintenance expenses were
also included as costs. The resulting
optimum value was used to specify an
overall level of energy conservation in
terms of a building shell U_o-value
(thermal conductance) that produced
the lowest life-cycle cost to the owner
of a manufactured home.

**Automated Residential Energy Standard
(ARES) Software**

The analysis to develop the standard
was done with the Automated
Residential Energy Standard (ARES)
software. ARES was developed by the
U.S. Department of Energy (DOE)
specifically for the development of
residential energy conservation
standards. Given a set of fuel price,
financial, economic, and ECM costs for
a building at a specific location, ARES
identifies the set of ECMs to invest in
such that the purchaser's total life-cycle
cost is minimized.

Rather than selecting a few cities to
represent the U.S., all 881 cities
available in ARES were used. Selection
of all 881 cities included in ARES
provided a density of locations such
that any point in the U.S. was close to
a city for which an optimum U value
was produced. This coverage alleviated
any bias which might have resulted
from selecting a small number of cities
to encompass the large area of the
country.

Several financial, economic, and fuel price parameters were required for the LCC analysis. Because most homes are purchased with financing, the development of the standard was based on a manufactured home purchased with financing. The loan selected has a 14% mortgage rate over 14 years with a down payment of 15%. The discount rate or alternative investment rate was 12%. The inflation rate was 4.9%. The period of analysis and building lifetime were both 33 years.

Furthermore, each state's average residential fuel price was defined for electricity, fuel oil, natural gas, and liquid petroleum gas (LPG). Residential fuel price escalation rates (real) were defined by U.S. Census Region. Nationally, these annual fuel escalation rates averaged: electricity, 0.0% (constant); fuel oil, 2.5%; natural gas, 2.0%; and LPG, 2.4%.

The ECM options used in the life-cycle cost analysis are based upon cost data and commercial availability as determined from a survey of about one-third of the manufacturing plants in the United States. Single and double-wide homes were considered separately when there were significant differences between the ECM characteristics of the two. The ranges of insulation levels included as options are:

- Ceilings.....R-11 to R-38
- Walls.....R-7 to R-19
- Floors.....R-7 to R-22

Insulation and other building materials are rated in terms of Resistance value (R-value). This is the approximate inverse of a U-value which is related to energy flow, or consumption.

Energy conservation measures which would lower infiltration were considered, but rejected based on several concerns. Currently new manufactured homes are relatively airtight, so that a very low natural infiltration rate would result from further tightening. ECMs which could result in very low infiltration rates can have significant negative impacts on occupant health and compound the problem of condensation control. For these reasons, no infiltration control ECMs were considered. The issue of ventilation requirements is addressed as a solution to controlling condensation and indoor air quality.

Heating and cooling equipment efficiencies were required for the life-cycle cost analysis. The National Appliance and Energy Conservation Act of 1987 (NAECA) minimum standards for heating and cooling system efficiency in manufactured homes were assumed. A procedure to give credit for

efficiencies higher than those required by the NAECA was also developed.

Initially, single-and double-wide homes which made use of five specific types of HVAC equipment and fuels were optimized by ARES. The five equipment/fuel types for which optimum U-values were produced for each city are: natural gas with a forced air furnace, LPG with a forced air furnace, oil with a forced air furnace, electric resistance baseboard heaters, and an electric heat pump with forced air distribution. In all cases, an electric air-conditioning system was included.

The separate HVAC equipment and fuel types were aggregated into U-values for all equipment/fuel types based on the frequency with which each type of equipment was present in each region. Consideration was given to establishing separate fossil and electric U-values, but the combination of all system types was selected as preferable for a number of reasons including simplicity.

Combination of Uo Values Into Geographic Zones

After the production of the 881 U-values defined above, the individual U-values were aggregated to four Uo value zones selected as representing the range of optimums found in the U.S. The U-value applicable to each zone was defined as the sales weighted average of the U-values for all states in that zone. The four zones and the U-value requirement associated with each were shown in the proposed rule. Single and double wide U-values were determined to be very similar and were combined into U-values for all homes. The Uo value indicates the maximum transmission heat loss coefficient expressed as [BTUs/(hr)(sq.ft.)(F degree)] that will be acceptable.

The existing Standards (24 CFR 3280.506) divide the country into 3 Outdoor Winter Design Temperature Zones. The southern half of the United States is within Zone I and the northern half is within Zone II. Alaska is Zone III.

The proposed rule combined Zones II and III into Zone IV except for the States of Kansas, Missouri, and Kentucky. The maximum transmission heat loss coefficient for most of Zone IV was reduced to 0.079 from 0.126. Alaska was reduced to 0.079 from 0.104.

California, Arizona, New Mexico, Oklahoma, Kentucky, Tennessee, and North Carolina were included in Zone III and therefore, the Uo value in the proposed rule was 0.096. In 24 CFR 3280.506, Kansas, Missouri and Kentucky have a present Uo value of 0.126; the other states mentioned above have a present Uo value in 24 CFR 3280.506 of 0.157. The rest of the

present Zone I states, with the exception of Florida, are reduced in the February 24, 1992 proposed rule to 0.109 (the current standard in 24 CFR 3280.506 is 0.157). Florida is reduced in the February 24, 1992 proposed rule 0.132 from 0.157.

Calculation of Cost and Benefits from Revised Uo Values

The costs and benefits from the consumer's perspective were estimated to compare homes built to the proposed rule (national average U-value of 0.098) with current practice of the industry (range in U-values 0.125 to 0.140) and with the existing FMHCSS (Title VI) which requires an average U-value of 0.145.

The present value of the net savings sums the total energy savings and deducts all the ECM costs, mortgage costs, and financing costs, putting all values in terms of present dollars. The cost of incorporating the ECMs above current practice was estimated to average \$800 to \$1100 per home and above Title VI were estimated to average \$1200 per home. The net savings from the revised Uo values are shown in Table A.

TABLE A.—THERMAL CONDUCTANCE STANDARD AVERAGE CONSUMER SAVINGS WITH REVISED STANDARD (Based On A Sales Weighted Average For Each State)

| | |
|---------------------------------|-------------------------|
| 1. Existing HUD-code (Uo .145). | \$2000 per home. |
| 2. Average home (Uo .125-.140). | \$800-\$1,600 per home. |

To examine the national total present value of the proposed standard, the average new home U-value for the current practice (rather than the Title VI) minimum U-values for a new home was approximated. The national aggregated present value of the savings for each year, assuming the Uo values contained in the proposed rule were in effect, was estimated to be \$300 million. This value would be about \$400 million per year if all homes were assumed to be built to the current standard in 24 CFR 3280.506.

Credit for Energy Efficient Appliances

Two alternative methods of compliance are suggested for inclusion in the standard. The first alternative method allows a trade-off between investments which lower a home's U-value and investments in high efficiency HVAC equipment. This alternative gives homes a U-value credit for increases in HVAC efficiency, but does not require the use of equipment above the NAECA

standard. The second alternative allows a calculation or simulation of annual energy use to show that a home meets the energy use implicit in the U-value standard.

One acceptable method for calculating the coefficient of heat transmission has been developed and published (HUD User-005945, Overall U-Values and Heating/Cooling Loads-Manufactured Homes, PNL 8006, February 1992). While this method will not be mandatory, it will indicate a minimum acceptable method for calculating the coefficient of heat loss transmission (Uo value). The Overall U-Values and Heating/Cooling Loads-Manufactured Homes, PNL 8006, February 1992, along with three related documents, were made available to the general public through the HUD-USER service (P.O. Box 6091, Rockville, MD 20850, Telephone Number (301) 251-5154).

Summary of Development of Energy Conservation Measures

In total, there were five major actions involved in the development of the energy conservation standards:

1. A life-cycle cost model to determine the optimum ECM investment was developed.
2. The definitions of the ECMs, including their cost and "U" value, which could be considered as options were established.
3. The financial, economic, and fuel price parameters used in the life-cycle cost analysis were defined.
4. Separate U-value optimums were defined for a large number of cities using different energy sources for both single and multi (double) section homes.
5. The resultant U-values were aggregated in several steps into four U-value zones, each one having a specified maximum coefficient of heat transmission.

III. Publication of Proposed Rule

As stated previously, the proposed energy conservation standards were published for public comment on February 24, 1992 (57 FR 6420). Because of the significant nature of the changes

to the energy conservation standards and the other related changes to the manufactured home standards, the Department provided a 90 day comment period. The Department received a total of 75 comments from the general public, States, manufacturers, trade associations, utilities and others who are involved with the construction trades and the manufactured housing industry.

The Manufactured Housing Construction and Safety Standards Consensus Committee (MCC) developed an alternative energy conservation standard that was submitted to HUD during the public comment period. The MCC is a group of manufacturers, regulators and other interested parties involved with the manufactured housing industry. The Manufactured Housing Institute serves as the Secretariat of the MHCSS Consensus Committee.

Commentators included remarks on over 100 different issues which have been organized into three general categories:

- A. Energy conservation standards.
- B. Ventilation and indoor air quality standards.
- C. Other changes to the manufactured housing construction and safety standards.

In July 1992, the Department contracted with Pacific Northwest Laboratories to assist in analyzing the comments received and make further recommendations concerning the life-cycle cost analysis and the heat loss transmission coefficients (Uo values) that were included in the proposed rule. A similar contract was issued in August, 1992 to the Forest Products Laboratory (FPL) and the National Institute of Standards and Technology (NIST) to analyze the issues related to ventilation and indoor air quality.

Copies of these final reports were received in February, 1993 and are available to the general public through the HUD-USER service (P.O. Box 6091, Rockville, MD 20850, Telephone Number (301) 251-5154). Copies of the FPL/NIST report were also made available to the Manufactured Housing

Advisory Council. Where the contractor's summary or comments have been consistent with the views of the Department and used in the final rule, attribution has been indicated.

Manufactured Home Advisory Council

Under section 605 of the Manufactured Home Construction and Safety Standards Act, the Department must, to the extent feasible, consult with the Manufactured Home Advisory Council prior to establishing, amending or revoking any manufactured home construction standard. On June 13, 1993, the Department published a notice in the Federal Register of an upcoming meeting of the Manufactured Home Advisory Council (the Council) to be held on July 13-14, 1993. The Council was asked by the Department to consider, among other matters, the February 24, 1992 proposed rule, (57 FR 6420), concerning energy conservation and ventilation standards for manufactured homes.

The Council met for two days and made a number of recommendations to the Department. The Council's recommendations that relate to the energy conservation and ventilation standards are the following:

1. The Department should issue energy conservation standards prior to October 24, 1993 so that the national preemptive standard for manufactured homes will be maintained.

2. The energy conservation standards should be different from the Uo values included in the HUD proposed rule. The Council approved new Uo values based on a MCC compromise proposal presented by M. Emanuel Levy, President, the Levy Partnership. The Levy Partnership is a consulting firm which was hired by the MCC to develop an alternative energy standard for manufactured homes. The recommended Uo values were derived from a simple average of the 1989 MCC proposal and the values contained in the HUD proposed rule. The recommended Uo values approved by the Council are shown below:

UO VALUES BY ZONE

| Code | Zone I | Zone II | Zone III | Zone IV |
|---|--------|---------|----------|---------|
| MCC compromise proposal presented by Dr. Levy | .129 | .113 | .102 | .091 |
| HUD proposal | .132 | .109 | .096 | .079 |

3. The Department should withdraw the proposed ventilation provisions in subparts B and F and rewrite the

proposal based on the Forest Products Laboratory (FPL) and the National Institute of Standards and Technology

(NIST) research. Also, the Department should undertake a cost benefits justification and solicit input from the

public using negotiated rulemaking or "other processes." To the extent possible, the ventilation standards should be promulgated along the same time lines as the energy standards for implementation at the same time.

The Department has carefully considered these recommendations in terms of the requirements of The Housing and Community Development Act of 1987 and the Energy Policy Act of 1992. Also, we have considered the impact of the adoption of energy conservation measures without changes in the ventilation and indoor air quality standards. The Department's decisions on these issues are included with the discussion of the public comments.

IV. Discussion of Public Comments

There were several major questions about the methodology used to develop the energy conservation measures. Since the assumptions are crucial to the development of the final Uo standards, most of the comments focused on these assumptions. The investment period and the assumptions about the direction of future fuel prices generated the most comments. The following discussion includes the key areas of interest to the commentators.

The Use of the ARES II Software

ARES was issued by the U.S. Department of Energy (DOE) in 1987. However, in the review of the software, it was determined that the investment period contained in ARES would be inconsistent with the intent of Congress. Accordingly, the standards were developed using ARES II; the ARES II program allowed for any investment period to be postulated as part of the analysis.

Several persons commented on the use of the ARES II program for calculating the optimum level of energy conservation measures. The DOE noted in its comments on the proposed rule that "life-cycle cost-effectiveness * * * is an appropriate criterion for evaluating various levels of energy conservation measures (ECMs) in manufactured housing. A life-cycle net-present-value analysis * * * is broad enough in scope to cover all of the economic impacts that the purchaser of a new manufactured house must contend with, and to treat them in a way that makes real financial sense to the purchaser."

On the other hand, one major trade association noted that the ARES II program was not a consensus-based standard and that it should be considered by certain consensus bodies before being used to develop Uo values that will be incorporated into the Manufactured Home Construction and

Safety Standards. Also, this industry trade association indicated that HUD did not meet with the Manufactured Home Advisory Council prior to the issuance of the proposed rule.

Another trade association noted that the program was not available from DOE. Other criticisms of ARES were that the program is "not used by anyone" and that ARES fails to account for solar influx in windows since ARES assumes manufactured homes have no south facing windows.

The Department believes that the DOE ARES II software provides the best available tool for conducting this type of life-cycle cost since it provides for the determination of energy requirements based on the application of economic principles. Secondly, the program is flexible in its application since it includes appropriate local cost data. Also, it provides credit for new technologies and contains equipment sizing guidelines. Finally, the ARES software database is extremely comprehensive since it contains data from over 880 cities in the United States.

Further, the ARES II is very similar to the ARES software. The ARES software has been in the public domain for a number of years and was based on a consensus process. The DOE has recently issued the ARES II software for public comment. We have not received any technical comments from interested parties that would have a material bearing on the legitimacy and technical accuracy of the ARES II software. Finally, the MCC also used ARES in the calculation of Uo values. Accordingly, we believe that the ARES software is the appropriate methodology for conducting this analysis.

Industry Criticism of HUD's Investment Period

The time period used as the investment period for the life-cycle cost analysis was the issue of greatest importance to the commentators. Many manufacturers indicated that the analysis period should be limited to a period of seven years that is the typical occupancy period for the first purchaser of the home. As indicated above, the proposed rule is based on a 33-year period that is the useful life of the structure.

The comments made by the MCC represented many comments made by manufacturers of this product. The MCC stated that HUD has elected to interpret "useful life" and "effective" life to mean the 33-year physical life of the home. In the MCC's view, that investment period overstates the energy savings to the consumer, who only lives

in the home an average of seven years. The MCC cited the HUD 1989 American Housing Survey Tape that indicates that only 42 percent of homeowners remain in their homes after 7 years, 17 percent are left after 14 years, 3 percent after 21 years, and almost none after 28 years.

Also, the ASTM Standard E833-91a, Standard Terminology of Building Economics, defines "useful life" as "the period of time over which an investment is considered to meet its original objective." Therefore, many commentators suggested that the analysis period be based on the patterns of homeownership and the ASTM standard.

The MCC also indicated that a first occupant-based investment period was used by the National Association of Home Builders' (NAHB) updated energy policy stated in the May, 1992 issue of Builder magazine. The MCC reports that "cost-effectiveness" is based on the perspective of a typical first-time home buyer; benefits from the increased construction costs must exceed economic costs during a multiyear analysis, not to extend beyond the period of occupancy (usually seven years). Also, the MCC noted that other forms of housing, whether single family or multifamily, do not require 33-year breakeven points.

The MCC and certain suppliers further raised a technical objection concerning the use of the 33 year period. The MCC stated: "When a life-cycle cost analysis is performed with a significantly long analysis period involved (33 years), it is typical to designate a second financial criteria, e.g. a period when the investment is to be paid back or a point in time when positive cash flow is achieved."

One supplier to manufactured housing added that it is not appropriate "to use an economic model with the least favorable breakeven point for the home buyer needing the most affordable housing alternative." Also, one member of the ASHRAE-53 Committee indicated that the use of a 33-year analysis period is not consistent with the ASHRAE Committee that developed and endorsed the use of the ARES software.

Furthermore, the Manufactured Home Advisory Council approved on July 14, 1993 a MCC compromise proposal presented by Dr. Emanuel Levy, who had completed an earlier study that was the basis for the MCC 1989 proposal. The compromise uses a 15-year investment period which is between the period of time used by the Department (33 years) and that recommended by the MCC in 1989 (7 years) in its public comments to the Department.

On the other hand, there were many commentators who favored the period of analysis chosen by the Department. One such commentator indicated that the use of the life of the home rather than the residency period of the first buyer was "correct from a public policy point of view." That is, "from the point of view of economic efficiency, it does not matter who owns the house, but rather how long it is inhabited."

Also, a group of power companies and environmental groups submitted comments in support of the longer investment period. This group stated that the analysis period was appropriate due to long life of the improvements and the need to conserve energy. Also, the power companies raised the issue of the avoidance of the building of new production plants and other external benefits from improving the energy efficiency of these homes.

The Department and most commentators agree on the use of the life-cycle cost (LCC) method to determine the cost-benefit of energy conservation measures (ECM). The apparent difference between the HUD proposed standards and the MCC proposed standards are principally because of the difference in the time period used in the method of analysis, 33 years vs. 7 years. As noted above, the Advisory Council recommended differing standards which would approximate a LCC analysis based on a 15 year useful life.

The House of Representatives' Committee Report on Section 568 of the Housing and Community Development Act of 1987 instructed the Department to develop "a standard that assures the combination of construction costs and estimated value of energy saved through the operation of the energy-efficient home over its estimated useful life." Also, the language in the Committee report refers to manufactured home owners and there is no reference to the first home owner as proposed by the MCC.

Furthermore, Chairman Gonzalez of the House Subcommittee of Housing and Community Development wrote to Secretary Kemp on September 1, 1989 that "Congress intended your Department to develop standards that would be cost effective for the manufactured home owners over the expected useful life of the manufactured home." Finally, the use of an investment period based on the life of the house is supported by reference to the Congressional record where Senator Adams clarified that the Department was to perform a life cycle cost analysis "taking into consideration the cost of energy savings from those measures

over the effective physical life of the structure".

Accordingly, the Department developed a rule that considers these costs over the 33-year average useful life of manufactured homes. Based on the legislative history, the absence of the term "first home owner" from the law and the expressed language contained in Chairman Gonzalez's letter, the Department believes that the use of a 33-year investment period meets the intent of Congress.

HUD's contractor also noted that the use of a longer period concurs with the published ASHRAE guidelines in this area. Specifically, the 1989 ASHRAE Handbook of Fundamentals recommends that "[g]enerally, longer lifetimes (e.g., 30 years) rather than shorter lifetimes (e.g., 10 years) approach true life-cycle cost minimization more closely and avoid the high cost of retrofitting if energy prices rise." (ASHRAE 1989a, p. 2.). Also, the energy conservation measures that are likely to be employed (increased insulation, improved components such as doors and windows and other energy improvement measures) have useful lives that are much greater than 7 years.

Furthermore, while the HUD survey data does indicate that less than half of the original owners are in the home after 7 years, other data suggests that the initial occupancy period may be longer. For example, Ms. Helen Boosalis, Chairperson of the National Commission for Manufactured Housing, remarked in a recent Commission meeting that the American Association of Retired Persons (AARP) had found that senior citizens will occupy their homes for 12 or more years. Also, there is unpublished data from borrower surveys conducted by the DOE's Bonneville Power Administration that the occupancy period of the first homeowner is approximately 15 years.

Finally, the Department has noted that the analysis period, while important, does not have a significant effect on the overall Uo values that are determined under the life-cycle cost analysis. PNL has estimated what would be the result if the analysis that was completed in 1989 was redone using 1992 inputs and using analysis periods ranging from 7 to 33 years. The results of this analysis are shown in the Table below:

TABLE B

| | Proposed Uo by zone | 33 yr. | 15 yr. | 7 yr. |
|---------|---------------------|--------|--------|-------|
| I | 0.132 | 0.118 | 0.125 | 0.129 |

TABLE B—Continued

| | Proposed Uo by zone | 33 yr. | 15 yr. | 7 yr. |
|-----------|---------------------|--------|--------|-------|
| II | 0.109 | 0.097 | 0.103 | 0.106 |
| III | 0.096 | 0.086 | 0.091 | 0.094 |
| IV | 0.079 | 0.071 | 0.075 | 0.077 |

Accordingly, in Zones I-IV included in the February 24, 1992 proposed rule, the impact of the analysis period would have been slight and if the Department had redone the life-cycle cost analysis with 1992 data, the overall heat loss transmission coefficient would be lower than was proposed by the Department in 1989. However, until a more authoritative LCC analysis is performed, the Department has concluded that an analysis period based on the estimated life of the structure is appropriate and consistent with the statutory mandate.

There are several other parameters that were used in the ARES II analysis which several commentators disagreed with. These parameters can be separated into parameters that relate to the financial assumptions that are made in the purchase of the home, economic parameters concerning the discount rate and the energy provided to the home (type of fuel, future changes in fuel prices etc.). The financial parameters will be discussed first.

DOE's ARES II examines 12 financial impacts on the purchaser. ARES provides a means of comparison for the purchase of energy conservation measures which is more comprehensive than simple-payback and return-on-investment analyses that consider only two factors, purchase price of the ECM and fuel savings. The 12 expense and savings factors that ARES investigates include:

- (1) Down payment—the amount the purchaser actually pays in cash for each incremental level of ECM improvement;
- (2) Mortgage payments—to pay off the remaining price of the ECM during the loan term;
- (3) Loan fees—non-tax-deductible expenses associated with obtaining the mortgage for financing the balance of the ECM;
- (4) Mortgage points—a tax-deductible expense associated with obtaining the mortgage;
- (5) Tax deduction on mortgage interest—this results in a cash savings (i.e., a "negative expense") to the purchaser due to a reduction in personal income tax;
- (6) Tax deduction on mortgage points—this also results in a cash savings, albeit only during the year of purchase;

(7) Fuel expenses—fuel for heating and cooling will always be an expense for the home buyer, but the expense will decrease significantly as conservation levels improve;

(8) Operation and maintenance expenses other than for fuel necessary to keep degradable ECMs, such as heating equipment, operating properly and performing at the original efficiency;

(9) Property taxes—ECM purchases increase the value of the home and therefore the owner pays more property taxes, but some of the taxes can be "recovered" via the Federal income tax deduction allowed for property taxes;

(10) Capital replacements—some of the ECMs may fail during the period of analysis and the owner must bear the expense of replacing them;

(11) Resale value—when the manufactured house is sold, the owner will recover some part of the original expenditures for the ECMs; and

(12) Loan balance—when the house is sold, the owner must pay off that portion of the mortgage balance relating to the ECMs.

Because most homes are purchased with financing, the development of the standard was based on a manufactured home purchased with financing. The loan selected has a 14% mortgage rate over 14 years with a down payment of 15%.

The Financial Assumptions Savings and Expense Factors

There were relatively few comments on the savings and expense factors that were included in the proposed rule. A number of commentators noted there have been significant changes in savings and expense items since the new thermal requirements were generated. These included falling mortgage interest rates. These commentators suggested HUD adopt the proposed standard then update the analysis based on the new conditions.

The financial assumptions used to optimize the standard were generally current when the original analysis was performed. Since the analysis, we have noted that there have been significant changes in the mortgage interest rate and fuel costs. A rate of about 11.3% (2% above the site-built rate of about 9.3% nominal rate that represents a long-term Office of Thrift Supervision averages using 1963–1991 data (OTS 1991)). This long-term rate is also generally consistent with current real mortgage rates. This interest rate includes points and loan fees. Inflation has fallen from the 4.9% used in the original analysis to about 3.9% now. The change in interest rates would produce a lower optimum U_o value.

The Congress has requested in the National Energy Policy Act that the Department assess the energy efficiency of manufactured homes and make recommendations to the National Commission on Manufactured Housing regarding thermal insulation and energy efficiency standards. The Department will consider a further study of energy efficiency which may include the reconsideration of the optimal U_o values based on more current financial parameters.

To calculate the net present value of future energy savings from energy conservation measures, the life-cycle cost must use a discount rate as an input for ARES. The discount rate or Alternative Investment Rate (AIR) clearly has a significant effect on the outcome and, therefore, on the resulting energy conservation standards. HUD proposed that the rate of return of the conservation investment for a potential new-home buyer should be equal to the rate of return (i.e., the AIR) of another investment that is in some sense equivalent to the buyer's spending money on energy conservation.

Two primary considerations for any investor are risk and liquidity. A low-risk investment, such as a common passbook savings account, normally provides a low rate of return. High-risk investments, conversely, must pay high interest rates to attract capital, capital that the investor may lose. Investments with low liquidity, such as long-term certificates of deposit, must also pay higher rates to attract investors willing to tie up their money for long periods of time. Highly liquid investments generally offer lower interest rates since the principal amount is always available to the investor for withdrawal from the financial institution.

A conservation investment has to be considered as highly illiquid: the money cannot be recovered for any other use, at least during the time that the owner occupies the manufactured house. A number of possible discount rates were reviewed, with the consumers' best common "alternative investment," prepayment of the mortgage selected. This alternative investment established a discount rate of 7% (real). Prepayment of the mortgage is still probably the best alternative rate available to the owner of a manufactured home.

As a consequence of both moderate risk and low liquidity, HUD proposed an AIR of 12%. The AIR is derived by combining the real discount rate with the inflation rate according to standard economic formulas.

Discount Rate

Most commentators suggested a lower real discount rate that ranged from 2–5; there were other commentators who supported the rate used by HUD. The alternative proposal produced by the MCC was developed using a discount rate of 10%.

In determining an applicable real discount rate, it is appropriate to use a methodology that reflects alternate consumer durable goods purchase opportunities for the buyer of a new manufactured home. DOE used this approach in establishing the consumer discount rate in the Energy Conservation Program for Consumer Products. DOE developed 7% in setting energy conservation standards in the appliance program. DOE viewed 7% as the real rate of return for alternative uses of consumer money that is forgone to finance the purchase of energy efficient appliances.

In HUD's view, the DOE methodology seems to be the most appropriate for selecting a discount rate which reflects the low liquidity of the energy conservation investment. Secondly, the mortgage rates on manufactured homes have fallen substantially since the PNL analysis was completed three years ago. Therefore, the life-cycle cost analysis would support a discount rate that is lower than the 12% nominal and 7% real discount rate. A lower discount rate would further lower the heat loss transmission coefficients (U_o values) that could be derived from this analysis. Also, the lower interest rates would mean that the acceptance of a lower discount rate as suggested by some of the commentators would not have a significant impact on the heat loss transmission coefficients.

Another key assumption in calculating the U_o values is the direction of future fuel prices. Residential fuel price escalation rates (real) were defined by U.S. Census Region. Nationally, these annual fuel escalation rates averaged: electricity, 0.0% (constant); fuel oil, 2.5%; natural gas, 2.0%; and liquid petroleum gas (LPG); 2.4%.

These fuel price escalations were based on long term projections of the Federal Energy Management Program (NIST 1988). Similar rates were projected by the Energy Information Administration (EIA) (EIA 1989, page 47) and other, non-government projections.

Fuel Price Escalation Rates

Many comments were received on the fuel price escalation rates. Some commentators, including manufactured

home producers, recommended that constant real fuel prices should have been used in the analysis. They argued that it is difficult to project fuel prices for 33 years and therefore, the Department should have assumed constant real fuel prices.

The MCC stated that projecting costs reliably for a 33-year period is not practical since the reliability of such projections is poor. That is, experience during the last 15 years has "shown us there have been drastic shifts in forecasting of fuel rates almost yearly. Reliability is substantially improved when shorter range forecasting is used as opposed to long range."

Other commentators supported the fuel price projection used by HUD. These commentators argued that the projection of an increase in fuel prices was appropriate. Others argued that projecting an increase in fuel prices was necessary to calculate the savings from an investment in the energy efficiency of the manufactured homes.

While the Department recognizes that projections of fuel price escalation rates involve some uncertainty and are difficult to predict accurately, it disagrees with the idea of fixing those rates at 0 percent real in the ARES software. DOE's Federal Energy Management Program (FEMP) annually publishes forecasted fuel price escalations. The forecast used in the LCC analysis was the Energy Prices and Discount Factors for Life-Cycle Cost Analysis 1990 (NISTIR 85-3273-4, Rev. 5/90) that presents projected fuel price escalations for 5-year blocks and for each of four U.S. Census Regions. Converting these data to equivalent annual price escalation rates yields the table below:

TABLE C.—RESIDENTIAL FUEL PRICE ESCALATION RATES FOR 1990-2020 BY U.S. CENSUS REGION

[percent per year in real terms]

| Fuel Type | East | Central | South | West |
|-------------------|------|---------|-------|------|
| Electricity | 0.4 | 0.1 | 0.4 | 0.7 |
| Fuel Oil ... | 2.6 | 2.8 | 2.6 | 2.8 |
| Natural Gas | 3.5 | 1.9 | 2.6 | 2.5 |

Although these fuel escalation rates are used for analyzing proposed Federal building investments, they were derived from estimates by DOE's Energy Information Administration that are generally applicable and therefore suitable for use in proposed Federal standards.

There is no doubt that fuel prices are uncertain and short-term fuel prices are volatile. However, the behavior of fuel

prices over longer periods of time is more relevant over the useful life of the 33-year investment in energy-efficiency in a home. Long-term fuel prices have increased faster than inflation over the last 33 years, and there is no indication the long-term trend will change.

Furthermore, published projections of future fuel prices generally predict a slow escalation of long-term aggregate fuel prices. The update of the same source used by PNL in the original analysis, the newest FEMP projection of fuel prices for 1993-2022, includes fuel price escalations that in the aggregate average about the same as those projected for use in PNL's analysis.

In addition, the assumption of constant real fuel prices, which was proposed by numerous commentators, runs counter to the generally recommended practice for economic optimization. For example, the ASHRAE guidelines in the 1989 ASHRAE Handbook of Fundamentals include an annual rate of energy price increase in its evaluation of optimum insulation level (ASHRAE 1989a, p. 20.10). The ASHRAE 90.2 committee (ASHRAE 1989b), which also produced a manufactured home thermal standard, assumed a fuel price increase.

Several public and private projections on future fuel prices gave similar projections, especially in the aggregate, which is supportive of the DOE projection. Also, the commentators supporting constant fuel prices offered no expert analysis or reference that projected constant fuel prices in the future to support their position, nor is HUD aware of any long-term projections that the aggregate fuel prices seen by manufactured home owners will remain constant. Accordingly, the Department has concluded that the DOE projections represent the most authoritative evidence of the future direction of fuel prices.

Each state's average residential fuel price was defined for electricity, fuel oil, natural gas, and LPG. Residential fuel price escalation rates (real) were defined by U.S. Census Region. Fuel neutrality was assumed; the Department's stated primary reason for establishing one level was for simplicity.

Fuel Neutrality

Energy providers were divided on the question of fuel neutrality. The Edison Electrical Institute supported the HUD proposal for the following reasons:

Leaving the decision of fuel and equipment purchase to the individual customer assures that barriers to achieving higher equipment efficiency will be minimized. A policy of fuel

neutrality allows equipment to be selected based on customer choice. Maintaining fuel neutrality recognizes that different customers have different needs. Moreover, in some areas, fuel and equipment choices may be dictated by unique local conditions.

A policy of fuel neutrality also eliminates any biases in the choice of equipment that may emerge in the future. The uncertainties associated with future fuel availability and prices, technological advances, and customer preferences should not be restricted today. Fuel neutrality assures that customers will be able to maximize their choices.

On the other hand, The American Gas Association (AGA) requested that HUD reconsider its decision not to establish separate fossil and electric U-values. AGA stated that the rationale of simplicity does not meet the intent of the law that requires "energy conservation standards * * * designed to ensure the lowest total of construction and operating cost." The establishment of a single U-value will actually decrease the efficient utilization of energy in heating homes covered by the HUD FMHCSS, by encouraging the construction of housing that uses electric resistance heating.

AGA also stated that while electric resistance heating is the least expensive heating option according to first cost (i.e., equipment cost), electric resistance heating is the most expensive heating option in terms of average residential fuel prices and the least efficient in terms of total resource utilization. Furthermore, AGA stated that any federal standard that fails to consider the average residential energy price and energy efficiency will penalize the use of fossil fuels, such as natural gas for heating, by requiring thermal insulation levels that result in unduly long payback periods.

In support of this argument, AGA cited Department of Energy figures for residential average unit costs. This data indicates that electricity costs over four times as much as natural gas for the average residential consumer. With significant disparities in average residential energy costs, the economic payback for any given appliance will also be different, depending on the energy source. Accordingly, AGA advocated the need to establish separate fossil fueled Uo values in the FMHCSS.

AGA believes that it is vital for HUD to acknowledge that such standards should not be set on a site consumption basis alone. Current standards disadvantage fuels, such as natural gas, which are efficient at the point of end-use, but are even more advantageous

from a total resource conservation standpoint. The total energy cycle for natural gas would take into account all energy losses that occur from the point of energy source extraction, through processing, conversion, transportation and distribution of energy. The cumulative energy efficiency for the total cycle of natural gas is over 91 percent, as compared to a total cycle efficiency of between 26 to 37 percent (depending on type of electric generation plant) for electricity. These are significant numbers that should not be ignored.

Finally, a number of state model energy codes for site built housing, including California and Washington, recognize the need to have separate thermal insulation requirements for electric resistance heating and other energy sources. Thus, AGA maintains that there is ample precedent for their position.

The Department acknowledges the arguments being raised by the American Gas Association and there is no question that natural gas is a more efficient form of heating than electric resistance heating. However, the extent of usage of natural gas in manufactured homes is more limited due to the cost of installing gas lines to homes which tend to be sited in less populated areas.

Secondly, there is the issue of the difficulty of devising standards that are dependent on the type of energy selected. Manufacturers use different types of heating systems and the confusion of having appliance dependent heat loss transmission coefficients would be difficult in a home that is being produced to a national standard.

Thirdly, the heating system that is installed can be replaced rather easily. By permitting a reduced coefficient for one type of fossil fuel, a consumer may gain a temporary advantage that could be obviated by a later change in the type of furnace being used.

Finally, the use of different standards would create difficulties in enforcement as manufactured homes are checked only in one state of production by the in-plant primary inspection agency (IPIA) approved by HUD. Also, natural gas furnaces with higher fuel efficiency ratings can be used to obtain technical credit for fuel efficient appliances.

Accordingly, the Department has determined that there will not be separate heat loss transmission coefficients between the various types of fossil fuels and electric resistance heating. However, if the Department undertakes additional analyses for future changes in the heat loss transmission coefficients, we will

seriously consider conducting a parallel analysis to take into account the differences between fossil fuel and electric resistance heating costs.

The Effect of Lower Uo Values On Consumers

Finally, there were many industry commentators who indicated that the cost of these energy conservation measures would substantially reduce the number of Americans who can afford to purchase these homes. Also, the industry noted that the cost of the energy conservation measures would not be recovered upon the sale of the home since the second home purchaser will not repay the original purchaser for the energy conservation features of the home.

The Department is also concerned about the impact of this proposal on the cost of manufactured housing since many of these homes provide affordable housing in many parts of the country. For this reason, the life-cycle cost optimizes the economic benefit of the proposed energy conservation measures.

In completing the life-cycle cost analysis, the Department determined that the total cost of these measures would be less than half of the net benefits received each adjusted for the present value of money. That is, the estimated total cost of these measures (roughly \$175,000,000) would generate gross savings of about \$375,000,000. Therefore, the net benefit to consumers of requiring these savings is over \$200,000,000 per year.

Furthermore, the annual net savings from the increased energy conservation measures would be roughly \$20,000,000 after accounting for the larger mortgage and other related costs to buy the energy conservation measures. This represents cost-effective energy standards as required by the Congress. Also, the LCC shows that the energy conservation measures are clearly in the homeowners aggregate interests since they yield the least cost to the consumer, thereby making manufactured housing more affordable.

The industry also argues that the second home purchaser will not repay the original purchaser for the energy conservation features of the home. In general, it is difficult to quantify the value that a used home purchaser places on energy efficiency. Energy-efficient homes, such as the Super Good Cents homes, have been available for only a limited period of time in several areas and there is insufficient data to determine whether the increased value is retained.

Nevertheless, there is evidence that more energy-efficient homes command a

higher resale value. The current NADA Manufactured Housing Appraisal Guide does contain additive values for optional equipment, such as an upgraded insulation package. The value of the upgraded insulation package in the current HUD standard for Zone II (Uo value of .126) varies from \$750-\$1,600, depending on whether the home is a single or double wide home and the type of glazing and the presence of storm windows.

Since the NADA Guide is based on actual sales of homes, homes with lower Uo values are likely to command a higher resale value. Also, the amount of value which could be added to the resale price of a used home is roughly equivalent to the cost of the energy conservation measures.

The Manufactured Home Advisory Council also questioned the Department concerning the cost of increasing the level of ventilation in manufactured homes and whether the life cycle cost analysis prepared by PNL included the additional costs of ventilation. The original PNL study did not include specific costs for ventilation since PNL believed that it was difficult to specify the minimum ventilation rate. However, PNL recognized that low infiltration rates could trigger condensation problems in homes and recommended further studies of this question.

Furthermore, as PNL has noted in its evaluation of this analysis, the ventilation standard was not established based on the minimization of costs and therefore, it is somewhat misleading to sum the costs of the ventilation and the energy conservation measures. That is, the value of the ventilation requirements are for the elimination of the moisture damage and for an increase in occupant health and comfort.

However, as discussed below, the Department has concluded that the increase in whole house ventilation is necessary for energy efficient homes. Also, the Manufactured Home Advisory Council did express its concern for the impact of the ventilation cost on the overall costs and benefits of the energy conservation measures. For this reason, the Department has estimated the costs and benefits in a conservative manner.

PNL has completed further analysis of this matter and determined that the cost of the ventilation equipment would range from \$200-\$300 and that the annual energy loss for operation of the fan motor, the ventilation of heated air, etc. would average \$50 per year. Based on these findings and using the same parameters as were included in the original study, the Department has determined that the annual net savings

for an average home are reduced from \$94.00 to \$41.00 per year.

Therefore, even if the cost of ventilation is added to the initial costs of the energy conservation measures and the net savings are reduced, the energy conservation measures remain cost-effective. Also, the net benefits to consumers do not consider the benefits of ventilation and improvements to health which will require additional study for precise quantification of the benefits.

The Methodology Used to Derive the Heat Loss Transmission Coefficients

After a detailed review of the life-cycle cost methodology, the key assumptions including the period of analysis, the economic parameters and the financial parameters, the Department has concluded that this analysis is technically reasonable and consistent with the intent of Congress. Therefore, the Department has concluded that this method of analysis is valid for the determination of the heat loss transmission coefficients for manufactured homes.

The Four Heat Loss Transmission Zones Contained in the Proposed Rule

After the completion of the analysis using the ARES II database consisting of the 881 Uo values, individual Uo values were aggregated to four Uo value zones selected as representing the range of optimums found in the U.S. The Uo

value applicable to each zone was defined as the sales weighted average of the Uo values for all states in that zone. The 4 zones and the Uo value requirement associated with each area were shown in the February 24, 1992 proposed rule.

As has been indicated previously, the existing Standards (24 CFR 3280.506) divide the country into 3 U value zones. The southern half of the country is zone I and the northern half is zone II. Alaska is zone III. The proposed rule made zones II and III into zone IV except for the States of Kansas, Missouri and Kentucky. The maximum allowed Uo value for most of zone IV was reduced to 0.079 from 0.126. The coefficient is expressed as BTUs/(hr) (sq.ft) (F). Alaska was reduced to 0.079 from 0.104.

California, Arizona, New Mexico, Oklahoma, Kentucky, Tennessee, and North Carolina were given a Uo value of 0.096 in the proposed rule. The current HUD standard for Kansas, Missouri and Kentucky is presently 0.126; the other States have a Uo value of 0.157. The rest of the zone I States in the present HUD standard, with the exception of Florida, are reduced to 0.109 from 0.157. Florida was reduced in the proposed rule to 0.132 from 0.157.

Comments were received from three geographical areas suggesting that HUD change the proposed standard for that particular area. The State of Oregon recommended adopting the Pacific Northwest's Model Conservation

Standard, a site-built housing energy code. Due to the severity of its climate, the State of Alaska recommended that HUD adopt its state standard which is more stringent than the Uo value used in the proposed zone IV.

The Florida Energy Office (FEC) submitted comments indicating that "despite Florida's significant air conditioning requirements, the energy efficiency standard for Florida is the least stringent for the entire United States". FEC also stated that zone I would fail to satisfy the requirements of the Florida Energy Efficiency Code for Building Construction and that analysis by the University of Florida suggested that a more severe standard would be cost effective in Florida. Accordingly, the Florida Energy Office recommended, among other actions, that HUD establish an interim standard for zone I equal to the standard for zone II, i.e., a Uo value of 0.109.

Finally, several manufacturers stated that constructing a single wide home in zone IV to the proposed standards would be difficult due to the number of windows which are commonly used in single wide homes. For example, the Manufactured Housing Institute suggested a window area equal to 17% of the floor area was not uncommon.

The Manufactured Home Advisory Council recommended that the proposed four zones be used with changes in the Uo values for each of these zones (see the table below).

UO VALUES BY ZONE

| Code | Zone I | Zone II | Zone III | Zone IV |
|---|--------|---------|----------|---------|
| MCC compromise proposal presented by Dr. Levy | .129 | .113 | .102 | .091 |
| HUD proposal | .132 | .109 | .096 | .079 |

The Advisory Council based its recommendation on statements by producers and by Dr. Levy that windows which have been tested to

meet the requirements of the northern zone were not currently available. Also, the Council was concerned about the cost impact in zone IV and the cost

impact in zone IV for the proposed rule would be greater than for the MCC Compromise proposal. The relative cost impacts in each zone are shown below:

COST OF ENERGY CONSERVATION MEASURES

(In dollars)

| Code | Zone I | Zone II | Zone III | Zone IV |
|---|--------|---------|----------|---------|
| MCC compromise proposal presented by Dr. Levy | 437 | 908 | 1,281 | 1,654 |
| HUD proposal | 339 | 1,134 | 1,573 | 2,446 |

Concerning the adoption of the Uo value found in the Pacific Northwest model energy code, HUD believes that this recommendation would provide for a less optimal value than is provided by the ARES analysis that is the basis for

the heat loss coefficients in the Northern Zone IV of the proposed rule. Also, the Department believes that the HUD standards should be uniform for particular regions except where there is a technical basis for proposing a more

or less rigorous performance standard due to variations in the climate. Accordingly, the recommendation from the State of Oregon has not been accepted.

At the present time, the HUD standards do provide a separate zone for Alaska. However, given the very small number of homes that are shipped to Alaska and the prevailing practice to include a special insulation package for homes destined for areas in the State which experience severe cold, we do not believe that a separate Uo zone is necessary. Furthermore, the proposed Uo zone for Alaska is substantially lower than the current standard and is once again based on the optimal Uo value after surveying a total of six cities in Alaska.

Combination of Proposed Zones I and II

Based on comments and the other technical analysis submitted by the State of Florida Energy Office, the Department has reviewed the initial decision to separate Florida into a separate Uo zone. A reconsideration of the data indicates that a lower Uo value could be supported as being cost effective especially in the central and northern parts of the State where there is a greater concentration of manufactured homes.

In their public comments, manufacturers of homes also proposed a lower Uo value than was indicated by HUD in the proposed rule. The Department has also received a letter from Dr. Emanuel Levy, dated July 21, 1993, which indicates that the combination of Zones I and IIs would be justified since there are manufacturers in the South who ship to States in proposed Zones I, II, and III. The modified Levy proposal is shown below:

UO VALUES BY ZONE

| Code | Zone I | Zone II | Zone III |
|---|--------|---------|----------|
| Modified proposal submitted by Dr. Levy | .118 | .102 | .091 |
| HUD final rule .. | .116 | .096 | .079 |

The Department agrees that a common "southern zone" will be easier to administer and eliminate potential difficulties for homes which are produced in neighboring states and then shipped into Florida. Accordingly, the Department has concluded that the State of Florida should be included as part of new Zone I, consisting of proposed Zones I and II. The zones have been renumbered accordingly.

In determining the separate zones, PNL used a sales weighted average to determine the Uo value for each major geographic areas. Accordingly, the Department has determined that the State of Florida should be included with

the States in proposed Zone II. A revised Uo value of 0.116 is being implemented for the States of Florida, Alabama, Georgia, Louisiana, Mississippi, South Carolina, and Hawaii.

Changes in the Uo Values

The Department has carefully analyzed the Advisory Council's recommendation for a compromise between the HUD proposed rule and the MCC 1989 recommendation. The compromise is based on an average of the Uo values derived from using a 7 and a 33-year investment period. Therefore, the MCC compromise recommendation presented by Dr. Levy would be approximately equivalent to using a 15-year investment period.

We have concluded that the MCC Compromise recommended by the Advisory Council cannot be accepted for the following four reasons:

1. Lack of Technical Justification

The 1987 law requires that: "The energy conservation standards established under this subsection shall be cost-effective energy conservation performance standards designed to ensure the lowest total of construction and operating costs." The Council recommendation does not have any technical support which shows that it provides the lowest total of construction and operating costs. Also, the plotting of the costs and benefits of the proposed rule indicates that the optimum level of net savings is reached by the use of an investment period similar to the useful life of the structure.

2. Lesser Energy Conservation Than Is Provided in ASHRAE 90-2 P

Under the Energy Policy Act of 1992, Congress stated that should HUD not issue a preemptive energy standard by October 24, 1993, States could issue energy standards provided that any State standard is as least as stringent as the Second Public Review Draft of the BSR/ASHRAE 90.2 P entitled "Energy Efficient Design of Low-Rise Residential Buildings." The HUD-proposed standards provide very similar results with ASHRAE 90-2 P when both numbers are reduced to a single national standard (see the Table below). Also, the ASHRAE standard is almost identical to the HUD-proposed standard in the Northern Zone; the MCC Compromise proposal would provide significantly lower levels of energy conservation.

3. Availability of Means to Comply With the Uo Standard in Proposed Zone IV

Members of the Advisory Council stated that the energy conservation standards established under this subsection shall take into consideration the design and factory construction techniques of manufactured homes. Several members of the Council stated that the type of windows being used in manufactured homes had not been tested to meet the Uo values that are needed for the northern zone.

The Department is not persuaded that the manufacturers will be unable to comply with the proposed standard. First, the standard is a performance standard for the overall building shell; there is no requirement for a specific U value for windows. A manufacturer may design a structure to provide for more or less insulation in lieu of specific types of windows.

Second in its initial survey of manufacturers, PNL determined that windows were available which have a low enough U value for the northern zone. PNL has reconfirmed that the windows are available in the marketplace.

Furthermore, the 1993 edition of the Energy Source Directory lists over 20 window manufacturers who are producing windows tested to the AAMA 1503.1-1988 standard. The directory lists over 150 models of windows that have been tested and determined to have a U value of 0.40 or less which would be sufficient to meet the building shell Uo value of 0.079 in Zone III of the final rule. Also, we have determined that should the manufacturer need to test certain windows, the necessary testing to ascertain U values could be performed within a few months.

4. The Production of Single Wide Homes to Much Lower Uo Values

Concerning the Advisory Council's concerns about the production of single wide homes with a Uo value of 0.079, the Department has noted that numerous manufacturers in the Pacific Northwest have produced single wide homes to a much lower standard (Uo value 0.056). Also, one manufacturer produced a single wide home that was tested by the National Renewable Energy Laboratory and which met the revised Uo value of 0.079 for proposed Zone IV. Accordingly, the Department has concluded that the production of

single wide homes in Zone IV is feasible.

For these reasons, the Department has concluded that the MCC Compromise recommended by the Advisory Council cannot be adopted in the final rule. However, the Department recognizes that over 30% of manufactured homes are sited in new Zone III and that the demand for windows to construct energy efficient houses in the northern area may result in some production delays or potential temporary shortages

of windows. Also, it may be necessary to complete certain tests for particular designs.

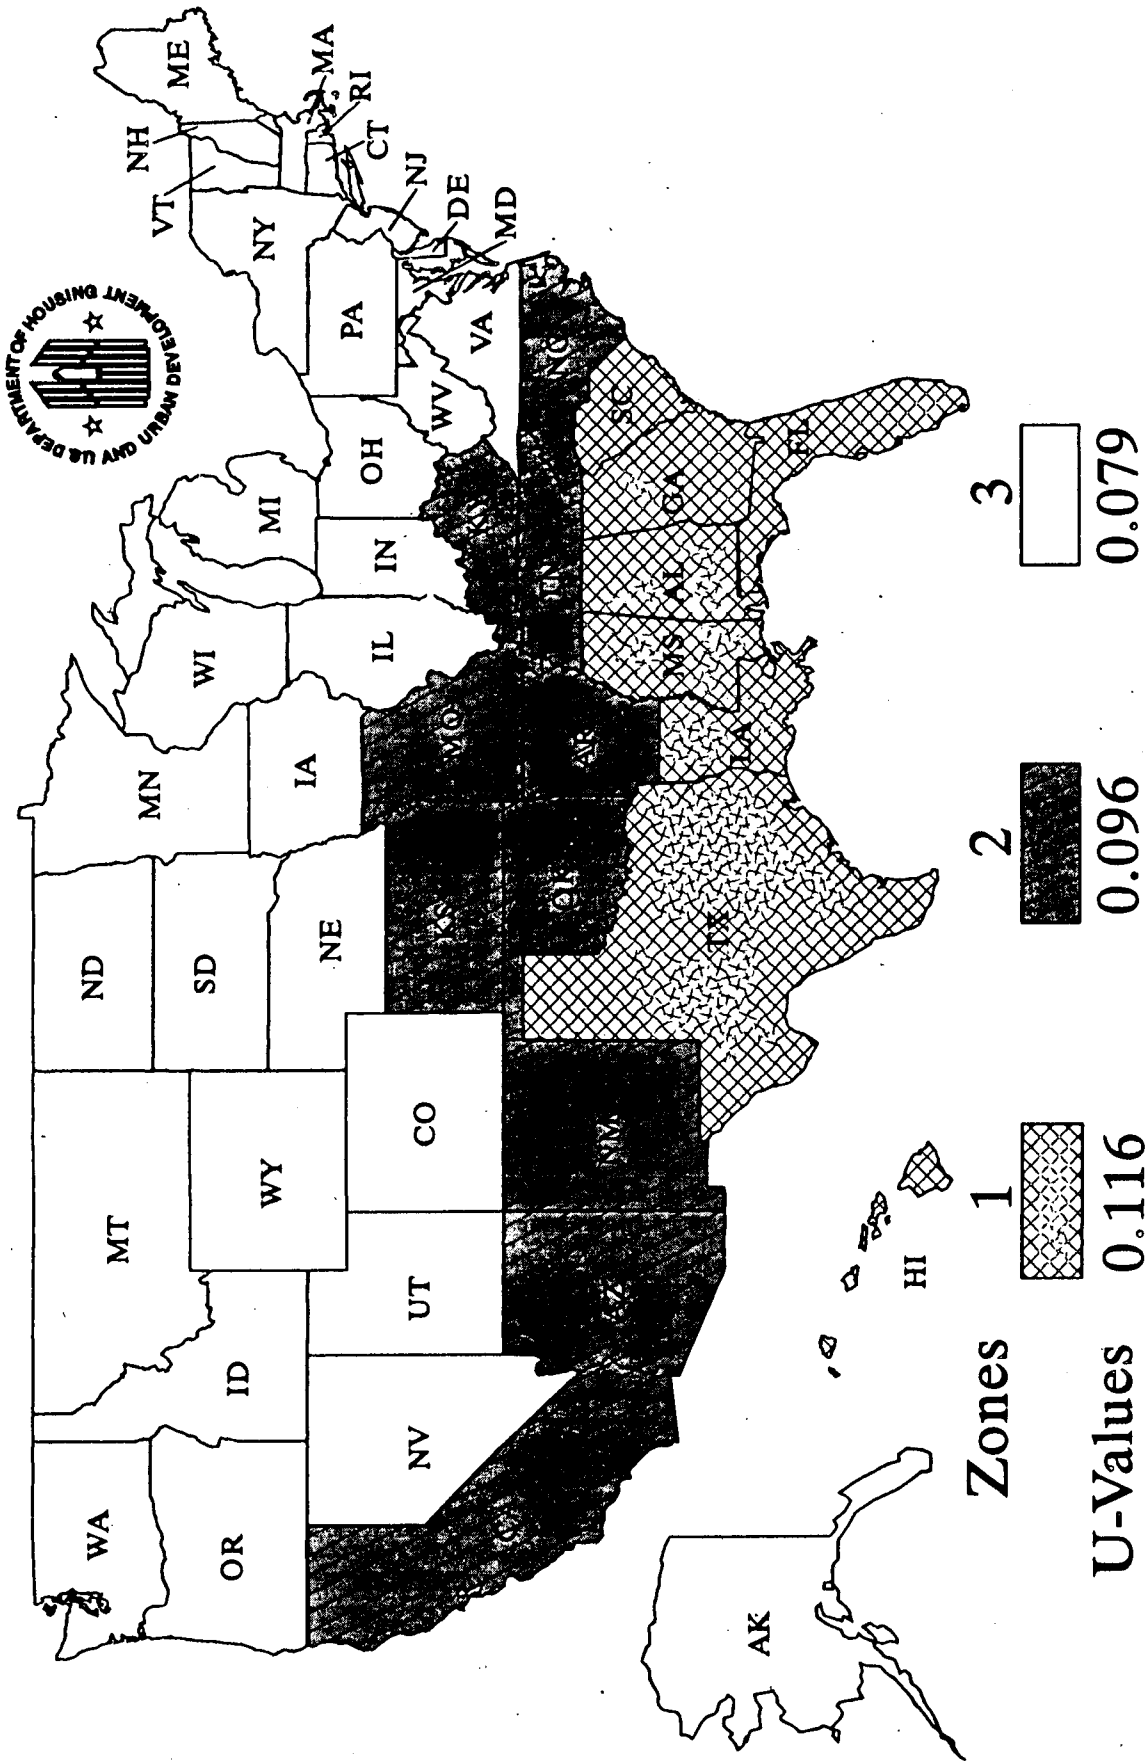

Furthermore, the Department believes that the national preemptive building code should have a uniform implementation date so that manufacturers in all parts of the United States will make these homes available at the same time to consumers. Also, a differing effective date solely for the northern region (Zone III) would complicate the enforcement of the

program and the orderly transition to new energy efficient homes.

To ensure that the production of manufactured homes is not adversely effected and for uniformity of enforcement, the Department has determined that the effective date of these energy standards is 12 months from the date of publication. The new three "U" Zones are shown on the attached map:

BILLING CODE 4210-27-U

U/O Value Zone Map for Manufactured Housing

Credit for High Efficiency Heating/Cooling Equipment. Calculating the Uo Value

In the proposed rule, the Department proposed a method for giving credit for high efficiency heating/cooling equipment. This would provide manufacturers with the flexibility to provide lesser insulation levels provided that the heating/cooling equipment exceeded the fuel efficiency used in calculating the Uo values for the home.

The MCC proposed that the Department permit credits in three areas:

1. Solar water heaters;
2. Infiltration control; and.
3. High-efficiency equipment.

Departmental Views on the Issues Raised by the Commentators

To assure the proper treatment for energy efficient heating/cooling equipment, HUD asked PNL to evaluate the proposed credits suggested by the MCC. Based on PNL's opinion, the Department has determined that the estimated credits are excessive, due to the fact that the MCC analysis assumes that a fractional change in equipment efficiency translates directly to the same fraction change in the required Uo yields.

The reduction in the Uo value is less than the increase in equipment efficiency (Revision To The Energy Conservation Requirements In The Manufactured Home Construction and Safety Standards—Appendix F—HUD User 005943). Further, the reduction in the Uo value should never be less than the change in the equipment efficiency (Appendix F).

The MCC calculations are not consistent with this principle. That is, the base case is the NAECA minimum for manufactured home fossil fuel furnaces, with an AFUE of 75. The MCC gives credits for two levels of equipment efficiency, AFUEs of 80 and 90, which yield an increase in efficiency of almost 7% and 20% (75/80 and 75/90) respectively. The increase in the allowed Uo value should be less than this.

Similarly, the MCC proposal includes a credit for solar water heaters which is excessive. The Department of Energy's Energy Information Administration (EIA) has determined that the hot water heating is only about 18% of total residential energy use. PNL has prepared the following table which shows the approximate solar savings implied by the change in Uo values in the four proposed zones.

TABLE D.—APPROXIMATE SOLAR SAVINGS

| | Base Uo | Solar | HVAC change (per-cent) | Change re-quired (per-cent) |
|-------------|---------|-------|------------------------|-----------------------------|
| Zone I | 0.126 | 0.155 | +23 | -69 |
| Zone II ... | 0.110 | 0.148 | +35 | -104 |
| Zone III .. | 0.092 | 0.128 | +39 | -117 |
| Zone IV .. | 0.098 | 0.117 | +19 | -58 |

Note that Zones II and III are estimated to require saving more than 100% of the water heating energy, which makes them unlikely. In general, solar water heaters meet a fraction of the water heating energy demand. It is seldom economical or practical to design a solar water heating system which meets 100% of the water heating need. There is also generally a need for electricity to pump the water being heated in the solar system. Finally, it should be noted that the MCC proposal did not include any specification for how large or effective the solar water heater was to be.

Based on the analysis enumerated above, we have concluded that the MCC proposed recommendations are not technically supportable and the methodology proposed by the Department in the February 24, 1992 proposed rule, should be included in the final rule. This methodology for alternative heat loss calculations of energy usage is contained in the publication "Overall U-Values and Heating/Cooling Loads—Manufactured Homes, PNL 8006, February 1992—§ 3280.508(b) (HUD User-005945). Other similar calculations could also be acceptable provided that all of the factors indicated in the HUD User-005945, Overall U-Values and Heating/Cooling Loads—Manufactured Homes, PNL 8006, February 1992—§ 3280.508(b), are covered.

V. Ventilation and Indoor Air Quality Standards

In conjunction with the proposed energy conservation standards, the Department is amending the standards to address the issues of condensation control and indoor air quality. The basic purpose of the ventilation standards is to prevent the potential deterioration of the home due to the accumulation of moisture and to obtain a satisfactory living environment.

The tighter construction of the homes that will occur as a result of the new energy conservation standards reduces the natural air flow in and out of these homes. This reduced number of natural air changes raises the concern about

indoor air quality. The Department has concluded that the issues of condensation control and indoor air quality require more effective standards for ventilation and vapor retarder placement.

Three sources of input have been used in developing the final standard for indoor air quality and ventilation:

1. ASHRAE 62-1989 which was the fundamental document which the proposed rule was based upon.

2. Public comments from consumers, manufacturers, trade associations and other interested parties.

3. An independent reviewer, FPL/NIST, that was used to determine the merits of all comments.

HUD's conclusions are embodied in the language of the rule.

To provide adequate ventilation for the interior of the home, the Department proposed that a combination of mechanical and passive systems be used. Each home would be designed with the capability to change the indoor air at the rate of 0.35 air changes per hour. HUD originally proposed a 75 cubic feet per minute intake with an exhaust system providing at least 50 cubic feet per minute exhaust.

The ventilating system would have to be capable of operating independently of the heating or heating and air conditioning function, but may be integrated with the main blower system. The Department proposed that a system may have automatic controls, but should be manually operable.

The Manufactured Home Advisory Council (the Council) met on July 13-14, 1993. The Council made this recommendation to the Department:

The Department should withdraw the proposed ventilation provisions in Subparts B and F and rewrite the proposal based on the Forest Products Laboratory (FPL) and National Institute of Standards and Technology (NIST) research. Also, the Department should undertake a cost benefits justification and solicit input from the public using negotiated rulemaking or "other processes". To the extent possible, the ventilation standards should be promulgated along the same time lines as the energy standards for implementation at the same time.

Members of the Advisory Council also made several comments concerning condensation problems. One council member said that indoor air quality solutions should be left up to manufacturers while another member said that some manufacturers will not include ventilation without mandatory standards. Another member of the Council said that there are considerable problems with moisture in the Northwest and that something should be done.

The Advisory Council members noted the work that had been done by FPL/NIST and several members indicated that HUD's final proposal should be patterned on the FPL/NIST report. The Council was also concerned about the October 24, 1993 deadline for the issuance of the energy conservation measures and the Council wished to see a better cost/benefit analysis.

The Advisory Council's recommendation on the ventilation standard consists of four parts:

1. The Department should use the FPL/NIST report in determining the ventilation standards.

2. The Department should undertake a cost benefit analysis of the ventilation standards.

3. The Department should solicit input from the public using negotiated rulemaking or "other process".

4. The ventilation standards should be promulgated along the same time lines as the energy standards for implementation at the same time.

Concerning the FPL/NIST report, HUD had contracted with these organizations to provide an independent and authoritative assessment of the public comments and the original proposed rule. The Advisory Council was supportive of the recommendations contained in the 1993 FPL/NIST report. Also, the FPL/NIST report is current and is based on ASHRAE 62-1989.

The Department and the Advisory Council both agree with the basic conclusions contained in the FPL/NIST report. Almost all of the recommendations presented by FPL/NIST were accepted by HUD. Some of their recommendations were modified to address the particular needs of manufactured homes. Also, several recommendations, such as requirements for the location of the wall vapor retarder, will be addressed in future revisions to the FMHCCS.

The next issue raised by the Council was the need for a cost benefit study of the ventilation standard. To ensure that the cost estimates are reflective of actual conditions, HUD has expanded the number of cities used in its study to obtain better precision for ventilation costs. This matter was previously covered as part of the discussion of the overall cost of the new Uo requirements on consumers (see Section IV D). It should be noted that even if the cost of ventilation equipment is added to the cost of the energy conservation measures, the overall energy and ventilation standard remains cost effective.

Concerning the solicitation of input and the use of negotiated rulemaking, the Department has compiled an

extensive public record on the ventilation standard, including the recommendations of the Advisory Council. Given the level of input shown in the public record and the study by FPL/NIST, the Department believes that negotiated rulemaking would not be appropriate and that the Department should proceed with the issuance of the final standard.

Finally, the Advisory Council recommended that the ventilation standards should be implemented at the same time as the other energy standards. We agree with this recommendation and therefore, the Department has determined that the energy and ventilation standards should be promulgated and made effective 12 months after the publication of the final rule.

Considerable public comments were received on interior mechanical ventilation. Several commentators expressed strong support for strengthening the current requirements for ventilation and there was generally no objection to using ASHRAE 62-1989 as a basis for ventilation standards for manufactured homes. Only one commentator opposed any change to the current standards, because in the commentator's opinion, even the current standards were not enforced sufficiently.

Most commentators generally accepted a target ventilation rate of 0.35 ACH as desirable. Several commentators stated that there is insufficient technical background information and justification given in the proposed rule. A number of disagreements focused on specific implementation of the standard and requirements that were perceived to go beyond ASHRAE 62-1989. These requirements include the mandatory installation of mechanical ventilation and HUD's rejection of openable windows as an alternative to mechanical ventilation.

The Bonneville Power Administration (BPA), which is part of the Department of Energy, agreed with HUD's assessment that homes are being built relatively air tight and that an unacceptably low natural infiltration rate would result from further air tightening. They also felt that, even though manufacturers are constructing air-tight homes now, there is no incentive for them to continue to do so. While some manufacturers may be producing air tight units at the factory, this does not guarantee they will remain at the same airtightness level after being transported to the site and undergoing the necessary set-up preparation (i.e., plumbing, electrical, HVAC, drainage, etc.) BPA suggested that testing be

required to assure units will perform at the stated maximum air tightness level.

BPA also recommended that some alternative method of infiltration control or ventilation equipment should be considered for a trade off credit, similar to the credits given for higher efficiency heating and air conditioning equipment. They felt that a considerable variety of cost effective equipment is available, which provides numerous alternatives to the manufacturers.

One major consumer organization wanted to increase whole house air flow beyond .35 air changes per hour (ACH). They stated that while .35 ACH is a reasonable ventilation level in most cases, the capacity to exceed this level is very important in smaller housing units or in housing units with a higher than average number of occupants. Further, additional ventilation capacity is particularly important in the first year of a new home, because building materials emit a variety of substances, including moisture. These substances can have significant negative impacts on an occupant's health and compound the problem of condensation control.

The Use of American Society of Heating, Refrigerating and Air Conditioning Engineers (ASHRAE) Standard 62-1989

HUD has concluded that the supporting documentation provided by FPL and NIST provides good technical support for HUD's final determination to use the ASHRAE 62-1989 standard. They submitted a report to HUD which detailed their moisture determinations. This report, entitled Ventilation, Moisture, and Indoor Air Quality in Manufactured Houses, February, 1993, is available from HUD User.

ASHRAE originally established the ventilation rate of .35 ACH by a consensus process. It has been carefully researched and is considered to be the most authoritative and accurate document available. Most of the commentators did not object to using this document as a basis for our ventilation.

Accordingly, the Department has determined that the ASHRAE 62-1989 target of 0.35 air changes per hour is proper for the anticipated usage and occupancy level of manufactured homes. Use of enhanced ventilation for periods of unusually high occupancy or during the first year of occupancy while not required would be recommended. The value of .35 ACH is based on obtaining good indoor air quality under normal conditions.

Intake and Exhaust Rates for Whole House Ventilation

In order to accomplish the levels contained in ASHRAE 62-1989, the Department originally proposed a 75 cubic feet per minute intake with an exhaust system providing at least 50 cubic feet per minute (CFM) exhaust. This was in addition to the kitchen and bath ventilation (see the discussion below).

The Intake and Exhaust Rates

Some of the commentators focused on the potential technical problems which could occur. They said numerous problems will be created by the 75 CFM requirement, such as: creating a need to preheat air in colder climates; condensation in walls and attics; increased thermal load; and increased risk of structural damage from outside moist air. The home owner will simply not use the mechanical ventilation system since it will bring in raw unconditioned air, which the owner feels will be more costly to heat or cool.

Because of the air supply-exhaust differential, 75 and 50 CFM, most commentators believe that the requirement for a system with a positive pressure may be counterproductive and should be eliminated. They said that moist air will be forced into the wall or ceiling cavity potentially causing deterioration of the structure. In the Indoor Air Review, April 1992 issue, it was stated that "Positive Pressure Ventilation" has some major drawbacks as stated (see below).

Positive Pressure Ventilation— * * * The positive pressure can force warm, moist indoor air through holes left in the building envelope, increasing the risk of condensation in walls and attics. This approach is seldom used in colder climates due to the fact that the incoming air will create some discomfort in the home unless it is preheated. It can also create a great deal of structural damage to the building.

Several commentators stressed the need for further research. They felt that the Department, in cooperation with home manufacturers, equipment manufacturers and other Federal agencies, should undertake additional research and field testing of ventilation systems and installation methods.

A few commentators were concerned about HUD's proposed fixed fan ratings of 75 and 50 CFM ventilation, independent of the size of the home. They stated that this may not provide the anticipated results because homes vary in size from 800 up to 2500 square feet of floor area. If this fixed fan size is used in very small and very large size homes, a significant difference in the number of air changes per hour (ACH)

will exist. For example, the recommended fan systems in an 800 square foot home would provide about 0.5 ACH at an elevated positive pressure, while in a 2500 square foot home, the fan systems would provide only 0.15 ACH. Fan requirements should be sized to the size of the home.

A manufacturer believed that a lower rate, 25 CFM, was sufficient. The manufacturer based this conclusion on the fact that HUD's CFM rates are from the ASHRAE 62-1989 standard, which allows for natural ventilation of site built homes. They said that HUD did not allow credit for natural ventilation. Also, fuel burning fireplaces, water heaters and furnaces used in manufactured homes have sealed combustion chambers which require less air than site built homes. It appears to the commentator that 25 CFM mechanical ventilation systems would be adequate, and would compensate for the tighter home construction resulting from higher insulation levels.

Another commentator questioned the effectiveness of the fans installed CFM rate. BPA had studied a number of manufactured homes in the Pacific Northwest to determine compliance with their utility sponsored insulated home. They discovered that the performance of the fan was reduced by 35% from its rated CFM when installed in the home. They attributed this discrepancy to duct friction losses.

Some commentators felt mechanical ventilation standards lacked consideration of natural ventilation through openable windows. They noted that natural ventilation through openable windows is still the most practical and affordable means to improve indoor air quality. Also, ASHRAE 62-1989 and many model building codes require no mechanical ventilation for dwellings when rooms have openable window areas totaling at least 4 percent of floor areas.

There was total agreement among commentators that homes in Alaska should use only mechanical ventilation as Alaska's climatic conditions are more severe than most of North America. Their experience indicated that mechanical ventilation is the only mode of ventilation that works, because it provides better control of ventilation rates, air distribution and air tempering methods.

A home manufacturer was concerned about the home owner paying for mechanical ventilation when he/she can have ventilation for free by simply opening the window. A commentator stated that there is insufficient documentation or technical analysis to warrant the recommended changes with

regard to ventilation. Furthermore, several commentators suggested that adequate ventilation may not be provided as intended by the proposed rule.

HUD feels the supporting documentation for ventilation is strong and sufficient to make decisions on this matter. The FPL/NIST report provided good technical analysis and data to support HUD's final determination. These contractors used the latest in computer simulation, the MOIST computer program, to make the best determination concerning these complex moisture problems. The report details their determinations on the necessary level of ventilation and it addresses many of the comments submitted on the proposed energy rule.

The Department agrees with the commentators who questioned the air supply-exhaust differential rates (75 and 50 CFM) and the resulting problems caused by positive pressure. FPL/NIST's analysis also indicates that a balanced system is preferable. HUD has reconsidered this matter and agrees that an unbalanced system could be detrimental and would potentially allow moisture accumulation in the wall. As a result, the exhaust requirements of 75 CFM and 50 CFM fans are deleted and HUD will require that the manufacturer specifically meet .35 ACH for the home. Also, tolerance considerations allowing positive and negative pressures were noted in the rule which is a function of climate location.

In order to meet the ASHRAE 62-1989 standard, FPL/NIST determined that .035 CFM per square foot of floor area of mechanical ventilation was needed. This was derived from an empirical relationship of natural and mechanical ventilation, and the measured natural infiltration rates of manufactured homes. Recently built manufactured homes have an average natural infiltration of .25 ACH. An empirical relationship indicated that a .20 ACH mechanical ventilation is needed to obtain the total .35 ACH. This translates into .035 CFM per square foot of total floor area; a typical 1200 square foot home would require a 42 CFM fan.

Concerning the allowance in ASHRAE for natural ventilation, and thereby lower ventilation rates, ASHRAE 62-1989 states: "The ventilation is normally satisfied by infiltration and natural ventilation. Dwellings with tight enclosures may require supplemental ventilation supply for fuel burning appliances . . ." (Emphasis added.) HUD did allow for infiltration but calculations indicated that it was insufficient to meet ASHRAE's .35 ACH.

ASHRAE also states that additional ventilation is needed to accommodate the requirements of the installed fuel burning equipment. If manufactured homes did not have sealed combustion chambers, which obtain air for combustion directly from the outdoors, even more ventilation would be needed.

Concerning the use of openable windows to provide ventilation, we acknowledge that in theory, it is less expensive to use windows rather than mechanical ventilation. However, as noted in the public comments, some home owners would not use the windows on a regular enough basis to assure adequate ventilation. This tendency will be even more likely in cold climates.

In addition, an openable window does not provide for uniform ventilation of the home to the degree the fan system can provide. The validity of this concept is supported by the state of Alaska's specific request for mechanical ventilation. Their climate conditions are among the most severe in the United States. They said that mechanical ventilation provides better control of flow rates, air distribution and tempering means.

HUD acknowledges that a mechanical system could be disabled by the home owner. Nevertheless, we believe that the home owner will realize that the purpose of the ventilation system is for a healthy indoor environment and for the durability of the home.

Therefore, the Department has concluded that mechanical ventilation is necessary to obtain the level of ventilation specified in ASHRAE 62-1989. A requirement for mechanical ventilation at a rate of 0.35 CFM has been added.

Cost of Ventilation and Equipment

A number of commentators discussed the cost impact on homes. They said that the proposed requirements by HUD attempt to create acceptable indoor air quality by sacrificing energy conservation, without estimating the costs involved. Further, the commentators claim that the ventilation equipment has not proven to be reliable or effective; also, no evaluation of the operation and maintenance costs of the mechanical systems has been made. Concern was also raised that occupants would interfere with the proper operation of the equipment.

A number of commentators expressed concern that the new ventilation standards would be costly to install and the loss of heated air due to ventilation ("energy penalty") was not considered. HUD investigated this matter and has determined that the total costs for

equipment and increased energy consumption are small. The retail cost of the installed equipment ranges from \$200 to \$300.

Two feasible types of equipment were considered: the furnace fresh air vent system and a separate exhaust fan with intake vents. Five cities were considered in this analysis: two northern cities and three southern cities. For both systems, the annual cost of the energy averaged \$50, with a maximum of about \$100.

While this will reduce the net savings from the ECMs, the purchase of ECMs remains cost-effective with substantial net savings for the consumer. Further, HUD believes the societal benefit derived from healthier living conditions should be considered; this benefit is at least implicitly accounted for in the ASHRAE 62-1989 standard.

We believe that the concern about the reliability, maintenance and durability of the ventilation equipment is overstated. This concern appears to be based on operating standard bathroom or kitchen fans, most of which were not designed or intended to be operated continuously. While the manufacturer will need to install a fan which is appropriate for the size of the home, a properly chosen fan can run continuously for years.

On a related matter, a number of commentators suggested using a blower door test to verify infiltration rates and duct leaks. HUD did not present this or any testing protocol in the proposed rule; HUD will consider this in future updates to the FHMCS.

Kitchen and Bath Ventilation Rates

Kitchen and bath fans are installed to provide spot ventilation for the control of excessive moisture and odor. The HUD-code (24 CFR 3280, Subpart B) includes a requirement for an air change for the kitchen every 30 minutes. The proposed rule specifies a ventilation rate for the kitchen of 100 cubic feet per minute (CFM). The present HUD-code requires an air change every 12 minutes for bath and toilet areas. The proposed rule would be 50 cubic feet per minute in these areas. Ventilation through openable windows would not count as a ventilation method except for a separate toilet compartment. These rates conform to ASHRAE Standard No. 62-1989.

There was general agreement that the bath and kitchen fans should be capable of producing 50 and 100 CFM. This conforms to ASHRAE requirements, which are considered by most to be the best authoritative source; also, ASHRAE has a long history of development and consensus. The intent of these fans is to remove peak or spot ventilation needs.

HUD accepted a suggestion that in a separate water closet compartment, an operable window will be allowed in lieu of mechanical ventilation. Because of the severity of the climate, manufactured homes destined for Alaska will not be allowed to use openable windows.

Attic Ventilation

In the February 24, 1992 proposed rule, ventilation would have been required for all attic and roof cavities with the exception of single-section homes that have metal roofs and no underlayment. All attic or roof cavities, except those on certain single-section homes, should be ventilated with at least 50% of the open free ventilation area in the upper half of the roof cavity.

The remainder of the vents would be equally dispersed in the eaves or a low location in the gabled ends. A free ventilation area equal to at least 1/300 of the attic or roof cavity floor area should be provided. In addition, both mechanical and passive ventilation of the roof cavity will have a 1-inch air gap between roof and insulation. This 1-inch gap also applies to cathedral ceilings.

The research on this subject indicates that attic or roof cavity ventilation is the primary and most reliable method of removing condensation. It also assists in providing a way for moisture to escape from the home that is not removed by other methods. This research which was done in the late 70's also revealed that a vapor retarder should be utilized on the warm side of the attic or roof cavity. A prominent study was performed by Burch and Luna and is titled, A Mathematical Model for Predicting Attic Ventilation Rates for Preventing Condensation on Roofing Sheathing.

Alternatively, in the proposed rule, a mechanical system would be permitted in the attic or roof cavity to provide the ventilation. A minimum rate of 10 air changes per hour was included in the proposed rule, or 0.7 CFM per square foot of attic floor area. The mechanical ventilation was to be controlled by a switch with an automatic humidity sensor control.

Certain single section manufactured homes would be excluded from the attic and roof cavity ventilation requirements. These single wides were excluded because of economic considerations. However, additional requirements were imposed, such as the sealing of the ceiling diaphragm. Also, the Department proposed that an interior air exchange rate capable of at least 150 cubic feet per minute would be required.

Roof Cavity Ventilation

Generally, the comments supported most of HUD's proposed recommendations and confirmed HUD's view that attic ventilation is needed. Commentators indicated that HUD needs to provide industry with more flexible ventilation options in locating the open venting area and the ventilation reduction when a ceiling vapor retarder is installed. Many commentators agreed that the mechanical ventilation rate of 10 ACH is excessive. A few commentators indicated that the calculation of the roof cavity air change rate needs to be clarified. Several commentators raised the concern that roof cavity ventilation equipment would negatively pressurize the cavity, thereby causing indoor air to exfiltrate from the living space into the roof cavity.

Other commentators supported HUD's revision to the rule that permitted a sealed attic for certain single-wide homes. These homes would have special requirements including sealing of all air leakage sites in the ceiling. One commentator wanted this exception extended to double-wide homes. Another commentator stated that it would be difficult to seal all air leaks.

Many commentators agreed with HUD's decision to ventilate only homes having shingled roofs while some single section manufactured homes constructed with metal roofs will not require ventilation. Some suggested that a testing protocol be developed to guarantee proper sealing, possibly requiring a blower door test.

A manufacturer's experience indicated that most passive ventilation systems don't work as well in practice as in theory. An active ventilation system would be preferred provided it could be controlled by a humidity controller and would not provide positive pressure to the attic space. Some commentators had opposed mechanical ventilation saying that it would not be viable due to lack of air space volume and the potential for the system to fail.

One leading consumer organization supported HUD's requirement on roof ventilation. They believe that condensation damage has been a serious problem in manufactured housing and has resulted in expensive repairs and premature deterioration of homes. While maintaining the ASHRAE standard, this organization indicated that the Department should cooperate with other federal agencies, equipment producers and home manufacturers to undertake additional research. This should include field testing of

ventilation systems and installation methods. The organization also believes this approach will result in the best method for meeting the standard.

Another commentator stated that the ventilation condensation proposal would impose unnecessary and costly new standards upon manufacturers. Further, they said HUD failed to cite any rationale or justification for the change, such as reported systemic failures in manufactured homes (roofing system), or evidence that manufactured homes suffer from poor air quality or excessive condensation.

A major utility company supported the proposed ventilation requirements for all attic or roof cavities. The utility stated that the implementation of passive and mechanical systems is necessary for condensation control. Also, these measures will improve indoor air quality for residents and prolong the life of the structure.

A number of commentators felt that 10 ACH for the mechanical ventilation of the roof cavity was excessive; this was based on a .7 CFM/ft² of attic. HUD has determined that the rate for the roof cavity should be lowered to .02 CFM for every foot of attic floor area. FPL/NIST has investigated this matter and believes that this .02 CFM is reasonable.

In addition, many of the commentators concur with HUD's proposal to permit a sealed attic for certain single wide metal roof homes. The FPL/NIST recommendation allowed the option for the attic to be ventilated or sealed. However, FPL/NIST acknowledges that experience with construction standards over the years has indicated that ventilated attics work. Many of the commentators, including manufacturers of homes, support ventilating the attic.

Originally HUD proposed that single wide units with metal roofs would be required to have a minimum whole house mechanical ventilation rate of 150 CFM. Many commentators said the rate was excessive and not substantiated. These comments are supported by the recent report to us by FPL/NIST and the public comments. The report indicates that a whole house ventilation rate of 0.35 ACH is adequate, if the ceiling is sealed to prevent warm moist air from flowing into the unvented roof cavity. The requirement for single section homes with unvented roof cavities to have a whole house ventilation rate of 150 CFM is removed from the rule.

FPL/NIST, who did a recent study on attic ventilation, said they prefer a sealed attic for all homes; however, they also felt that a ventilated attic was acceptable. FPL and NIST said that cavity ventilation over the last forty

years has been a way to avoid moisture accumulation but little technical basis exists to support this method. Computer simulation run using the NIST moisture model (MOIST) showed the drying and wetting effects in the attic caused by various conditions, such as climate, indoor relative humidity and ceiling infiltration.

Even though FPL/NIST are not convinced that roof vents are necessary, vents can usually be installed cheaply and easily without comprising the thermal integrity of the roof. Because of the many years experience in constructing vented attics, they recommended a parallel to other building codes: 1/300 vent area to attic floor area. HUD concurs with their recommendations.

They also recommended that the roof cavity have positive pressure and that cathedral ceilings not be ventilated. Furthermore, measurements on vented walls showed that vents may increase leakage of moist air into the cavity. This would cause structural and sheathing deterioration in the wall cavity. This deterioration would go unnoticed since the interior of the wall is not easily accessible.

HUD believes that additional analysis and research needs to be done before a final decision is made concerning sealed roof cavities. Consumer organizations also recommended more field testing and research. As a result, HUD intends to have NIST investigate issues related to attic ventilation and infiltration.

Concerning the comment that the new standard is costly and there is no "evidence" that a problem exists, HUD has investigated many claims of condensation and moisture problems. These problems were mainly in the northeast and southern regions. Most of the problems seem to be related to unvented attics.

Another commentator said that a blower door test protocol should be developed to insure the proper sealing of the ceiling. HUD has considered this suggestion but concluded that the added cost versus benefit does not warrant making this a requirement. Nonetheless, HUD will investigate and consider this in the next cycle of proposed changes to the standards.

The issue of the possible failure of the mechanical system was also considered by HUD. HUD expects the manufacturer to give instructions in the owners manual that will give some indication of the inspection and maintenance needed on these fan systems.

Moisture Control

The main issues in the proposed rule concerned vapor retarder placement, the

condensation control map and the sealing of penetrations.

Ceiling Vapor Retarders

HUD included in the February 24, 1992 proposed rule a requirement for a ceiling vapor retarder with a permeance no greater than 1 perm (dry cup method) installed on the living side of the roof cavity. Also, the ceiling vapor retarder could be omitted in the southern condensation zone. Finally, the term "ceiling vapor barrier" has been changed in the proposed rule to the term "ceiling vapor retarder."

A manufacturer suggested that a vapor retarder should be used in humid climates, but should not be mandatory since these areas are small geographically. The Oregon State Building Code agency suggested that the vapor retarder be placed on the living side of all manufactured homes. A leading consumer organization suggested that HUD specify one uniform location for the vapor retarder because differing locations would restrict the transportation of homes to other locations. This organization also recommended following the experience of the Pacific Northwest in the placement of the vapor retarder. Alaska considers their situation unique and stressed the need for a vapor retarder in all their homes.

The State of Colorado's Housing Office agrees with HUD that a vapor retarder is needed and all air leakage paths should be sealed. They also stated that improper sealing was a major problem. To alleviate this problem, they recommended a blower door test. An insulation association advocated deleting the vapor retarder in mild heating climates and hot and humid climates. They felt this would more easily accommodate reverse (heat/moisture) flows.

Another code agency suggested that HUD follow ASHRAE and the MEC standards. ASHRAE specifies a vapor retarder on the outside in warm climates and on the inside for cold climates. The MEC allows the omission of the vapor retarder in hot and humid climates and gave detailed parameters where this applies. Another association recommended the use of both a vapor retarder and attic ventilation. They said the proposed standard should reduce the incidence of condensation damage, while assuring new homes will be able to achieve a high level of energy efficiency.

FPL/NIST felt the vapor retarder should be placed on the inside in cool climates and on the outside in warm climates. They also made the vapor retarder optional for southern zones

under certain building conditions. One commentator felt that a vapor retarder for crawl spaces should be specified in the homeowners manual.

The comments received concerning ceiling vapor retarders varied from recommending no vapor retarder to advocating a vapor retarder in certain weather conditions. No clear consensus seems to exist and very little analytical evidence was provided on the location and need for vapor or air retarders. Much of the public comment was based on experience.

HUD relied on the FPL/NIST study, Ventilation, Moisture, and Indoor Air Quality in Manufactured Houses, February 1993. Other reference standards, such as ASHRAE and the MEC, specify a vapor retarder on the inside for cold climates and on the outside for warm climates. This is similar to our proposed standard.

HUD has used the experience of the Pacific Northwest as much as possible but cannot directly apply their specifications to southern states and other climatic conditions. As with all homes in Zone III, a vapor retarder must be installed on all homes sited in Alaska.

The Department understands that the placement of a vapor retarder in one uniform location on all homes is desirable, so that the home can be moved from one location to another. However, a single location for the vapor retarder is not technically desirable. In addition, most homes, once originally sited, rarely are moved; if they are moved, the second destination is likely to be in the same climatic area.

Theoretical and practical evidence by known authorities and home manufacturers stressed the need for a vapor retarder that is a function of climate. The ASHRAE and the MEC standards also specifies a vapor retarder on the inside for cold climates and on the outside for warm climates.

Accordingly, the Department has determined that the ceiling vapor retarders may be omitted in Uo Zone 1 (see the map contained in Section IV). Also, the term "ceiling vapor barrier" has been changed to the term "ceiling vapor retarder."

The Department has determined that the test method, referred to as the dry cup method in the proposed rule, is referred to as the Desiccant method in the ASTM E-96-90 standard.

Accordingly, the Department has amended § 3280.504(a) to include the ASTM E-96-90 Standard Test method for vapor transmission, the Desiccant method.

To control moisture, placing a vapor retarder on bare crawl space ground

would be beneficial. However, since the set-up of and installation of the home is the responsibility of the local and state authorities, HUD does not have the authority to issue standards on this matter.

Condensation Control Map

In the original proposal, HUD used the ASHRAE condensation map of the United States.

Many commentators were concerned that the condensation control map was difficult to use and did not correspond to state boundaries, which made it difficult to determine the need and enforcement of the vapor retarder. Some commentators said that information concerning the condensation design zone of the home should be placed on the data plate, while others said it should be placed on the heating or cooling certificate. Other commentators said that a prospective second home buyer would benefit from this information and it would be more likely that the home would be placed in the correct condensation zone if the home were moved.

An insulation association generally agreed with the use of a vapor retarder, but was concerned about the interpretation of the condensation zone map. They recommended four zones that were similar to the thermal map; two zones would be hot and humid climates and two would be the cold climates. A code association said that the Canal Zone, Puerto Rico, and U.S. Virgin Islands should be included on the condensation control map.

The condensation control map was taken from the ASHRAE Book of Fundamentals. The ASHRAE zones were developed with the intent that local design engineers could determine the specific requirements for an individual home when they knew exactly the specific site location.

HUD agrees that the map is difficult to read and has redefined the zones to correspond to state borders by simply using the Uo zone map that is given in the energy conservation section (see Section IV E). HUD will also require the home's condensation design conditions of the home to be placed on the data plate. The three types of weather conditions are cold zone, hot zone, and hot and humid zone.

Air Leakage

There was concern about air leakage which could transport moisture and energy through the home envelope. The State of Minnesota was concerned about wind wash through the attic. They said that this causes considerable heat loss at the soffit-wall junction by displacing

entrapped conditioned air with outside air; a baffle can relieve this situation. In addition, the State of Minnesota wanted all penetrations sealed, including, but not limited to, the electrical, plumbing, flue and exhaust penetrations.

The State of Alaska was also concerned about air infiltration and extended Minnesota's recommendations. They added more prescriptive requirements to include the installation methods for doors and windows, and the sealing of major joint envelope elements. Further, they want to use the Canadian standard protocol for depressurization testing of homes. The State of Colorado agrees with the need for this test and felt it would also be effective in determining the leaks in the HVAC system.

A major home manufacturer and others pointed out that the ventilation equipment should exhaust indoor air directly to the outdoors, not into the roof cavity. Another commentator felt that exhausting indoor air into the roof cavity was acceptable.

Air infiltration/exfiltration can transmit considerable energy and humidity and many of the commentators expressed concern about sealing all potential leakage paths. New information presented in the technical journals indicates that leaks in the duct system can contribute as much as 25% to the energy loss in a home.

HUD agrees with Colorado's comment that all penetrations should be sealed; we also agree with Minnesota's suggestion to place air baffles in the soffit. The Department realizes that a blower door test is a good indicator of air leakage, but also realizes that this is an added cost, which may not be cost-effective. HUD is investigating these matters further and will consider them for the next standards update. The duct system issues will also be considered.

Ventilated Walls and the Location of Vapor Retarders in Walls

HUD asked for comments on the use of ventilated walls and the placement of the vapor retarder on exterior walls. The following questions were included in the proposed rule:

1. Given the need for improved thermal efficiency, should the Standards continue to permit the use of ventilated walls? Also, should the Standards limit the use of ventilated walls for use only with metal sided homes?

2. Should the placement and location of the vapor retarders in exterior walls be related to the condensation zone in which it is to be located?

Most of the comments received stated that the ventilated wall should not be allowed. In addition, the FPL/NIST

study also corroborates this opinion. FPL/NIST stated that it will add moisture to wall as well as increase moisture in the attic. Also, it will lose considerable energy and potentially cause deterioration of the home structure.

HUD has reviewed the comments on the use of a ventilated wall. Since the Department did not propose a standard in this area, a decision on this issue will be included in future revisions to the FMHCSS.

The Placement of the Vapor Retarder in the Exterior Wall

Many of the comments discussed in the ceiling vapor retarder section would also apply to the placement of the vapor retarder in the exterior wall. As was stated previously, there is a wide range of views on the placement and need for a vapor retarder.

HUD has reviewed all of the comments concerning the placement and/or need for a vapor retarder on the exterior wall. Since the Department did not propose a standard in this area, a decision on this issue will be included in future revisions to the FMHCSS.

VI. General Update of the Standards

In order to remain abreast of the industries that utilize those reference standards incorporated in the FMHCSS, the Department is amending the FMHCSS to incorporate the latest edition of those standards and incorporate new relevant standards. Public comments concerning reference standards affirmed the Department's position that the reference standards should be updated to the most recent version, new reference standards should be incorporated when adopted by the affected industry, and out of date standards should be deleted. The commentators also expressed concern that the Department is not updating the reference standards often enough. The Department concurs and will be proposing amendments to the FMHCSS on an annual basis.

There was one new reference standard on which there has been significant comment and discussion. First, the Department proposed that "AAMA1503.1-1988, Voluntary Test Method for Thermal Transmittance and Condensation Resistance of Windows, Doors and Glazed Wall Sections" be the appropriate standard for determining U-value of glazed products. Several commentators suggested that a more appropriate standard would be the "NFRC 100-91, Procedure for Determining Penetration Product Thermal Properties." The reasons given for using the NFRC 100-91 are

persuasive, better accuracy being the most significant.

However, the Department has not been given evidence that the AAMA1503.1-1988 is inadequate for the intended purpose. Also, at the present time, the NFRC procedures are being developed for the certification of windows and we have been informed that no certification labels for manufactured home windows have actually been issued by the NFRC. Therefore, the Department will consider the adoption of the NFRC in future revisions to the FMHCSS.

To provide an easy reference, the following table lists the reference standards found in the MHCSS by issuing organization. The organization name and address is underlined. The column to the right indicates the section of the Standards where the reference is used. To the left of the Standard, an asterisk (*) indicates that the Standard is updated. An "N" indicates the Standard is new.

The following Standards would be deleted from the FMHCSS as they are obsolete and have been withdrawn by the issuing organization:

ANSI C72.1 1972, Household Automatic Storage Type Water Heaters. ARI Standard 210-81 for Unitary Air Conditioning Equipment.

ARI Standard 240-81 for Air Sound Unitary Heat Pump Equipment.

ASTM A120-83 Standard Specifications for Pipe, Block Hot Dipped Zinc Coated (Galvanized) Welded and Seamless for Ordinary Uses.

CISPI 310-85

FTM-2-1985 Large Scale Test Method for Determining Formaldehyde Emissions from Wood Products.

ANSI A58.1-1982 Building Code Requirements for Minimum Design Loads in Buildings and other structures.

GAL Standard for Fireplace Stoves for Installation in Mobile Structures.

ASTM D2016-74(83), Standard Test Methods for Moisture Content of Wood.

LP-320B-1973, With 1977 Amendment 1, Pipe and Fittings [Polyvinyl Chloride (PVC)].

Drain Waste and Vent (DWV).

FF-N-105B-1971, With 1977 Amendment 4, Nails, Brads, Staples and Spikes, Wire Cuts and Wrought.

QQ-S-781H-1974, With 1977 Amendment 2 and Notice 1, Striping Steel and Seals.

WW-N-351C-1976, With 1977

WW-P-401E-1974, Pipe and Pipe Fittings, Cast Iron Soil.

WW-V-54D-1973, With 1977 Interim Amendment 3 Value, Gate Bronze.

Other Proposed Amendments

Other amendments are being incorporated into the Standards based upon recommendations submitted by the Department. Amendments developed by the Department in response to needs identified from working with the Standards. Following is a discussion of those changes by section. In addition, the Department considered concerns regarding the Americans with Disabilities Act, the Fair Housing Act and Section 504 of the Rehabilitation Act insofar as they may relate to use of manufactured housing by disabled persons. Design and construction of manufactured housing used as single family private residential housing may not be covered by these statutes. However, if manufactured homes constructed to the FMHCSS are used for commercial purposes, as public accommodations, by a governmental

entity or by recipients of Federal financial assistance or if they are covered multifamily dwellings (as defined by 24 CFR 100.201), the use of the home may be subject to the requirements of these civil rights statutes.

Section 3280.1 Scope

This section is amended to delete those requirements pertaining to waivers and interpretive bulletins. These requirements would be relocated in new §§ 3280.8 and 3280.9 respectively.

Section 3280.2 Definition

Old paragraph (2) definition of "center" is deleted because it does not appear in the FMHCSS.

A paragraph is added to provide a definition of a "Bay Window". The definition is needed to establish minimum square footage of the home for coverage under the Act.

Old paragraph (4) "Combustible material" is deleted as the definition conflicts with the preferred definition of "combustible materials" in § 3280.202(a)(1).

Old paragraphs (5) "defect" and (10) "imminent safety hazard" are deleted. They are more appropriately located in 24 CFR part 3282, the Manufactured Home Procedural and Enforcement Regulations.

Section 3280.3 Acceptance of Plans

The existing section is deleted and replaced with a new section titled Procedural and Enforcement Regulations and Consumer Manual Requirements.

Section 3280.4 Incorporation by Reference

Paragraph (a) is amended to clarify that reference standards have the same force and effect as the FMHCSS. One commentator recommended that the proposed language be changed to preclude over application of reference standards by using phrasing similar to that in model building codes. However, the Department was not addressing this issue with the proposed rule and believes that adding the phrase "Reference Standards have the same force and effect as this Standard" * * * does not impact the degree of applicability. Accordingly, the amendment will be effected as proposed.

Paragraph (b) is amended to provide an updated list of the names and addresses of those organizations whose standards are referenced in the FMHCSS.

Section 3280.5 Data Plate

This change incorporates the language of interpretive bulletin A-2-77 on the durability requirements for data plates. Additionally, a new requirement to provide the Department's certification label(s) number(s) on the data plate is added. One commentator stated that the certification label numbers are not necessary on the data plate. The Department believes that it is necessary to identify the label as belonging to the home in a way that can be verified at the manufactured home location.

Section 3280.8 Waivers

A new section sets forth the requirements for waivers that were previously located in § 3280.1. The changes substantially incorporate the MCC Standards Committee's recommendation except that the Department prefers to retain the term "waiver" as opposed to using the new terminology "determination of equivalency."

Section 3280.9 Interpretative Bulletins

A new section sets forth the provision on interpretative bulletins previously located in § 3280.1.

Section 3280.10 Use of Alternative Construction

A new section is added to clarify that certain homes that do not conform to the FMHCSS in all respects are permissible when certain criteria found in the Procedural and Enforcement Regulations are followed. This is a MCC recommendation.

Section 3280.11 Certification Label

This section has been renumbered from § 3280.8. Additionally, certain language pertaining to transition labels used at the time the FMHCSS were implemented that is no longer needed is being deleted.

Section 3280.103 Interior Light and Ventilation

This section is editorially amended to present the lighting requirements separately from the ventilation requirements. The lighting requirements would be in paragraph (a) and the ventilation requirements in paragraphs (b), (c), (d), and (e).

The lighting requirements in paragraph (a) would reflect the following revisions. The use of artificial light in place of exterior windows would be permitted now for laundry areas, utility rooms, and storage rooms. It would be permissible to combine the space of adjoining rooms to meet the lighting requirements provided at least 50 percent of the common wall area is

open and the open wall area is at least equal to 10 percent of the combined floor area. The CABO Standards Committee recommended the second change.

Paragraph (b) is amended to reflect the new whole house ventilation requirements. Refer to the explanation on whole house ventilation found in the Section of the Preamble on Condensation Control.

Section 3280.105 Exit Facilities

In the rule published for public comment on February 24, 1992 (57 FR 6420), the Department proposed to amend this section to incorporate Interpretative Bulletin B-1-76. Interpretative Bulletin B-1-76 clarifies that swinging exterior doors stops may not reduce the clear opening to less than 73 inches in height and 27 inches in width.

The Department has decided that this Interpretative Bulletin, while still in effect, should not be incorporated into § 3280.105 of the standards at this time. The Department will consider modifications to the standards for exit facilities in the next revision to the FMHCSS and will seek public comment on whether it is appropriate to issue guidelines designed to make manufactured housing more accessible to persons with disabilities.

Section 3280.109 Space Planning

The existing section did not provide any identifiable requirements, and therefore is deleted.

Section 3280.112 Hallways

The existing § 3280.113 is renumbered as § 3280.112 and a new paragraph. Also, in the February 24, 1992 rule, the Department proposed to amend this section to incorporate Interpretative Bulletin B-3-76. Interpretative Bulletin B-3-76 clarifies that an interior door shall have at least 27 inches clear width if the interior door must be passed through to reach an exterior door. This does not apply to interior passage doors which only provide interior access to another room or other interior area.

The Department has decided that this Interpretative Bulletin, while still in effect, should not be incorporated into § 3280.112 of the Standards at this time. The Department will consider modifications to the standards for hallway widths in the next revision to the FMHCSS and will seek public comment on whether it is appropriate to issue guidelines designed to make manufactured housing more accessible to persons with disabilities.

Section 3280.203 Flame Spread Limitations and Fire Protection Requirements

Paragraph (a) is editorially amended to include that list of materials which need not be flame spread tested in accordance with ASTM E-84 or ASTM E-162. This list was inadvertently deleted from the FMHCSS when the February 12, 1987 (52 FR 4581) amendments were published.

Paragraph (b)(4) is amended to clarify that vertical surfaces within 6 inches horizontally of the cooking range are subject to flame spread and combustibility requirements pertaining to cooking range areas. This requirement was inadvertently deleted from the FMHCSS when the August 9, 1984 (49 FR 32008) amendments were published.

Section 3280.208 Fire Detection Equipment

Paragraph (d) is amended to permit locating smoke detectors on walls at a distance permitted by the smoke detector's listing. Several comments were received to also permit smoke detectors on manufactured home ceilings. The Department is not rejecting this recommendation, but believes it needs to be addressed specifically along with several other issues relating to smoke detector reliability and effectiveness.

Section 3280.303(g) Alternate Test Procedures

The section is amended editorially to clarify that the Department shall be responsible for approving alternate test procedures developed under this section. The standards presently do not require the Department's approval before an alternate test procedure is used to approve a design. The industry commented that they prefer that the new requirement not be imposed but the Department's considers it necessary. Experience has often demonstrated that without prior review by the Department, that the real performance level of a tested component could be less than required by the FMHCSS.

Section 3280.304 Materials

Refer to IIIA of this preamble concerning reference standard updates.

Section 3280.305 Structural Design Requirements

A new paragraph (b)(4) is added to incorporate Interpretative Bulletin D-3-76. It clarifies that roof slopes of 20 degrees or less may be excluded from the horizontal wind calculation.

Paragraph (d) is amended to incorporate Interpretative Bulletin D-5-76. It clarifies that the deflection limit

for a cantilevered roof section is 2 times the length divided by 180. Additionally, it clarifies that the uplift loads specified in § 3280.305(c) (1) and (2) are required by § 3280.305(c)(3)(iii) to be increased by a factor of 2.5.

Paragraph (f)(2) is amended to incorporate Interpretative Bulletin D-8-76. This permits increasing the allowed stress on interior walls by 1.33.

Paragraph (g)(2) is amended to incorporate the provisions of Interpretative Bulletin D-8-76. This clarifies the application of coverings and sealants to wood floors subject to moisture.

A new paragraph (g)(3) is added to permit the installation of carpet in a laundry space when the laundry appliances are not provided with the home.

Section 3280.306 Windstorm Protection

Paragraph (a) is amended to incorporate interpretative bulletin D-7-76. This clarifies that 1.5 factor of safety is only applied to the tie down system and it is not required to be applied to the structure of the home.

Section 3280.309 Health Notice on Formaldehyde Emission

Paragraph (b), is amended to delete the requirement that the title be printed with the color red.

Section 3280.401 Structural Load Test

Paragraph (b) is amended to clarify that 2.5 is the lowest factor of safety that will be acceptable when testing under the ultimate load test procedures. This clarification is based upon Interpretive Bulletin E-1-76. Several commentator objected to the Department's requirement that a safety factor greater than 2.5 be used if the applicable reference standard for that material would require it. The purpose of Interpretive Bulletin E-1-76, however, was clearly to set the lower factor of safety limit at 2.5, and as this Interpretive Bulletin went through notice and comment rulemaking, proposed May 11, 1976; final January 4, 1977), it has the same effect as any other rule. Also, as the 1.5 adjustment factor is no longer specified, the Department does not see this posing a problem for the industry.

Section 3280.402 Test Procedure for Roof Trusses

This change was to be editorial by changing the term "mobile home" to "manufactured home". Industry requested that the words "Example of Test Procedure for Roof Trusses" be added. The Department concurs with

the comment that the figure could be misconstrued as implying that this is the only way to test trusses. Accordingly, the phrase is being added to the Figure A-1.

Section 3280.504 Condensation Control and Installation of Vapor Retarders

Section 3280.504 has been amended to have more effective ventilation and more effective placement of vapor retarders. Refer to the section in the Preamble on Condensation Control and Ventilation Requirements.

Section 3280.508 Heat Loss

This section is amended to use the term "U Value Zones" in place of "Winter Design Temperature Zones" and to incorporate the map designating the "U Value Zones" of which there are three.

Paragraph (a) is amended to incorporate the following "Maximum Transmission Coefficients": Zone 3=0.079, Zone 2=0.096 and Zone 1=0.116. The coefficient is in terms of Btu/(hr)(sq. ft.) (degree F).

Paragraph (c) is amended to require storm windows or insulating glass for homes designated for Zone 3.

These amendments to significantly improve the overall Heat Loss characteristics of manufactured homes are described in more detail in the Preamble section on Energy Conservation Standards.

Section 3280.508 Heat Loss, Heat Gain and Cooling Load Calculations

Paragraphs (a) and (b) of this section are amended to incorporate the applicable section of the 1989 edition of the ASHRAE Handbook of Fundamentals and a new paragraph incorporating the Pacific Northwest Laboratories document "Overall U-value and Heating/Cooling Loads—Manufactured Homes" as a reference standard which will outline an acceptable heat loss/heat gain calculation method. (See previous discussion on Energy Conservation Standards.)

A new paragraph (c) is incorporated to account for low R value paths in the heat loss calculations.

A new paragraph (d) is incorporated to calculate a credit to the required U value for utilizing high efficiency heating and cooling equipment.

A new paragraph (e) sets out the appropriate reference standards for determining the allowable U value for window and doors.

There were several comments received expressing concerns over the viability of the default window values

which were included in the proposed rule. Commentators on this subject stated that the values were too conservative and that lower U-values were available.

The Department agrees with the commentators based on its review of the 1989 ASHRAE Handbook of Fundamentals. Table 13 in Chapter 27 provides recognized U-values that are based upon the differing types of window construction and does provide lower U-values. Since the 1989 ASHRAE Handbook of Fundamentals is the source of values and data for heat loss and heat gain determinations, the Department has determined that the Table 13 values should be allowed.

Table 13 provides three categories of window types. Manufacturers shall select the appropriate type and select the window U value from the column for residential housing. Where the type classification is indeterminate, the U-value selected shall be from the window type having the higher U-value.

A new paragraph (f) is incorporated to set the criteria to determine an Annual Energy Used Based compliance as an alternative to the specific Uo requirement.

Section 3280.510 Heat Loss Certificate

The heat loss certificate is amended to be compatible with the revised U Value Zones.

Section 3280.511 Comfort Cooling Certificate and Information

The comfort cooling certificate is amended to be compatible with the revised U Value Zones.

Section 3280.602 Definitions

The definitions of (1) Flushometer tank; (2) Plumbing appliance; (3) Plumbing appurtenance; (4) Whirlpool bathtub are being incorporated into the Standards. A comment indicated that the cross reference in the Whirlpool bathtub definition to a definition of a Hydromassage Bathtub in the National Electrical Code could be misleading. The Department concurs and is removing the cross reference from the definition. A cross reference to address electrical requirements is now included in the new § 3280.607(c)(6).

Section 3280.603 General Requirements

Paragraph (a)(5) is amended to clarify the applicability of the reference standards. It further clarifies that when an appropriate standard not specified in § 3280.604 is utilized, or in absence of an appropriate standard, the plumbing component is to be listed. A commentator pointed out that the

proposed language did not allow for the use of alternative reference standards. The Department agreed with the comment. Accordingly, the final amendment states that alternative standards are acceptable also provided the component is listed.

Section 3280.604 Materials

Paragraph (a) is amended to incorporate the updated reference standards. Refer to Preamble section on Reference Standards.

Paragraph (b) is amended to clarify that where two standards for a component are indicated, it is only necessary to conform to one of them except when an additional evaluation of toxicity is necessary.

Section 3280.604 Materials

Several new standards are being incorporated into the reference standard table. Refer to the Preamble section on Reference Standards.

Section 3280.606 Traps and Clean-outs

Paragraph (b)(1)(iii) is amended to permit the removal of a water closet to provide the clean out access to the drain lines.

Section 3280.607 Plumbing Fixtures

Paragraph (b) is amended to delete several references to the term, "toilet" and replace with the term, "water closet."

Paragraph (b)(4) is amended to permit the use of high loop in the drain system of a dishwasher. Additional clarification is also added on the use of a standpipe for a dishwasher.

Paragraph (c) is amended to incorporate interpretive bulletin G-2-77(a) to clarify that fixture diverter valves do not require direct access.

Section 3280.609(c) is amended by adding new paragraphs (c)(5) and (c)(6). Paragraph (c)(5) specifies that the hot water supply to a fixture faucet, fitting, or diverter shall always be on the left. Paragraph (c)(6) adds criteria for access and installation of Whirlpool bathtub drainage systems.

Section 3280.609 Water Distribution Systems

Paragraphs (b)(5) and (b)(6) are amended to change references from toilets to water closets.

Section 3280.609(b) is amended by adding a new paragraph (b)(7) to require exterior hose bibs and laundry sink faucets with a hose connection are to be protected by a listed non-removable backflow prevention device. In response to a commentator's concern, the requirement is rephrased so that automatic clothes washers are not covered by this requirement.

Section 3280.609(b) is amended by adding a new paragraph (b)(8) to require flushometer tanks to be installed with an air gap or vacuum breaker located above the fixture flood level.

Paragraph (d)(1)(i) is amended to delete the terminology "approved or listed" and replace it with "listed". The term approved is redundant as all plastic plumbing components must be listed.

Paragraph (e)(3) is amended to specify that any solder used in the water distribution system shall not contain more than 0.2 percent lead.

Section 3280.610 Drainage Systems

Paragraph (c)(5) is amended to clarify the manufacturers' responsibilities for drainage systems which require onsite assembly. The clarification assures that the manufacturer will provide all the materials and appropriate installation instructions.

Paragraphs (d) and (e) are amended to use the term "water closet" instead of "toilet."

Section 3280.612 Test and Inspection

Paragraph (b)(3) is amended to use the term "water closet" instead of "toilet."

Section 3280.702 Definitions

The definition of "Connector gas" in paragraph (a)(17) is amended to be more descriptive as to its function and delete the reference to a specific reference standard.

Section 3280.703 Minimum Standards

This section is amended to clarify that compliance with only one of the incorporated reference standards is sufficient to meet the requirement of the FMHCSS.

The table is amended to incorporate the latest edition of the standard reference. Refer to the Preamble section on reference standards.

Section 3280.705 Gas Piping System

Paragraph (c) the requirements for interconnecting gas lines between sections of manufactured homes are amended to permit permanent pipe and listed connectors. In addition, a shutoff valve is required when listed connectors are utilized.

Section 3280.705 is amended to delete the table for gas line systems that are sized for liquefied petroleum (LP) gas only. It is being proposed that all gas lines be sized to handle both LP and natural gas.

Paragraph (l)(2) is amended to clarify that appliance connectors may be installed through openings in cabinetry walls.

Paragraphs (l)(2)(ii) and (l)(3) are amended to clarify that shutoff valves

for appliances are to conform to ANSI Z21.15-1989 and are to be of the non-displaceable rotor type.

Section 3280.708 Exhaust Duct System and Provision for the Future Installation of a Clothes Dryer

Paragraphs (b)(3) and (c)(1) are amended to incorporate the requirements for a roughed in moisture lint exhaust system which were provided by interpretive bulletin H-1-77.

Section 3280.709 Installation of Appliances

Paragraph (e)(6) is amended to incorporate the requirements of interpretive bulletin H-2-76. This clarifies the manufactured home manufacturers' responsibilities in preparing the home to connect external heating or combination cooling/heating appliances at the set-up site.

Section 3280.710 Venting, Ventilation and Combustion Air

Paragraph (b)(1) is amended to incorporate the requirements of interpretive bulletin H-2-78 as amended on February 27, 1979. This permits that section of a fuel-fired heating appliance vent that is above the roof line to be shipped loose and installed at the set-up site.

Paragraph (g) is being deleted. The industry pointed out that paragraph (g) requires that optional ventilation provision be provided. This requirement would conflict with the whole house ventilation requirement being incorporated in § 3280.103.

Section 3280.713 Accessibility

This section is amended to clarify that the gas risers to an appliance may be removable to permit replacement of the appliance.

Section 3280.714 Appliance Cooling

New paragraphs (a)(4) and (a)(5) are added to clarify the testing and certification requirements for cooling and heat pump coils that are installed in a furnace or heating appliance. The certification shall insure that they are rated in combination with the heating appliance or furnace, and in combination with the outdoor section of the system. Additional language has been included to insure that safety is addressed and to implement the Department of Energy procedures.

Section 3280.715 Circulating Air System

Paragraph (b)(4) is amended to clarify the area calculation for return air when doors are undercut for this purpose.

Specifically, it clarifies that the measurement is made from the hard floor deck and not the carpet surface.

Subpart I Electrical Systems

Subpart I is amended to update all references to the National Electrical Code NFPA No. 70, to incorporate the 1993 Edition of that document.

Section 3280.801 Scope

Paragraph (c) is amended to editorially change references to 115/230 volts to 120/240 volts. This makes the FMHCSS consistent with the National Electrical Code.

Section 3280.804 Disconnecting Means and Branch Circuit Protection Equipment

Paragraph (g)(1)(ii) is amended to permit individual appliances on an individual circuit to be rated up to 13.3 amperes before the 150% limitation is placed on the circuit size. This makes the FMHCSS compatible with the NEC.

Paragraph (i) is revised to change 230 volts to read 240 volts.

Paragraph (j) is amended to correct the editorial error on the tag for the power supply entrance. The blank space for the correct ampere rating is being repositioned. Also, the voltage 115/230 is revised to read 120/240.

A new paragraph (k) is added to clarify that a common main disconnect when used with service and distribution equipment shall be rated and listed as suitable for service equipment.

A new paragraph (l) is added to provide a service entrance tag that is compatible with a 3 wire service connection.

Section 3280.805 Branch Circuit Required

Paragraph (a)(1) is amended to change 115 volts as the constant in the calculations of required lighting circuits to 120 volts. This makes the FMHCSS compatible with the NEC.

Paragraph (a)(2) is amended to no longer require the family room to be supplied with a small appliance branch circuit. This makes the FMHCSS compatible with article 220-4 of the NEC.

Paragraph (a)(3)(ii) is amended editorially to clarify the circuits with motor loads, or any continuous duty load may not have a load that exceeds 80 percent of the branch circuit rating.

Paragraph (a)(3)(v) is amended to clarify that a laundry area must be provided with a 20 ampere circuit dedicated for laundry room use only.

Section 3280.806 Receptacle Outlets

Paragraph (b) is amended to clarify that receptacles in compartments

accessible from the outdoors are required to be ground fault protected and that dedicated laundry receptacles provided in areas that are part of a bathroom are not required to have a ground fault protection. It is further amended in response to comment to incorporate the GFCI requirement for receptacles within 6 feet of the kitchen sink.

Paragraph (d)(2) is amended to permit a duplex receptacle to simultaneously serve as the dedicated outlet for a refrigerator and a counter top.

Paragraph (d)(7) is amended to clarify that the receptacle in a laundry area is to be within 6 feet of the intended location of the appliance(s).

Paragraph (d)(8) is amended to delete the language pertaining to receptacles located in compartments accessible from the outdoors. The language is being located in paragraph (b) to remove the confusion over whether or not such a receptacle can be considered the required outdoor receptacle.

Section 3280.807 Fixtures and Appliances

Paragraph (c) is amended to cross reference Article 410-4(d) of the National Electrical Code. This article clarifies that no hanging or pendant type fixture may be installed within 3 feet horizontally or 8 feet vertically of a bathtub rim.

Paragraph (a) is amended to permit the use of "limited combustible" material as a fixture flash ring as "limited combustible" is currently defined and permitted in subpart C.

Existing paragraph (g) is deleted. These provisions apply to the installation of hydro massage bathtubs. Previously, when the 1984 edition of the National Electrical Code was referenced, hydro massage bathtubs would have been treated as hot tubs or spas unless special consideration was provided. The 1993 edition of the National Electrical Code provides appropriate criteria for installing hydro massage bathtubs. Accordingly, those provisions in the FMHCSS are no longer necessary.

Section 3280.808 Wiring Methods and Materials

A new paragraph (g) is added to incorporate the provision of interpretive bulletin I-1-80 to provide the performance requirements for a substantial brace used to support electrical outlet boxes.

A new paragraph (r) is added to establish a limit of one-eighth of an inch as the permissible oversize limit for close fitting of electrical boxes in combustible walls and ceilings. One-eighth inch is the limit currently being

enforced. A new paragraph(s) is added to clarify that N. M. (non-metallic) sheathed cable can be repaired provided the conductors are not damaged.

Section 3280.809 Grounding

Paragraph (b)(1) is amended to clarify that when service equipment is installed on manufactured homes, it is permissible to have the ground and neutral buses in the distribution panel remain interconnected.

Paragraph (b)(2) is amended to change 115/230 volts to read 120/280 volts. This makes the FMHCSS compatible with the NEC.

Section 3280.810 Electrical Testing

Paragraph (a) is amended to incorporate interpretive bulletin I-1-78. This clarifies the acceptable range of voltages that can be used and exactly which conductors must be tested against each other during the dielectric test.

Paragraph (b) is amended to revise the operational check to exclude major listed appliances from the check and to revise the polarity test to permit visual inspection.

Section 3280.811 Calculations

Numerous references to voltage are changed to read 120/240 volts from 115/230 volts.

In paragraph (a)(1) (ii) and (iv), (a)(5), (a)(6) and (b), the term watts is also being replaced with the term volt-amperes. This makes the FMHCSS compatible with the NEC.

Section 3280.813 Outdoor Outlets, Fixtures and Air Conditioning Equipments

Paragraph (a) is amended to specify a listing for outdoor fixtures and equipment of "suitable for use in wet locations."

Section 3280.815 Polarization

Paragraph (b) is amended to change 230 volts to read 240 volts. This makes the FMHCSS compatible with the NEC.

Findings and Certification

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR part 50, which implement section 120(2)(C) of the National Environmental Policy Act of 1969. The Finding of No Significant Impact is available for public inspection between 7:30 a.m. and 5:30 p.m. weekdays in the Office of the Rules Docket Clerk at the above address.

This rule does constitute a "significant regulatory action" as that term is defined in section 3(f) of Executive Order 12866 issued on

October 4, 1993. An analysis of the rule indicates that it would cause an annual effect on the economy of \$100 million or more.

This rule does not create a serious inconsistency or interfere with an action taken or planned by another agency. The rule does not materially alter the budgetary impact of entitlements, grants, user fees or loan programs or the rights and obligations of the recipients of such grants or programs. Finally, the Department believes that this rule does not raise any novel legal or policy issues arising out of legal mandates, the President's priorities or the principles set forth in this Executive Order.

The Regulatory Impact Analysis is available for public inspection between 7:30 a.m. and 5:30 p.m. weekdays in the Office of the Rules Docket Clerk at the above address.

Under 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. As required by the Act, this rule must balance the increased cost with real savings in energy cost.

This rule is listed as sequence number 1484 under the Office of Housing in the Department's semiannual agenda of regulations published on April 16, 1993 (58 FR 24383, 24418) under Executive Order 12291 and the Regulatory Flexibility Act.

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, Federalism, has determined that the policies contained in this rule will not have substantial direct effects on States or their political subdivisions, or the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government. As a result, the rule is not subject to review under the Order. Specifically, the requirements of this rule are directed to manufacturers and do not impinge upon the relationship between the Federal government and State and local governments.

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this rule does not have potential for significant impact on the formation, maintenance, and general well-being of the family, and thus, is not subject to review under the Order. The rule involves standards for manufactured homes. Any effect on the family would likely be indirect and insignificant.

List of Subjects in 24 CFR Part 3280

Fire prevention, Housing standards, Incorporation by reference, Manufactured homes, Reporting and recordkeeping requirements.

Accordingly, 24 CFR part 3280 is amended as follows:

PART 3280—MANUFACTURED HOME CONSTRUCTION AND SAFETY STANDARDS

1. The authority citation for 24 CFR part 3280 is revised to read as follows and the authority citations following all of the sections in part 3280 are removed:

Authority: 42 U.S.C. 5403 and 42 U.S.C. 3535(d).

Subpart A—General

2. Section 3280.1 is revised to read as follows:

§ 3280.1 Scope.

This standard covers all equipment and installations in the design, construction, transportation, fire safety, plumbing, heat-producing and electrical systems of manufactured homes which are designed to be used as dwelling units. This standard seeks to the maximum extent possible to establish performance requirements. In certain instances, however, the use of specific requirements is necessary.

3. Section 3280.2 is amended by removing the paragraph designations from the section, by revising the introductory paragraph, by removing the definitions for "Center", "Combustible Material," "Defect," and "Imminent safety hazard", and by adding in alphabetical order the definition for "Bay Window," to read as follows:

§ 3280.2 Definitions.

Definitions in this subpart are those common to all subparts of the standard and are in addition to the definitions provided in individual parts. The definitions are as follows:

* * * * *

Bay Window—a window assembly whose maximum horizontal projection is not more than two feet from the plane of an exterior wall and is elevated above the floor level of the home.

* * * * *

4. Section 3280.3 is revised to read as follows:

§ 3280.3 Manufactured Home Procedural and enforcement regulations and manufactured home consumer manual requirements.

A manufacturer must comply with the requirements of this part and in addition must comply with the requirements of 24 CFR Parts 3282,

Manufactured Home Procedural and Enforcement Regulations, and 3283, Manufactured Home Consumer Manual Requirements.

5. Section 3280.4 is amended by revising paragraphs (a) and (b) to read as follows:

§ 3280.4 Incorporation by reference.

(a) The specifications, standards and codes of the following organizations are incorporated by reference in 24 CFR part 3280 (this Standard) pursuant to 5 U.S.C. 552(a) and 1 CFR part 51 as though set forth in full. The incorporation by reference of these standards has been approved by the Director of the Federal Register. Reference standards have the same force and effect as this Standard (24 CFR part 3280) except that whenever reference standards and this Standard are inconsistent, the requirements of this Standard prevail to the extent of the inconsistency.

(b) The abbreviations, and addresses of organizations issuing the referenced standards appear below. Reference standards which are not available from their producer organizations may be obtained from the Office of Manufactured Housing and Regulatory Functions, Manufactured Housing and Construction Standards Division, U.S. Department of Housing and Urban Development, 451 Seventh Street, SW., room B-133, Washington, DC 20410.

* * * * *

6. Section 3280.5 is revised to read as follows:

§ 3280.5 Data plate.
 Each manufactured home shall bear a data plate affixed in a permanent manner near the main electrical panel or other readily accessible and visible location. Data plates shall be made of material which will receive typed

information as well as preprinted information and which can be cleaned of ordinary smudges or household dirt without removing information contained thereon; or, they shall be covered in a permanent manner with materials which will make it possible to clean them of ordinary dirt and smudges without obscuring the information. Data plates shall contain not less than the following information:

- (a) The name and address of the manufacturing plant in which the manufactured home was manufactured.
- (b) The serial number and model designation of the unit and the date the unit was manufactured.
- (c) The statement, "This manufactured home is designed to comply with the Federal manufactured home construction and safety standards in force at the time of manufacture."
- (d) A list of the certification label(s) number(s) which are affixed to each transportable manufactured section under § 3280.8.
- (e) A list of major factory-installed equipment including the manufacturer's name and the model designation of each appliance.
- (f) Reference to the structural zone and wind zone for which the home is designed and duplicates of the maps as set forth in § 3280.305(c)(4). This information may be combined with the heat loss/comfort cooling certificate and the Uo value zone map required by § 3280.510 and § 3280.511.
- (g) The phrase: "Design Approval by" followed by the name of the agency which approved the design.

7. Section 3280.8 is redesignated as § 3280.11 and paragraph (c) of the newly redesignated § 3280.11 is revised to read as follows:

§ 3280.11 Certification label.
 * * * * *
 (c) The label shall read as follows:
 As evidenced by this label No. ABC 000001, the manufacturer certifies to the best of the manufacturer's knowledge and belief that this manufactured home has been inspected in accordance with the requirements of the Department of Housing and Urban Development and is constructed in conformance with the Federal manufactured home construction and safety standards in effect on the date of manufacture. See date plate.
 * * * * *

8. Part 3280, subpart A, is amended by adding new §§ 3280.8, 3280.9, and 3280.10 to read as follows:

§ 3280.8 Waivers.
 (a) Where any material piece of equipment, or system which does not meet precise requirements or specifications set out in the standard is

shown, to the satisfaction of the Secretary, to meet an equivalent level of performance, the Secretary may waive the specifications set out in the Standard for that material, piece of equipment, or system.

(b) Where the Secretary is considering issuing a waiver to a Standard, the proposed waiver shall be published in the Federal Register for public comment, unless the Secretary, for good cause, finds that notice is impractical, unnecessary or contrary to the public interest, and incorporates into the waiver that finding and a brief statement of the reasons therefor.

(c) Each proposed and final waiver shall include:
 (1) A statement of the nature of the waiver; and
 (2) Identification of the particular standard affected.

(d) All waivers shall be published in the Federal Register and shall state their effective date. Where a waiver has been issued, the requirements of the Federal Standard to which the waiver relates may be met either by meeting the specifications set out in the Standard or by meeting the requirements of the waiver published in the Federal Register.

§ 3280.9 Interpretative bulletins.
 Interpretative bulletins may be issued for the following purposes:
 (a) To clarify the meaning of the Standard; and
 (b) To assist in the enforcement of the Standard.

§ 3280.10 Use of alternative construction.
 Requests for alternative construction can be made pursuant to 24 CFR 3282.14 of this chapter.

Subpart B—Planning Considerations

9. Section 3280.103 is revised to read as follows:

§ 3280.103 Light and ventilation.
 (a) *Lighting.* Each habitable room shall be provided with exterior windows and/or doors having a total glazed area of not less than 8 percent of the gross floor area.

(1) Kitchens, bathrooms, toilet compartments, laundry areas, and utility rooms may be provided with artificial light in place of windows.

(2) Rooms and areas may be combined for the purpose of providing the required natural lighting provided that at least one half of the common wall area is open and unobstructed, and the open area is at least equal to 10 percent of the combined floor area or 25 square feet whichever is greater.

(b) *Whole house ventilation.* Each manufactured home shall be capable of

providing a minimum of 0.35 air changes per hour continuously or at an equivalent hourly average rate. The following criteria shall be adhered to.

(1) Natural infiltration and exfiltration shall be considered as providing 0.25 air changes per hour.

(2) The remaining ventilation capacity of 0.10 air change per hour or its hourly average equivalent shall be calculated using 0.035 cubic feet per minute per square foot of interior floor space. This ventilation capacity shall be in addition to any openable window area.

(3) The remaining ventilation capacity may be provided by: a mechanical system, or a passive system, or a combination passive and mechanical system. The ventilation system or provisions shall not create a positive pressure in Uo value Zones 2 and 3 or a negative pressure condition in Uo value Zone 1. Mechanical systems shall be balanced. Combination passive and mechanical systems shall have adequately sized inlets or exhaust to release any unbalanced pressure. Passive systems shall have inlets and exhaust of sufficient size to alleviate unbalance pressure conditions under normal conditions. Temporary imbalances due to gusting or high winds are permitted.

(4) The ventilation system or provision shall exchange air directly with the exterior of the home, except it shall not draw or expel air with the space underneath the home. The ventilation system or provision shall not draw or expel air into the floor, wall, or ceiling/roof systems even if those systems are vented.

(5) The ventilation system or a portion thereof may be integral with the homes heating or cooling system. The system shall be capable of operating independently of the heating or cooling modes. A ventilation system that is integral with the heating or cooling system shall be listed as part of the heating and cooling system or listed as suitable for use therewith.

(6) A mechanical ventilation system, or mechanical portion thereof, shall be provided with a manual control and may be provided with automatic timers or humidistats.

(7) Substantiation of the ventilation capacity to provide 0.10 ACH shall be provided for a mechanical system, or a passive system, or a combination passive and mechanical system.

(c) *Additional ventilation.* (1) At least half of the minimum required glazed area in paragraph (a) of this section shall be openable directly to the outside of the manufactured home for unobstructed ventilation. These same ventilation requirements apply to rooms

combined in accordance with § 3280.103(a)(2).

(2) Kitchens shall be provided with a mechanical ventilation system that is capable of exhausting 100 cfm to the outside of the home. The exhaust fan shall be located as close as possible to the range or cook top, but in no case farther than 10 feet horizontally from the range or cook top.

(3) Each bathroom and separate toilet compartment shall be provided with a mechanical ventilation system capable of exhausting 50 cfm to the outside of the home. A separate toilet compartment may be provided with 1.5 square feet of openable glazed area in place of mechanical ventilation, except in Uo value Zone 3.

§ 3280.109 [Removed]

10. Section 3280.109 is removed.

§ 3280.110 [Redesignated as § 3280.109]

11. Section 3280.110 is redesignated as § 3280.109.

§ 3280.111 [Redesignated as § 3280.110]

12. Section 3280.111 is redesignated as § 3280.110.

§ 3280.112 [Redesignated as § 3280.111]

13. Section 3280.112 is redesignated as § 3280.111.

§ 3280.113 [Redesignated as § 3280.112]

14. Section 3280.113 is redesignated as § 3280.112.

§ 3280.114 [Redesignated as § 3280.113]

15. Section 3280.114 is redesignated as § 3280.113.

Subpart C—Fire Safety

16. Section 3280.202 is revised as follows:

§ 3280.202 Definitions.

The following definitions are applicable to subparts C, H, and I of the Standards:

Combustible material: Any material not meeting the definition of limited-combustible or non-combustible material.

Flame-spread rating: The measurement of the propagation of flame on the surface of materials or their assemblies as determined by recognized standard tests conducted as required by this subpart.

Interior finish: The surface material of walls, fixed or movable partitions, ceilings, columns, and other exposed interior surfaces affixed to the home's structure including any materials such as paint or wallpaper and the substrate to which they are applied. Interior finish does not include:

(1) Trim and sealant 2 inches or less in width adjacent to the cooking range and in furnace and water heater spaces provided it is installed in accordance with the requirements of § 3280.203(b)(3) or (4), and trim 6 inches or less in width in all other areas;

(2) Windows and frames;

(3) Single doors and frames and a series of doors and frames not exceeding 5 feet in width;

(4) Skylights and frames;

(5) Casings around doors, windows, and skylights not exceeding 4 inches in width;

(6) Furnishings which are not permanently affixed to the home's structure;

(7) Baseboards not exceeding 6 inches in height;

(8) Light fixtures, cover plates of electrical receptacle outlets, switches, and other devices;

(9) Decorative items attached to walls and partitions (i.e., pictures, decorative objects, etc.) constituting no more than 10% of the aggregate wall surface area in any room or space not more than 32 square feet in surface area, whichever is less;

(10) Plastic light diffusers when suspended from a material which meets the interior finish provisions of § 3280.203(b);

(11) Coverings and surfaces of exposed wood beams; and

(12) Decorative items including the following:

(i) Non-structural beams not exceeding 6 inches in depth and 6 inches in width and spaced not closer than 4 feet on center;

(ii) Non-structural lattice work;

(iii) Mating and closure molding; and

(iv) Other items not affixed to the home's structure.

Limited combustible: A material meeting:

(1) The definition of Article 2-3 or NFPA 220-1992; or

(2) 1/8-inch or thicker gypsum board.

Noncombustible material: A material meeting the definition of contained in NFPA 220-1992.

Single-station alarm device: An assembly incorporating the smoke detector sensor, the electrical control equipment, and the alarm-sounding device in one unit.

Smoke detector: A wall-mounted detector of the ionization chamber or photoelectric type which detects visible or invisible particles of combustion and operates from a 120V AC source of current.

17. Section 3280.203 is amended by revising paragraphs (a) and (b)(4) to read as follows:

§ 3280.203 Flame spread limitations and fire protection requirements.

(a) *Establishment of flame spread rating.* The surface flame spread rating of interior-finish material shall not exceed the value shown in § 3280.203(b) when tested by "Standard Test Method for Surface Burning Characteristics of Building Materials, ASTM E 84-91a" except that the surface flame spread rating of interior-finish materials required by § 3280.203(b) (5) and (6) may be determined by using the "Standard Test Method for Surface Flammability of Materials Using a Radiant Heat Energy Source, ASTM E 162-90". However, the following materials need not be tested to establish their flame spread rating unless a lower rating is required by these standards.

- (1) Flame-spread rating—76 to 200.
 - (i) .035-inch or thicker high pressure laminated plastic panel countertop;
 - (ii) ¼-inch or thicker unfinished plywood with phenolic or urea glue;
 - (iii) Unfinished dimension lumber (1-inch or thicker nominal boards);
 - (iv) ¾-inch or thicker unfinished particleboard with phenolic or urea binder;
 - (v) Natural gum-varnished or latex- or alkyd-painted:
 - (A) ¼-inch or thicker plywood, or
 - (B) ¾-inch or thicker particleboard, or
 - (C) 1-inch or thicker nominal board;
 - (vi) ¾-inch gypsum board with decorative wallpaper; and
 - (vii) ¼-inch or thicker unfinished hardboard.
 - (2) Flame-spread rating—25 to 200,
 - (i) Painted metal;
 - (ii) Mineral-base acoustic tile;
 - (iii) ¾-inch or thicker unfinished gypsum wallboard (both latex- or alkyd-painted); and
 - (iv) Ceramic tile.
- (The above-listed material applications do not waive the requirements of § 3280.203(c) or § 3280.204 of this subpart.)

(b) * * *

(4) Exposed interior finishes adjacent to the cooking range shall have a flame spread rating not exceeding 50, except that backspashes not exceeding 6 inches in height are exempted. Adjacent surfaces are the exposed vertical surfaces between the range top height and the overhead cabinets and/or ceiling and within 6 horizontal inches of the cooking range. (Refer also to § 3280.204(a), Kitchen Cabinet Protection.) Sealants and other trim materials 2 inches or less in width used to finish adjacent surfaces are exempt from this provision provided that all joints are completely supported by a framing member.

* * * * *

18. Section 3280.208 is amended by revising paragraphs (c) and (d) to read as follows:

§ 3280.208 Fire detection equipment.

* * * * *

(c) *Labeling.* Smoke detectors shall be labeled as conforming with the requirements of Underwriters' Laboratories Standard No. 217—Fourth Edition 1993 for Single and Multiple Station Smoke Detectors.

(d) *Installation.* Each smoke detector shall be installed in accordance with its listing. The top of the detector shall be located on a wall 4 inches to 12 inches, or at a distance permitted by the listing, below the ceiling. However, when a detector is mounted on an interior wall below a sloping ceiling, it shall be located 4 inches to 12 inches below the intersection of the connecting exterior wall and the sloping ceiling (cathedral ceiling). The required detector(s) shall be attached to an electrical outlet box and the detector connected by a permanent wiring method into a general electrical circuit. There shall be no switches in the circuit to the detector between the over-current protection device protecting the branch circuit and the detector. Smoke detector(s) shall not be placed on the same branch circuit or any circuit protected by a ground fault circuit interrupter.

Subpart D—Body and Frame Construction Requirements

19. Section 3280.302 is revised as follows:

§ 3280.302 Definitions.

The following definitions are applicable to Subpart D only:

Anchoring equipment: means straps, cables, turnbuckles, and chains, including tensioning devices, which are used with ties to secure a manufactured home to ground anchors.

Anchoring system: means a combination of ties, anchoring equipment, and ground anchors that will, when properly designed and installed, resist overturning and lateral movement of the manufactured home from wind forces.

Diagonal tie: means a tie intended to primarily resist horizontal forces, but which may also be used to resist vertical forces.

Footing: means that portion of the support system that transmits loads directly to the soil.

Ground anchor: means any device at the manufactured home stand designed to transfer manufactured home anchoring loads to the ground.

Hurricane resistive manufactured home: means a manufactured home

which meets the wind design load requirements for Zone II in § 3280.305(c)(2).

Loads: (1) *Dead load:* means the weight of all permanent construction including walls, floors, roof, partition, and fixed service equipment.

(2) *Live load:* means the weight superimposed by the use and occupancy of the manufactured home, including wind load and snow load, but not including dead load.

(3) *Wind load:* means the lateral or vertical pressure or uplift on the manufactured home due to wind blowing in any direction.

Main frame: means the structural component on which is mounted the body of the manufactured home.

Pier: means that portion of the support system between the footing and manufactured home exclusive of caps and shims.

Sheathing: means material which is applied on the exterior side of a building frame under the exterior weather resistant covering.

Stabilizing devices: means all components of the anchoring and support system such as piers, footings, ties, anchoring equipment, ground anchors, and any other equipment which supports the manufactured home and secures it to the ground.

Support system: means a combination of footings, piers, caps, and shims that will, when properly installed, support the manufactured home.

Tie: means straps, cable, or securing devices used to connect the manufactured home to ground anchors.

Vertical tie: means a tie intended to resist the uplifting or overturning forces.

20. Section 3280.303 is amended by revising paragraph (g) to read as follows:

§ 3280.303 General requirements.

* * * * *

(g) *Alternative test procedures.* In the absence of recognized testing procedures either in these standards or the applicable provisions of those standards incorporated by reference, the manufacturer electing this option shall develop or cause to be developed testing procedures to demonstrate the structural properties and significant characteristics of the material, assembly, subassembly component or member. Such testing procedures shall become part of the manufacturer's approved design. (Refer to § 3280.3.)

(1) Testing procedures so developed shall be submitted to the Department for approval.

(2) Upon notification of approval, the alternative test procedure is considered acceptable.

(3) Such tests shall be witnessed by an independent licensed professional

engineer or architect or by a recognized testing organization. Copies of the test results shall be kept on file by the manufactured home manufacturer.

21. Section 3280.304 is amended by revising paragraph (b)(1) and the table to read as follows:

§ 3280.304 Materials.

* * * * *

(b)(1) Standards for some of the generally used materials and methods of construction are listed in the following table.

Steel

Specification for Aluminum Structures Construction Manual Series—Section 1, Fifth Edition—1986, The Aluminum Association.

Specification for Structural Steel Buildings—Allowable Stress Design and Plastic Design—AISC—June 1, 1989.

The following parts of this reference standard are not applicable: 1.3.3, 1.3.4, 1.3.5, 1.3.6, 1.4.6, 1.5.1.5, 1.5.5, 1.6, 1.7, 1.8, 1.9, 1.10.4 through 1.10.7, 1.10.9, 1.11, 1.13, 1.14.5, 1.17.7 through 1.17.9, 1.19.1, 1.19.3, 1.20, 1.21, 1.23.7, 1.24, 1.25.1 through 1.25.5, 1.26.4, 2.3, 2.4, 2.8 through 2.10.

Specification for the Design of Cold-Formed Steel Structural Members—AISI—1986 Edition With 1989 Addendum.

The following parts of this reference standard are not applicable: 3.1.2, 4.2.1, 4.2.4.

Stainless Steel Cold-Formed Structural Design Manual—AISI—1974.

The following part of this reference standard is not applicable: 3.1.2.

Standard Specifications Load Tables and Weight Tables for Steel Joists and Joist Girders, only Sections 1-6 and the table for "H series only" are applicable—Steel Joist Institute 1992.

Manual for Structural Applications of Steel Cables for Buildings—AISI—1973.

Standard Specification for Strapping, Flat Steel and Seals—ASTM D3953-91.

Wood and Wood Products

Basic Hardboard—ANSI/AHA A135.4-1982.

Prefinished Hardboard Paneling—ANSI/AHA A135.5-1988.

Hardboard Siding—ANSI/AHA A135.6-1990.

Interim Voluntary Standard for Hardwood and Decorative Plywood—HPVA Interim Standard HP-1-1993.

Structural Design Guide for Hardwood Plywood Wall Panels—HPMA Design Guide HP-SG-86.

For wood products—Structural Glued Laminated Timber—ANSI/AITC A190.1-1992.

Voluntary Product Standard, Construction and Industrial Plywood—PS-1-82.

APA Design/Construction Guide, Residential and Commercial—APA E30M-1993.

Design and Fabrication of All-Plywood Beams, Suppl. 5—APA-H 815D-1989.

Plywood Design Specification—APA-Y 510Q-1993.

Design and Fabrication of Glued Plywood-Lumber Beams, Suppl. 2—APA-S 812P-1992.

Design and Fabrication of Plywood Curved Panels, Suppl. 1—APA-S 811M-1990.

Design and Fabrication of Plywood Sandwich Panels, Suppl. 4—APA-U 814G-1990.

Design and Fabrication of Plywood Stressed-Skin Panels, Suppl. 3—APA-U 313K-1990.

National Design Specifications for Wood Construction, 1991 Edition, With Supplement, Design Values for Wood Construction, AFPA.

Wood Structural Design Data, 1986 Edition With 1992 Revisions, AFPA.

Span Tables for Joists and Rafters—PS-20-70, 1993, AFPA.

Design Values for Joists and Rafters, American Softwood Lumber Standard Sizes, 1992, AFPA.

Design Specifications for Metal Plate Connected Wood Trusses—TPI-85.

Wood Particleboard—ANSI A208.1-1989,

Wood Flush Doors—ANSI/NWWDA I.S.1-87.

Wood Windows—ANSI/NWWDA I.S.2-87.

Wood Sliding Patio Doors—NWWDA-I.S.3-88.

Water Repellent Preservative Non Pressure Treatment for Millwork—NWWDA-I.S.4-81.

Standard Test Methods for Puncture and Stiffness of Paperboard, and Corrugated and Solid Fiberboard—ASTM D781-68 (73).

Standard Test Methods for Direct Moisture Content Measurement of Wood and Wood-Base Materials—ASTM D4442.

Standard Test Methods for Use and Calibration of Hand-Held Moisture Meters—ASTM D4444-92.

Other

Standard Specification for Gypsum Wallboard—ASTM C36-93.

Fasteners

Application and Fastening Schedule: Power-Driven, Mechanically Driven and Manually Driven Fasteners—HUD-FHA Use of Materials Bulletin—UM-25d-73.

Unclassified

American Society of Civil Engineering Minimum Design Loads for Buildings and Other Structures—ANSI/ASCE 7-88.

Performance Standard for Wood-Based Structural Use Panels—PS-2-92, APA.

Safety Performance Specifications and Methods of Test for Safety Glazing Materials Used in Building—ANSI Z97.1-1984.

* * * * *

22. Section 3280.305 is amended by redesignating paragraphs (g)(3) and (4) as (g)(4) and (5), respectively; by adding new paragraphs (b)(4) and (g)(3); and by revising paragraphs (d), (f)(2), (g)(2), and (i)(1)(i) to read as follows:

§ 3280.305 Structural design requirements.

* * * * *

(b) * * *

(4) Whenever the roof slope does not exceed 20 degrees, the design horizontal wind load required by § 3280.305(c)(1) and (2) may be determined without including the vertical roof projection of the manufactured home. However, regardless of the roof slope of the manufactured home, the vertical roof projection shall be included when determining the wind loading for split level or clerestory type roof systems.

* * * * *

(d) *Design load deflection.* (1) When a structural assembly is subjected to total design live loads, the deflection for structural framing members shall not exceed the following:

| | |
|---|-------|
| Floor | L/240 |
| Roof and ceiling | L/180 |
| Headers, beams, and girders (vertical load) | L/180 |
| Walls and partitions | L/180 |

Where L equals the clear span between supports or two times the length of a cantilever.

(2) The allowable eave or cornice deflection for uplift is to be measured at the design uplift load. [9 psf or 15 psf x by 2.5]. The allowable deflection shall be (2 x Lc)/180 when Lc is the measured horizontal eave projection from the wall.

* * * * *

(f) * * *

(2) Interior walls and partitions shall be constructed with structural capacity adequate for the intended purpose and shall be capable of resisting a horizontal load of not less than five pounds per square foot. An allowable stress increase of 1.33 times the permitted published design values may be used in the design

of wood framed interior partitions. Finish of walls and partitions shall be securely fastened to wall framing.

(g) * * *

(2) Wood, wood fiber or plywood floors or subfloors in kitchens, bathrooms (including toilet compartments), laundry areas, water heater compartments, and any other areas subject to excessive moisture shall be moisture resistant or shall be made moisture resistant by sealing or by an overlay of nonabsorbent material applied with water-resistant adhesive. Use of one of the following methods would meet this requirement:

(i) Sealing the floor with a water-resistant sealer; or
 (ii) Installing an overlay of a non-absorbent floor covering material applied with water-resistant adhesive; or

(iii) Direct application of a water-resistant sealer to the exposed wood floor area when covered with a non-absorbent overlay; or

(iv) The use of a non-absorbent floor covering which may be installed without a continuous application of a water-resistant adhesive or sealant when the floor covering meets the following criteria:

(A) The covering is a continuous membrane with any seams or patches seam bonded or welded to preserve the continuity of the floor covering; and

(B) The floor is protected at all penetrations in these areas by sealing with a compatible water-resistant adhesive or sealant to prevent moisture from migrating under the nonabsorbent floor covering; and

(C) The covering is fastened around the perimeter of the subfloor in accordance with the floor covering manufacturer's instructions; and,

(D) The covering is designed to be installed to prevent moisture penetration without the use of a water-resistant adhesive or sealer except as required in this paragraph (g). The vertical edges of penetrations for plumbing shall be covered with a moisture-resistant adhesive or sealant. The vertical penetrations located under the bottom plates of perimeter walls of rooms, areas, or compartments are not required to be sealed; this does not include walls or partitions within the rooms or areas.

(3) Carpet or carpet pads shall not be installed under concealed spaces subject to excessive moisture, such as plumbing fixture spaces, floor areas under installed laundry equipment. Carpet may be installed in laundry space provided:

- (i) The appliances are not provided;
- (ii) The conditions of paragraph (g)(2) of this section are followed; and
- (iii) Instructions are provided to remove carpet when appliances are installed.

* * * * *

(i) * * *

(1) *Welded connections.* (i) All welds shall be made in accordance with the applicable provisions of the Specification for Structural Steel Buildings, Allowable Stress Design and Plastic Design, AISC, June 1, 1989. The Specification for the Design of Cold-Formed Steel Structural Members, AISI-1986 with 1989 addendum, and the Stainless Steel Cold-Formed Structural Design Manual, AISI-1974.

* * * * *

23. Section 3280.306 is amended by revising the introductory text of paragraph (a) to read as follows:

§ 3280.306 Windstorm protection.

(a) *Provisions for support and anchoring systems.* Each manufactured home shall have provisions for support and anchoring systems, which, when properly designed and installed, will resist overturning and lateral movement (sliding) of the manufactured home as imposed by the respective design loads. The design wind loads to be utilized for calculating resistance to overturning and lateral movement shall be the wind loads indicated in § 3280.305(c) (1) and (2) increased by a factor of safety of 1.5. The basic allowable stresses of materials required to resist overturning and lateral movement shall not be increased in the design and proportioning of these members. The 1.5 factor of safety to be applied to the design wind load is only to be utilized in the design of the tie-down system to resist overturning and lateral movement, and is not to be applied to the design of the home structure. Wind loading effects for purposes of this section shall be 1.5 x horizontal wind load (15 PSF, 25 PSF) and roof uplift (9 PSF, 15 PSF). When determining the effects of wind overturning and sliding to evaluate the tie-down system, the 1.5 factor of safety is to be applied simultaneously to both the vertical building projection as horizontal wind load and across the surface of the full roof structure as uplift loading. No additional shape or location factors need be applied in the design of the tie-down system. The dead load of the structure may be used to resist the above wind loading effects.

* * * * *

24. Section 3280.309 is amended by revising paragraph (b) to read as follows:

§ 3280.309 Health Notice on formaldehyde emissions.

* * * * *

(b) The Notice shall be legible and typed using letters at least 1/4 inch in size. The title shall be typed using letters at least 3/4 inch in size.

* * * * *

Subpart E—Testing

25. Section 3280.401 is amended by revising paragraph (b) to read as follows:

§ 3280.401 Structural load tests.

* * * * *

(b) *Ultimate load tests.* Ultimate load tests shall be performed on a minimum of three assemblies or components to generally evaluate the structural design. Every structural assembly or component tested shall be capable of sustaining its total dead load plus the design live load increased by a factor of safety of at least 2.5. A factor of safety greater than 2.5 shall be used when required by an applicable reference standard in § 3280.304(b)(1). Tests shall be conducted with loads applied and deflections recorded in 1/4 design live load increments at 10-minute intervals until 1.25 times design live load plus dead load has been reached. Additional loading shall then be applied continuously until failure occurs or the total of the factor of safety times the design live load plus the dead load is reached. Assembly failure shall be considered as design live load deflection greater than the limits set in § 3280.305(d), rupture, fracture, or excessive yielding. Assemblies to be tested shall be representative of average quality or materials and workmanship of the production. Each test assembly, component, or sub-assembly shall be identified as to type and quality or grade of material. All assemblies, components, or sub-assemblies qualifying under this section shall be subject to a periodic qualification testing program acceptable to the Department.

26. In § 3280.402, in paragraph (c)(1)(i), Figure A-1 is revised as follows:

§ 3280.402 Test procedure for roof trusses.

* * * * *

(c) * * *

(1) * * *

(i) * * *

Figure A-1. Test Procedures for Roof Trusses

BILLING CODE 4310-27-C

27. Section 3280.403 is amended by revising paragraphs (d)(2) and (e)(1) to read as follows:

§ 3280.403 Standard for windows and sliding glass doors used in manufactured homes.

(d) (2) Sealed insulating glass, where used, shall meet all performance requirements for Class C in accordance with ASTM E-774-92, Standard Specification for Sealed Insulating Glass Units. The sealing system shall be qualified in accordance with ASTM E-773-88 Standard Test Methods for Seal Durability of Sealed Insulating Glass Units. Each glass unit shall be permanently identified with the name of the insulating glass manufacturer.

(e) (1) All such windows and doors shall show evidence of certification by affixing a quality certification label to the product in accordance with ANSI Z34.1-1987, "For Certification-Third-Party Certification Program."

28. Section 3280.405 is amended by revising paragraphs (c) (1) and (2) to read as follows:

§ 3280.405 Standard for swinging exterior passage doors for use in manufactured homes.

(c) (1) *Wood.* Doors shall conform to the type 1 requirements of ANSI/NWWDA I.S.1-87, Wood Flush Doors.

(2) *Plywood.* Plywood shall be exterior type and preservative treated in accordance with NWWDA I.S.4-81, Water Repellent Preservative Non-Pressure Treatment for Millwork.

29. Section 3280.406 is amended by revising the introductory text of paragraph (b) to read as follows:

§ 3280.406 Air chamber test method for certification and qualification of formaldehyde emission levels.

(b) *Testing.* Testing shall be conducted in accordance with the Standard Test Method for Determining Formaldehyde Levels from Wood Products Under Defined Test Conditions Using a Large Chamber, ASTM E-1333-90, with the following exceptions:

Subpart F—Thermal Protection

30. Section 3280.504 is amended by revising the section heading; by revising paragraph (a); and by adding a new paragraph (c) to read as follows:

§ 3280.504 Condensation control and installation of vapor retarders.

(a) *Ceiling vapor retarders.* (1) In Uo Value Zones 2 and 3, ceilings shall have a vapor retarder with a permanence of not greater than 1 perm (as measured by ASTM E-96-93 Standard Test Methods for Water Vapor Transmission of Materials) installed on the living space side of the roof cavity.

(2) For manufactured homes designed for U. Value Zone 1, the vapor retarder may be omitted.

(c) *Attic or roof ventilation.* (1) Attic and roof cavities shall be vented in accordance with one of the following:

(i) A minimum free ventilation area of not less than 1/300 of the attic or roof cavity floor area. At least 50 percent of the required free ventilation area shall be provided by ventilators located in the upper portion of the space to be ventilated. At least 40 percent shall be provided by eave, soffit or low gable vents. The location and spacing of the vent openings and ventilators shall provide cross-ventilation to the entire attic or roof cavity space. A clear air passage space having a minimum height of 1 inch shall be provided between the

top of the insulation and the roof sheathing or roof covering. Baffles or other means shall be provided where needed to insure the 1 inch height of the clear air passage space is maintained.

(ii) A mechanical attic or roof ventilation system may be installed instead of providing the free ventilation area when the mechanical system provides a minimum air change rate of 0.02 cubic feet per minute (cfm) per sq. ft. of attic floor area. Intake and exhaust vents shall be located so as to provide air movement throughout space.

(2) Single section manufactured homes constructed with metal roofs and having no sheathing or underlayment installed, are not required to be provided with attic or roof cavity ventilation provided that the air leakage paths from the living space to the roof cavity created by electrical outlets, electrical junctions, electrical cable penetrations, plumbing penetrations, flue pipe penetrations and exhaust vent penetrations are sealed.

(3) Parallel membrane roof section of a closed cell type construction are not required to be ventilated.

(4) The vents provided for ventilating attics and roof cavities shall be designed to resist entry of rain and insects.

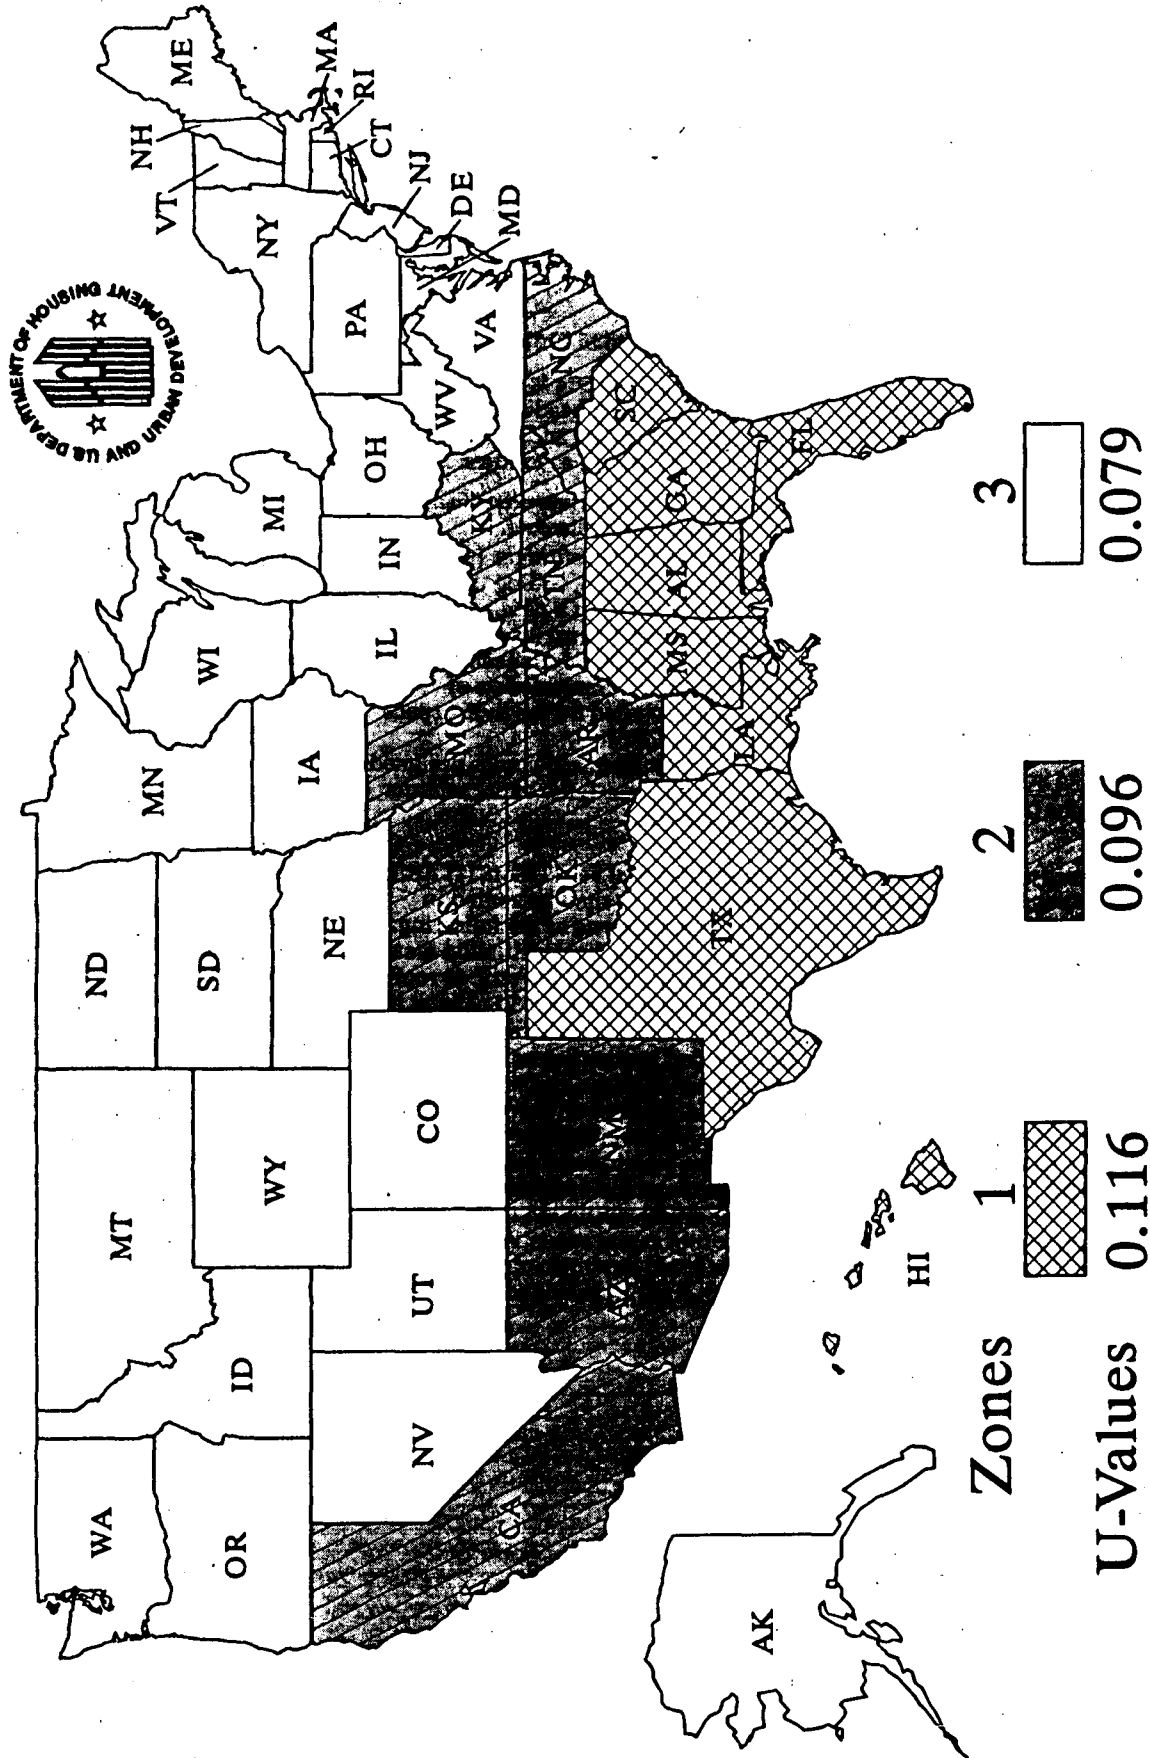

31. Section 3280.506 is revised to read as follows:

§ 3280.506 Heat loss/Heat gain.

The manufactured home heat loss/heat gain shall be determined by methods outlined in §§ 3280.508 and 3280.509. The Uo (Coefficient of heat transmission) value zone for which the manufactured home is acceptable and the lowest outdoor temperature to which the installed heating equipment will maintain a temperature of 70 F shall be certified as specified in § 3280.510 of this subpart. The Uo value zone shall be determined from the map in Figure 506.

BILLING CODE 4210-27-U

U/O Value Zone Map for Manufactured Housing

BILLING CODE 4210-37-C

(a) *Coefficient of heat transmission.* The overall coefficient of heat transmission (U_o) of the manufactured home for the respective zones and an indoor design temperature of 70 F, including internal and external ducts, and excluding infiltration ventilation and condensation control, shall not exceed the Btu/(hr.) (sq. ft.) (F) of the manufactured home envelope are as tabulated below:

| Uo value zone | Maximum coefficient of heat transmission |
|---------------|--|
| 1 | 0.116 Btu/(hr.) (sq. ft.) (F). |
| 2 | 0.096 Btu/(hr.) (sq. ft.) (F). |
| 3 | 0.079 Btu/(hr.) (sq. ft.) (F). |

(b) To assure uniform heat transmission in manufactured homes, cavities in exterior walls, floors, and ceilings shall be provided with thermal insulation.

(c) Manufactured homes designed for Uo Value Zone 3 shall be factory equipped with storm windows or insulating glass.

32. Section 3280.508 is revised to read as follows:

§ 3280.508 Heat loss, heat gain and cooling load calculations.

(a) Information, values and data necessary for heat loss and heat gain determinations shall be taken from the 1989 ASHRAE Handbook of Fundamentals, Chapters 20 through 27. The following portions of those chapters are not applicable:

- 21.1 Steel Frame Construction
- 21.2 Masonry Construction
- 21.3 Floor Systems
- 21.14 Pipes
- 21.16 Tanks, Vessels and Equipment
- 21.17 Refrigerated Rooms and Buildings
- 22.15 Mechanical and Industrial Systems
- 23.13 Commercial Building Envelope Leakage
- 25.4 Calculation of Heat Loss from Crawl Spaces

(b) The calculation of the manufactured home's transmission heat loss coefficient (U_o) shall be in accordance with the fundamental principals of the 1989 ASHRAE Handbook of Fundamentals and, at a minimum, shall address all the heat loss or heat gain considerations in a manner consistent with the calculation procedures provided in the document Overall U-values and Heating/Cooling Loads—Manufactured Homes—February 1992—PNL 8006, HUD User No. 0005945.

(c) Areas where the insulation does not fully cover a surface or is compressed shall be accounted for in the U-calculation (see § 3280.506). The

effect of framing on the U-value must be included in the U_o calculation. Other low-R-value heat-flow paths ("thermal shorts") shall be explicitly accounted for in the calculation of the transmission heat loss coefficient if in the aggregate all types of low-R-value paths amount to more than 1% of the total exterior surface area. Areas are considered low-R-value heat-flow paths if:

- (1) They separate conditioned and unconditioned space; and
- (2) They are not insulated to a level that is at least one-half the nominal insulation level of the surrounding building component.

(d) *High efficiency heating and cooling equipment credit.* The calculated transmission heat loss coefficient (U_o) used for meeting the requirement in § 3280.506(a) may be adjusted for heating and cooling equipment above that required by the National Appliance Energy Conservation Act of 1987 (NAECA) by applying the following formula:

$U_o \text{ adjusted} = U_o \text{ standard} \times [1 + (0.6) (\text{heating efficiency increase factor}) + (\text{cooling multiplier}) (\text{cooling efficiency increase factor})]$ where:

$U_o \text{ standard} =$ Maximum U_o for Uo Zone required by § 3280.506(a)

$U_o \text{ adjusted} =$ Maximum U_o standard adjusted for high efficiency HVAC equipment

Heating efficiency increase factor = The increase factor in heating equipment efficiency measured by the Annual Fuel Utilization Efficiency (AFUE), or the Heating Seasonal Performance Factor (HSPF) for heat pumps, above that required by NAECA (indicated as "NAECA" in formula). The formula is heating efficiency increase factor = AFUE (HSPF) home - AFUE (or HSPF) NAECA divided by AFUE (HSPF) NAECA.

Cooling efficiency increase factor = the increase factor in the cooling equipment efficiency measured by the Seasonal Energy Efficiency Ratio (SEER) above that required by NAECA.

The formula being cooling equipment = SEER home - SEER NAECA divided by SEER NAECA.

The cooling multiplier for the Uo Zone is from the following table:

| Uo zone | Cooling multiplier (Cm) |
|---------|-----------------------------|
| 1 | 0.60 (Florida only). |
| 1 | 0.20 (All other locations). |
| 2 | 0.07. |
| 3 | 0.03. |

(e) U-values for any glazing (windows, skylights, and the glazed portions of any door) shall be based on tests using American Architectural Manufacturers Association (AAMA) 1503.1-1988, Voluntary Test Method for Thermal

Transmittance and Condensation Resistance of Windows, Doors and Glazed Wall Sections. In the absence of tests, manufacturers shall use the residential window U values contained in Table 13 in Chapter 27, the 1989 ASHRAE Handbook of Fundamentals. In the event that the classification of the window type is indeterminate, the manufacturer shall use the classification which gives the higher U value. For the purpose of calculating U_o values, storm windows shall be treated as an additional pane.

(f) *Annual energy used based compliance.* As an alternative, homes may demonstrate compliance with the annual energy used implicit in the coefficient of heat transmission (U_o) requirement. The annual energy use determination must be based on generally accepted engineering practices. The general requirement is to demonstrate that the home seeking compliance approval has a projected annual energy use, including both heating and cooling, less than or equal to a similar "base case" home that meets the standard. The energy use for both homes must be calculated based on the same assumptions; including assuming the same dimensions for all boundaries between conditioned and unconditioned spaces, site characteristics, usage patterns and climate.

33. Section 3280.510 is amended by revising paragraph (b), and adding a new paragraph (c) to read as follows:

§ 3280.510 Heat loss certificate.

* * * * *

(b) *Outdoor certification temperature.* The lowest outdoor temperature at which the installed heating equipment will maintain a 70°F temperature inside the home without storm sash or insulating glass for Zones 1 and 2, and with storm sash or insulating glass for Zone 3 and complying with § 3280.508 and § 3280.509.

(c) *Operating economy certification temperature.* The temperature to be specified for operating economy and energy conservation shall be 20°F or 30% of the design temperature difference, whichever is greater, added to the temperature specified as the heating system capacity certification temperature without storm windows or insulating glass in Zones 1 and 2 and with storm windows or insulating glass in Zone 3. Design temperature difference is 70° minus the heating system capacity certification temperature in degrees Fahrenheit.

HEATING CERTIFICATE

Home Manufacturer _____

Plant Location _____
 Home Model _____
 (Include Uo Value Zone Map)

This manufactured home has been thermally insulated to conform with the requirements of the Federal Manufactured Home Construction and Safety Standards for all locations within Uo Value Zone _____ Heating Equipment Manufacturer _____ Heating Equipment Model _____

The above heating equipment has the capacity to maintain an average 70F temperature in this home at outdoor temperatures of [see paragraph (b) of this section] F. To maximize furnace operating economy and to conserve energy, it is recommended that this home be installed where the outdoor winter design temperature (97 1/2%) is not higher than [see paragraph (c) of this section] F degrees Fahrenheit.

The above information has been calculated assuming a maximum wind velocity of 15 MPH at standard atmospheric pressure.

34. Section 3280.511 is amended by revising paragraphs (a)(1), (b), and (c) to read as follows:

§ 3280.511 Comfort cooling certificate and information.

(a) * * *

(1) *Alternative I.* If a central air conditioning system is provided by the home manufacturer, the heat gain calculation necessary to properly size the air conditioning equipment shall be in accordance with procedures outlined in Chapter 22 of the 1989 ASHRAE Handbook of Fundamentals, with an assumed location and orientation. The following shall be supplied in the Comfort Cooling Certificate:

Air Conditioner Manufacturer _____
 Air Conditioner Model _____
 Certified Capacity _____ BTU/Hr. in accordance with the appropriate Air Conditioning and Refrigeration Institute Standards

The central air conditioning system provided with this home has been sized, assuming an orientation of the front (hitch) end of the home facing _____ and is designed on the basis of a 75°F indoor temperature and an outdoor temperature of _____°F dry bulb and _____°F wet bulb.

Example Alternate I

COMFORT COOLING CERTIFICATE

Manufactured Home Mfg _____
 Plant Location _____
 Manufactured Home Model _____
 Air Conditioner Manufacturer _____
 Certified Capacity _____ BTU/Hr. in accordance with the appropriate Air Conditioning and Refrigeration Institute Standards.

The central air conditioning system provided with this home has been sized assuming an orientation of the front (hitch end) of the home facing _____. On this basis, the system is designed to maintain an indoor temperature of 75°F when outdoor temperatures are _____°F dry bulb and _____°F wet bulb.

The temperature to which this home can be cooled will change depending upon the amount of exposure of the windows to the sun's radiant heat. Therefore, the home's heat gains will vary dependent upon its orientation to the sun and any permanent shading provided. Information concerning the calculation of cooling loads at various locations, window exposures and shadings are provided in chapter 22 of the 1989 edition of the ASHRAE Handbook of Fundamentals.

* * * * *

(b) For each home designated as suitable for central air conditioning the manufacturer shall provide the maximum central manufactured home air conditioning capacity certified in accordance with the ARI Standard 210/240-89 Unitary Air-Conditioning and Air-Source Heat Pump Equipment and in accordance with § 3280.715(a)(3). If the capacity information provided is based on entrances to the air supply duct at other than the furnace plenum, the manufacturer shall indicate the correct supply air entrance and return air exit locations.

(c) *Comfort cooling information.* For each manufactured home designated, either "suitable for" or "provided with" a central air conditioning system, the manufacturer shall provide comfort cooling information specific to the manufactured home necessary to complete the cooling load calculations. The comfort cooling information shall include a statement to read as follows:

To determine the required capacity of equipment to cool a home efficiently and economically, a cooling load (heat gain) calculation is required. The cooling load is dependent on the orientation, location and the structure of the home. Central air conditioners operate most efficiently and provide the greatest comfort when their capacity closely approximates the calculated cooling load. Each home's air conditioner should be sized in accordance with Chapter 22 of the American Society of Heating, Refrigerating and Air Conditioning Engineers (ASHRAE) Handbook of Fundamentals, 1989 Edition, once the location and orientation are known.

Information Provided by the Manufacturer Necessary to Calculate Sensible Heat Gain

|---|---|
| Walls (without windows and doors) | U |
| Ceilings and roofs of light color | U |
| Ceilings and roofs of dark color | U |
| Floors | U |
| Air ducts in floor | U |
| Air ducts in ceiling | U |
| Air ducts installed outside the home | U |

Information necessary to calculate duct areas.

Subpart G—Plumbing Systems

35. Section 3280.602 is amended by removing the paragraph designations from the section and by adding in alphabetical order the definitions for

"Flushometer tank", "Plumbing appliance", "Plumbing appurtenance", and "Whirlpool bathtub", to read as follows:

§ 3280.602 Definitions.

* * * * *

Flushometer tank: means a device integrated within an air accumulator vessel which is designed to discharge a predetermined quantity of water to fixtures for flushing purposes.

* * * * *

Plumbing appliance: means any one of a special class of plumbing fixture which is intended to perform a special plumbing function. Its operation and/or control may be dependent upon one or more energized components, such as motors, control, heating elements, or pressure or temperature-sensing elements. Such fixture may operate automatically through one or more of the following actions: A time cycle, a temperature range, a pressure range, a measured volume or weight, or the fixture may be manually adjusted or controlled by the user or operator.

Plumbing appurtenance: means a manufactured device, or a prefabricated assembly, or an on-the-job assembly of component parts, and which is an adjunct to the basic piping system and plumbing system and plumbing fixtures. An appurtenance demands no additional water supply, nor does it add any discharge load to a fixture or the drainage system.

* * * * *

Whirlpool bathtub: means a plumbing appliance consisting of a bathtub fixture which is equipped and fitted with a circulation piping system, pump, and other appurtenances and is so designed to accept, circulate, and discharge bathtub water upon each use.

36. Section 3280.603 is amended by revising paragraph (a)(5) to read as follows:

§ 3280.603 General requirements.

(a) * * *

(5) *Components.* Plumbing materials, devices, fixtures, fittings, equipment, appliances, appurtenance, and accessories intended for use in or attached to a manufactured home shall conform to one of the applicable standards referenced in § 3280.604. Where an applicable standard is not referenced, or an alternative recognized standard is utilized, the plumbing component shall be listed by a nationally recognized testing laboratory, inspection agency or other qualified organization as suitable for the intended use.

* * * * *

37. Section 3280.604 is revised to read as follows:

§3280.604 Materials.

(a) *Minimum standards.* Materials, devices, fixtures, fittings, equipment, appliances, appurtenances and accessories shall conform to one of the standards in the following table and be free from defects. Where an appropriate standard is not indicated in the table or a standard not indicated in the table is preferred, the item may be used if it is listed. A listing is also required when so specified in other sections of this subpart.

(b) Where more than one standard is referenced for a particular material or component, compliance with only one of those standards is acceptable.

Exceptions:

(1) When one of the reference standards requires evaluation of chemical, toxicity or odor properties which are not included in the other standard, then conformance to the applicable requirements of each standard shall be demonstrated;

(2) When a plastic material or component is not covered by the Standards in the following table, it shall be certified as non-toxic in accordance with NSF14-1990, "Plastic Piping Components and Related Materials."

Ferrous Pipe and Fittings

Gray Iron Threaded Fittings—ANSI/ASME B16.4-1992.

Malleable Iron Threaded Fittings—ANSI/ASME B16.3-1992.

Material and Property Standard for Special Cast Iron Fittings—IAPMO PS 5-84.

Welding and Seamless Wrought Steel Pipe—ANSI/ASME B36.10-1979.

Standard Specification for Pipe, Steel, Black and Hot-Dipped, Zinc-Coated, Welded and Seamless—*ASTM A53-93.

Pipe Threads, General Purpose (Inch)—ANSI/ASME B1.20.1-1983.

Standard Specification for Cast Iron Soil Pipe and Fittings—ASTM A74-92.

Standard Specification for Hubless Cast Iron Soil Pipe and Fittings for Sanitary and Storm Drain, Waste, and Vent Piping Applications—CISPI-301-90.

Nonferrous Pipe and Fittings

Standard Specification for Seamless Copper Pipe, Standard Sizes—ASTM B42-93.

Standard Specification for General Requirements for Wrought Seamless Copper and Copper-Alloy Tube—ASTM B251-93.

Standard Specification for Seamless Copper Water Tube—ASTM B 88-93.

Standard Specification for Copper Drainage Tube (DWV)—ASTM B306-92.

Wrought Copper and Copper Alloy Solder-Joint Pressure Fitting—ASME/ANSI B16.22-1989.

Wrought Copper and Wrought Copper Alloy Solder-Joint Drainage Fittings—DWV—ASME/ANSI B16.29-1986.

Cast Copper Alloy Solder-Joint Pressure Fittings—ANSI B16.18-1984.

Cast Copper Alloy Solder-Joint Drainage Fittings—DWV—ASME B16.23-1992.

Cast Copper Alloy Fittings for Flared Copper Tubes—ASME/ANSI B16.26-1988.

Standard Specification for Seamless Red Brass Pipe, Standard Sizes—ASTM B43-91.

Cast Bronze Threaded Fittings, Classes 125 and 250—ANSI/ASME B16.15-1985.

Plastic Pipe and Fittings

Standard Specification Acrylonitrile-Butadiene-Styrene (ABS) Schedule 40 Plastic Drain, Waste, and Vent Pipe and Fittings—ASTM D2661-91.

Standard Specification for Poly (Vinyl Chloride) (PVC) Plastic Drain, Waste, and Vent Pipe and Fittings—ASTM D2665-91b.

Standard Specification for Drain, Waste, and Vent (DWV) Plastic Fittings Patterns—ASTM D3311-92.

Standard Specification for Acrylonitrile-Butadiene-Styrene (ABS) Schedule 40, Plastic Drain, Waste, and Vent Pipe With a Cellular Core—ASTM F628-91.

Standard Specification for Chlorinated Poly (Vinyl Chloride) (CPVC) Plastic Hot- and Cold-Water Distribution Systems—ASTM D2846-92.

Standard Specification for Polybutylene (PB) Plastic Hot- and Cold-Water Distribution Systems—ASTM D3309-92a.

Plastic Piping Components and Related Materials—ANSI/NSF 14-1990.

Miscellaneous

Standard Specification for Rubber Gaskets for Cast Iron Soil Pipe and Fittings—ASTM C564-88.

Backflow Valves—ANSI A112.14.1-1975.

Plumbing Fixture Setting Compound—TTP 1536A-1975.

Material and Property Standard for Cast Brass and Tubing P-Traps—IAPMO PS 2-89.

Relief Valves and Automatic Gas Shutoff Devices for Hot Water Supply Systems—*ANSI Z21.22-1986, With Addendum Z21.22a-1990.

Standard Specification for Solvent Cement for Acrylonitrile-Butadiene-

Styrene (ABS) Plastic Pipe and Fittings—ASTM D2235-88.

Standard Specification for Solvent Cements for Poly (Vinyl Chloride) (PVC) Plastic Piping Systems—ASTM D2564-91a.

Specification for Neoprene Rubber Gaskets for HUB and Spigot Cast Iron Soil Pipe and Fittings—CISPI-HSN-85.

Plumbing System Components for Manufactured Homes and Recreational Vehicles—ANSI/NSF 24-1988.

Material and Property Standard for Diversion Tees and Twin Waste Elbow—IAPMO PS 9-84.

Material and Property Standard for Flexible Metallic Water Connectors—IAPMO PS 14-89.

Material and Property Standard for Dishwasher Drain Airgaps—IAPMO PS 23-89.

Material and Property Standards for Backflow Prevention Assemblies—IAPMO PS 31-91.

Plumbing Fixtures

Plumbing Fixtures (General Specifications)—FS WW-P-541E/GEN-1980.

Vitreous China Plumbing Fixtures—ANSI/ASME A112.19.2(M)-1990.

Enameled Cast Iron Plumbing Fixtures—ANSI/ASME A112.19.1M-1987.

Porcelain Enameled Formed Steel Plumbing Fixtures—ANSI/ASME A112.19.4(M)-1984.

Plastic Bathtub Units With Addenda Z124.1a-1990 and Z124.16-1991—ANSI Z124.1-1987.

Standard for Porcelain Enameled Formed Steel Plumbing Fixtures—IAPMO TSC 22-85.

Plastic Shower Receptors and Shower Stalls With Addendum Z124.2a-1990—ANSI Z124.2-1987.

Stainless Steel Plumbing Fixtures (Designed for Residential Use)—ANSI/ASME A112.19.3M-1987.

Material and Property Standard for Drains for Prefabricated and Precast Showers—IAPMO PS 4-90.

Plastic Lavatories with addendum Z124.3a-1990—ANSI Z124.3-1986.

Safety Performance Specifications and Methods of Test for Safety Glazing Materials Used in Building—ANSI Z97.1-1984.

Plumbing Fixture Fittings—ANSI/ASME A112.18.1M-1989.

Trim for Water Closet, Bowls, Tanks, and Urinals—ANSI A112.19.5-1979.

Plastic Water Closets, Bowls and Tanks with Addenda Z124.4a-1990—ANSI Z124.4-1986.

Whirlpool Bathtub Appliances—ASME/ANSI A112.19.7M-1987.

Performance Requirements for Individual Thermostatic Pressure

Balancing and Combination Control for Bathing Facilities—ASSE 1016—1988, (ANSI 1990).

Performance Requirements for Pressurized Flushing Devices (Flushometers) For Plumbing Fixtures—ASSE 1037—1990 (ANSI—1990).

Performance Requirements for Water Closet Flush Tank Fill Valves (Ballcocks)—ASSE 1002 Revision 5—1986, (ANSI/ASSE—1979).

Performance Requirements for Hand-held Showers—ASSE 1014—1989 (ANSI—1990).

Hydrants for Utility and Maintenance Use—ANSI/ASME A112.21.3M—1985.

Performance Requirements for Home Laundry Equipment—ASSE 1007—1986.

Performance Requirements for Hot Water Dispensers, Household Storage Type Electrical—ASSE 1023—ANSI/ASSE—1979.

Plumbing Requirements for Residential Use (Household) Dishwashers—ASSE 1006, ASSE/ANSI—1986.

Performance Requirements for Household Food Waste Disposer Units—ASSE 1008—1986.

Performance Requirements for Temperature Activated Mixing Valves for Primary Domestic Use—ASSE 1017—1986.

Water Hammer Arresters—ANSI A112.26.1—1969 (R 1975).

Suction Fittings for Use in Swimming Pools, Wading Pools, Spas, Hot Tubs and Whirlpool Bathtub Appliances—ASME/ANSI A112.19.8M—1989.

Air Gaps in Plumbing Systems—ASME A112.1.2—1991.

Performance Requirements for Diverters for Plumbing Faucets with Hose Spray, Anti-Siphon Type, Residential Applications—ASSE 1025—ANSI/ASSE—1978.

Performance Requirements for Pipe Applied Atmospheric Type Vacuum Breakers—ASSE 1001 ASSE/ANSI—1990.

Performance Requirements for Hose Connection Vacuum Breakers—ASSE 1011—1981 (ANSI—1982).

Performance Requirements for Wall Hydrants, Frost Proof Automatic Draining, Anti-Backflow Types—ANSI/ASSE 1019—1978.

38. Section 3280.606 is amended by revising paragraph (b)(1)(iii) to read as follows:

§ 3280.606 Traps and cleanouts.

* * * * *

(b) * * *

(1) * * *

(iii) A cleaning tool shall not be required to pass through more than 360 degrees of fittings, excluding removable "P" traps, to reach any part of the

drainage system. Water closets may be removed for drainage system access.

* * * * *

39. Section 3280.607 is amended by revising paragraphs (b)(2), (b)(2)(i), (ii), (iv) and (v), (b)(4)(i), and (c)(1) and by adding new paragraphs (c) (5) and (6) to read as follows:

§ 3280.607 Plumbing fixtures.

* * * * *

(b) * * *

(2) *Water closets.* (i) Water closets shall be designed and manufactured according to approved or listed standards and shall be equipped with a water flushing device capable of adequately flushing and cleaning the bowl at each operation of the flushing mechanism.

(ii) Water closet flushing devices shall be designed to replace the water seal in the bowl after each operation. Flush valves, flushometer valves, flushometer tanks and ballcocks shall operate automatically to shut off at the end of each flush or when the tank is filled to operating capacity.

* * * * *

(iv) Water closets that have fouling surfaces that are not thoroughly washed at each discharge shall be prohibited. Any water closet that might permit the contents of the bowl to be siphoned back into the water system shall be prohibited.

(v) *Floor connection.* Water closets shall be securely bolted to an approved flange or other approved fitting which is secured to the floor by means of corrosion-resistant screws. The bolts shall be of solid brass or other corrosion-resistant material and shall be not less than one-fourth inch in diameter. A watertight seal shall be made between the water closet and flange or other approved fitting by use of a gasket or sealing compound.

* * * * *

(4) *Dishwashing machines.* (i) A dishwashing machine shall not be directly connected to any waste piping, but shall discharge its waste through a fixed air gap installed above the machine, or through a high loop as specified by the dishwashing machine manufacturer, or into an open standpipe-receptor with a height greater than the washing compartment of the machine. When a standpipe is used, it shall be at least 18 inches but not more than 30 inches above the trap weir. The drain connections from the air gap or high loop may connect to an individual trap, to a directional fitting installed in the sink tailpiece or to an opening

provided on the inlet side of a food waste disposal unit.

* * * * *

(c) *Installation—(1) Access.* Each plumbing fixture and standpipe receptor shall be located and installed in a manner to be accessible for usage, cleaning, repair and replacement. Access to diverter valves and other connections from the fixture hardware is not required.

* * * * *

(5) *Fixture fittings.* Faucets and diverters shall be installed so that the flow of hot water from the fittings corresponds to the left-hand side of the fitting.

(6) *Whirlpool bathtub appliances—(i) Access panel.* A door or panel of sufficient size shall be installed to provide access to the pump for repair and/or replacement.

(ii) *Piping drainage.* The circulation pump shall be accessibly located above the crown weir of the trap. The pump drain line shall be properly sloped to drain the volute after fixture use.

(iii) *Piping.* Whirlpool bathtub circulation piping shall be installed to be self-draining.

(iv) *Electrical.* Refer to the National Electrical Code, NFPA 70—1993, Article 685G.

40. Section 3280.609 is amended by revising paragraphs (b) (5) and (6), (d)(1)(i) and (e)(3), and by adding paragraphs (b) (7) and (8), to read as follows:

§ 3280.609 Water distribution system.

* * * * *

(b) * * *

(5) *Flushometer valves or manually operated flush valves.* An approved or listed vacuum breaker shall be installed and maintained in the water supply line on the discharge side of a water closet flushometer valve or manually operated flush valve. Vacuum breakers shall have a minimum clearance of 6 inches above the flood level of the fixture to the critical level mark unless otherwise permitted in their approval.

(6) *Flush tanks.* Water closet flush tanks shall be equipped with an approved or listed anti-siphon ball cock which shall be installed and maintained with its outlet or critical level mark not less than 1 inch above the full opening of the overflow pipe.

(7) *Hose bibbs.* When provided, all exterior hose bibbs and laundry sink hose connections shall be protected by a listed non-removable backflow prevention device. This is not applicable to hose connections provided for automatic washing machines with built-in backflow prevention.

(8) *Flushometer tanks.* Flushometer tanks shall be equipped with an approved air gap on the vacuum breaker assembly located above the flood level rim above the fixture.

(d) * * *
(1) * * *

(i) *Plastic piping.* All plastic water piping and fittings in manufactured homes must be listed for use with hot water.

(e) * * *

(3) *Solder fittings.* Joints in copper water tubes shall be made by the appropriate use of approved cast brass or wrought copper fittings, properly soldered together. The surface to be soldered shall be thoroughly cleaned bright mechanically. The joints shall be properly fluxed and made with a solder that contains no more than 0.2 percent lead.

41. Section 3280.610 is amended by revising paragraphs (c)(5), (d)(1), and (e)(1)(iii) to read as follows:

§ 3280.610 Drainage systems.

(c) * * *

(5) *Preassembly of drain lines.* Section(s) of the drain system, designed to be located underneath the home, are not required to be factory installed when the manufacturer designs the system for site assembly and also provides all materials and components, including piping, fittings, cement, supports, and instructions necessary for proper site installation.

(d) * * *

(1) *Water closet connection.* The drain connection for each water closet shall be 3 inches minimum inside diameter and shall be fitted with an iron, brass, or listed plastic floor flange adaptor ring securely screwed, soldered or otherwise permanently attached to the drain piping, in an approved manner and securely fastened to the floor.

(e) * * *
(1) * * *

(iii) A 3-inch minimum diameter piping shall be required for water closets.

42. Section 3280.611 is amended by revising paragraph (d)(5) to read as follows:

§ 3280.611 Vents and venting.

(d) * * *

(5) Materials for the anti-siphon trap vent shall be as follows:

(i) Cap and housing shall be listed acrylonitrile-butadiene-styrene, DWV grade;

(ii) stem shall be DWV grade nylon or acetal;

(iii) spring shall be stainless steel wire, type 302;

(iv) sealing disc shall be neoprene, conforming to CISPI-HSN-85, the Specification for Neoprene Rubber Gaskets for HUB and Spigot Cast Iron Soil Pipe and Fittings, and ASTM C 564-88, Standard Specification for Rubber Gaskets for Case Iron Soil Pipe and Fittings, or, Silicone Rubber, Low and High Temperature and Tear Resistant, Conforming to Rubber, Silicone, FS ZZ-R-765B-1970, With 1971 Amendment 1; and Liners, Case, and Sheet, Overwrap; Water-Vapor Proof or Waterproof, Flexible, MIL-L-10547E-1975.

43. Section 3280.612 is amended by revising paragraph (b)(3) to read as follows:

§ 3280.612 Test and inspection.

(b) * * *

(3) *Flood level test.* The manufactured home shall be in a level position, all fixtures shall be connected, and the entire system shall be filled with water to the rim of the water closet bowl. (Tub and shower drains shall be plugged). After all trapped air has been released, the test shall be sustained for not less than 15 minutes without evidence of leaks. Then the system shall be unplugged and emptied. The waste piping above the level of the water closet bowl shall then be tested and show no indication of leakage when the high fixtures are filled with water and emptied simultaneously to obtain the maximum possible flow in the drain piping.

Subpart H—Heating, Cooling and Fuel Burning Systems

44. Section 3280.702 is amended by removing the paragraph designations from the section and by revising the definition for "Connector-Gas appliance" to read as follows:

§ 3280.702 Definitions.

Connector-Gas appliance: means a flexible or semi-rigid connector used to convey fuel gas between a gas outlet and a gas appliance.

45. Section 3280.703 is revised to read as follows:

§ 3280.703 Minimum standards.

Heating, cooling and fuel burning appliances and systems in manufactured homes shall be free of defects, and shall conform to applicable standards in the following table unless otherwise specified in this standard. (See § 3280.4) When more than one standard is referenced, compliance with any one such standard shall meet the requirements of this standard.

Appliances

Central Cooling Air Conditioners—UL 465—Seventh Edition-1987 With Revisions through December 24, 1987.

Liquid Fuel-Burning Heating Appliances for Manufactured Homes and Recreational Vehicle—UL 307A—Sixth Edition-1990, With Revisions through August 21, 1990.

Electrical Air Heaters—UL 1025—Second Edition-1987 With Revisions July 13, 1989, February 6, 1990 and December 3, 1991.

Electric Baseboard Heating Equipment—UL 1042—Third Edition-1987 With Revision July 15, 1993.

Electric Central Air Heating Equipment—UL 1096—Fourth Edition-1986 With Revisions July 16, 1986 and January 30, 1988.

Gas Burning Heating Appliances for Mobile Homes and Recreational Vehicles—UL 307B—First Edition-1982 With Revision May 18, 1987.

Gas Clothes Dryers Vol. 1, Type 1 Clothes Dryers—ANSI Z21.5.1-1992.

Gas Fired Absorption Air Conditioning Appliances—ANSI Z21.40.1-1981, With Addenda Z21.40.1a-1982.

Gas-Fired Central Furnaces [Except Direct Vent System Central Furnaces]—ANSI Z21.47-1990, With Addendum Z21.47a-1990 and Z21.47b-1992.

Household Cooking Gas Appliances ANSI Z21.1-1990 With Addenda Z21.1a-1991 and Z21.1b-1993.

Refrigerators Using Gas Fuel—ANSI Z21.19-1990, With Addenda Z21.19a-1992.

Gas Water Heaters Vol. 1, Storage Water Heaters With Input Ratings of 75,000 BTU per hour or Less—ANSI Z21.10.1-1990, With Addendum Z21.10.1a-1991 and Z21.10.1b-1992.

Household Electric Storage Tank Water Heaters—UL 174—Seventh Edition-1989 With Revisions May 8, 1990 and January 22, 1991.

Ferrous Pipe and Fittings

Standard Specification for Pipe, Steel, Black and Hot-Dipped, Zinc-Coated, Welded and Seamless—ASTM A53-93.

Standard Specification for Electric-Resistance-Welded Coiled Steel Tubing for Gas and Fuel Oil Lines—*ASTM A539-90a.

Pipe Threads, General Purpose
(Inch)—ANSI/ASME B1.20.1-1983.
Welding and Seamless Wrought Steel
Pipe—ANSI/ASME B36.10-1979.

Nonferrous Pipe, Tubing and Fittings

Standard Specification for Seamless
Copper Water Tube—ASTM B88-93.
Standard Specification for Seamless
Copper Tube for Air Conditioning and
Refrigeration Field Service—ASTM
B280-93.

Metal Connectors for Gas
Appliances—ANSI Z21.24-1987, With
Addenda Z21.24a 1990 and Z21.24b-
1992.

Manually Operated Gas Valves for
Appliances, Appliance Connector
Valves and Hose End Valves—ANSI
Z21.15-1992.

Standard for Gas Supply Connectors
for Manufactured Homes—IAPMO TSC
9-92.

Standard Specification for General
Requirements for Wrought Seamless
Copper and Copper-Alloy Tubes—
ASTM B251-93.

Standard Specification for Seamless
Copper Pipe, Standard Sizes—ASTM
B42-93.

Direct Vent Central Furnaces—ANSI
Z21.64-1990, With Addenda Z21.64a-
1992.

Miscellaneous

Factory-Made Air Ducts and
Connectors—UL 181—Seventh Edition-
1990, With Revision November 20,
1990.

Tube Fittings for Flammable and
Combustible Fluids, Refrigeration
Service, and Marine Use—UL 109—Fifth
Edition-1993.

Pigtails and Flexible Hose Connectors
for LP-Gas—UL 569—Sixth Edition-1990.

Roof Jacks for Manufactured Homes
and Recreational Vehicles—UL 311-
Seventh Edition-1990.

Relief Valves and Automatic Gas
Shutoff Devices for Hot Water Supply
Systems—ANSI Z21.22-1986, With
Addenda Z21.22a-1990.

Automatic Gas Ignition Systems and
Components—ANSI Z21.20-1989, With
Addendum Z21.20a-1991 and Z21.20b-
1992.

Automatic Valves for Gas
Appliances—ANSI Z21.21-1987, With
Addendum Z21.21a-1989 and Z21.21b-
1992.

Gas Appliance Thermostats—ANSI
Z21.23-1989, With Addenda Z21.23a-
1991.

Gas Vents—UL 441—Seventh Edition-
1991.

Installation of Oil-Burning
Equipment, NFPA 31-1992 Edition.

National Fuel Gas Code—NFPA 54-
1992 ANSI 223.1.

Warm Air Heating and Air
Conditioning Systems, 1993 Edition,
NFPA-90B.

The following sections are applicable:

2-2.4
2-3.6
Table 3-1.3, Section B
4-1.6

Standard for the Storage and Handling
of Liquefied Petroleum Gases, 1992
Edition—NFPA-58.

Flares for Tubing (1972)—SAE-J533b.
Chimneys, Factory-Built Residential
Type and Building Heating Appliance—
UL 103—Seventh Edition—1989 With
Revision February 23, 1989.

Factory-Built Fireplaces—UL 127-
Sixth Edition With Revisions January 4,
1989, June 10, 1991, June 29, 1992.

Room Heaters Solid-Fuel Type—UL
1482—Third Edition—1988 With
Revision September 13, 1988.

Fireplace Stoves—UL 737—Sixth
Edition—1988 With Revisions
September 19, 1988, July 10, 1990 and
June 10, 1991.

Unitary Air-Conditioning and Air-
Source Heat Pump Equipment—ANSI/
ARI 210/240-89.

AGA Requirements for Gas
Connectors for Connection of Fixed
Appliances for Outdoor Installation,
Park Trailers and Manufactured
(Mobile) Homes to the Gas Supply—No.
3-87.

46. Section 3280.704 is amended by
revising the introductory text of
paragraph (b)(2) and paragraph (b)(5)(i)
to read as follows:

§3280.704 Fuel supply systems.

* * * * *

(b) * * *

(2) *Construction of containers.*

Containers shall be constructed and
marked in accordance with the
specifications for LP-Gas Containers of
the U.S. Department of Transportation
(DOT) or the Rules for Construction of
Pressure Vessels 1986, ASME Boiler and
Pressure Vessel Code section VIII,
Division 1 ASME Containers shall have
a design pressure of at least 312.5 psig.

* * * * *

(5) *LP-gas safety devices.* (i) DOT
containers shall be provided with safety
relief devices as required by the
regulations of the U.S. Department of
Transportation. ASME containers shall
be provided with relief valves in
accordance with subsection 221 of the
Standard for the Storage and Handling
Liquefied Petroleum Gases, NFPA No.
58-1992, Safety relief valves shall have
direct communication with the vapor
space of the vessel.

* * * * *

47. Section 3280.705 is amended by
revising paragraphs (b)(1) and (3), (c),
and (d); the table following paragraph
(h) is amended by removing and
reserving Part II; in paragraph (k), the
introductory text is revised and the label
diagram entitled "LP Gas System" is
removed; and paragraph (l)(1) and the
introductory text of paragraph (l)(2), and
paragraphs (l)(2)(ii) and (l)(3) are revised
to read as follows:

§3280.705 Gas piping systems.

* * * * *

(b) * * *

(1) Steel or wrought-iron pipe shall
comply with ANSI Standard B36.10-
1979, Welded and Seamless Wrought
Steel Pipe. Threaded brass pipe in iron
pipe sizes may be used. Threaded brass
pipe shall comply with ASTM B43-91,
Standard Specification for Seamless Red
Brass Pipe, Standard Sizes.

* * * * *

(3) Copper tubing shall be annealed
type, Grade K or L, conforming to the
Standard Specification for Seamless
Copper Water Tube (ASTM B88-93) or
shall comply with the Standard
Specification for Seamless Copper Tube
for Air Conditioning and Refrigeration
Field Service, ASTM B 280-93. Copper
tubing shall be internally tinned.

* * * * *

(c) *Piping design.* Each manufactured
home requiring fuel gas for any purpose
shall be equipped with a natural gas
piping system acceptable for LP-Gas.
Where fuel gas piping is to be installed
in more than one section of an
expandable or multiple unit home, the

design and construction of the crossover(s) shall be as follows:

(1) All points of crossover shall be readily accessible from the exterior of the home.

(2) The connection(s) between units shall be made with a connector(s) listed for exterior use or direct plumbing sized in accordance with § 3280.705(d). A shutoff valve of the nondisplaceable rotor type conforming to ANSI Z21.15-1992 Manually Operated Gas Valves for Appliances, Appliances Connector Valves and Hose End Valves, suitable for outdoor use shall be installed at each crossover point upstream of the connection when listed connectors are used.

(3) The connection(s) may be made by a listed quick disconnect device which shall be designed to provide a positive seal of the supply side of the gas system when such device is separated.

(4) The flexible connector, direct plumbing pipe, or "quick disconnect" device shall be provided with protection from mechanical and impact damage and located to minimize the possibility of tampering.

(5) For gas line cross over connections made with either hard pipe or flexible connectors, the crossover point(s) shall be capped on the supply side to provide a positive seal and covered on the other side with a suitable protective covering.

(6) Suitable protective coverings for the connection device(s) when separated, shall be permanently attached to the device or flexible connector.

(7) When a quick disconnect device is installed, a 3 inch by 1¼ inch minimum size tag made of etched, metal-stamped or embossed brass, stainless steel, anodized or alcalde aluminum not less than 0.020 inch thick or other approved material (e.g., 0.005 inch plastic laminates) shall be permanently attached on the exterior wall adjacent to the access to the "quick disconnect" device. Each tag shall be legibly inscribed with the following information using letters no smaller than ¼ inch high:

Do Not Use Tools To Separate the "Quick-Disconnect" Device

(d) *Gas pipe sizing.* Gas piping systems shall be sized so that the pressure drop to any appliance inlet connection from any gas supply connection, when all appliances are in operation at maximum capacity, is not more than 0.5 inch water column as determined on the basis of test, or in accordance with Table 3280.705(d). When determining gas pipe sizing in the table, gas shall be assumed to have a specific gravity of 0.65 and rated at 1000

B.T.U. per cubic foot. The natural gas supply connection(s) shall be not less than the size of the gas piping but shall be not smaller than ¾ inch nominal pipe size.

(k) *Identification of gas supply connections.* Each manufactured home shall have permanently affixed to the exterior skin at or near each gas supply connection or the end of the pipe, a tag of 3 inches by 1¼ inches minimum size, made of etched, metal-stamped or embossed brass, stainless steel, anodized or alcalde aluminum not less than 0.020 inch thick, or other approved material (e.g., 0.005 inch plastic laminates), which reads as follows. The connector capacity indicated on this tag shall be equal to or greater than the total Btuh rating of all intended gas appliances.

(1) *LP-Gas supply connectors* (1) A listed LP-Gas flexible connection conforming to the UL Standard for Pigtails, and Flexible Hose Connectors for LP-Gas, UL 569—Sixth Edition—1990, or equal shall be supplied when LP-Gas cylinder(s) and regulator(s) are supplied.

(2) *Appliance connections.* All gas burning appliances shall be connected to the fuel piping. Materials as provided in § 3280.705(b) or listed appliance connectors shall be used. Listed appliance connectors when used shall not run through walls, floors, ceilings or partitions, except for cabinetry, and shall be 3 feet or less in length or 6 feet or less for cooking appliances. Connectors of aluminum shall not be used outdoors. A manufactured home containing a combination LP-natural-gas-system may be provided with a gas outlet to supply exterior appliances when installed in accordance with the following:

(ii) The outlet shall be provided with an approved quick-disconnect device, which shall be designed to provide a positive seal on the supply side of the gas system when the appliance is disconnected. A shutoff valve of the nondisplaceable rotor type conforming to ANSI Z21.15-1992, Manually Operated Gas Valves, shall be installed immediately upstream of the quick-disconnect device. The complete device shall be provided as part of the original installation.

(3) *Valves.* A shutoff valve shall be installed in the fuel piping at each appliance inside the manufactured home structure, upstream of the union or connector in addition to any valve on

the appliance and so arranged to be accessible to permit serving of the appliance and removal of its components. The shutoff valve shall be located within 6 feet of a cooking appliance and within 3 feet of any other appliance. A shutoff valve may serve more than one appliance if located as required above. Shut off valves shall be of the nondisplaceable rotor type and conform ANSI Z21.15-1992, Manually Operated Gas Valves.

49. Section 3280.706 is amended by revising paragraphs (b)(1), (b)(3), and (b)(4) to read as follows:

§ 3280.706 Oil piping systems.

(1) Steel or wrought-iron pipe shall comply with ANSI B 36.10-1979, Welded and Seamless Wrought Steel Pipe. Threaded copper or brass pipe in iron pipe sizes may be used.

(3) Copper tubing shall be annealed type, Grade K or L conforming to the Standard Specification for Seamless Copper Water Tube, ASTM B88-93, or shall comply with the Standard Specification for Seamless Copper Tube for Air Conditioning and Refrigeration Field Service, ASTM B280-93.

(4) Steel tubing shall have a minimum wall thickness of 0.032 inch for diameters up to ½ inch and 0.049 inch for diameters ½ inch and larger. Steel tubing shall be constructed in accordance with the Specification for Electric-Resistance-Welded Coiled Steel Tubing for Gas and Field Oil Lines, ASTM, A539-90a, and shall be externally corrosion protected.

50. Section 3280.707 is amended by revising paragraph (d)(2) introductory text to read as follows:

§ 3280.707 Heat producing appliances.

(2) All gas and oil-fired automatic storage water heaters shall have a recovery efficiency, E, and a standby loss, S, as described below. The method of test of E and S shall be as described in Section 2.7 of Gas Water Heaters, Vol. I, Storage Water Heaters with Input/Ratings of 75,000 BTU per hour or less, ANSI Z21.10.1-1990, with addendums Z21.10.1a-1991 and Z21.10.1b-1992 except that for oil-fired units. CF=1.0, Q=total gallons of oil consumed and H=total heating value of oil in BTU/gallon.

51. Section 3280.708 is amended by revising paragraphs (b)(3) and (c)(1) to read as follows:

§ 3280.708 Exhaust duct system and provisions for the future installation of a clothes dryer.

(b) (3) A moisture lint duct system consisting of a complete access space (hole) through the wall or floor cavity with a cap or cover on the interior and exterior of the cavity secured in such a manner that they can be removed by a common household tool shall be provided. The cap or cover in place shall limit air infiltration and be designed to resist the entry of water or rodents. The manufacturer is not required to provide the moisture-lint exhaust duct or the termination fitting. The manufacturer shall provide written instructions to the owner on how to complete the exhaust duct installation in accordance with provisions of § 3280.708(a)(1) through (5).

(c) (1) Provide a roughed in moisture-lint exhaust duct system consisting of a complete access space (hole) through the wall or floor cavity with a cap or cover on the interior and exterior of the cavity which are secured in such a manner that they can be removed by the use of common household tools. The cap or cover in place shall limit air filtration and be designed to resist the entry of water or rodents into the home. The manufacturer is not required to provide the moisture-lint exhaust duct or the termination fitting;

52. Section 3280.709 is amended by revising paragraph (e)(6) to read as follows:

§ 3280.709 Installation of appliances.

(e) (6) When an external heating appliance or combination cooling/heating appliance is to be field installed, the home manufacturer shall make provision for proper location of the connections to the supply and return air systems. The manufacturer is not required to provide said appliance(s). The preparation by the manufacturer for connection to the home's supply and return air system shall include all fittings and connection ducts to the main duct and return air system such that the installer is only required to provide:

- (i) The appliance;
- (ii) Any appliance connections to the home; and
- (iii) The connecting duct between the external appliance and the fitting

installed on the home by the manufacturer. The above connection preparations by the manufacturer do not apply to supply or return air systems designed only to accept external cooling (i.e., self contained air conditioning systems, etc.)

53. Section 3280.710 is amended by revising paragraph (b)(1) and by removing paragraph (g) to read as follows:

§ 3280.710 Venting, ventilation and combustion air.

(b) (1) Components shall be securely assembled and properly aligned at the factory in accordance with the appliance manufacturer's instructions except vertical or horizontal sections of a fuel fired heating appliance venting system that extend beyond the roof line or outside the wall line may be installed at the site. Sectional venting systems shall be listed for such applications and installed in accordance with the terms of their listings and manufacturers' instructions. In cases where sections of the venting system are removed for transportation, a label shall be permanently attached to the appliance indicating the following:

Sections of the venting system have not been installed. Warning-do not operate the appliance until all sections have been assembled and installed in accordance with the manufacturer's instructions.

54. Section 3280.713 is revised to read as follows:

§ 3280.713 Accessibility.

Every appliance shall be accessible for inspection, service, repair, and replacement without removing permanent construction. For those purposes, inlet piping supplying the appliance shall not be considered permanent construction. Sufficient room shall be available to enable the operator to observe the burner, control, and ignition means while starting the appliance.

55. Section 3280.714 is amended by revising paragraph (a) to read as follows:

§ 3280.714 Appliances, cooling.

(a) Every air conditioning unit or a combination air conditioning and heating unit shall be listed or certified by a nationally recognized testing agency for the application for which the unit is intended and installed in accordance with the terms of its listing.

(1) Mechanical air conditioners shall be rated in accordance with the ARI Standard 210/240-89 Unitary Air

Conditioning and Air Source Unitary Heat Pump Equipment and certified by ARI or other nationally recognized testing agency capable of providing follow-up service.

(i) Electric motor-driven unitary cooling systems with rated capacity less than 65,000 BTU/Hr when rated at ARI Standard rating conditions in ARI Standard 210/240-89 Unitary Air-Conditioning and Air-Source Heat Pump Equipment, shall show energy efficiency (EER) values not less than 7.2.

(ii) Heat pumps shall be certified to comply with all the requirements of the ARI Standard 210/240-89 Unitary Air Conditioning and Air Source Unitary Heat Pump Equipment. Electric motor-driven vapor compression heat pumps with supplemental electrical resistance heat shall be sized to provide by compression at least 60 percent of the calculated annual heating requirements for the manufactured home being served. A control shall be provided and set to prevent operation of supplemental electrical resistance heat at outdoor temperatures above 40 F, except for defrost operation.

(iii) Electric motor-driven vapor compression heat pumps with supplemental electric resistance heat conforming to ARI Standard 210/240-89 Unitary Air-Conditioning and Air-Source Heat Pump Equipment shall show coefficient of performance ratios not less than shown below:

COP

| Temperature degrees fahrenheit | Coefficient of performance |
|--------------------------------|----------------------------|
| 47 | 2.5 |
| 17 | 1.7 |
| 0 | 1.0 |

(2) Gas-fired absorption air conditioners shall be listed or certified in accordance with ANSI Standard Z21.40.1-1981 "Gas-fired Absorption Summer Air Conditioning Appliances" with addenda 1a-1982, and certified by a nationally recognized testing agency capable of providing follow-up service.

(3) Direct refrigerating systems serving any air conditioning or comfort-cooling system installed in a manufactured home shall employ a type of refrigerant that ranks no lower than Group 5 in the Underwriters' Laboratories, Inc. "Classification of Comparative Life Hazard of Various Chemicals."

(4) When a cooling or heat pump coil and air conditioner blower are installed with a furnace or heating appliance, they shall be tested and listed in combination for heating and safety

performance by a nationally recognized testing agency.

(5) Cooling or heat pump indoor coils and outdoor sections shall be certified, listed and rated in combination for capacity and efficiency by a nationally recognized testing agency(ies). Rating procedures shall be based on U.S. Department of Energy test procedures.

56. Section 3280.715 is amended by revising paragraph (b)(4) and paragraph (e)(1) to read as follows:

§ 3280.715 Circulating air system.

(b) * * *

(4) *Permanent uncloseable openings.*

Living areas not served by return air ducts or closed off from the return opening of the furnace by doors, sliding partitions, or other means shall be provided with permanent uncloseable openings in the doors or separating partitions to allow circulated air to return to the furnace. Such openings may be grilled or louvered. The net free area of each opening shall be not less than 1 square inch for every 5 square feet of total living area closed off from the furnace by the door or partition serviced by that opening. Undercutting doors connecting the closed-off space may be used as a means of providing return air area. However, in the event that doors are undercut, they shall be undercut a minimum of 2 inches and not more than 2½ inches, as measured from the top surface of the floor decking to the bottom of the door and no more than one half of the free air area so provided shall be counted as return air area.

(e) * * *

(1) Be made of a material classified 94V-0 or 94V-1 when tested as described in Underwriters' Laboratories, Inc., Tests for Flammability of Plastic Materials for Parts in Devices and Appliances, UL 94-Fourth Edition-1991.

Subpart I—Electrical Systems

57. Section 3280.801 is amended by revising paragraphs (a), (b), (c), and (e) to read as follows:

§ 3280.801 Scope.

(a) Subpart I of this standard and part A of Article 550 of the National Electrical Code (NFPA No. 70-1993) cover the electrical conductors and equipment installed within or on manufactured homes and the conductors that connect manufactured homes to a supply of electricity.

(b) In addition to the requirements of this standard and Article 550 of the National Electrical Code (NFPA No. 70-1993) the applicable portions of other Articles of the National Electrical Code shall be followed covering electrical installations in manufactured homes. Wherever the requirements of this standard differ from the National Electrical Code, this standard shall apply.

(c) The provisions of this standard apply to manufactured homes intended for connection to a wiring system nominally rated 120/240 volts, 3-wire AC, with grounded neutral.

(e) Aluminum conductors, aluminum alloy conductors, and aluminum core conductors such as copper clad aluminum; are not acceptable for use in branch circuit wiring in manufactured homes.

58. Section 3280.803 is amended by revising paragraphs (k)(1), the introductory text of paragraph (k)(3), paragraphs (k)(3)(ii) and (k)(3)(iii), and by removing paragraph (l) to read as follows:

§ 3280.803 Power supply.

(k) * * *

(1) One mast weatherhead installation installed in accordance with Article 230 of the National Electrical Code NFPA No. 70-1993 containing four continuous insulated, color-coded, feeder conductors, one of which shall be an equipment grounding conductor; or

(3) Service equipment installed on the manufactured home in accordance with Article 230 of the National Electrical Code NFPA No. 70-1993; and

(ii) Exterior equipment, or the enclosure in which it is installed shall be weatherproof and installed in accordance with Article 373-2 of the National Electrical Code NFPA No. 70-1993. Conductors shall be suitable for use in wet locations;

(iii) The neutral conductor shall be connected to the system grounding conductor on the supply side of the main disconnect in accordance with Articles 250-23, 25, and 53 of NFPA No. 70-1993.

59. Section 3280.804 is amended by revising paragraphs (a), (g)(1)(ii), (i) and (j) and by adding new paragraphs (k) and (l) at the end of the section to read as follows:

§ 3280.804 Disconnecting means and branch-circuit protective equipment.

(a) The branch-circuit equipment shall be permitted to be combined with the disconnecting means as a single assembly. Such a combination shall be permitted to be designated as a distribution panelboard. If a fused distribution panelboard is used, the maximum fuse size of the mains shall be plainly marked with lettering at least ¼-inch high and visible when fuses are changed. See section 110-22 of the National Electrical Code (NFPA No. 70-1993) concerning identification of each disconnecting means and each service, feeder, or branch circuit at the point where it originated and the type marking needed.

(g) * * *
(1) * * *

(ii) Not more than 150 percent of the rating of a single appliance rated 13.3 amperes or more which is supplied by an individual branch circuit; but

(i) When circuit breakers are provided for branch-circuit protection 240 circuits shall be protected by 2-pole common or companion trip, or handle-tied paired circuit breakers.

(j) A 3 inch by 1-3/4 inch minimum size tag made of etched, metal-stamped or embossed brass, stainless steel, anodized or alclad aluminum not less than 0.020 inch thick, or other approval material (e.g., 0.005 inch plastic laminates) shall be permanently affixed on the outside adjacent to the feeder assembly entrance and shall read: This connection for 120/240 Volt, 3-Pole, 4-Wire, 60 Hertz, _____ Ampere Supply. The correct ampere rating shall be marked on the blank space.

(k) When a home is provided with installed service equipment, a single disconnecting means for disconnecting the branch circuit conductors from the service entrance conductors shall be provided in accordance with Part F of Article 230 of the National Electrical Code, NFPA No. 70-1993. The disconnecting means shall be listed for use as service equipment. The disconnecting means may be combined with the disconnect required by § 3280.804(c). The disconnecting means shall be rated not more than the ampere supply or service capacity indicated on the tag required by paragraph (l) of this section.

(l) When a home is provided with installed service equipment, the electrical nameplate required by § 3280.804(j) shall read: "This connection for 120/240 volt, 3 pole, 3 wire, 60 Hertz, _____ Ampere

Supply." The correct ampere rating shall be marked in the blank space.

60. Section 3280.805 is amended by revising paragraphs (a)(1), (a)(2), and (a)(3)(ii), through (v) to read as follows:

§ 3280.805 Branch circuits required.

(a) * * *

(1) Lighting, based on 3 volt-amperes per square foot times outside dimensions of the manufactured home (coupler excluded) divided by 120 volts times amperes to determine number of 15 or 20 ampere lighting area circuits. e.g. [3 × length × width—[120 × (15 or 20)] = number of 15 or 20 ampere circuits.

(2) *Small appliances.* For the small appliance load in kitchen, pantry dining room and breakfast rooms of manufactured homes, two or more 20-ampere appliance branch circuits, in addition to the branch circuit specified in § 3280.805(a)(1), shall be provided for all receptacle outlets in these rooms, and such circuits shall have no other outlets. Receptacle outlets supplied by at least two appliance receptacle branch circuits shall be installed in the kitchen.

(3) * * *

(ii) For fixed appliances on a circuit without lighting outlets, the sum of rated amperes shall not exceed the branch-circuit rating. Motor loads or other continuous duty loads shall not exceed 80 percent of the branch circuit rating.

(iii) The rating of a single cord and plug connected appliances on a circuit having no other outlets, shall not exceed 80 percent of the circuit rating.

(iv) The rating of range branch circuit shall be based on the range demand as specified or ranges in § 3280.811, Item B(5) of Method 1. For central air conditioning, see Article 440 of the National Electrical Code (NFPA No. 70-1993).

(v) Where a laundry area is provided, a 20 ampere branch circuit shall be provided to supply laundry receptacle outlets. This circuit shall have no other outlets. See § 3280.806(a)(7).

61. Section 3280.806 is amended by revising paragraphs (a)(2), (b), (d)(2), (d)(7), and (d)(8) to read as follows:

§ 3280.806 Receptacle outlets.

(a) * * *

(2) Installed according to section 210-7 of the National Electrical Code (NFPA No. 70-1993).

(3) * * *

(b) All 120 volt single phase, 15 and 20 ampere receptacle outlets, including receptacles in light fixtures, installed outdoors, in compartments accessible from the outdoors, in bathrooms, and

within 6 feet of a kitchen sink to serve counter top surfaces shall have ground-fault circuit protection for personnel. Feeders supplying branch circuits may be protected by a ground-fault circuit-interrupter in lieu of the provision for such interrupters specified above. Receptacles dedicated for washer and dryers, also located in a bathroom, are exempt from this requirement.

* * * * *

(d) * * *

(2) Adjacent to the refrigerator and free-standing gas-range space. A duplex receptacle may serve as the outlet for a countertop and a refrigerator.

* * * * *

(7) In laundry areas within 6 feet of the intended location of the appliance(s).

(8) At least one receptacle outlet shall be installed outdoors.

* * * * *

62. Section 3280.807 is amended by revising paragraphs (c) and (e) and by removing paragraph (g) to read as follows:

§ 3280.807 Fixtures and appliances.

* * * * *

(c) If a lighting fixture is provided over a bathtub or in a shower stall, it shall be of the enclosed and gasketed type, listed for wet locations. See also Article 410-4(d) of the National Electrical Code NFPA No. 70-1993.

* * * * *

(e) Any combustible wall or ceiling finish exposed between the edge of a fixture canopy, or pan and an outlet box shall be covered with non-combustible or limited combustible material.

* * * * *

63. Section 3280.808 is amended by revising paragraphs (a) and (m) and by adding new paragraphs (q), (r), and (s) to read as follows:

§ 3280.808 Wiring methods and materials.

(a) Except as specifically limited in this part, the wiring methods and materials specified in the National Electrical Code (NFPA No. 70-1993) shall be used in manufactured homes.

* * * * *

(m) Outlet boxes of dimensions less than those required in Table 370-6(a) of the National Electrical Code (NFPA No. 70-1993) shall be permitted provided the box has been tested and approved for the purpose.

* * * * *

(q) A substantial brace for securing a box, fitting or cabinet shall be as described in the National Electrical Code, NFPA 70-1993 Article 370-13(d), or the brace, including the fastening mechanism to attach the brace to the

home structure, shall withstand a force of 50 lbs. applied to the brace at the intended point(s) of attachment for the box in a direction perpendicular to the surface in which the box is installed.

(r) Outlet boxes shall fit closely to the openings in combustible wall and ceilings with a maximum of a 1/8 inch gap. They shall be flush with the finish surface or project therefrom.

(s) Where the sheathing of NM cable has been cut or damaged and visual inspection reveals that the conductor and its insulation has not been damaged, it shall be permitted to repair the cable sheath with electrical tape which provides equivalent protection to the sheath.

64. Section 3280.809 is amended by revising paragraphs (b)(1) and (b)(2) to read as follows:

§ 3280.809 Grounding.

* * * * *

(b) * * *

(1) The grounded circuit conductor (neutral) shall be insulated from the grounding conductors and from equipment enclosures and other grounded parts. The grounded (neutral) circuit terminals in the distribution panelboard and in ranges, clothes dryers, counter-mounted cooking units, and wall-mounted ovens shall be insulated from the equipment enclosure. Bonding screws, straps, or buses in the distribution panelboard or in appliances shall be removed and discarded. However, when service equipment is installed on the manufactured home, the neutral and the ground bus may be connected in the distribution panel.

(2) Connection of ranges and clothes dryers with 120/240 volt, 3-wire ratings shall be made with 4 conductor cord and 3 pole, 4-wire grounding type plugs, or by type AC metal clad conductors enclosed in flexible metal conduit. For 120 volt rated devices a 3-conductor cord and a 2-pole, 3-wire grounding type plug shall be permitted.

* * * * *

65. Section 3280.810 is revised to read as follows:

§ 3280.810 Electrical testing.

(a) *Dielectric strength test.* The wiring of each manufactured home shall be subjected to a 1-minute, 900 to 1079 volt dielectric strength test (with all switches closed) between live parts and the manufactured home ground, and neutral and the manufactured home ground. Alternatively, the test may be performed at 1080 to 1250 volts for 1 second. This test shall be performed after branch circuits are complete and after fixtures or appliances are installed. Fixtures or appliances which are listed shall not be

required to withstand the dielectric strength test.

(b) Each manufactured home shall be subject to:

- (1) A continuity test to assure that metallic parts are properly bonded;
- (2) Operational test to demonstrate that all equipment, except water heaters, electric furnaces, dishwashers, clothes washers/dryers, and portable appliances, is connected and in working order; and
- (3) Polarity checks to determine that connections have been properly made. Visual verification shall be an acceptable check.

66. Section 3280.811 is amended by revising the introductory text of paragraph (a), paragraph (a)(1), the introductory text of paragraph (a)(5), paragraph (a)(6), the introductory text of paragraph (b), and paragraphs (b)(1) through (b)(5)(iv) to read as follows:

§ 3280.811 Calculations.

(a) The following method shall be employed in computing the supply cord and distribution-panelboard load for each feeder assembly for each manufactured home and shall be based on a 3-wire, 120/240 volt supply with 120 volt loads balanced between the two legs of the 3-wire system. The total load for determining power supply by this method is the summation of:

(1) Lighting and small appliance load as calculated below:

(i) Lighting volt-amperes: Length time width of manufactured home (outside dimensions exclusive of coupler) times 3 volt-amperes per square foot; e.g. Length x width x 3=lighting volt-amperes.

(ii) Small appliance volt-amperes: Number of circuits time 1,500 volt-amperes for each 20-ampere appliance receptacle circuit (see definition of "Appliance Portable" with Note); e.g. Number of circuits x 1,500=small appliance volt-amperes.

(iii) Total volts-amperes: Lighting volts-amperes plus small appliance=total volt-amperes.

(iv) First 3,000 total volts-amperes at 100 percent plus remainder at 35 percent=watts to be divided by 240 volts to obtain current (amperes) per leg.

(5) Derive amperes for free-standing range (as distinguished from separate ovens and cooking units) by dividing values below by 240 volts.

(6) If outlets or circuits are provided for other than factory-installed appliances, include the anticipated load. The following example is given to illustrate the application of this Method of Calculation:

Example. A manufactured home is 70x10 feet and has two portable appliance circuits, a 1000 volt-ampere 240 volt heater, a 200 volt-ampere 120 volt exhaust fan, a 400 volts-ampere 120 volt dishwasher and a 7000 volt-ampere electric range.

| Lighting and small appliance load | Volt-amperes |
|--|--------------|
| Lighting 70x10x3 | 2,100 |
| Small Appliance | 3,000 |
| Total | 5,100 |
| 1st. 3,000 Volt-Amperes at 100% | 3,000 |
| Remainder (5,100 - 3,000) =2,100, at 35% | 735 |
| Total | 3,735 |

| | Amperes per leg A | Amperes per leg B |
|------------------------------------|-------------------|-------------------|
| Lighting and small Appliance | 15.5 | 15.5 |
| Heater 240 volt | 4.1 | 4.1 |
| Fan 120 volt | 1.7 | |
| Dishwasher 120 volt | | 3.3 |
| Range | 23.3 | 23.3 |
| Total | 44.6 | 46.2 |

Note: Based on the higher current calculated for either leg, use one 50-A supply cord.

(b) The following is an optional method of calculation for lighting and appliance loads for manufactured homes served by single 3-wire 120/240 volt set of feeder conductors with an ampacity of 100 or greater. The total load for determining the feeder ampacity may be computed in accordance with the following table instead of the method previously specified. Feeder conductors whose demand load is determined by this optional calculation shall be permitted to have the neutral load determined by section 220-22 of the National Electrical Code (NFPA No. 70-1993). The loads identified in the table as "other load" and as "Remainder of other load" shall include the following:

- (1) 1500 volt-amperes for each 2-wire, 20-ampere small appliance branch circuit and each laundry branch circuit specified.
- (2) 3 volt-amperes per square foot for general lighting and general-use receptacles.
- (3) The nameplate rating of all fixed appliances, ranges, wall-mounted ovens, counter-mounted cooking units, and including 4 or more separately controlled space heating loads.
- (4) The nameplate ampere or kVA rating of all motors and of all low-power-factor loads.
- (5) The largest of the following:
 - (i) Air conditioning load;

(ii) The 65 percent diversified demand of the central electric space heating load;

(iii) The 65 percent diversified demand of the load of less than four separately-controlled electric space heating units.

(iv) The connected load of four or more separately-controlled electric space heating units.

* * * * *
67. Section 3280.813 is amended by revising paragraph (a) to read as follows:

§ 3280.813 Outdoor outlets, fixtures, air-conditioning equipment.

(a) Outdoor fixtures and equipment shall be listed for use in wet locations, except that if located on the underside of the home or located under roof extensions or similarly protected locations, they may be listed for use in damp locations.

* * * * *
68. Section 3280.815 is amended by revising paragraph (b) to read as follows:

§ 3280.815 Polarization.

* * * * *
(b) If the identified (white) conductor of a cable is used for other than grounded conductors or for other than switch loops as explained above (for a 240 volt circuit for example), the conductor shall be finished in a color other than white at each outlet where the conductors are visible and accessible.

* * * * *
Dated: October 18, 1993.
Nicolas P. Ketsinas,
Assistant Secretary for Housing-Federal Housing Commissioner.

BILLING CODE 4210-27-U

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 206

RIN 3067-AB97

Disaster Assistance; Public Elementary and Secondary School Facilities

AGENCY: Federal Emergency Management Agency, FEMA.
ACTION: Final rule.

SUMMARY: This final rule will provide an exception to FEMA's general practice of deferring to the authority of another Federal agency when both FEMA and the other agency have authority to grant assistance in response to a declared major disaster. This exception is being provided for public elementary and

secondary school facilities that are eligible for assistance from FEMA and from the Department of Education (ED). It will allow FEMA to grant assistance to public schools in major disasters without having to make a special exception for each case. This transfer of responsibility to FEMA from ED will eliminate the overlap of the two programs and the confusion resulting from that overlap.

EFFECTIVE DATE: This final rule is effective on November 24, 1993.

FOR FURTHER INFORMATION CONTACT: Charles B. Stuart, Disaster Assistance Programs, room 714, 500 C Street SW., Washington, DC 20472, (202) 646-3691.

SUPPLEMENTARY INFORMATION: An evaluation of the response to Hurricane Hugo and the Loma Prieta earthquake by FEMA identified difficulties, due to overlapping authorities between FEMA and the Department of Education (ED), for disaster assistance to local school districts. When public school facilities are damaged by a major disaster, ED is authorized to grant assistance for the repair of the academic facilities. Other facilities at the same school are eligible only for FEMA assistance. This overlap of responsibilities caused confusion among local officials as to how much assistance could be expected and from which agency.

Under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (Stafford Act), which authorizes the President to grant disaster assistance, FEMA may grant assistance to local governmental agencies, including school districts, for repair of all facilities owned by an agency. To avoid the possible ambiguity of situations like that mentioned above, the two agencies determined that to the extent possible all disaster assistance for public elementary and secondary schools would be consolidated under one agency.

Although FEMA has broad authority under the Stafford Act to grant assistance for the repair and restoration of facilities damaged or destroyed by a major disaster, FEMA regulations provide that it will generally defer to another Federal agency's authority as follows:

§ 206.226(a) Assistance under other Federal agency (OFA) programs. Generally, disaster assistance will not be made available under the Stafford Act when another Federal agency has specific authority to restore facilities damaged or destroyed by an event which is declared a major disaster.

The wording of this subsection allows FEMA to make exceptions to this practice. On the basis of an understanding reached between FEMA

and ED, FEMA has been providing assistance for repair of public elementary and secondary school facilities by making an exception to the deferral to the authority of another Federal Agency in each case since October 1, 1991.

On July 7, 1992, FEMA published in the *Federal Register* at 57 FR 29854 a proposed rule, and invited comments for 60 days ending September 8, 1992. No comments were received and therefore this final rule is unchanged from the proposed rule.

One specific type of assistance would remain the responsibility of ED. The payment of increased current operating expenses and replacement of lost revenues is authorized by 20 U.S.C. 241-1(a), and is implemented by 34 CFR 219.14. The Stafford Act contains no authority to replace lost revenues directly, and thus that form of assistance is not available from FEMA. This type of assistance, however, has seldom been granted by ED in the past.

No change in the amount of assistance granted will occur because all of the assistance formerly granted by ED is eligible under FEMA's program, with the exception noted above. Each applicant will receive the same total amount of assistance from one agency instead of two. The change also will cause no problems to FEMA personnel or local officials in the field. School district officials have been instructed to submit their applications for all assistance to the State emergency management agency, an office they already work with for FEMA assistance.

National Environmental Policy Act

This rule is categorically excluded from the requirements of 44 CFR Part 10, Environmental Consideration. No environmental impact assessment has been prepared.

Regulatory Flexibility Act

I certify that this rule will not have a significant economic impact on a substantial number of small entities in accordance with the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, because the rule consolidates assistance from two Federal programs, allowing local school district officials to apply for all Federal disaster assistance for which they are eligible through one Federal agency rather than two. The rule is not expected (1) to adversely affect the availability of disaster assistance funding to small entities, (2) to have significant secondary or incidental effects on a substantial number of small entities, nor (3) to create any additional burden on small entities.

Paperwork Reduction Act

This rule does not involve any collection of information for the purposes of the Paperwork Reduction Act.

Executive Order 12612, Federalism

This rule involves no policies that have federalism implications under Executive Order 12612, Federalism, dated October 26, 1987.

Executive Order 12778, Civil Justice Reform

This rule meets the applicable standards of section 2(b)(2) of Executive Order 12778.

List of Subjects in 44 CFR Part 206

Administrative practice and procedure, Community facilities, Disaster assistance, Reporting and recordkeeping requirements.

Accordingly, 44 CFR part 206 is amended as follows:

PART 206—[AMENDED]

1. The authority citation for part 206 continues to read as follows:

Authority: The Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.*; Reorganization Plan No. 3 of 1978, 5 U.S.C. App. 1; E.O. 12148, 3 CFR, 1979 Comp., p. 412; and E.O. 12673, 3 CFR, 1989 Comp., p. 214.

§ 206.226 [Amended]

2. Section 206.226 is amended by revising paragraph (a) to read as follows:

§ 206.226 Restoration of damaged facilities.

* * * * *

(a) *Assistance under other Federal agency (OFA) programs.* (1) Generally, disaster assistance will not be made available under the Stafford Act when another Federal agency has specific authority to restore facilities damaged or destroyed by an event which is declared a major disaster.

(2) An exception to the policy described in paragraph (a)(1) of this section exists for public elementary and secondary school facilities which are otherwise eligible for assistance from the Department of Education (ED) under 20 U.S.C. 241-1 and 20 U.S.C. 646. Such facilities are also eligible for assistance from FEMA under the Stafford Act, and grantees shall accept applications from local educational agencies for assistance under the Stafford Act.

(3) The exception does not cover payment of increased current operating expenses or replacement of lost revenues as provided in 20 U.S.C. 241-1(a) and implemented by 34 CFR

219.14. Such assistance shall continue to be granted and administered by the Department of Education.

Dated: October 15, 1993.
 James L. Witt,
 Director.

 BILLING CODE 6710-02-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 0

[DA93-1179]

List of Office of Management and Budget Approved Information Collection Requirements

AGENCY: Federal Communications Commission.
 ACTION: Final rule.

SUMMARY: This action amends the Commission's list of Office of Management and Budget approved information collection requirements contained in the Commission's Rules.

This action will provide the public with a current list of information collection requirements in the Commission's Rules which have OMB approval and a current list of OMB-approved information collection requirements which do not have an FCC form number or rule section associated with it.

EFFECTIVE DATE: October 25, 1993.

FOR FURTHER INFORMATION CONTACT: Judy Boley, Office of Managing Director, (202) 632-7513.

SUPPLEMENTARY INFORMATION:

Order

In the Matter of Editorial amendment of list of Office of Management and Budget approved information collection requirements contained in part 0 of the Commission's Rules.

By the Managing Director:

Adopted: October 14, 1993
 Released: October 15, 1993

1. Section 3507(f) of the Paperwork Reduction Act of 1980, as amended, 44 U.S.C. 3507(f), requires agencies to display a current control number assigned by the Director of the Office of Management and Budget ("OMB") for each agency information collection requirement.

2. Section 0.408 of the Commission's Rules displays the OMB control numbers assigned to the Commission's non-form information collection requirements. OMB control numbers assigned to Commission forms are not

listed in this section since those numbers appear on the forms.

3. This Order amends § 0.408 to remove listings of information collections which the Commission has eliminated and to add listings of new information collections which OMB has approved.

4. Authority for this action is contained in section 4(i) of the Communications Act of 1934 (47 U.S.C. 154(i)), as amended, and § 0.231(d) of the Commission's Rules. Since this amendment is a matter of agency organization procedure or practice, the notice and comment and effective date provisions of the Administrative Procedure Act do not apply. See 5 U.S.C. 553(b)(A)(d).

5. Accordingly, it is ordered, That § 0.408 of the Rules is amended as set forth in the Amendatory text, effective on the date of publication in the Federal Register.

List of Subjects in 47 CFR Part 0

Reporting and recordkeeping requirements.

Federal Communications Commission.

Andrew S. Fishel,
 Managing Director.

Amendatory Text

Part 0 of chapter I of title 47 of the Code of Federal Regulations is amended as follows:

PART 0—COMMISSION ORGANIZATION

1. The authority citation for part 0 continues to read:

Authority: Secs. 4, 303, 48 Stat. 1068, 1082, as amended; 47 U.S.C. 154, 303, unless otherwise noted.

2. Section 0.408, paragraph (b) is amended by removing the following rule sections and their corresponding control numbers.

§ 0.408 OMB control numbers assigned pursuant to the Paperwork Reduction Act.

Proposed Rules

Federal Register

Vol. 58, No. 204

Monday, October 25, 1993

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Part 98

[Docket No. 93-032-1]

Importation of Certain Animal Semen

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: We are proposing to prohibit the importation of animal semen from any country other than the country in which it was collected. We believe this action will help prevent the introduction of exotic animal diseases into the United States.

DATES: Consideration will be given only to comments received on or before December 27, 1993.

ADDRESSES: Please send an original and three copies of your comments to Chief, Regulatory Analysis and Development, PPD, APHIS, USDA, room 804, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Please state that your comments refer to Docket No. 93-032-1. Comments received may be inspected at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect comments are encouraged to call ahead on (202) 690-2817 to facilitate entry into the comment reading room.

FOR FURTHER INFORMATION CONTACT: Dr. Roger Perkins, Staff Veterinarian, Import-Export Products Staff, VS, APHIS, USDA, room 765B, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-4325.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR part 98 (referred to below as the regulations) govern the importation of animal germ plasm so as to prevent the introduction

of contagious diseases of livestock or poultry into the United States. Subparts A and B of part 98 apply to certain animal embryos and subpart C applies to certain animal semen.

Subparts A and B require that embryos be imported only from the country in which they were conceived and collected. This requirement enhances our ability to ensure that embryos destined for the United States are produced by animals free of disease and are collected and shipped under conditions adequate to prevent their contamination by disease organisms. Because subpart C currently has no comparable requirement for animal semen imports, we are proposing to require that animal semen be imported into the United States only from the country in which it was collected. This would allow us to achieve the control over semen collection and transport necessary to ensure that imports would not present a significant risk of introducing livestock or poultry diseases into this country.

Primarily, this proposed rule would help us to avoid risks stemming from the currently permissible importation of animal semen from a country other than the country of collection, when neither country is affected with rinderpest or foot-and-mouth disease. In a recent importation of this type, we found we needed additional information about the origin of the semen and its collection before we could allow it to be imported. As a result, the animal health officials of the exporting country had to contact the national veterinary service of the country of collection to require further testing and obtain further data. We believe this sort of convoluted process exposes the United States to the risk of animal disease being introduced inadvertently through the import of contaminated semen.

Because we are particularly concerned about preventing the introduction of rinderpest and foot-and-mouth disease, the importation of animal semen from countries affected with either, or both, of these diseases is prohibited, unless the strict procedures specified in § 98.34 of the regulations are followed. Nevertheless, we frequently receive requests to import from countries free of rinderpest and foot-and-mouth disease animal semen that was previously collected in countries affected by these diseases. We

must deny these requests since, under § 98.34 of the regulations, animal semen originating in affected countries may be imported into the United States only if it is collected under the supervision of a United States Department of Agriculture veterinarian and only if the semen is transferred directly from the collection site to the port of New York. Furthermore, we believe that some countries free of these diseases do not enforce animal semen import regulations adequate to prevent the importation of contaminated animal semen from affected countries. This rule would not affect the regulations governing the importation of animal semen collected in countries affected by rinderpest and foot-and-mouth disease. It would, however, clarify that the prohibition on such imports into the United States applies to all animal semen imported from an affected country into a country free of rinderpest and foot-and-mouth disease.

The regulations require that importers wishing to import animal semen into the United States apply for a permit from the Animal and Plant Health Inspection Service (APHIS). Previously, the permit application required importers to present information attesting to the health and origin of the donor animal, but not concerning the location of semen collection. In a document published in the *Federal Register* on July 13, 1993, and effective on August 12, 1993, (58 FR 37642-37644, Docket No. 92-128-2), we amended the regulations by requiring that all imported animal semen be accompanied by a health certificate. The health certificate does not require any additional tests or examinations, but does provide the location, date, and other details regarding the collection of animal semen for import into the United States. This certificate will help us to enforce the rule proposed in this document and further ensure the safety of imported animal semen.

We are also proposing to revise the language in one section of the regulations regarding animal semen import permits. The first sentence under § 98.34(a)(3) states that APHIS may deny permit applications for the import of animal semen into the United States because of "[c]ommunicable disease conditions in the area or country of origin, or in a country where the shipment has been or will be held or

through which the shipment has been or will be transported." Because our proposal would prohibit the import of animal semen from any country other than the country in which it was collected, neither could it allow imported animal semen to be held in any country, other than the country of its collection, while in transit to the United States. Therefore, we propose to remove from § 98.34(a)(3) references to countries where animal semen import shipments have been or will be held.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this proposed rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this proposed rule would have an effect on the economy of less than \$100 million; would not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and would not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

We anticipate that the provisions of this proposed rule, if adopted, would have little or no economic effect. The proposed prohibition against importing animal semen from a country other than the country in which it was collected would not affect significantly the cost of doing business for importers. This proposal would only require them to import animal semen directly from the country in which it was collected; no countries currently allowed to export animal semen under the various regulations would be excluded as a source of animal semen as a result of this proposal.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Executive Order 12778

This proposed rule has been reviewed under Executive Order 12778, Civil Justice Reform. If this proposed rule is adopted: (1) All State and local laws and regulations that are inconsistent with this rule will be preempted; (2) no retroactive effect will be given to this rule; and (3) administrative proceedings

will not be required before parties may file suit in court challenging this rule.

Paperwork Reduction Act

This document contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

List of Subjects in 9 CFR Part 98

Animal diseases, Imports.
Accordingly, 9 CFR part 98, subpart C, would be amended as follows:

PART 98—IMPORTATION OF CERTAIN ANIMAL EMBRYOS AND ANIMAL SEMEN

1. The authority citation for part 98 would be revised to read as follows:

Authority: 7 U.S.C. 1622; 21 U.S.C. 103, 104, 105, 111, 134a, 134b, 134c, 134d, 134f, 136, and 136a; 31 U.S.C. 9701; 7 CFR 2.17, 2.51, and 371.2(d).

2. The undesignated paragraph in § 98.31 would be designated as paragraph (a) and a new paragraph (b) would be added to read as follows:

§ 98.31 General prohibitions; exceptions.

(a) * * *

(b) Animal semen may not be imported into the United States from any country other than the country in which it was collected.

§ 98.34 [Amended]

3. In § 98.34, paragraph (a)(3), the first sentence would be amended by removing the phrase "where the shipment has been or will be held or".

Done in Washington, DC, this 18 day of October 1993.

Patricia Jensen,

Deputy Assistant Secretary, Marketing and Inspection Services.

BILLING CODE 3410-34-P

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 360

RIN 3064-AB24

Receivership Rules

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Proposed rule.

SUMMARY: The Board of Directors (Board) of the Federal Deposit Insurance Corporation (FDIC) is issuing a proposed regulation required by section 141 of the FDIC Improvement Act of 1991 (FDICIA) on the least-cost

resolution of failed and failing depository institutions insured by the FDIC. The intended effect of the proposed rule is to comply with the statutory requirement of prescribing regulations on the prohibition against increasing losses to the insurance funds by protecting uninsured depositors and non-depositor creditors of insured depository institutions.

DATES: Written comments must be received by the FDIC on or before November 24, 1993.

ADDRESSES: Written comments shall be addressed to the Office of the Executive Secretary, Federal Deposit Insurance Corporation, 550-17th Street, NW., Washington, DC, 20429. Comments may be hand-delivered to room F-400, 1776 F Street, NW., Washington, DC 20429, on business days between 8:30 a.m. and 5 p.m. (FAX number: (202) 898-3838). Comments will be available for inspection in room 7118, 550-17th Street, NW., Washington, DC between 9 a.m. and 4:30 p.m. on business days.

FOR FURTHER INFORMATION CONTACT: Gail Patelunas, Assistant Director, Division of Resolutions (202/898-6779), Sean Forbush, Resolution Specialist, Division of Resolutions (202/898-8506), David Gearin, Senior Counsel, Legal Division (202/898-3621), Ruth R. Amberg, Senior Counsel, Legal Division (202/898-3736) or Joseph A. DiNuzzo, Senior Attorney, Legal Division (202/898-7349), Federal Deposit Insurance Corporation, Washington, DC, 20429.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

No collections of information pursuant to section 3504(h) of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) are contained in this notice. Consequently, no information has been submitted to the Office of Management and Budget for review.

Regulatory Flexibility Act

The Board hereby certifies that the proposed rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). It will not impose burdens on depository institutions of any size and will not have the type of economic impact addressed by the Act. Accordingly, the Act's requirements regarding an initial and final regulatory flexibility analysis (*Id.* at 603 & 604) are not applicable here.

Background

Section 141 of FDICIA (Pub. L. 102-242, 105 Stat. 2236 (1991)) amended

section 13(c) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)) to, among other things, require that the assistance provided by the FDIC under section 13(c) of the FDI Act be "necessary" to meet the FDIC's obligation to provide insurance coverage for insured deposits in a failed or failing institution and that the resolution be the "least costly" to the deposit insurance fund of "all possible methods" of meeting that obligation. This least-cost resolution requirement, set forth in section 13(c)(4)(A) of the FDI Act, became effective immediately upon the enactment of FDICIA on December 19, 1991.

Section 141 also amended section 13(c) of the FDI Act to prohibit the FDIC from taking any direct or indirect action after December 31, 1994 (or such earlier time as the FDIC determines to be appropriate), with regard to any insured depository institution, that would have the effect of increasing losses to either the Bank Insurance Fund or the Savings Association Insurance Fund by protecting depositors for more than the insured portion of their deposits or creditors other than depositors. 12 U.S.C. 1823(c)(4)(E) (Section 13(c)(4)(E)).

Section 13(c)(4)(E) requires that the FDIC prescribe regulations to implement the requirement no later than January 1, 1994, and that the regulations become effective no later than January 1, 1995.

The FDICIA amendments to the FDI Act created a "systemic risk" exception to sections 13(c)(4)(A) and (E) of the FDI Act which may be invoked only if the Secretary of the Treasury, acting in consultation with the President and on the recommendation of two-thirds of the members of the Board and the Board of Governors of the Federal Reserve System, determines that the transaction is necessary to avoid "serious adverse effects on economic conditions or financial stability". Costs of such a transaction are to be recovered through special assessments on insured institutions on a broad deposit base which includes foreign deposits. 12 U.S.C. 1823(c)(4)(G). This provision has not been invoked to date.

FDICIA's least-cost resolution requirements arose from a Congressional effort to stem insurance fund losses and to instill depositor discipline in the banking industry. Prior to the passage of FDICIA, the FDIC could pursue any resolution alternative as long as it was less costly than liquidating the institution. Thus, when faced with several proposals that satisfied the cost test, the FDIC could have selected, for policy reasons (such as minimizing community disruption), a more

expensive proposal than the least cost resolution. In many cases effected prior to the enactment of FDICIA, the resolutions involved an acquiring institution's assumption of both insured and uninsured deposits and resulted in no losses for uninsured depositors. Of the 124 banks closed in 1991, approximately 16 percent of the failures involved a loss for uninsured depositors.

Since the enactment of FDICIA, the FDIC has adhered to the least-cost requirements of FDICIA. In resolving institutions, the FDIC typically solicits bids for both total deposits and insured deposits only, evaluating all bids received and selecting the least costly. Therefore, in cases where the uninsured deposits are passed to the assuming institution, it is because that resolution transaction represented the least costly of all possible resolution alternatives.

During 1992, the FDIC resolved 120 bank failures and provided open bank assistance to two institutions in danger of failing.

Uninsured depositors were made whole in 50 percent of the 1992 failures. For the first eight months of 1993, 30 of the 34 bank failures have been resolved in transactions covering only insured deposits.¹

The Proposed Rule

The proposed rule adds a new section to Part 360 of the FDIC's regulations stating the prohibition in section 13(c)(4)(E) of the FDI Act on taking any action under section 13(c) of the FDI Act that would have the effect of increasing losses to any insurance fund by protecting uninsured depositors or non-depositor creditors of a failed or failing depository institution. In addition, the proposed rule references the systemic risk exception to the prohibition.

The proposed rule also includes the provision of section 13(c)(4)(E) of the FDI Act which makes clear that the prohibition shall not be construed as prohibiting the FDIC from engaging in purchase and assumption transactions under which uninsured deposits may be acquired so long as the loss to the insurance fund on those uninsured

deposits is less than if the institution had been liquidated and the insured deposits were paid. Since section 13(c)(4)(A) and its least-cost rule of comparison will continue in effect after the implementation of section 13(c)(4)(E), the question may arise how these two provisions will interrelate. The FDIC believes that by complying with the more general least cost requirements of section 13(c)(4)(A) of the FDI Act, it also has complied fully with the prohibition of Section 13(c)(4)(E). Under the latter provision, the FDIC is prohibited from protecting uninsured deposits and creditors other than depositors only if doing so "would have the effect of increasing losses to any insurance fund." In the FDIC's view, the more general least cost requirements of section 13(c)(4)(A) already prohibit the FDIC from protecting creditors other than insured depositors if it would have the effect of increasing, rather than decreasing, losses to the applicable deposits insurance fund. Consequently, it is the FDIC's view that Section 13(c)(4)(E) is subsumed in the more general least cost provisions of Section 13(c)(4)(A) and has no independent operative effect.

Because the FDIC currently complies with the least cost requirements of section 13(c) (as imposed by section 141 of FDICIA), the Board proposes to make the final rule effective thirty days after the final rule is issued.² As noted above, section 13(c)(4)(E) requires that the final rule be issued no later than January 1, 1994. The proposed effective date would satisfy the requirement in section 13(c)(4)(E) that the FDIC regulations on that provision take effect no later than January 1, 1995.

Request for Public Comment

The FDIC is hereby requesting comment during a 30-day comment period on all aspects of the proposed rule.

List of Subjects in 12 CFR Part 360

Savings and loan associations.

The Board of Directors of the Federal Deposit Insurance Corporation hereby proposes to amend part 360 of chapter III of title 12 of the Code of Federal Regulations as set forth above.

PART 360—RESOLUTION AND RECEIVERSHIP RULES

1. The title of Part 360 is revised to read as follows:
2. The authority citation for Part 360 is revised to read as follows:

² A thirty-day delayed effective date complies with the general rulemaking requirements of the Administrative Procedure Act. 5 U.S.C. 553(d).

¹ Recently a national depositor preference statute was enacted amending the FDI Act to provide for a depositor preference for amounts realized from the liquidation or other resolution of FDIC-insured institutions. Public Law 103-66, 107 Stat. 312 (August 10, 1993). This new law will not directly affect the proposed rule (which applies to corporate actions affecting only the deposit insurance funds); however, the national depositor preference statute will elevate all depositors' claims over those of other unsecured creditors. Thus, uninsured depositors receiving receivership certificates may recover a greater percentage of their claims than they would have prior to the enactment of the national depositor preference statute.

Authority: Sec. 401(h), Pub. L. 101-73, 103 Stat. 357; 12 U.S.C. 1821(d)(11), 1823(c)(4).

§§ 360.1-360.3 [Redesignated as §§ 360.2-360.4]

3. Sections 360.1, 360.2 and 360.3 are redesignated as §§ 360.2, 360.3 and 360.4, respectively, and a new § 360.1 is added to read as follows:

§ 360.1 Least-cost resolution.

(a) *General rule.* Except as provided in section 13(c)(4)(G) of the FDI Act (12 U.S.C. 1823(c)(4)(G)), the FDIC shall not take any action, directly or indirectly, with respect to any insured depository institution that would have the effect of increasing losses to any insurance fund by protecting:

(1) Depositors for more than the insured portion of their deposits (determined without regard to whether such institution is liquidated); or

(2) Creditors other than depositors.

(b) *Purchase and assumption transactions.* Subject to the requirement of section 13(c)(4)(A) of the FDI Act (12 U.S.C. (c)(4)(A)), paragraph (a) of this section shall not be construed as prohibiting the FDIC from allowing any person who acquires any assets or assumes any liabilities of any insured depository institution, for which the FDIC has been appointed conservator or receiver, to acquire uninsured deposit liabilities of such institution as long as the applicable insurance fund does not incur any loss with respect to such uninsured deposit liabilities in an amount greater than the loss which would have been incurred with respect to such liabilities if the institution had been liquidated.

By order of the Board of Directors.

Dated at Washington, DC., this 19th day of October, 1993.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,
Executive Secretary.

BILLING CODE 6714-01-P

**FEDERAL FINANCIAL INSTITUTIONS
EXAMINATION COUNCIL**

12 CFR Part 1102

[Docket No. AS93-2]

**Appraisal Subcommittee; Appraiser
Regulation; Freedom of Information
Act Implementation**

AGENCY: Appraisal Subcommittee,
Federal Financial Institutions
Examination Council.

ACTION: Proposed rules.

SUMMARY: The Appraisal Subcommittee ("ASC") of the Federal Financial Institutions Examination Council is proposing amendments to the portions of its regulations regarding the Freedom of Information Act (FOIA), to enable interested persons: To obtain copies of ASC final opinions and orders in adjudications, statements of general policy not published in the Federal Register, interpretive, no-action requests and responses and certain other correspondence related to ASC field reviews; to request confidential treatment of information subject to a FOIA request; and to petition for the issuance, amendment or repeal of an ASC rule.

DATES: Comments must be received on or before December 9, 1993.

ADDRESSES: Persons wishing to submit written comments should file them with Edwin W. Baker, Executive Director, or Marc L. Weinberg, General Counsel, at (202) 634-6520, Appraisal Subcommittee, 2100 Pennsylvania Avenue, NW., suite 200, Washington, DC 20037. All comment letters should refer to Docket No. AS93-2. All comments received will be available for public inspection and copying at the above location.

FOR FURTHER INFORMATION CONTACT: Edwin W. Baker, Executive Director, or Marc L. Weinberg, General Counsel, at (202) 634-6520, Appraisal Subcommittee, 2100 Pennsylvania Avenue, NW., suite 200, Washington, DC 20037.

SUPPLEMENTARY INFORMATION:

I. Background and Authority

FOIA, 5 U.S.C. 552, generally requires each Federal agency to make available to the public information regarding its organization, operation, rules of procedure, substantive rules and interpretations of general applicability and statements of general policy. 5 U.S.C. 552(a)(1). In addition, each agency, in accordance with published rules, must "make available for public inspection and copying—(A) final opinions, * * * as well as orders, made in the adjudication of cases; (B) those statements of policy and interpretations which have been adopted by the agency and are not published in the Federal Register; and (C) administrative staff manuals and instructions to staff that affect a member of the public * * *." 5 U.S.C. 552(a)(2). Certain documents and portions thereof, however, can be withheld from disclosure under one or more statutory exemptions set out in

FOIA, 5 U.S.C. 552(b), or the Privacy Act of 1974, 5 U.S.C. 553a.¹

Executive Order No. ("EO") 12600, 52 FR 23781 (June 23, 1987), generally requires each agency subject to FOIA to establish procedures to notify submitters of records containing confidential commercial information when those records are requested under FOIA and the agency determines that the information may be required to disclose that information.

Paragraph (e) of 5 U.S.C. 553 requires each agency to give an interested person the right to petition for the issuance, amendment or repeal of a rule.

II. Description of the Proposed Amendments

The ASC is proposing technical amendments to subpart D—new §§ 1102.305, .306 and .307—to implement the provisions summarized above. In that regard, proposed § 1102.305 would clarify that certain written communications, such as the ASC's annual report to Congress; all final opinions and orders made in the adjudication of cases; all statements of general policy not published in the Federal Register; and incoming and outgoing correspondence concerning interpretive, no-action and State review matters, shall be made publicly available on a routine basis no sooner than 20 business days after the ASC or its staff sends or gives the item of correspondence to be affected person or persons.

Next, the ASC is proposing § 1102.306, consistent with EO 12600, to provide predisclosure notification procedures for confidential commercial information. Under paragraph (a) of the new section, a submitter of written information to the ASC who wants some or all of that information to be treated as confidential information under 5 U.S.C. 552(b)(4) may file a request for confidential treatment with the ASC at the time the information is submitted to the ASC or soon thereafter. Confidential information means "trade secrets and commercial or financial information obtained from a person and privileged or confidential," as stated § 552(b)(4).

New paragraphs (b) and (c) of § 1102.306 would deal with the form of the request. They would require the submitter to include in reasonable detail the facts and arguments supporting the request and its legal justification, to

¹ On December 14, 1992, the ASC adopted 12 CFR part 1102, subpart D, implementing the ASC's basic program for complying with FOIA. See 57 FR 60722 (December 22, 1992). And, on August 7, 1992, the ASC adopted 12 CFR part 1102, subpart C, implementing the Privacy Act. See 57 FR 36356 (August 13, 1992).

designate clearly all information considered confidential and to separate clearly such information from other non-confidential information.

Paragraph (d) of the proposed section notes that a request for confidential treatment will be considered by the ASC only in connection with a FOIA request for access to the claimed confidential information under FOIA. That is, the ASC would not determine whether the request for confidential treatment should be granted or denied, in whole or in part, when the request is received by the ASC. The ASC, however, would process the request upon receipt to ensure that it is complete and would place it with the related information submission. If a FOIA request were made respecting that information, the ASC then would be required to send written notices to the submitter and the FOIA requester. The submitter would have no longer than ten business days to file written objections to the ASC's disclosure of the information. (The ASC could provide a submitter with a notice even if the submitter did not request confidential treatment of the requested information. The ASC, however, would have to have substantial reason to believe that disclosure of the requested information would result in substantial competitive harm to the submitter.) These notice requirements would not have to be followed under certain stated circumstances, such as if the ASC determines under this subpart that the information should not be disclosed. The ASC must carefully consider the issues involved, and if disclosure of the requested information is warranted, a written notice, containing a brief description of why the submitter's objections were not sustained, must be forwarded to the submitter within ten business days. The time for response may be extended up to ten additional business days, as provided in 5 U.S.C. 552(a)(6)(B), or for other periods by agreement between the submitter and the ASC. This notice shall be provided to the submitter at least five business days prior to release of the requested information. Last, the ASC would be required to notify a submitter promptly of any filing of any suit against the ASC pursuant to 5 U.S.C. 552 to compel disclosure of documents or information covered by the submitter's request for confidential treatment, and conversely, would be required to notify the requester of the documents or information of any suit filed by the submitter against the ASC to enjoin disclosure.

Finally, proposed § 307 would provide an interested person with the right to petition the ASC for the

issuance, amendment or repeal of a rule, thus implementing 5 U.S.C. 553(e).

III. Conclusion

The ASC is proposing the amendments to subpart D of part 1102 to implement 5 U.S.C. 552 and 553(e) and EO 12600 and welcomes public comment on the proposals.

IV. Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980, 44 U.S.C. 35, forms, reporting and recordkeeping requirements included in proposed 12 CFR part 1102, subpart D, §§ 1102.305, 1102.306 and 1102.307 were submitted for review and approval to the Office of Management of Budget. No person may be subjected to a penalty for failure to comply with these information collection requirements until they have been approved and assigned an OMB control number. The OMB control number, when assigned, will be announced in the *Federal Register*. The public reporting burden for the collection of information requirements contained in this proposed rule is estimated to include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed and completing and reviewing the collection of information. The proposals would enhance the ASC's FOIA program, would conform the ASC's rules and regulations to EO 12600, and would specifically provide for the public's petition rights under 5 U.S.C. 553(e). The estimated number of respondents each year is 100 for proposed § 1102.305, two for proposed § 1102.306 and one for proposed § 1102.307, with an estimated average reporting burden of .5 hours per response and an estimated annual total reporting burden of 51.5 hours. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the ASC at the address provided above, and to Gary Waxman, Clearance Officer, Office of Management and Budget New Executive Office Building, room 3228, Washington, DC 20503.

V. Regulatory Flexibility Act Statement

Pursuant to section 605(b) of the Regulatory Flexibility Act, the ASC certifies that proposed §§ 1102.305, 1102.306 and 1102.307 are not expected to have a significant economic impact on a substantial number of small entities. The proposals would fully implement FOIA, EO 12600 and 5 U.S.C. 553(e). None of these authorities addresses business or corporate entities.

Accordingly, a regulatory flexibility analysis is not required.

VI. EO 12291 Statement

The ASC has determined that the proposed amendments to subpart D would not constitute a "major rule" within the meaning of EO 12291. Accordingly, a Regulatory Impact Analysis is not required on the grounds that the amendments: (1) Would not have an annual effect on the economy of \$100 million or more; (2) would not result in a major increase in the cost of financial institution operations or governmental supervision; and (3) would not have a significant adverse effect on competition (foreign or domestic), employment, investment, productivity or innovation, within the meaning of the Executive Order.

Administrative practice and procedure, Appraisers, Banks, banking, Freedom of information, Mortgages, Reporting and recordkeeping requirements

Text of the Proposed Rule

Chapter XI, title 12, part 1102, subpart D of the Code of Federal Regulations is amended as set forth below:

PART 1102—APPRAISER REGULATION

Subpart D—Description of Office, Procedures, Public Information

1. The authority citation for subpart D is revised to read as follows:

Authority: 5 U.S.C. 552, 553(e); Executive Order 12600, 52 FR 27381 (3 CFR, 1987 Comp; p. 235).

2. New sections 1102.305, 1102.306 and 1102.307 are added to read as follows:

§ 1102.305 Availability of interpretive, no-action and other written communications.

(a) *In general.* Subject to the provisions of § 1102.304 and subpart C. of this part certain types of ASC written communications shall be made publicly available upon request.

(b) *Types of written communications.* The following types of written communications shall be subject to paragraph (a) of this section.

(1) The ASC's annual report to Congress;

(2) All final opinions and orders made in the adjudication of cases;

(3) All statements of general policy not published in the *Federal Register*;

(4) Requests for the ASC or its staff to provide interpretive advice with respect to the meaning or application of any

statute administered by the ASC or any rule or regulation adopted thereunder and any ASC responses thereto;

(5) Requests for a statement that, on the basis of the facts presented in such a request, the ASC would not take any enforcement action pertaining to the facts as represented and any ASC responses thereto; and

(6) Correspondence between the ASC and a State appraiser regulatory program.

(c) *Embargo period.* Unless the ASC determines otherwise, the written communication in paragraph (b) of this section shall be made publicly available no sooner than 20 business days after a written response has been sent or given to the affected person or persons.

§ 1102.306 Confidential treatment procedures.

(a) *In general.* Any submitter of written information to the ASC who desires that some or all of his or her submission be afforded confidential treatment under 5 U.S.C. 552(b)(4) (i.e., trade secrets and commercial or financial information obtained from a person and privileged or confidential) shall file a request for confidential treatment with the Executive Director of the ASC at the time the written information is submitted to the ASC or within ten business days thereafter. Nothing in this section limits the authority of the ASC and its staff to make determinations regarding access to documents under this subpart.

(b) *Form of request.* A request for confidential treatment shall be submitted in a separate letter or memorandum conspicuously entitled, "Request for Confidential Treatment." Each request shall state in reasonable detail the facts and arguments supporting the request and its legal justification. Conclusory statements that particular information would be useful to competitors or would impair sales or similar statements, generally will not be considered sufficient to justify confidential treatment.

(c) *Designation and separation of confidential material.* Submitters shall clearly designate all information considered confidential and shall clearly separate such information from other non-confidential information.

(d) *ASC action on request.* A request for confidential treatment of information will be considered only in connection with a request to the information under FOIA as implemented by this subpart. Upon the receipt of a request for access, the Executive Director or his or her designee ("ASC Officer") as soon as possible shall provide the submitter with a written notice describing the

request and shall provide the submitter with a reasonable opportunity, no longer than ten business days to submit written objections to disclosure of the information. Notice may be given orally, and such notice shall be promptly confirmed in writing. The ASC Officer may provide a submitter with a notice if the submitter did not request confidential treatment of the requested information when the ASC Officer has substantial reason to believe that disclosure of the requested information would result in substantial competitive harm to the submitter. The ASC officer similarly shall notify the person seeking disclosure of the information under FOIA of the existence of a request for confidential treatment. These notice requirements need not be followed if the ASC Officer determines under this subpart that the information should not be disclosed; the information has been published or has been officially made available to the public; disclosure of the information is required by law (other than FOIA); or the submitter's request for confidential treatment appears obviously frivolous, in such instance the submitter shall be given written notice of the determination to disclose the information at least five days prior to release. The ASC Officer shall carefully consider the issues involved, and if disclosure of the requested information is warranted, a written notice, containing a brief description of why the submitter's objections were not sustained, must be forwarded to the submitter within ten business days. The time for response may be extended up to ten additional days, as provided in 5 U.S.C. 552(a)(6)(B), or for other periods by agreement between the submitter and the ASC Officer. This notice shall be provided to the submitter at least five days prior to release of the requested information.

(e) *Notice of lawsuit.* The ASC Officer shall notify a submitter of any filing of any suit against the ASC pursuant to 5 U.S.C. 552 to compel disclosure of documents or information covered by the submitter's request for confidential treatment within ten business days of service of the suit. The ASC Officer also shall notify the requester of the documents or information of any suit filed by the submitter against the ASC to enjoin their disclosure within ten business days of service of the suit.

§ 1102.307 Right to petition for issuance, amendment and repeal of rules of general application.

Any person desiring the issuance, amendment or repeal of a rule of general application may file a petition for those purposes with the Executive Director of

the ASC. The petition shall include a statement setting forth the text or substance of any proposed rule or amendment desired or shall specify the rule for which repeal is desired. The petitioner also shall state the nature of his or her interest and the reasons for seeking ASC action. The Executive Director shall acknowledge receipt of the petition within ten business days of receipt. The ASC shall consider the petition and related staff recommendations and shall take such action as it deems appropriate. The Executive Director shall notify the petitioner in writing of the ASC action within ten business days of the action.

By the Appraisal Subcommittee of the Federal Financial Institutions Examination Council.

Dated: October 13, 1993.

Fred D. Finkle,

Chairperson.

BILLING CODE 4710-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

(Docket No. 93-NM-149-AD)

Airworthiness Directives; de Havilland, Inc., Model DHC-8-100 and DHC-8-300 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain de Havilland, Inc., Model DHC-8-100 and DHC-8-300 series airplanes. This proposal would require inspections to detect breakage in the engine rear mount strut assemblies, and replacement of broken struts. This proposal would also require eventual replacement of all currently installed struts with new and/or reworked struts, as terminating action for the inspections. This proposal is prompted by several reports of failure of the engine rear mount struts, due to fracture at one of the rosette welds on the shank of the strut where full weld depth was not achieved during manufacture. The actions specified by the proposed AD are intended to prevent fracture of the engine rear mount struts, which could reduce the structural integrity of the nacelle and engine support structure. **DATES:** Comments must be received by December 20, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 93-NM-149-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from De Havilland, Inc., Garratt Boulevard, Downsview, Ontario M3K 1Y5, Canada. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Jon Hjelm, Aerospace Engineer, Airframe Branch, ANE-172, FAA, Engine and Propeller Directorate, New York Aircraft Certification Office, 181 South Franklin Avenue, room 202, Valley Stream, New York 11581; telephone (516) 791-6220; fax (516) 791-9024.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 93-NM-149-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 93-NM-149-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056.

Discussion

Transport Canada Aviation, which is the airworthiness authority for Canada, recently notified the FAA that an unsafe condition may exist on certain de Havilland Model DHC-8-100 and DHC-8-300 series airplanes. Transport Canada Aviation advises that several reports have been received of failure of the engine rear mount struts in the vicinity of the "rosette" weld. Subsequent investigation revealed that the fracture initiated at one of the rosette welds on the shank of the strut, just above the bearing, where full weld depth was not achieved during manufacture. Defective welds in the engine rear mount strut can fracture, leaving the engine only partially supported. When the strut fails, the design level of redundancy in the engine mounting system is reduced. Subsequent failure of another system component could result in a severe degradation of the integrity of the nacelle/engine support structure. This condition, if not corrected, could result in the fracture and total failure of the engine rear mount struts, and subsequent reduced controllability of the airplane.

De Havilland, Inc., has issued Service Bulletin S.B. 8-71-17, dated April 3, 1992, that describes procedures for repetitive visual inspections to detect breakage in the engine strut assemblies and replacement of broken struts. The service bulletin also describes procedures for eventual replacement of the existing struts with new and/or reworked struts (referred to as "Post-Modification 8/1763"), on which the welding has been improved. Transport Canada Aviation classified this service bulletin as mandatory and issued Canadian Airworthiness Directive CF-92-14, dated May 13, 1992, in order to assure the continued airworthiness of these airplanes in Canada.

This airplane model is manufactured in Canada and is type certificated for operation in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, Transport Canada Aviation has kept the FAA informed of the situation described above. The FAA has examined the

findings of Transport Canada Aviation, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require repetitive detailed visual inspections to detect breakage in the engine strut assemblies, and replacement of broken struts with new and/or reworked struts. This proposal would also require eventual replacement of the currently installed struts with new and/or reworked struts; when accomplished, this replacement would terminate the need for the proposed repetitive inspections. The actions would be required to be accomplished in accordance with the service bulletin described previously.

The FAA estimates that 125 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 16 work hours per airplane to accomplish the proposed actions, and that the average labor rate is \$55 per work hour. Required parts would be provided by the manufacturer at no cost to the operators. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be \$110,000, or \$880 per airplane. This total cost figure assumes that no operator has yet accomplished the proposed requirements of this AD action.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12886; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the

location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

De Havilland, Inc.: Docket 93-NM-149-AD.

Applicability: Model DHC-8-102 and -103 series airplanes, serial numbers 003 through 310 inclusive; and Model DHC-8-301, -311, and -314 series airplanes, serial numbers 100 through 311 inclusive; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent fracture of the engine rear mount struts, and subsequent reduced structural integrity of the nacelle and engine support structure, accomplish the following:

(a) Within 50 hours time-in-service after the effective date of this AD, perform a detailed visual inspection to detect breakage in the engine strut assemblies, part number 8711016-001, -003, -005, or -007, in accordance with De Havilland, Inc., Service Bulletin S.B. 8-71-17, dated April 3, 1992.

(1) If any broken strut is detected, prior to further flight, replace the broken strut with a new strut, part number 87110016-009, or a reworked strut, part number 8DK1763-001; Post-Modification 8/1763; in accordance with the service bulletin.

Note 1: The Post-Modification 8/1763 struts are either new struts, part number 87110016-009, or reworked struts, part number 8DK1763-001.

(2) If no broken strut is detected, repeat the inspection thereafter at intervals not to exceed 50 flight hours.

(b) Within 24 months after the effective date of this AD, replace all of the currently installed engine rear mount struts with new struts, part number 87110016-009, and/or reworked struts, part number 8DK1763-001; Post-Modification 8/1763; in accordance with de Havilland, Inc., Service Bulletin S.B. 8-71-17, dated April 3, 1992. This replacement constitutes terminating action for the repetitive inspection requirements of this AD.

(c) As of the effective date of this AD, no person shall install an engine rear mount

strut, part number 8711016-001, -003, -005, or -007, on any airplane.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, New York Aircraft Certification Office (ACO), FAA, Engine and Propeller Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, New York ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the New York ACO.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on October 19, 1993.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-P

Federal Highway Administration

23 CFR Part 660

[FHWA Docket No. 93-16]

RIN 2125-AD13

Forest Highway Portion of Public Lands Highway Program; Correction

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Correction to notice of proposed rulemaking.

SUMMARY: This document contains a correction to a notice of proposed rulemaking which was published Tuesday, October 5, 1993, (58 FR 51794). The notice proposed to revise the Forest Highway Program regulations to conform to the requirements of the Intermodal Surface Transportation Efficiency Act of 1991.

DATES: Comments must be received on or before December 6, 1993.

FOR FURTHER INFORMATION CONTACT: Mr. Allen W. Burden, Chief, Program Planning, Development, and Administration Division, Federal Lands Highway Office, (202) 366-9488, or Mr. Wilbert Baccus, Office of the Chief Counsel, (202) 366-1396, Federal Highway Administration, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except legal Federal Holidays.

SUPPLEMENTARY INFORMATION:

Background

On October 5, 1993, the Federal Highway Administration published a notice of proposed rulemaking pertaining to revising the Forest Highway Program regulations to conform to the requirements of the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA). The document contained an omission of several lines of text in the proposed regulatory language for section 660.109, Program development.

Correction of Publication

Accordingly, in FR Doc. 93-24367, published October 5, 1993 (58 FR 51794), make the following correction:

1. On page 51797, column 2, paragraph (a) introductory text, under § 660.109, Program development, should read as follows:

(a) The FHWA will arrange and conduct a conference with the FS and the SHA to jointly select the projects which will be included in the programs for the current fiscal year and at least the next four years. Projects included in each year's program will be selected considering the following criteria:

* * * * *

Authority: 23 U.S.C. 315; 49 CFR 1.48.

Issued on: October 19, 1993.

Theodore A. McConnell,

Chief Counsel.

BILLING CODE 4910-22-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Ch. I

[FRL-4793-7]

Establishment and Open Meeting of the Negotiated Rulemaking Advisory Committee for Small Nonroad Engine Regulations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Establishment of FACA committee and meeting announcement.

SUMMARY: As required by section 9(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), EPA is giving notice of the establishment of an Advisory Committee to negotiate a rule to reduce air emissions from small nonroad engines. EPA has determined that this is in the public interest and will assist the Agency in performing its duties prescribed under section 213 of the Clean Air Act (CAA). Copies of the Committee Charter have been filed with

the appropriate committees of Congress and the Library of Congress.

The committee will meet on December 14 and 15, 1993. The purpose of the meeting is to consider information pertaining to the scope and purpose of rule, to generate issues for the committee to discuss and to begin discussion of these issues. The committee meeting is open to the public without need for advance registration.

DATES: The committee will meet on December 14, 1993 from 9 a.m. to 6 p.m., and on December 15, 1993 from 8:30 a.m. to 4:30 p.m.

ADDRESSES: The location of the meeting will be the Holiday Inn North Campus, 3600 Plymouth Rd., Ann Arbor, MI 48105, (313) 769-9800.

FOR FURTHER INFORMATION CONTACT:

Persons needing further information on the substantive matters of the rule should contact Betsy McCabe, National Vehicle and Fuel Emissions Laboratory, 2565 Plymouth Rd., Ann Arbor, Michigan 48105, (313) 668-4344.

Persons needing further information on procedural matters should call Deborah Dalton, Consensus and Dispute Resolution Program, Environmental Protection Agency, 401 M Street, SW., Washington DC 20460, (202) 260-5495, or the Committee's facilitators, Lucy Moore or John Folk-Williams, Western Network, 616 Don Gaspar, Santa Fe, New Mexico, 87501, (505) 982-9805

SUPPLEMENTARY INFORMATION:

I. Background: Need for Rule

Section 213 of the CAA, as amended, requires EPA to conduct a study of emissions from nonroad engines and vehicles, and to determine whether such emissions contribute significantly to air pollution problems. Section 213 further requires EPA to promulgate regulations that will result in reductions in emissions from nonroad sources, if the Agency makes the positive determination of significance.

EPA completed the Nonroad Engine and Vehicle Emission Study in November 1991 (the Nonroad Study is available for public review in EPA Docket #A-91-24). On May 17, 1993, EPA issued a notice of proposed rulemaking determining that nonroad sources are significant contributors to total ozone precursor and carbon monoxide (CO) emissions in areas that have failed to attain the National Ambient Air Quality Standards (NAAQS) for ozone and CO. In this action, EPA also proposed emission control regulations for the first category of nonroad engines to be regulated (compression-ignition engines 50

horsepower and above) (see 58 FR 28809).

During the summer of 1992, a convening effort was conducted to investigate the possibility of developing regulations for small nonroad engines using regulatory negotiation or another consensus-based process. Pursuant to this convening effort, EPA held public meetings November 16-17, 1992 (57 FR 49054), and January 28-29, 1993 (58 FR 4392), to explore further with potential participants the use of consensus-based regulatory approaches.

As an outcome of discussions at the January public meeting, EPA has decided to pursue a two-phased strategy to regulate emissions from small nonroad engines. Phase one regulations, to be effective in the near term, will be similar to those developed by the California Air Resources Board for lawn and garden and utility engines. Representatives from industry, states, and environmental and public health associations expressed interest in working with EPA to develop longer-term phase two regulations through a regulatory negotiation process.

On February 1, 1993 the Sierra Club filed a citizen suit against EPA because EPA missed a November 1992 deadline for promulgating regulations for control of emissions from nonroad sources. EPA has agreed to the following schedule for small nonroad engine regulation development in the settlement of the lawsuit: Phase one proposal April 1994, final May 1995; phase two proposal April 1996, final April 1997. The regulatory negotiations will address phase two regulations for small nonroad engines.

EPA held an organizational meeting June 30 and July 1, 1993, to discuss how the negotiations will proceed, operating protocols, and membership issues. Three organizations addressed the group with requests for membership. The group held an additional meeting September 29 and 30, 1993 to finalize operating protocols, overview state issues, discuss data collection efforts and data needs, and to begin to identify and prioritize negotiation issues. The group identified the need for a Test Procedures Task Group and a Technology Task Group. These two task groups will begin work and will report back to the full committee at the December 14 and 15, 1993 meeting. The full committee meeting planned for October 27 and 28, 1993 has been moved to December 14 and 15, 1993.

II. Public Response to EPA's Notice of Intent To Negotiate

On June 25, 1993, EPA published a notice of intent to form an advisory

committee to negotiate small nonroad engine regulations (see 58 FR 34389). The Agency specifically requested public comment on whether: (1) it should establish a Federal Advisory Committee; (2) it properly identified interests affected by key issues; (3) regulatory negotiation is appropriate for this rulemaking; and (4) the extent to which the issues and procedures are adequate and appropriate. The period for public comment on this notice closed July 30, 1993.

EPA received five petitions for membership on the small nonroad engines negotiated rulemaking committee by the close of the public comment period. The Agency decided to add two organizations to the committee because they represent important interests that differ from those already represented on the committee. The Handheld Ice and Earth Auger Manufacturers Association will represent small business interests, and the National Equipment Servicing and Dealers Association (NESDA) will represent interests of the servicing and dealer network of the lawn and garden outdoor power equipment industry. The Toro Company and Ryobi Outdoor Products, Inc., both of whom addressed the July 1, 1993 organizational meeting, are each members of at least one association already represented on the committee. It is not clear to EPA how the interests of these companies differ from those of the associations that represent them; these companies have not been included individually on the committee. Finally, the National Golf Car Manufacturers Association expressed initial interest in participating on the negotiating committee, but decided to forego the opportunity to petition for formal membership on the FACA committee. After the close of the public comment period, EPA received an additional request for membership from the Renewable Fuels Association. This request, and any future requests for membership on the committee, will be decided by the full committee.

In addition to membership requests, EPA also received comments from five organizations that expressed interest in the proposed regulatory negotiation process: The Academy of Model Aeronautics; the Associated Builders and Contractors, Inc.; the Gas Research Institute; and the National Propane Gas Association; and the Portable Power Equipment Manufacturers Association. No comments were received opposing the negotiation process. The National Propane Gas Association (NPGA) also requested that, if at some point in the future it is decided to include fuel

providers in this activity, NPGA would appreciate consideration for participation. The NPGA request will be considered by the full committee.

III. Scope of the Proposed Negotiation

The rule will control emissions from nonroad spark-ignition engines 25 horsepower and below, excluding engines used in marine propulsion or recreational propulsion applications ("small nonroad engines"). Phase two regulatory negotiations will address the full range of issues relating to small nonroad engines including, but not limited to, useful life, in-use emissions, evaporative and refueling emissions, test procedure issues, and market-based incentive programs.

Phase one regulations will be implemented in the near term and are anticipated to achieve significant public health and environmental benefits. By following the basic structure of California regulations for the same engines, EPA is claiming the early emission reduction benefits available while continuing to develop the data necessary for a more complete control program in the second phase of regulation.

EPA's goals in developing phase two regulations for implementation in the longer term include: (1) Developing a more stringent control program to be effective in the next century; (2) encouraging the development and use of advanced technology for control of emissions from small nonroad engines; and (3) maximizing public health and environmental benefits from control while providing maximum flexibility in achieving these results.

IV. Issues and Questions to be Resolved

The negotiation committee will address key issues during the negotiations including, but not limited to: an emission control program related to small nonroad engines; standards and effective date; test procedures; fuel effects; enforcement; in-use, evaporative, and refueling emissions; market-based incentive programs; and compliance flexibility programs.

V. Parties to the Negotiation

The following organizations are represented on the committee. The Environmental Protection Agency considers this a balanced committee.

Trade Associations and Regulated Industry

- Engine Manufacturers Association
- Hand Held Ice and Earth Auger Manufacturers Association
- Manufacturers of Emission Controls Association

- National Equipment Servicing and Dealers Association
- Outdoor Power Equipment Institute
- Portable Power Equipment Manufacturers Association

Public Interest Groups

- American Lung Association
- Natural Resources Defense Council

State Government

- State and Territorial Air Pollution Program Administrators/Association of Local Air Pollution Control Officials
- State of Wisconsin, Bureau of Air Management

Federal Government

- U.S. Environmental Protection Agency

VI. Schedule for the Negotiation

EPA has set a deadline of May 31, 1995 for the committee to complete work on the rule. The Agency intends to terminate the activities of the committee if it does not appear likely to reach consensus on a schedule that is consistent with Agency rulemaking needs.

VII. Negotiation Procedures

The following procedures and guidelines will apply to the committee unless they are modified by the committee during the negotiating process.

A. Facilitators

EPA will use a neutral facilitation team. The facilitators will not be involved with the substantive development or enforcement of the regulation. The facilitators' role is to:

- Chair negotiating sessions;
- Help the negotiation process run smoothly; and
- Help participants define and reach consensus.

B. Good Faith Negotiation

Since participants must be willing to negotiate in good faith and be authorized to do so, each organization must designate a senior official to represent its interests. This applies to EPA as well. Gay MacGregor, Assistant Director, Certification Division, Office of Mobile Sources, Office of Air and Radiation will be EPA's representative at the negotiation.

C. Administrative Support

EPA will supply logistical, administrative and management support. If it is deemed necessary and appropriate, EPA will provide technical support to the committee in gathering

and analyzing additional data or information. The Office of Policy, Planning and Evaluation, Consensus and Dispute Resolution Program will provide administrative support.

D. Meetings

Meetings will be held in Ann Arbor, Michigan at the convenience of the committee. EPA will announce committee meetings in the **Federal Register** in accordance with FACA. Such meetings will be open to the public.

E. Committee Procedures

Under the general guidance and direction of the facilitators, and subject to any applicable legal requirements, the members will establish the detailed procedures for committee meeting which they consider most appropriate.

F. Defining Consensus

The goal of the negotiating process is consensus. In the negotiations completed to date, consensus has meant that each interest concurs in the result. We expect the participants to fashion their own working definition of this term.

G. Failure of Advisory Committee To Reach Consensus

In the event the committee is unable to reach consensus, EPA may proceed to develop its own rule. Parties to the negotiation may withdraw at any time. If this happens, the remaining committee members and the Agency will evaluate whether the committee should continue.

H. Record of Meetings

In accordance with FACA's requirements, EPA will keep a record of all Advisory Committee meetings. This record will be placed in the public docket for this rulemaking.

Dated: October 19, 1993.

Deborah S. Dalton,

Deputy Director, Consensus and Dispute Resolution Program, Office of Policy, Planning and Evaluation.

BILLING CODE 6540-50-P

DEPARTMENT OF THE INTERIOR**Fish and Wildlife Service****50 CFR Part 17****Endangered and Threatened Wildlife and Plants; Reopening of Comment Period, Public Hearing, and Availability of Panel Report on Proposed Endangered Status and Designation of Critical Habitat for the Alabama Sturgeon**

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; reopening of comment period, notice of public hearing and availability of panel report.

SUMMARY: The Fish and Wildlife Service (Service) gives notice that a second public hearing will be held on the proposed rule to determine endangered status and designation of critical habitat for the Alabama sturgeon, *Scaphirhynchus suttkusi*. The comment period is reopened to accommodate the public hearing and to allow the Service to accept a report from a panel of experts on the taxonomy and likelihood of existence of this taxon. The panel report is expected to be available by October 29, 1993, for public review.

DATES: The public hearing will be held from 6 p.m. to 10 p.m. on November 15, 1993. The public comment period is reopened on October 25, 1993, and closes on December 8, 1993.

ADDRESSES: The public hearing will be held in South Hall #1 at the Montgomery Civic Center, 300 Bibb Street, Montgomery, Alabama. Requests for the panel report, and written comments and materials should be sent to Field Supervisor, U.S. Fish and

Wildlife Service, 6578 Dogwood View Parkway, Suite A, Jackson, MS 39213. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: James H. Stewart, at the above address (601/965-5900).

SUPPLEMENTARY INFORMATION:**Background**

The Service proposed to determine the Alabama sturgeon, *Scaphirhynchus suttkusi*, to be an endangered species and to designate its critical habitat on June 15, 1993 (58 FR 33148). The Alabama sturgeon, a small sturgeon with a maximum length of about 30 inches, is endemic to the Mobile River system, Alabama and Mississippi. Its current range is restricted to the lower Alabama River and the Cahaba River in Alabama. Both of these areas and the free flowing portion of the lower Tombigbee River are proposed as critical habitat. Factors in the sturgeon's decline include dams, and possible adverse effects from altered water flows, channel maintenance and gravel dredging.

A public hearing on the proposed rule was announced in the Federal Register of September 13, 1993 (58 FR 47851) and was held on October 4, 1993. The capacity of the facility selected for the public hearing was not sufficient for all the individuals that wished to attend. A second hearing is being conducted to allow additional verbal statements to be presented, although written comments will also be accepted and will be given equal consideration. Verbal statements may be limited in length if the number of parties present necessitates such a

limitation. There are, however, no limits to the length of written comments or materials presented at the hearing or mailed to the Service office in the ADDRESSES section.

The Service intends that any final action resulting from the proposed rule will be as accurate and as effective as possible. Questions have been raised both as the species' continued existence and as to its taxonomic classification. A panel of ichthyologists is being convened to examine the taxonomic issue, to provide an opinion on the likely existence of the taxon based on available data, and to make suggestions on what information would be necessary to conclude the taxon is likely extinct. This panel will provide the Service with an opinion on these three issues in the form of a report, which is available for public review and comment during this comment period. A copy may be obtained by contacting the Field Supervisor (see ADDRESSES section).

Author

The primary author of this notice is James H. Stewart (see ADDRESSES section).

Authority: The authority for this action is the Endangered Species Act (16 U.S.C. 1531-1544).

DEPARTMENT OF AGRICULTURE

Agricultural Research Service

Availability for Licensing and Intent to Grant Exclusive License; Neogen Corp.

AGENCY: Agricultural Research Service, USDA.

ACTION: Notice of availability and intent.

SUMMARY: Notice is hereby given that the U.S. Patent Application Serial No. 08/081,591, "Hybridoma Producing Antibodies to Salinomycin," filed June 23, 1993, is available for licensing and that the U.S. Department of Agriculture, Agricultural Research Service, intends to grant an exclusive license to Neogen Corporation of Lansing, Michigan.

DATES: Comments must be received on or before January 24, 1993.

ADDRESSES: Send comments to: USDA, ARS, Office of Technology Transfer, room 401, Building 005, BARC-West, Baltimore Boulevard, Beltsville, Maryland 20705-2350.

FOR FURTHER INFORMATION CONTACT: June Blalock of the Office of Technology Transfer at the Beltsville address given above; telephone: 301-504-5989.

SUPPLEMENTARY INFORMATION: The Federal Government's patent rights to this invention are assigned to the United States of America, as represented by the Secretary of Agriculture. It is in the public interest to so license this invention for Neogen Corporation has submitted a complete and sufficient application for a license. The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within ninety days from the date of this published Notice, ARS receives written evidence and argument which establishes that the grant of the license would not be consistent with the

requirements of 35 U.S.C. 209 and 37 CFR 404.7.

W.H. Tallent,

Assistant Administrator.

BILLING CODE 3510-03-M

Agricultural Stabilization and Conservation Service

National Conservation Review Group; Meeting

AGENCY: Agricultural Stabilization and Conservation Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The National Conservation Review Group will meet to consider recommendations from State and County Conservation Review Groups with respect to the operational features of the Agricultural Conservation Program (ACP), the Emergency Conservation Program (ECP), the Forestry Incentives Program (FIP), and the Water Bank Program (WBP). Comments and suggestions will be received from the public concerning these conservation and environmental programs administered by the Agricultural Stabilization and Conservation Service (ASCS).

DATES: Meeting date: December 2, 1993.

ADDRESSES: Meeting location: The meeting is scheduled to be held in the Conference Room of the Forest Service Chief, second floor of the Auditors Building, 14th and Independence Ave., SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Grady Bilberry, Chief, Conservation and Environmental Activities Branch, Conservation and Environmental Protection Division, ASCS, U.S. Department of Agriculture, P.O. Box 2415, room 4768-S, Washington, DC 20013-2415, 202-720-7333.

SUPPLEMENTARY INFORMATION: The National Conservation Review Group meeting is scheduled to be held from 9 a.m. to 4 p.m. on December 2, 1993, in the Conference Room of the Forest Service Chief, second floor of the Auditors Building, 14th and Independence Ave., SW. Washington, DC. Meeting session will be open to the public.

The agenda will include consideration of State and County Conservation Review Group

recommendations for changes in administrative procedures and policy guidelines of the ACP, ECP, FIP, and WBP. An opportunity will be provided for the public to present comments at the meeting on these conservation and environmental programs administered by ASCS.

Because of time constraints and anticipated participation from interested individuals and groups, comments will be limited to not more than 5 minutes. Individuals or groups interested in making recommendations shall make them in writing and submit them to the Chief, Conservation and Environmental Activities Branch, Conservation and Environmental Protection Division, ASCS, U.S. Department of Agriculture, P.O. Box 2415, room 4768-S, Washington, DC 20013-2415, for inclusion in the minutes.

The meeting may also include discussion of current procedures, criteria, and guidelines relevant to the implementation of these programs.

Because of limited space, persons desiring to attend the meeting should call Mr. Grady Bilberry at 202-720-7333 to make reservations.

Signed at Washington, DC, on October 18, 1993.

Floy E. Payton,

Acting Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc. 93-26120 Filed 10-22-93; 8:45 am]

BILLING CODE 3410-05-P

Forest Service

Mining Activities on Piru Creek, Los Padres National Forest, Ventura County, CA; Intent to Prepare an Environmental Impact Statement

The Department of Agriculture, Forest Service will prepare an environmental impact statement for approval of proposed Plans of Operation for mining activities along Piru Creek from Lockwood Flat to Pyramid Lake on the Mount Pinos Ranger District. Management emphases in the Los Padres National Forest Land Resource Management Plan (1988) are to improve water quality, vegetative diversity, wildlife habitat capability, and to protect property and cultural resources. Management emphases for the project management area are general forest recreation and watershed management.

Potential resource issues which may affect alternative development include the presence of riparian-dependent sensitive amphibians and reptiles; the presence of an amphibian species which is proposed for listing as endangered; sensitive heritage resources; water quality; California condor foraging habitat; conflicts in recreational uses of Piru Creek; the study of Piru Creek as a potential Wild and Scenic river; maintaining biodiversity, and protecting the sensitive riparian ecosystem.

The California Department of Fish and Game and the U.S. Fish and Wildlife Service will be invited to participate as cooperating agencies to evaluate potential impacts on threatened and endangered species habitat. Representatives from the Army Corps of Engineers and the Regional Water Quality Control Board will be invited to participate in resolving issues that deal with water quality. Federal, State, and local agencies, as well as industry, and other individuals or organizations who may be interested in or affected by the decision, will be invited to participate in the scoping process. This process will include:

1. Identification of potential issues and/or concerns.
2. Identification of issues to be analyzed in depth.
3. Identification of issues which may be eliminated from further analysis.

Scoping will be initiated during the fall of 1993 and will continue into the spring of 1994.

The analysis is expected to take approximately 14 months to complete. The draft EIS is expected to be filed with the Environmental Protection Agency (EPA) and available for public review and comment by August, 1994. EPA will publish a notice of availability for the draft EIS in the *Federal Register*. The comment period will be 45 days from the date of the EPA's published notice of availability. All persons interested in the proposed projects are urged to participate at that time. Comments on the draft EIS should be as specific as possible and may address the adequacy of the EIS or the merits of the alternatives considered. In addition, Federal court decisions have established that reviewers of a draft EIS must structure their participation in the environmental review so that it is meaningful and alerts an agency to the reviewer's positions and contentions. Environmental objections that could have been raised at the draft EIS review stage may be waived if not raised until after completion of the final EIS. The reason for this is to ensure that substantive comments and objections are made available to the Forest Service

in a timely manner so that the agency can respond to them in the final EIS.

The final EIS is scheduled to be completed by November, 1994. In the final EIS, the Forest Service is required to respond to comments received from the public and consulted agencies. The responsible official will consider the comments, responses, laws, regulations, and policies in making a decision regarding these project proposals. The responsible official will document the decision and reasons for the decision in the Record of Decision. That decision will be subject to appeal.

David W. Dahl, Forest Supervisor, Los Padres National Forest, Goleta, CA, is the responsible official. Written comments, questions, and suggestions concerning the analysis should be sent to Mark Bethke, District Ranger, Mount Pinos Ranger District, Star Route, Box 400, Frazier Park, California 93225 (phone 805-245-3731).

Dated: October 8, 1993.

David W. Dahl,

Forest Supervisor.

BILLING CODE 3410-11-M

DEPARTMENT OF COMMERCE

Bureau of Export Administration

[Docket No. 931071-3271]

General Order Prohibiting Exports of Unprocessed Timber From Certain Public Lands

AGENCY: Bureau of Export Administration, Commerce.

ACTION: Notice of general order on log exports.

SUMMARY: On August 23, 1993, pursuant to the Forest Resources Conservation and Shortage Relief Act of 1990, as amended ("Act"), the Secretary of Commerce issued a General Order prohibiting the export of unprocessed timber originating from public lands located west of the 100th meridian in the contiguous United States. In addition, the Order prohibits certain unprocessed timber substitutions between public and private lands, provides certain exemptions from this prohibition, and includes definitions and contract sanctity provisions for certain prior contracts.

As a result, exports of unprocessed timber originating from public lands located west of the 100th meridian in the contiguous United States are prohibited, effective June 1, 1993.

DATES: June 1, 1993.

FOR FURTHER INFORMATION CONTACT:

Bernard Kritzer, Senior Industry Analyst, Office of Foreign Availability, Bureau of Export Administration, 202-482-0074.

SUPPLEMENTARY INFORMATION:

I. Background

On July 1, 1993, the President signed into law Pub. L. 103-45, the Forest Resources Conservation and Shortage Relief Amendments Act of 1993 ("Amendments"). This law amended the Act. The Act requires the Secretary of Commerce to issue an Order prohibiting the export of unprocessed timber originating from public lands west of the 100th meridian in the contiguous U.S. Before the Amendments were enacted, the Act required affected states to issue and implement their own timber export regulations in accordance with the Act and previous Orders of the Secretary of Commerce. On May 4, 1993, following a legal challenge, the U.S. Court of Appeals for the Ninth Circuit ("Court of Appeals") held provisions of the Act requiring states to implement the Federal prohibition in this manner unconstitutional. *Board of Natural Resources v. Brown*, 992 F.2d 937 (9th Cir. 1993).

In passing the Amendments, Congress intended to remedy the provisions the Court of Appeals ruled unconstitutional by assigning certain regulatory responsibilities to the Federal government, specifically, the Secretary of Commerce.

The Act, however, allows a state to elect to implement a timber export program under its own state regulatory procedures if the Secretary of Commerce reviews and approves it. Finally, as an interim measure, the Act allows states with timber export programs implemented under the Act, which existed before the Amendments became law, to continue to administer that program pending implementation of Federal regulations. In the 30-day period allowed under the Amendments for notification to Commerce of pre-existing state programs, the State of Washington was the only state to do so.

The states affected by this Order are: Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, and Wyoming.

The Secretary's General Order prohibits unprocessed timber exports from public lands as follows: (1) Effective June 1, 1993, for affected states with annual sales of 400 million board feet ("MMBF") or less; and (2) effective June 1, 1993, and ending on December

31, 1995, for affected states with annual sales greater than 400 MMBF.

At present, only the State of Washington's annual sales are greater than 400 MMBF; all other states' are 400 MMBF or less. Therefore, the Secretary's prohibition is permanent for all affected states except the State of Washington. In 1995, the Secretary of Commerce will establish the level of exports for unprocessed timber from public lands in the states with annual sales greater than 400 MMBF, to be effective January 1, 1996.

The Secretary's Order prohibits substitution. No person may purchase, directly or indirectly, unprocessed timber originating from public lands in an affected state: (1) If such purchaser would use the unprocessed timber as a substitute for exported unprocessed timber originating from private lands in that state; or (2) if the purchaser, during the preceding 24-month period, exported unprocessed timber originating from private lands in that state. These substitution prohibitions, however, will not apply in a state on or after the date on which: (1) The Governor of that state provides the Secretary of Commerce with notification of a prior state program under section 491(d)(2)(C) (16 U.S.C. 620c(d)(2)(C)) of the Act (that is, one that existed before the Amendments became law); (2) the Secretary of Commerce approves a state program under section 491(d)(2)(A) (16 U.S.C. 620c (d)(2)(A)) of the Act (that is, when a state submits a program for Commerce approval), or (3) the Secretary of Commerce issues implementing regulations under the Act, whichever occurs first.

The unprocessed timber export prohibition is comprehensive. At this time, the Act provides no exceptions based on species, grades, or location within public lands. The Act, however, does provide contract sanctity for any contract for the purchase of unprocessed timber from public lands entered into before: (1) September 10, 1990, for all affected states other than the State of Washington; (2) January 1, 1991, for the State of Washington; or (3) October 23, 1992, for states in which exports were permitted pursuant to prior orders of the Secretary of Commerce.

Consistent with section 491(f) (16 U.S.C. 620c(f)) of the Act, this order shall not be construed to supersede the controls on the export of Western Red Cedar required by section 7(i) of the Export Administration Act of 1979, as amended (50 U.S.C. App. 2406(i)), and as set out in § 777.7 of the Export Administration Regulations (15 CFR 777.7).

The Act also requires the Department of Commerce to: (1) Promulgate and administer regulations to implement the Act; (2) ensure that species, grades, and geographic origin of unprocessed timber prohibited from export within each state is representative of the timber comprising the total timber sales program of the state; (3) to monitor sales and purchases of unprocessed public timber between persons; (4) review and approve or disapprove state programs submitted by states that elect to implement their own timber export program; (5) publish in the **Federal Register** any notices of a finding that a state program submitted for Department of Commerce approval is disapproved; (6) investigate violations of, enforce, and conduct civil penalty hearings under the Act; and (7) report to Congress on the effect of the ban by June 1, 1995. The Department of Commerce will publish proposed regulations and solicit public comments in the **Federal Register** to implement these provisions.

Accordingly, the Secretary of Commerce issued the following General Order on August 23, 1993:

General Order Prohibiting Exports of Unprocessed Timber From Certain Public Lands

The Forest Resources Conservation and Shortage Relief Amendments Act of 1993, Public Law 103-45, July 1, 1993, amended the Forest Resources Conservation and Shortage Relief Act of 1990, Public Law 103-382, 104 Stat. 714, August 20, 1990 (16 U.S.C. 620 *et seq.*) ("Act"). The Act, as amended, requires the Secretary of Commerce to issue an Order prohibiting, notwithstanding any other provision of the law, the export of unprocessed timber originating from public lands west of the 100th meridian in the contiguous United States as follows: (1) Effective June 1, 1993, for states with annual sales of 400 million board feet ("MMBF") or less; and (2) effective June 1, 1993, and ending December 31, 1995, for states with annual sales greater than 400 MMBF. The Act also requires me to prohibit substitutions, provide exemptions therefrom, and provide for contract sanctity. This order is being issued pursuant to provisions of the Act.

(a) Timber originating from public lands in states with annual timber sales volumes of 400,000,000 board feet ("MMBF") or less. Pursuant to section 491 (a) and (b)(1) (16 U.S.C. 620c (a) and (b)(1)) of the Forest Resources Conservation and Shortage Relief Act of 1990, as amended, and, notwithstanding any other provision of the law, effective June 1, 1993, the export from the United States to any destination, including Canada, of any unprocessed timber originating from public lands in states located west of the 100th meridian in the contiguous United States with annual timber sales volumes of 400 MMBF or less is prohibited.

(b) Timber originating from public lands in states with annual timber sales volumes greater than 400 MMBF. Pursuant to section 491 (a) and (b)(2) (16 U.S.C. 620c(a) and (b)(2)) of the Forest Resources Conservation and Shortage Relief Act of 1990, as amended, effective June 1, 1993, and ending on December 31, 1995, the export from the United States to any destination, including Canada, of any unprocessed timber originating from public lands in states located west of the 100th meridian in the contiguous United States with annual timber sales volumes greater than 400 MMBF is prohibited.

(c) Prohibition on substitution. Pursuant to section 491(b)(3)(A) (16 U.S.C. 620c(b)(3)(A)) of the Forest Resources Conservation and Shortage Relief Act of 1990, as amended, and notwithstanding any other provision of law, all persons are prohibited from purchasing, directly or indirectly, unprocessed timber originating from public lands in a state if: (1) Such unprocessed timber would be used in substitution for exported unprocessed timber originating from private lands in that State; or (2) such person has, during the preceding 24-month period, exported unprocessed timber originating from private lands in that State.

(d) Exemption. Pursuant to section 491(b)(3)(B) (16 U.S.C. 620c(b)(3)(B)) of the Forest Resources Conservation and Shortage Relief Act of 1990, as amended, the prohibitions in section (c) of this Order do not apply in a state on or after the date on which: (1) The Governor of that state provides the Secretary of Commerce with notification of a prior state program under section 491(d)(2)(C) (16 U.S.C. 620c(d)(2)(C)) of the Act; (2) the Secretary of Commerce approves a state program under section 491(d)(2)(A) (16 U.S.C. 620c(d)(2)(A)) of the Act, or (3) the Secretary of Commerce issues implementing regulations under the Act, whichever occurs first.

(e) Prior contracts. Pursuant to section 491(e) (16 U.S.C. 620c(e)) of the Forest Resources Conservation and Shortage Relief Act of 1990, as amended, this Order does not apply to any contract for the purchase of unprocessed timber from public lands entered into before September 10, 1990, with respect to states with annual sales volumes of 400 MMBF or less, or January 1, 1991, with respect to states with annual sales volumes greater than 400 MMBF, or any contract under which exports were permitted pursuant to an Order of the Secretary of Commerce in effect under the Act before October 23, 1992.

(f) Western Red Cedar. Consistent with section 491(f) (16 U.S.C. 620c(f)) of the Act, this Order shall not be construed to supersede the controls on the export of Western Red Cedar required by section 7(i) of the Export Administration Act of 1979 (50 U.S.C. app. 2406(i)), and as set out in section 777.7 of the Export Administration Regulations (15 CFR 777.7).

(g) Definitions. (1) Public lands. As defined in section 493(5) (16 U.S.C. 620e(5)) of the

¹ On July 6, 1993, the Governor of the State of Washington provided the Secretary of Commerce with written notification of a prior state program under the provisions of this section.

Act, "public lands" means lands west of the 100th meridian in the contiguous 48 states that are held or owned by a State or political subdivision thereof, or any other public agency. Such term does not include any lands the title to which is:

- (i) held by the United States;
- (ii) held in trust by the United States for the benefit of any Indian tribe or individual;
- (iii) held by any Indian tribe or individual subject to a restriction by the United States against alienation; or
- (iv) held by any Native Corporation as defined in section 3 of the Alaska Native Claims Settlement Act (43 U.S.C. 1602).

(2) Unprocessed Timber. As defined in section 493(7) (16 U.S.C. 620e(7)) of the Act, the term "unprocessed timber" means trees or portions of trees or other roundwood not processed to standards and specifications suitable for end product use. The term "unprocessed timber" does not include timber processed into any one of the following:

- (i) Lumber or construction timbers, except Western Red Cedar, meeting current American Lumber Standard Grades or Pacific Lumber Inspection Bureau Export "R" or "N" list grades, sawn on 4 sides not intended for remanufacture.
- (ii) Lumber, construction timbers, or cants for remanufacture, except Western Red Cedar, meeting current American Lumber Standards Grades or Pacific Lumber Inspection Bureau Export "R" or "N" list clear grades, sawn on four sides, not to exceed twelve inches in thickness.
- (iii) Lumber, construction timbers, or cants for remanufacture, except Western Red Cedar, that do not meet the grades referred to in clause (ii) and are sawn on four sides, with wane less than one-quarter of any face, not exceeding eight and three-quarters inches in thickness.
- (iv) Chips, pulp, or pulp products.
- (v) Veneer or plywood.
- (vi) Poles, posts, or piling cut or treated with preservatives for use as such.
- (vii) Shakes or shingles.
- (viii) Aspen or other pulpwood bolts, not exceeding 100 inches in length, exported for processing into pulp.
- (ix) Pulp logs or cull logs processed at domestic operations for the purpose of conversion of the logs into chips.

(3) Substitution. Consistent with the language contained in section 493(8) (16 U.S.C. 620e(8)) of the Act, the acquisition of unprocessed timber from public lands west of the 100th meridian in the contiguous 48 states to be used in "substitution" for exported unprocessed timber originating from private lands means acquiring unprocessed timber from such public lands and engaging in exporting, or selling for export, unprocessed timber originating from private lands within the same geographic and economic area.

(4) Acquisition. As defined in section 493(1) (16 U.S.C. 620e(1)) of the Act, the term "acquire" means to come into possession of, whether directly or indirectly, through a sale, trade, exchange, or other transaction, and the term "acquisition" means the act of acquiring.

(5) Person. As defined in section 493(3) (16 U.S.C. 620e(3)) of the Act, the term "person"

means any individual, partnership, corporation, association, or other legal entity and includes any subsidiary, subcontractor, or parent company, and business affiliates where one affiliate controls or has the power to control the other or when both are controlled directly or indirectly by a third person.

Dated: August 23, 1993.

Ronald H. Brown,
Secretary of Commerce.

Dated: October 19, 1993.

Iain S. Baird,

Acting Assistant Secretary for Export Administration.

BILLING CODE 3510-DT-P

Foreign-Trade Zones Board

[Docket No. 52-93]

Foreign-Trade Zone 70—Detroit, MI; Application for Subzone, BASF Corporation, Chemical Manufacturing Facilities, Wyandotte, MI

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Greater Detroit Foreign Trade Zone, Inc., grantee of FTZ 70, requesting special-purpose subzone status for the chemical manufacturing facilities of BASF Corporation located in the Wyandotte, Michigan, area. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR part 400). It was formally filed on October 12, 1993.

The BASF facilities consist of two sites in the Detroit area: Site 1 (233 acres)—"North Works" manufacturing facility, 1609 Biddle Avenue, Wyandotte, Michigan, some nine miles south of downtown Detroit on the Detroit River; and, Site 2 (2.5 acres)—"Refractory Handling, Inc.," raw materials/finished goods warehousing, distribution facility, 17423 West Jefferson Avenue, Riverview, Michigan, about one mile south of the Wyandotte facility.

The facilities (845 employees) are used to produce certain chemical products, such as bulk vitamins, thermoplastic polyurethanes, expanded polyolefins, polyols, plastic materials, and elastocell products (duty rates—3.1% to 12.5%). Currently, some 40 percent of material inputs are sourced from abroad, including isophytol, trimethylhydroquinone, naphthalene diisocyanate, castor oil, styrene, alcohols, phenols, nitrogen-function compounds, vitamins/provitamins/hormones, glycosides/vegetable alkaloids, beta carotene, mixed

alkylbenzenes and alkylnaphthalenes, polyacetals, polyethers, and polycarbonates (duty rates—free to 20%, 3.7¢/kg+13.6%).

Zone procedures would exempt BASF from Customs duty payments on the foreign items used in export production. On domestic sales, the company would be able to choose the duty rates that apply to the finished products made at the plant for the foreign materials noted above (For example, the duty rate on naphthalene diisocyanate is 13.5%, whereas, the duty rate for the finished product, motor vehicle bounce bumpers, is 3.1% (2.5% if transferred in-bond to auto assembly subzones)). The application indicates that the savings from zone procedures would help improve the facilities' international competitiveness.

In accordance with the Board's regulations (as revised, 56 FR 50790-50808, 10-8-91), a member of the FTZ Staff has been appointed examiner to investigate the application and report to the Board.

Public comment on the application is invited from interested parties. Submissions (original and three copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is on December 27, 1993. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to January 10, 1994.

A copy of the application and the accompanying exhibits will be available for public inspection at each of the following locations:

U.S. Department of Commerce District Office,
1140 Patrick V. McNamara Building, 477
Michigan Avenue, Detroit, MI 48226.

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 3716, 14th Street & Constitution Avenue, NW., Washington, DC 20230.

Dated: October 15, 1993.

John J. Da Ponte, Jr.,
Executive Secretary.

BILLING CODE 3510-DS-P

International Trade Administration

Sanctions for Violation of Administrative Protective Order

AGENCY: Import Administration,
International Trade Administration,
Commerce.

ACTION: Notice.

SUMMARY: This is a notice of the status of an investigation into a charge of

violation of an administrative protective order in antidumping and countervailing duty proceedings.

EFFECTIVE DATE: October 25, 1993.

FOR FURTHER INFORMATION CONTACT:

Stephen J. Powell, Chief Counsel for Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482-8916.

SUPPLEMENTARY INFORMATION: The International Trade Administration United States Department of Commerce (ITA), wishes to remind those members of the bar who appear before it in antidumping and countervailing duty proceedings of the extreme importance of protecting the confidentiality of business proprietary information obtained pursuant to administrative protective order (APO) during the course of those proceedings. In order that the gravity with which the ITA views violations of its APO's might be better appreciated, ITA is publishing the following report on recent allegations that the provisions of an ITA APO have been violated.

An individual employed by a firm included proprietary information in the public version of a submission, which was served upon interested parties to the proceeding and placed upon the public file at the Department of Commerce for a period of five days. The named individual at the same firm reviewed this material and failed to delete the proprietary information before the document was filed. Following an investigation by the ITA, the named individual was held responsible for this violation of APO.

In this case, the individual involved was (1) required to send a letter of apology to counsel for the company whose information was improperly disclosed; and (2) required to attend a training session conducted by the ITA on procedures for protecting proprietary data. The individual also was issued a private reprimand which warned that future violations could be treated more severely.

We consider these sanctions to be appropriate for the following reasons: First, the violation appears to have been inadvertent; second, after having the violation brought to the named individual's attention, that individual took prompt action to prevent harm to the submitter; third, the named individual cooperated fully with the ITA's investigation; and, fourth, no apparent harm resulted from the violation.

Serious harm can result from the failure to properly safeguard proprietary information obtained under APO. The

ITA will continue to investigate vigorously allegations that the provisions of APOs have not been faithfully observed, and is prepared to impose sanctions commensurate with the nature of the violations, including letters of reprimand, denial of access to proprietary information, or disbarment from practice before the ITA.

This notice is published pursuant to 19 CFR 354.15(e) of the Department's regulations.

Dated: October 19, 1993.

Timothy J. Hauser,

Acting Under Secretary for International Trade.

BILLING CODE 3510-DS-M

Ames Laboratory-U.S. Department of Energy, Notice of Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Comments: None received. **Decision:** Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Docket Number: 93-063. **Applicant:** Ames Laboratory-U.S. Department of Energy, Ames, IA 50011-3020. **Instrument:** Sequential Stopped-Flow Spectrofluorimeter, Model DX.17MV. **Manufacturer:** Applied Photophysics, United Kingdom. **Intended Use:** See notice at 58 FR 44653, August 24, 1993. **Reasons:** The foreign instrument provides: (1) sequential multi-mixing, (2) wave-length scanning, (3) both stopped-flow fluorescence and circular dichroism measurements and (4) time resolved spectra.

We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

Frank W. Creel,

Director, Statutory Import Programs Staff.

[FR Doc. 93-26186 Filed 10-22-93; 8:45 am]

BILLING CODE 3510-DS-F

Brandeis University, et al.; Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Comments: None received. **Decision:** Approved. No instrument of equivalent scientific value to the foreign instruments described below, for such purposes as each is intended to be used, is being manufactured in the United States.

Docket Number: 93-081. **Applicant:** Brandeis University, Waltham, MA 02254-9110. **Instrument:** Microvolume Stopped-Flow Spectrometer, Model SX.17MV. **Manufacturer:** Applied Photophysics, United Kingdom. **Intended Use:** See notice at 58 FR 42941, August 12, 1993. **Reasons:** The foreign instrument provides both stopped-flow fluorescence and stopped-flow circular dichroism measurements and time resolved spectra.

Docket Number: 93-088. **Applicant:** University of Minnesota Medical School, Minneapolis, MN 55455. **Instrument:** pO₂ Histogram, Model 6650. **Manufacturer:** Eppendorf-Netheler-Hinz GmbH, Germany. **Intended Use:** See notice at 58 FR 42941, August 12, 1993. **Reasons:** The foreign instrument provides partial O₂ pressure histograms and has a steel needle polarographic sensor probe under computer control.

The National Institutes of Health advises in its memoranda dated September 17, 1993, that (1) the capabilities of each of the foreign instruments described above are pertinent to each applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value for the intended use of each instrument.

We know of no other instrument or apparatus being manufactured in the United States which is of equivalent scientific value to either of the foreign instruments.

Frank W. Creel,

Director, Statutory Import Programs Staff.

[FR Doc. 93-26190 Filed 10-22-93; 8:45 am]

BILLING CODE 3510-DS-F

East Carolina University, et al.; Notice of Consolidated Decision on Application for Duty-Free Entry of Scientific Instrument

This is a decision consolidated pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 am and 5 pm in room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 93-082. *Applicant:* East Carolina University, Greenville, NC 27834. *Instrument:* Spectrometer Workstation, Model A5000. *Manufacturer:* Applied Photophysics, Ltd., United Kingdom. *Intended Use:* See notice at 58 FR 42941, August 12, 1993.

Docket Number: 93-085. *Applicant:* North Carolina State University, Raleigh, NC 27695-7212. *Instrument:* Kiel Carbonate Prep Device. *Manufacturer:* Finnigan, MAT, Germany. *Intended Use:* See notice at 58 FR 44654, August 24, 1993.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instruments, for the purposes for which the instruments are intended to be used, is being manufactured in the United States. *Reasons:* These are compatible accessories for instruments previously imported for the use of the applicants. In each case, the instrument and accessory were made by the same manufacturer. The National Institutes of Health advises in its memoranda dated September 17, 1993, that the accessories are pertinent to the intended uses and it knows of no comparable domestic accessories.

We know of no domestic accessories which can be readily adapted to the previously imported instruments.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510-DS-F

Illinois Institute of Technology, et al.; Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in room 4211, U.S. Department of Commerce,

14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 93-089. *Applicant:* Illinois Institute of Technology, Chicago, IL 60616. *Instrument:* Electron Microscope, Model CM 200. *Manufacturer:* N.V. Philips, The Netherlands. *Intended Use:* See notice at 58 FR 42941, August 12, 1993. *Order Date:* April 30, 1993.

Docket Number: 93-093. *Applicant:* University of New Mexico, Albuquerque, NM 87131. *Instrument:* Electron Microscope, Model JEM-2010/SEG/SIP/DP. *Manufacturer:* JEOL Ltd., Japan. *Intended Use:* See notice at 58 FR 47887, September 13, 1993. *Order Date:* March 29, 1993.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as these instruments are intended to be used, was being manufactured in the United States at the time the instruments were ordered. *Reasons:* Each foreign instrument is a conventional transmission electron microscope (CTEM) and is intended for research or scientific educational uses requiring a CTEM. We know of no CTEM, or any other instrument suited to these purposes, which was being manufactured in the United States either at the time of order of each instrument or at the time of receipt of application by the U.S. Customs Service.

Applications for Duty-Free Entry of Scientific Instruments

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897; 15 part CFR 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with subsections 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5 p.m. in room 4211, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC.

Docket Number: 93-123. *Applicant:* University of Alaska, Geophysical Institute, Fairbanks, AK 99775-0800. *Instrument:* Low Light Level Color Television Camera, Model Pavicam-S. *Manufacturer:* Pavic Inc., Japan. *Intended Use:* The instrument will be used for the study of the Northern Lights and other ionospheric phenomena. It will be used especially during the launches of sounding rockets intended to measure the electric and magnetic fields and other energetic electrons above auroras. *Application Received by Commissioner of Customs:* September 28, 1993.

Docket Number: 93-124. *Applicant:* Brandeis University, Department of Biochemistry, 415 South Street, Waltham, MA 02254. *Instrument:* Microvolume Stopped-Flow Spectrophotometer, Model SX.17 MV. *Manufacturer:* Applied Photophysics, United Kingdom. *Intended Use:* The instrument will be used for the following studies: (1) The mechanism of protein conformational change, (2) the kinetic mechanism of medically important enzymes such as inosine monophosphate dehydrogenase, (3) the mechanisms of inhibitor interactions with these enzymes, (4) the mechanisms of chemical and enzymatic reactions and (5) the mechanisms of coupled vectorial processes. In addition, the instrument will be used for educational purposes in several biochemistry courses. *Application Received by Commissioner of Customs:* September 29, 1993.

Docket Number: 93-125. *Applicant:* University of Texas Health Science Center, Anesthesiology Department, 6431 Fannin, 5020 MSMB, Houston, TX 77030. *Instrument:* Hyperbaric Ventilator. *Manufacturer:* Pneu Pac, United Kingdom. *Intended Use:* The instrument will be used for animal studies to evaluate the effects of decompression on the pulmonary circulation. *Application Received by Commissioner of Customs:* September 29, 1993.

Docket Number: 93-126. *Applicant:* Research Foundation, State University of New York, Stony Brook, NY 11794. *Instrument:* Microstructure Profiler. *Manufacturer:* Seimac Ltd., Canada.

Intended Use: The instrument will be used in studies of turbulent mixing in stratified tidal estuaries and other flow regimes. In addition, the instrument will be used for educational purposes in an advance graduate level course on "Turbulent Mixing in Estuaries and Oceans." *Application Received by Commissioner of Customs:* October 1, 1993.

Docket Number: 93-127. *Applicant:* Argonne National Laboratory, 9700 S. Cass Avenue, Argonne, IL 60439. *Instrument:* UV Excimer Laser Amplifier, Model LPX 110i. *Manufacturer:* Lambda Physik, Germany. *Intended Use:* The instrument will be used to study the chemistry induced by energetic radiation, the transient intermediates such as radicals, radical ions, electrons, and excited states, and the interaction of the photo ionizing radiation with condensed-phase matter. *Application Received by Commissioner of Customs:* October 1, 1993.

Docket Number: 93-128. *Applicant:* University of Wisconsin - Madison, Department of Geology and Geophysics, 1215 West Dayton Street, Madison, WI 53706. *Instrument:* Electron Microprobe, Model SX 50. *Manufacturer:* Cameca, France. *Intended Use:* The instrument will be used to examine materials such as: naturally occurring minerals and volcanic glasses; meteorites; experimentally produced minerals and glasses; experimentally produced metals, ceramics and semiconductors; microfossils; experimental and natural aerosols. The instrument will also be used for educational purposes in courses in Geology. *Application Received by Commissioner of Customs:* October 6, 1993.

BILLING CODE 3510-DS-F

University of Kansas; Notice of Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 93-090. *Applicant:* University of Kansas, Lawrence, KS 66045. *Instrument:* Cryostopped-Flow Spectrophotometer/Fluorimeter System, Model SF-41 Canterbury. *Manufacturer:* Hi-Tech Scientific Ltd., United Kingdom. *Intended Use:* See notice at 58 FR 44654, August 24, 1993.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument provides: (1) Millisecond dead time, (2) a temperature range of -100° to +60°C with stability to ± 0.1°C and (3) an anaerobic O₂ ingress rate of <0.5 micromoles per hour. The National Institutes of Health advises in its memorandum dated September 17, 1993, that (1) this capability is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific

value to the foreign instrument for the applicant's intended use.

We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

Adjustment of Import Limits for Certain Cotton, Wool, Man-Made Fiber and Silk Blend Textile Products Produced or Manufactured in China

October 19, 1993.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: October 19, 1993.

FOR FURTHER INFORMATION CONTACT: Janet Heinzen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927-6703. For information on embargoes and quota re-openings, call (202) 482-3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for certain categories are being adjusted, variously, for swing and carryover.

A description of the textile and apparel categories in terms of HTS numbers is available in the **CORRELATION:** Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 57 FR 54976, published on November 23, 1992). Also see 57 FR 62304, published on December 30, 1992.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist

only in the implementation of certain of its provisions.

Rita D. Hayes,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

October 19, 1993.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on December 23, 1992, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in China and exported during the twelve-month period which began on January 1, 1993 and extends through December 31, 1993.

Effective on October 19, 1993, you are directed to amend further the directive dated December 23, 1992 to adjust the limits for the following categories, as provided under the terms of the current bilateral agreement between the Governments of the United States and the People's Republic of China:

| Category | Adjusted twelve-month limit ¹ |
|--------------------------|--|
| Levels not in a group | |
| 219 | 1,646,517 square meters. |
| 333 | 65,511 dozen. |
| 338/339 | 2,396,187 dozen of which not more than 1,870,607 dozen shall be in Categories 338-S/339-S ² . |
| 341 | 720,591 dozen of which not more than 385,749 dozen shall be in Category 341-Y ³ . |
| 360 | 6,764,306 numbers of which not more than 4,710,220 numbers shall be in Category 360-P ⁴ . |
| 442 | 43,860 dozen. |
| 448 | 23,019 dozen. |
| 614 | 10,884,870 square meters. |
| 641 | 1,144,944 dozen. |
| 647 | 1,261,437 dozen. |
| 648 | 992,830 dozen. |
| 652 | 1,996,529 dozen. |
| 670-L ⁵ | 15,352,870 kilograms. |
| 846 | 116,956 dozen. |

| Category | Adjusted twelve-month limit ¹ |
|---|--|
| Group II 330, 332, 349, 353, 354, 359-O ⁶ , 431, 432, 439, 459, 630, 632, 643, 644, 653, 654 and 659-O ⁷ , as a group. | 131,401,493 square meters equivalent. |

¹ The limits have not been adjusted to account for any imports exported after December 31, 1992.

² Category 338-S: all HTS numbers except 6109.10.0012, 6109.10.0014, 6109.10.0018 and 6109.10.0023; Category 339-S: all HTS numbers except 6109.10.0040, 6109.10.0045, 6109.10.0060 and 6109.10.0065.

³ Category 341-Y: only HTS numbers 6204.22.3060, 6206.30.3010 and 6206.30.3030.

⁴ Category 360-P: only HTS numbers 6302.21.1010, 6302.21.1020, 6302.21.2010, 6302.21.2020, 6302.31.1010, 6302.31.1020, 6302.31.2010 and 6302.31.2020.

⁵ Category 670-L: only HTS numbers 4202.12.8030, 4202.12.8070, 4202.92.3020, 4202.92.3030 and 4202.92.9025.

⁶ Category 359-O: all HTS numbers except 6103.42.2025, 6103.49.3034, 6104.62.1020, 6104.69.3010, 6114.20.0048, 6114.20.0052, 6203.42.2010, 6203.42.2090, 6204.62.2010, 6211.32.0010, 6211.32.0025, 6211.42.0010 (Category 359-C); 6103.19.2030, 6103.19.4030, 6104.12.0040, 6104.19.2040, 6110.20.1022, 6110.20.1024, 6110.20.2030, 6110.20.2035, 6110.90.0044, 6110.90.0046, 6201.92.2010, 6202.92.2020, 6203.19.1030, 6203.19.4030, 6204.12.0040, 6204.19.3040, 6211.32.0070 and 6211.42.0070 (Category 359-V).

⁷ Category 659-O: all HTS numbers except 6103.23.0055, 6103.43.2020, 6103.43.2025, 6103.49.2000, 6103.49.3038, 6104.63.1020, 6104.63.1030, 6104.69.1000, 6104.69.3014, 6114.30.3044, 6114.30.3054, 6203.43.2010, 6203.43.2090, 6203.49.1010, 6203.49.1090, 6204.63.1510, 6204.69.1010, 6210.10.4015, 6211.33.0010, 6211.33.0017, 6211.43.0010 (Category 659-C); 6502.00.9030, 6504.00.9015, 6504.00.9060, 6505.90.5090, 6505.90.6090, 6505.90.7090, 6505.90.8090 (Category 659-H); 6112.31.0010, 6112.31.0020, 6112.41.0010, 6112.41.0020, 6112.41.0030, 6112.41.0040, 6211.11.1010, 6211.11.1020, 6211.12.1010 and 6211.12.1020 (Category 659-S).

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,
Rita D. Hayes,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-F

Announcement of Import Restraint Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in Egypt

October 19, 1993.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits for the new agreement year.

EFFECTIVE DATE: January 1, 1994.

FOR FURTHER INFORMATION CONTACT:

Jennifer Aldrich, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927-5850. For information on embargoes and quota re-openings, call (202) 482-3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

In a Memorandum of Understanding (MOU) dated September 12, 1993, the Governments of the United States and the Arab Republic of Egypt agreed to extend their Bilateral Textile Agreement, effected by exchange of notes dated March 15, 1992 and June 9, 1992, for two consecutive one-year periods beginning on January 1, 1994 and extending through December 31, 1995.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to establish limits for the period beginning on January 1, 1994 and extending through December 31, 1994.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see Federal Register notice 57 FR 54976, published on November 23, 1992). Information regarding the 1994 CORRELATION will be published in the Federal Register at a later date.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist

only in the implementation of certain of its provisions.

Rita D. Hayes,
Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

October 19, 1993.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on December 9, 1992; pursuant to the Memorandum of Understanding (MOU) dated September 12, 1993 between the Governments of the United States and the Arab Republic of Egypt; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1994, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textile products in the following categories, produced or manufactured in Egypt and exported during the twelve-month period beginning on January 1, 1994 and extending through December 31, 1994, in excess of the following levels of restraint:

| Category | Twelve-month restraint limit |
|--|------------------------------|
| Fabric Group 218-220, 224-227, 313-317 and 326, as a group. | 78,261,419 square meters. |
| Sublevels in Fabric Group | |
| 218 | 2,508,000 square meters. |
| 219 | 18,413,165 square meters. |
| 220 | 18,413,165 square meters. |
| 224 | 18,413,165 square meters. |
| 225 | 18,413,165 square meters. |
| 226 | 18,413,165 square meters. |
| 227 | 18,413,165 square meters. |
| 313 | 33,811,849 square meters. |
| 314 | 18,413,165 square meters. |
| 315 | 21,622,746 square meters. |
| 317 | 18,413,165 square meters. |
| 326 | 2,508,000 square meters. |

| Category | Twelve-month restraint limit |
|--|--|
| Levels not in a group 300/301 | 7,219,188 kilograms of which not more than 2,264,192 kilograms shall be in Category 301. |
| 339 | 873,370 dozen. |
| 369-S ¹ | 1,101,690 kilograms. |
| 448 | 18,160 dozen. |

¹Category 369-S: only HTS number 6307.10.2005.

Imports charged to these category limits for the period January 1, 1993 through December 31, 1993 shall be charged against those levels of restraint to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Rita D. Hayes,
Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-F

Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products and Silk Blend and Other Vegetable Fiber Apparel Produced or Manufactured in Sri Lanka

October 19, 1993.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs reducing limits.

EFFECTIVE DATE: October 26, 1993.

FOR FURTHER INFORMATION CONTACT: Jennifer Aldrich, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce. (202) 482-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927-6708. For information on embargoes and quota re-openings, call (202) 482-3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the

Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for certain categories are being reduced for carryforward used.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see Federal Register notice 57 FR 54976, published on November 23, 1992). Also see 58 FR 34570, published on June 28, 1993.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Rita D. Hayes,
Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

October 19, 1993.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on June 22, 1993, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool and man-made fiber textile products and silk blend and other vegetable fiber apparel, produced or manufactured in Sri Lanka and exported during the twelve-month period beginning on July 1, 1993 and extending through June 30, 1994.

Effective on October 26, 1993, you are directed to amend the directive dated June 22, 1993 to reduce the limits for the following categories, as provided under the terms of the current bilateral agreement between the Governments of the United States and the Democratic Socialist Republic of Sri Lanka:

| Category | Adjusted twelve-month limit ¹ |
|---------------|--|
| 335/835 | 208,309 dozen. |
| 340/640 | 789,196 dozen of which not more than 308,020 dozen shall be in Categories 340-Y/640-Y ² . |
| 635 | 249,846 dozen. |

¹The limits have not been adjusted to account for any imports exported after June 30, 1993.

²Category 340-Y: only HTS numbers 6205.20.2015, 6205.20.2020, 6205.20.2046, 6205.20.2050 and 6205.20.2060; Category 640-Y: only HTS numbers 6205.30.2010, 6205.30.2020, 6205.30.2050 and 6205.30.2060.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Rita D. Hayes,

Chairman, Committee for the Implementation of Textile Agreements.

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 93-26096 Filed 10-22-93; 8:45 am]

BILLING CODE 5000-04-M

Office of the Secretary

Civilian Health and Medical Program of the Uniformed Services (CHAMPUS); DRG Revised Rates.

AGENCY: Office of the Secretary, DoD.

ACTION: Notice of DRG revised rates.

SUMMARY: This notice provides the updated adjusted standardized amounts, DRG relative weights, outlier thresholds, and beneficiary cost-share per diem rates to be used for FY 1994 under the CHAMPUS DRG-based payment system. It also describes the non-regulatory changes made to the CHAMPUS DRG-based payment system in order to conform to changes made to the Medicare Prospective Payment System (PPS).

EFFECTIVE DATE: The rates and weights contained in this notice are effective for admissions occurring on or after October 1, 1993.

ADDRESSES: Office of the Civilian Health and Medical Program of the Uniformed Services (OCHAMPUS), Program Development Branch, Aurora, CO 80045-6900.

For copies of the Federal Register containing this notice, contact the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783-3238. The charge for the Federal Register is \$1.50 for each issue payable by check or money order to the Superintendent of Documents.

FOR FURTHER INFORMATION CONTACT: Rose M. Sabo, M.P.A., Program Development Branch, OCHAMPUS, telephone (303) 361-1178

To obtain copies of this document, see the "ADDRESSES" section above. Questions regarding payment of specific claims under the CHAMPUS DRG-based payment system should be addressed to the appropriate CHAMPUS contractor.

SUPPLEMENTARY INFORMATION: The final rule published on September 1, 1987, (52 FR 32992) set forth the basic procedures used under the CHAMPUS DRG-based payment system. This was subsequently amended by final rules published on August 31, 1988 (53 FR 33461), October 21, 1988 (53 FR 41331),

December 16, 1988 (53 FR 50515), May 30, 1990 (55 FR 21863), and October 22, 1990 (55 FR 42560).

An explicit tenet of these final rules, and one based on the statute authorizing use of DRGs by CHAMPUS, is that the CHAMPUS DRG-based payment system is modeled on the Medicare prospective payment system (PPS), and that, whenever practicable, the CHAMPUS system will follow the same rules that apply to the Medicare PPS.

We are not initiating any changes to the CHAMPUS DRG-based payment system, but this notice describes certain changes which are necessary in order to conform to changes to the Medicare PPS. HCFA publishes these changes annually in the Federal Register and discusses in detail the impact of the changes.

In addition, this notice updates the rates and weights in accordance with our previous final rules. The actual changes we are making, along with a description of their relationship to the Medicare PPS, are detailed below.

I. Medicare PPS Changes Which Affect the CHAMPUS DRG-Based Payment System

Following is a discussion of the changes the Health Care Financing Administration (HCFA) has made to the Medicare PPS which affect the CHAMPUS DRG-based payment system.

A. DRG Classification

Under both the Medicare PPS and the CHAMPUS DRG-based payment system, cases are classified into the appropriate DRG by a Grouper program. The Grouper classifies each case into a DRG on the basis of the diagnosis and procedure codes and demographic information (that is, sex, age, and discharge status). The Grouper used for the CHAMPUS DRG-based payment system is the same as the current Medicare Grouper with two modifications. The CHAMPUS system has replaced Medicare DRG 435 with two age-based DRGs (900 and 901), and we have implemented thirty-four (34) neonatal DRGs in place of Medicare DRGs 385 through 390. Grouping for all other DRGs under the CHAMPUS system is identical to the Medicare PPS.

For FY 1994 HCFA will implement a number of changes in DRGs to reflect changes in treatment patterns, technology and other factors affecting use of hospital resources. These changes include adding two new DRGs, renaming tracheostomy DRGs, and recalibrating changes in the grouper. The CHAMPUS Grouper will duplicate all changes made to the Medicare Grouper.

DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C., chapter 35).

Title and OMB control number: DoD FAR Supplement, Part 217, Special Contracting Methods, and Related Clauses in Part 252.217; OMB Control Number 0704-0214.

Type of request: Reinstatement.

Number of respondents: 43,600.

Responses per respondent: 1.5.

Annual responses: 66,600.

Average burden per response: 10 hours.

Annual burden hours: 666,700.

Needs and uses: The DoD FAR Supplement, part 217, prescribes policies and procedures for the acquisition of supplies and services through the use of special contracting methods. The information collected hereby is used by contracting officers to (1) Determine the extent of work to be performed under Master Agreements, and, (2) that the contractor is adequately insured, and (3) to identify contractors' sources of supply in order to enhance competition.

Affected public: Businesses or other for-profit; Non-profit institutions; and Small businesses or organizations.

Frequency: On Occasion.

Respondent's obligation: Required to obtain or retain a benefit.

OMB desk officer: Mr. Peter N. Weiss. Written comments and recommendations on the proposed information collection should be sent to Mr. Weiss at the Office of Management and Budget, Desk Officer for DoD, room 3235, New Executive Office Building, Washington, DC 20503.

DOD clearance officer: Mr. William P. Pearce.

Written requests for copies of the information collection proposal should

B. Wage Index and Metropolitan Services Areas (MSAs)

The CHAMPUS DRG-based payment system will continue to use the same wage index amounts used for the Medicare PPS. In addition, we will continue to duplicate all changes with regard to the wage index of specific hospitals which are redesignated by the Medicare Geographic Classification Review Board.

C. Hospital Market Basket

We will update the adjusted standardized amounts according to the final updated hospital market basket used for the Medicare PPS. According to HCFA's September 1 final rule, the projected market basket for FY94 is 4.3 percent, to be reduced by 2.5 percentage points for urban areas and 1.0 percentage points for rural areas.

D. Payment for Blood Clotting Factor

The Health Care Financing Administration is reinstating payments for the cost of administering blood clotting factor to beneficiaries who have hemophilia through discharges occurring before October 1, 1994. CHAMPUS will also reinstate payments through discharges occurring before October 1, 1994. After that date, CHAMPUS will no longer make additional payments for these factors.

E. Outlier Payments for Transfer Cases

CHAMPUS is adopting the HCFA outlier thresholds for FY94.

F. Hospitals Excluded From the Prospective Payment System

CHAMPUS will continue to follow the limitations of exclusions for freestanding hospitals and distinct hospital units as set forth by HCFA. In order for a hospital to be exempt from the DRG-based payment system, it must

be exempt from the Medicare prospective payment system. Accordingly, CHAMPUS will not approve exclusion of all units of a hospital and will allow a psychiatric or rehabilitation unit to be excluded only if the unit is a component of a hospital that is under the PPS and the hospital has a sufficient number of beds subject to the PPS to permit the provision of adequate cost information as specified by HCFA.

II. Medicare Changes Which Are Not Being Adopted By CHAMPUS

The Health Care Financing Administration is implementing a number of changes related to capital costs. CHAMPUS is not implementing those changes at this time. Capital costs will continue to be handled as a pass-through cost under CHAMPUS.

III. Other Related Information

For FY 1994 the cost-to-charge ratio used for the CHAMPUS DRG-based payment system will be 0.617 which is increased to 0.627 to account for bad debts. This shall be used to calculate the adjusted standardized amounts and to calculate cost outlier payments, except for children's hospitals. For children's hospital cost outliers, the cost-to-charge ratio used is 0.684.

IV. Updated Rates and Weights

Tables 1 and 2 provide the rates and weights to be used under CHAMPUS DRG-based payment system during FY 1994 and which are a result of the changes described above. The implementing regulations for the CHAMPUS DRG-based payment system are in 32 CFR part 199.

Dated: October 19, 1993.

L.M. Bynum,
Alternate OSD Federal Register Liaison
Officer, Department of Defense.

The following summary provides the adjusted standardized amounts and the cost-share per diem for beneficiaries other than dependents of active-duty members.

The adjusted standardized amount are effective for admissions occurring on or after October 1, 1993.

TABLE 1.—NATIONAL URBAN AND RURAL ADJUSTED STANDARDIZED AMOUNTS, LABOR/NONLABOR, AND COST-SHARE PER DIEM

| | |
|---|------------|
| National Large Urban Adjusted: Standardized Amount | \$3,240.36 |
| Labor portion | 2,294.82 |
| Nonlabor portion | 945.54 |
| National Other Urban Adjusted: Standardized Amount | 3,187.67 |
| Labor portion | 2,257.51 |
| Nonlabor portion | 930.16 |
| National Rural Adjusted: Standardized Amount | 3,213.45 |
| Labor portion | 2,430.33 |
| Nonlabor portion | 783.12 |

The cost-share per diem is effective for inpatient days of care occurring on or after October 1, 1993.

| | |
|--|--------|
| Cost-share per diem for beneficiaries other than dependents of active-duty members | 271.00 |
|--|--------|

The following summary shows the final CHAMPUS DRG weights, arithmetic and geometric mean lengths of stay, and outlier thresholds for all CHAMPUS DRGs. Long stay threshold (A) is applicable to all hospitals except children's hospitals, and long stay threshold (B) is applicable to children's hospitals.

TABLE 2.—CHAMPUS WEIGHT AND THRESHOLD SUMMARY

[Effective for admissions occurring on or after October 1, 1993]

| DRG No. | Description | CHAMPUS weight | Arithmetic mean los | Geometric mean los | Short stay threshold | Long stay threshold | |
|---------|---|----------------|---------------------|--------------------|----------------------|---------------------|-----|
| | | | | | | (A) | (B) |

DEPARTMENT OF EDUCATION

National Assessment Governing Board; Teleconference Meeting

AGENCY: National Assessment Governing Board, Education.

ACTION: Amendment to published notice of Executive Committee meeting.

SUMMARY: Notice is hereby given of an amendment to the notice of a teleconference meeting of the Executive Committee of the National Assessment Governing Board scheduled for October 22, 1993 published on October 18, 1993, FR 58, page 53719. The meeting date is changed; the time and agenda are unchanged. The Committee will meet in open session, on October 25, 1993, beginning at 11 a.m.

Dated: October 20, 1993.

Roy Truby,

Executive Director, National Assessment Governing Board.

[FR Doc. 93-26143 Filed 10-22-93; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Financial Assistance for Transitional Economic Development Planning

AGENCY: Pinellas Area Office, Albuquerque Operations Office, DOE.

ACTION: Notice of intent.

SUMMARY: The Pinellas Area Office intends to award a financial assistance agreement to The Enterprise Corporation of Tampa Bay (TEC) to develop a strategy for economic development planning for the local communities surrounding the Pinellas Plant. This project is necessary to help transition the communities' economy to non-defense enterprises, based on the Department's decision to withdraw the weapons mission from the Pinellas Plant. TEC has been chosen to lead the communities of the Tampa Bay area in their efforts to lessen the impact of

defense downsizing. The proposed award will help strategize for business stability and growth, identification of alternative uses of facilities/assets, and workforce transition. Further the financial assistance agreement will provide for a community economic development plan and administrative support for stakeholder organizations. A \$500,000 award covering as long as a three-year project period is contemplated.

FOR FURTHER INFORMATION CONTACT: Address comments to the attention of Edward E. Patenaude, Department of Energy, Pinellas Area Office, P.O. Box 2900, Largo, FL 34649-2900, (813)541-8196.

SUPPLEMENTARY INFORMATION: The financial assistance is to be awarded under the Department of Energy's (DOE), Technical Integration Program (Catalogue of Federal Domestic Assistance No. 81.103). It is authorized under the DOE Organizational Act, Pub. L. 95-91, as amended. Restricted eligibility is necessary in that the recipient organization must be uniquely qualified (10 CFR part 11, § 600.7(b)(2)(i)(d)). TEC is so qualified in that it has been selected by the local community to be the lead organization in coordinating, organizing and implementing Tampa Bay Defense Transition Task Force initiatives and programs.

Issued in Albuquerque, New Mexico on October 18, 1993.

Richard A. Marquez,
Assistant Manager for Management and Administration.

Sources Sought Announcement for Upcoming Class III Near-Term Solicitation

AGENCY: Bartlesville Project Office and Pittsburgh Energy Technology Center, Department of Energy.

ACTION: Near-term program opportunity notice.

SUMMARY: The U.S. Department of Energy, Bartlesville Project Office

through the Pittsburgh Energy Technology Center, announces that it intends to issue a competitive Program Opportunity Notice (PON) in support of maximizing the economic producibility of oil from Slope and Basin clastic (Class III) reservoirs. A public meeting is being scheduled.

DATES: The scheduled release date for the solicitation is January 28, 1994. No details pertaining to the public meeting are available at this time.

ADDRESSES: A copy of all pertinent information, including the solicitation, may be obtained by writing to the Department of Energy, Pittsburgh Energy Technology Center, Attention Keith R. Miles, Contract Specialist, P.O. Box 10940, Mail Stop 921-118, Pittsburgh, PA 15234. Requests may be faxed to 412/892-6216.

SUPPLEMENTARY INFORMATION:

Program Opportunity Notice No. DE-PS22-94BC14972

Title of Solicitation

Class III Oil Program: Near-Term Activities

Objective

The specific objective of this Program Opportunity Notice is to solicit applications to conduct cost-shared projects in domestic Slope and Basin clastic reservoirs that lead to maximizing the economic producibility of the domestic oil resource. These projects should extend the economic life of Slope and Basin clastic reservoirs through the improved understanding of the reservoirs, recovery processes, and producibility constraints. This understanding should lead to technology transfer to domestic operators with analogous reservoirs or similar production problems; projects may include a field demonstration.

Sources Sought

Organization interested in being placed on the Department's source list for information, are encouraged to submit a written request to the address listed in this announcement. The request must include: The company

name, address, and point of contact, including telephone number.

Any organization who has previously responded to the DOE Bartlesville Project Office's "Open Letter" dated August 16, 1993 need not respond to this announcement.

Dated: October 19, 1993.

Dale A. Siciliano,

Contracting Officer.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. ER93-216-000, et al.]

Montana Power Co., et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

October 19, 1993.

Take notice that the following filings have been made with the Commission:

1. Montana Power Company

[Docket No. ER93-216-000]

Take notice that on October 8, 1993, the Montana Power Company (Montana) tendered for filing with the Federal Energy Regulatory Commission an amendment to its original filing of Service Schedule F-3 to Rate Schedule FERC No. 3, an "Interconnection Agreement between the Montana Power Company, Idaho Power Company and Utah Power & Light Company. This amended filing provides additional information requested through a deficiency letter issued under this docket.

Comment date: November 1, 1993, in accordance with Standard Paragraph E at the end of this notice.

2. Enron Power Marketing, Inc.

[Docket No. ER94-24-000]

Take notice that on October 12, 1993, Enron Power Marketing, Inc. (EPMI) tendered for filing a petition for waivers and blanket approvals under various regulations of the Commission and for an order accepting its F.E.R.C. Electric Rate Schedule No. 1 to be effective October 12, 1993.

Comment date: November 1, 1993, in accordance with Standard Paragraph E at the end of this notice.

3. Kentucky Utilities Company

[Docket No. ER94-29-000]

Take notice that on October 15, 1993, Kentucky Utilities Company (KU) tendered for filing a revised executed Contract for Electric Service with the City of Madisonville for its east substation delivery point.

Comment date: November 2, 1993, in accordance with Standard Paragraph E at the end of this notice.

4. Southwestern Electric Power Company

[Docket No. ER93-856-000]

Take notice that on October 14, 1993, Southwestern Electric Power Company (SWEPCO) filed additional information in response to a Commission Staff inquiry regarding Amendment No. 1 to the Restated and Amended Interconnection Agreement between SWEPCO and Gulf States Utilities Company (Amendment No. 1).

SWEPCO has served a copy of this filing on Gulf States, the Public Utility Commission of Texas, Entergy Corporation and counsel for the intervenors, Brazos Electric Power Cooperative, Inc., Cajun Electric Power Cooperative, Inc. and Entergy Services, Inc.

Comment date: November 2, 1993, in accordance with Standard Paragraph E at the end of this notice.

5. Boston Edison Company

[Docket No. ER94-27-000]

Take notice that on October 14, 1993, Boston Edison Company (Edison) tendered for filing an agreement with Northeast Energy Associates (NEA) pursuant to which Boston Edison will provide coordination services for switching and tagging of transmission lines used by NEA for interconnection to the New England transmission grid.

Edison states that it has served the filing on NEA and the Massachusetts Department of Public Utilities.

Comment date: November 2, 1993, in accordance with Standard Paragraph E at the end of this notice.

6. Boston Edison Company

[Docket No. ER94-28-000]

Take notice that on October 14, 1993, Boston Edison Company (Edison) tendered for filing two agreements with Northeast Energy Associates (NEA, developer of a qualifying facility, for the interconnection of NEA's facility to Boston Edison's transmission system. Edison requests that these agreements be allowed to become effective June 28, 1989 and September 24, 1993, respectively. As good cause for a waiver of the 60-day notice requirement of section 205 to permit retroactive effective dates, Edison states that these agreements are being filed pursuant to the amnesty granted by the Commission in Docket No. PL93-2-002.

Edison states that it has served the filing on NEA and the Massachusetts Department of Public Utilities.

Comment date: November 2, 1993, in accordance with Standard Paragraph E at the end of this notice.

7. Missouri Public Service, Division of UtiliCorp United Inc.

[Docket No. ER94-25-000]

Take notice that Missouri Public Service, Division of UtiliCorp United Inc. (MPS) on October 13, 1993, tendered for filing an Amendment to the Transmission and Interconnection Agreement between MPS and Associated Electric Cooperative, Inc. (AEC) dated August 24, 1988.

The filing states that the Amendment was entered into in order to add two new delivery points at Faucett and Orrick Missouri. No change in rates will occur as a result of the Amendment. MPS is requesting waiver of the Commission's notice requirements so that as to the Orrick interconnection, the Amendment can become effective on August 9, 1993, as the parties agreed. As to the Faucett interconnection, MPS requests an effective date 60 days from the date of this filing, i.e., December 13, 1993.

Copies of the filing were served upon AEC and the Missouri Public Service Commission.

Comment date: November 2, 1993, in accordance with Standard Paragraph E at the end of this notice.

8. Northeast Utilities Service Company

[Docket No. ER93-914-000]

Take notice that on October 13, 1993, Northeast Utilities Service Company (NUSCO), on behalf of The Connecticut Light and Power Company (CL&P), tendered for filing a revised amendment for additional capacity purchases by New England Power Company (NEP).

Comment date: November 2, 1993, in accordance with Standard Paragraph E at the end of this notice.

9. Central Illinois Public Service Company

[Docket No. ER93-418-001]

Take notice that on October 13, 1993, Central Illinois Public Service Company (CIPS) tendered for filing its compliance filing in this docket.

Comment date: November 2, 1993, in accordance with Standard Paragraph E at the end of this notice.

10. Southern California Edison Company

[Docket Nos. ER76-205-014 (Phase II) ER79-150-022 (Phase II), ER81-177-016, ER82-427-011, ER84-74-017, ER86-271-003, ER87-483-004, and FA85-67-005]

Take notice that on October 15, 1993, Southern California Edison Company

tendered for filing its compliance filing in the above referenced dockets.

Comment date: November 2, 1993, in accordance with Standard Paragraph E at the end of this notice.

11. Central Illinois Light Company

[Docket No. ER94-26-000]

Take notice that Central Illinois Light Company (CILCO), on October 14, 1993, tendered for filing with the Commission a contract amendment to the Service Schedules contained in CILCO's Interconnection Agreement with Illinois Power Company (CILCO Rate Schedule FERC No. 24). This amendment has been filed for the purpose of reflecting current costs in the rates and consolidating several service schedules.

CILCO proposes the rate schedule changes to be effective on December 15, 1993.

Copies of the filing were served on Illinois Power and the Illinois Commerce Commission.

Comment date: November 2, 1993, in accordance with Standard Paragraph E at the end of this notice.

12. Central and South West Services, Inc.

[Docket No. ER94-32-000]

Take notice that on October 15, 1993, Central and South West Services, Inc. (CSWS), as agent for the electric utility operating companies of the Central and South West Corporation, tendered for filing a Restated and Amended Operating Agreement dated October 1, 1993. The Operating Agreement forms the basis for the coordinated operations of the CSW Operating Companies: Central Power and Light Company Public Service Company of Oklahoma, Southwestern Electric Power Company and West Texas Utilities Company. The Restated and Amended Operating Agreement includes a number of minor changes to the currently effective Operating Agreement, most of which merely eliminate obsolete factual references, clarify terminology or address internal CSW management procedures. Because the Restated Agreement also includes proposed reductions in two fixed charge rates used in pricing internal CSW System transactions, CSWS believes that the filing constitutes a rate increase.

The filing also conforms the terms of the Operating Agreement to established practice in several respects. In connection with these changes, CSW requests, to the extent necessary, amnesty treatment in accordance with the Commission's Final Order in Docket No. PL93-2-002, 64 FERC ¶61,139 (1993).

CSWS proposes an effective date of January 1, 1994 for the Restate Agreement.

Copies of the filing were sent to the Arkansas Public Service Commission, the Louisiana Public Service Commission, the Oklahoma Corporation Commission and the Public Utility Commission of Texas.

Comment date: November 2, 1993, in accordance with Standard Paragraph E at the end of this notice.

13. PacifiCorp

[Docket No. ER93-908-000]

Take notice that on October 14, 1993, PacifiCorp tendered for filing, an amendment to its filing in the docket referenced above. PacifiCorp has provided additional justification for its request of waiver of prior notice for services under its General Transfer Agreement with Bonneville Power Administration (Bonneville).

Copies of this filing have been supplied to Bonneville and the Public Utility Commission of Oregon.

Comment date: November 2, 1993, in accordance with Standard Paragraph E end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

Office of Energy Efficiency and Renewable Energy

State Energy Advisory Board; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: State Energy Advisory Board.

Date and Time: November 9, 1993—9 a.m. to 5 p.m. November 10, 1993—9 a.m. to 5 p.m.

Place: Courtyard Marriott, 2899 Jefferson Davis Hwy., Arlington, VA 22202, (703) 549-3434.

Contact: Sarah Kirchen, U.S. Department of Energy, Office of Technical and Financial Assistance, Officer of Energy Efficiency and Renewable Energy, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone: 202-586-1893, FAX: 202-586-1605.

Purpose of the Board: To make recommendations to the Assistant Secretary for Energy Efficiency and Renewable Energy regarding the goals and objectives and programmatic and administrative policies related to the Department's energy efficiency and renewable energy programs, and to otherwise carry out the Board's responsibilities as designated in the State Energy Efficiency Programs Improvement Act of 1990 (Pub. L. 101-440).

Purpose of the Meeting: To provide the Department with a Board consensus statement on FY95 budget and strategic planning priorities; to review 1992 National Energy Policy Act (EPACT) provisions and develop a work plan focused on the funding and implementation of these provisions; to discuss relationships among energy efficiency and renewable energy stakeholders (including Federal and State governments, industry, and the National Laboratories).

Tentative Agenda

- Orientation of new Board members and other internal Board business.
- Discussion of DOE FY95 budget and strategic plans.
- Discussion of EPACT issues.
- Discussion of energy efficiency and renewable stakeholders.

Public Participation: The meeting is open to the public. The chairperson of the Board is empowered to conduct the meeting to facilitate the orderly conduct of business. Any member of the public who wishes to make an oral statement pertaining to agenda items should contact Sarah Kirchen at the address or telephone number listed above. Requests must be received at least five days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. Each public comment is limited to 10 minutes.

Transcript: Available for public review and copying at the Public Reading Room, room 1E-190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC between 9 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on October 20, 1993.

Howard H. Raiken,

Advisory Committee Management Officer.

[FR Doc. 93-26171 Filed 10-22-93; 8:45 am]

BILLING CODE 6450-01-M

Office of Hearings and Appeals**Issuance of Decisions and Orders During the Week of July 12 Through July 16, 1993**

During the week of July 12 through July 16, 1993, the decisions and orders summarized below were issued with respect to appeals and applications for exception or relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeals*Plumbers & Steamfitters Local 150, 7/16/93, LFA-0304*

Plumbers and Steamfitters Local 150 appealed from a partial denial by the Savannah River Field Office of a Freedom of Information Request. The firm sought certified payroll records of a DOE contractor for the purpose of monitoring whether the contractor was complying with the Davis-Bacon Act. The Field Office released the documents in part. The names, addresses, and social security numbers of the employees were withheld pursuant to FOIA Exemption 6, which exempts from disclosure information that would constitute an unwarranted invasion of personal privacy. The DOE noted that the material that was released would, for the most part, enable the union to monitor compliance with the Davis-Bacon Act. The DOE found that privacy interests of the employees were not outweighed by the marginal contribution that the information would make to the public's understanding of government's enforcement of the Act. Accordingly, the Appeal was denied. *Shapiro, Fussell, Wedge & Smotherman, 7/15/93, LFA-0306*

Shapiro, Fussell, Wedge & Smotherman (Shapiro) filed an Appeal from a determination issued to it by the Strategic Petroleum Reserve Project Management Office (SPRMO) of the DOE. The determination denied, in part, a Request for Information that Shapiro had submitted under the Freedom of Information Act (FOIA). Shapiro requested records pertaining to an award made to a subcontractor for increased costs resulting from various engineering change notices. SPRMO withheld a document entitled "Analysis and Recommendations for Final Settlement" (Recommendation Document) pursuant to Exemption 5 of the FOIA. In considering the Appeal, the DOE found that the SPRMO had correctly withheld some of the material in the Recommendation Document, but

had withheld some segregable and releasable factual material and material which had been expressly adopted in the final decision adjudicating the subcontractor's claims. In addition, material setting forth the subcontractor's cost data was found to be not withholdable under Exemption 5. Consequently, the DOE remanded the matter to the SPRMO to release the segregable factual material and the material which had been expressly adopted in the final decision. The decision also directed the SPRMO to issue a new determination regarding the subcontractor cost data.

Requests for Exception*Duncan Thompson Petroleum, Inc., 7/13/93 LEE-0048*

Duncan Thompson Petroleum, Inc., filed an Application for Exception from the Energy Information Administration (EIA) requirement that it file Form EIA-782B, the "Reseller/Retailer's Monthly Petroleum Product Sales Report." In considering the Duncan Thompson request, the DOE found that the firm was not experiencing either gross inequity or serious hardship as a result of the EIA-782B filing requirement. On June 4, 1993, the DOE issued a Proposed Decision and Order tentatively determining that the exception request should be denied. No Notice of Objection to the Proposed Decision and Order was filed with the DOE within the prescribed time period. Therefore, on July 13, 1993, the DOE issued the Proposed Decision and Order in final form, denying Duncan Thompson's Application for Exception.

Lozier Oil Co., Inc., 7/16/93 LEE-0049

Lozier Oil Co., Inc. (Lozier) filed an Application for Exception from the Energy Information Administration (EIA) requirement that it file Form EIA-782A, the "Reseller/Retailer's Monthly Petroleum Product Sales Report." In considering the request, the DOE found that the firm was not experiencing either a gross inequity or serious hardship. Accordingly, the DOE issued a Proposed Decision and Order tentatively determining that the exception request should be denied. The time period within which a Notice of Objection could have been filed expired and no such document was received from Lozier or from any other potentially aggrieved party. Consequently, the Proposed Decision and Order was issued in final form.

Refund Applications*Murphy's Oil Corporation/Savings Oil Company 7/15/93 RF315-1175*

The DOE issued a Decision and Order granting an Application for Refund filed in the Murphy Oil Corporation special refund proceeding on behalf of Savings Oil Company and its affiliates (Savings). Savings sought a refund equal to its full allocable share based on its purchases of Murphy gasoline. In support of its claim of injury, the firm submitted information showing its cumulative banked gasoline costs at the end of the banking period and a competitive disadvantage analysis for its purchases of Murphy regular, unleaded, and premium gasolines. For its competitive disadvantage analysis, however, Savings could not provide the purchase price per gallon for each grade of gasoline. Instead, for each calendar quarter of the refund period the firm submitted the "composite purchase price" of its gasoline purchases, that is, the weighted average price per gallon paid for all three grades combined (equalling the total cost paid divided by the total gallons purchased of all three grades). The firm compared these composite prices with quarterly composite average market prices based upon data from Platt's Oil Price Handbook and Oilmanac. The OHA noted that because Savings' records do not state the price per gallon paid for each grade of gasoline, the firm's competitive disadvantage analysis could have overstated the disadvantage experienced by the firm in its purchases of one or another grade of gasoline at any particular time. The DOE found that it could not determine, for example, if the composite purchase price for any particular quarter reflected purchases of unleaded gasoline made at a strong competitive disadvantage which in turn would mask purchases of regular and premium gasoline at a competitive advantage. The DOE determined, however, that there was nothing in the material submitted by the applicant to suggest that such masking was likely to have occurred. Accordingly, the firm received a total refund of \$41,798 consisting of \$27,767 in principal and \$14,031 in accrued interest.

Murphy Oil Corporation/ Stormy Oil Company, 7/15/93, RF309-871

This Decision and Order concerns an Application for Refund filed by Mr. & Mrs. David Storms on behalf of the Stormy Oil Company (Stormy). In considering the submission, reference prices from the Energy Information Administration's State Energy Price and Expenditure Data System for middle distillate and Platt's Oil Price Handbook and Oilmanac (Platt's) for motor gasoline, were used to convert the firm's annual gross income to a reasonable

estimate of the volume of its purchases of Murphy refined products. Using this methodology, the DOE concluded that it was reasonable to estimate that Stormy had purchased 2,486,924 gallons of Murphy refined products (comprised of 1,314,200 gallons of middle distillate and 1,172,724 gallons of gasoline). On the basis of this estimate, a refund of \$3,059 (comprised of \$2,032 in principal and \$1,027 in interest) was granted.

Texaco Inc./Bob Magari Texaco, 7/12/93, RF321-19788

The DOE issued a Decision and Order concerning an Application for Refund filed in the Texaco refund proceeding on behalf of Bob Magari Texaco by its

owner, Mr. Bob Magari. That Decision rescinded in part a February 9, 1993 refund that was granted to Mr. Magari on the basis of the refined product purchases of another Texaco retail outlet. Because Mr. Magari's actual Texaco purchases were less than those that formed the basis of the original refund, Mr. Magari was required to remit \$363 to the DOE.

Texaco Inc./Mooney Texaco, 7/14/93, RF321-16790

The DOE issued a Decision and Order denying an Application for Refund filed on behalf of Mooney Texaco the Texaco Inc. special refund proceeding. The DOE found that because Mooney Texaco did not purchase from Texaco, but sold

Texaco product on consignment for an independent distributor of Texaco products, Mooney Texaco could not have been injured by any Texaco overcharges and consequently was not entitled to a refund in the Texaco proceeding.

Refund Applications

The Office of Hearings and Appeals issued the following Decisions and Orders concerning refund applications, which are not summarized. Copies of the full texts of the Decisions and Orders are available in the Public Reference Room of the Office of Hearings and Appeals.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-4791-5]

Evaluation of the Potential for External Corrosion and Review of Cathodic Protection Monitoring Associated With sti-P3 Underground Storage Tanks Data Availability

AGENCY: Environmental Protection Agency.

ACTION: Notice of data availability.

SUMMARY: The Environmental Protection Agency (EPA) is today publishing a notice of data availability regarding a report completed by Tillinghast, a Towers Perrin Company, on behalf of the Steel Tank Institute (STI). The Tillinghast report examines the potential for external corrosion of sti-P3 underground storage tanks (USTs) as well as owners' and operators' corrosion monitoring practices for USTs. The Agency's current regulations for corrosion monitoring require periodic post-installation monitoring of cathodically protected steel underground storage tanks. The Steel Tank Institute approached EPA in 1992, requesting it alter the mandated monitoring frequency for cathodic

protection monitoring of steel USTs, and specifically, USTs manufactured by STI members under the "sti-P3" specification. EPA responded by agreeing to consider data supplied by an independent, third-party examination of STI's initial findings, as part of an overall data collection process. This notice summarizes the methodology, findings, and conclusions of the study. EPA encourages public review and comment on the Tillinghast report, as it may be used in arriving at a final determination regarding STI's request for EPA to modify the current requirements for cathodic protection monitoring for steel underground storage tanks.

DATES: Written comments on this notice must be submitted on or before December 27, 1993.

ADDRESSES: Written comments on today's supplemental notice should be addressed to the docket clerk at the following address: U.S. Environmental Protection Agency, RCRA Docket (OS-305), 401 M Street, SW., Washington, DC 20460. One original and two copies of comments should be sent and identified by regulatory docket reference number UST 2-9. The docket is open from 9 a.m. to 4 p.m., Monday through Friday, excluding Federal holidays. Docket materials may be reviewed by appointment by calling (202) 260-9327. Copies of docket materials may be made at no cost, with a maximum of 100 pages of material from any one regulatory docket. Additional copies are \$0.15 per page. For a copy of the Tillinghast report, contact the EPA RCRA Docket.

FOR FURTHER INFORMATION CONTACT: For general information about this supplemental notice, contact the RCRA/ Superfund/OUST Hotline, Office of Solid Waste and Emergency Response, U.S. Environmental Protection Agency Washington, DC 20460, (800) 424-9346 (toll-free) or (703) 412-9810 (local). For the hearing impaired, the number is (800) 553-7672 (toll-free). For further

information, contact Amy Hazeltine in the Office of Underground Storage Tanks at (703) 308-8898.

SUPPLEMENTARY INFORMATION:

I. Background

A. Technical Requirements for Underground Storage Tanks

Final regulations for Underground Storage Tanks (USTs) containing regulated substances were promulgated by the Agency in September and October, 1988 and became effective in December, 1988 and January, 1989. The regulations include technical requirements for new and existing underground storage tanks and piping, financial responsibility requirements for UST owners and operators, and state program approval requirements. In order to prevent releases, EPA included in the technical requirements four important categories of preventative measures: (1) Tank design and installation, (2) release detection, (3) corrosion protection, and (4) spill and overflow control. All UST systems installed after December 22, 1988 must meet Federal requirements immediately. Owners of tank systems installed on or before that date have until December 22, 1998 to either upgrade their tanks with corrosion protection and spill and overflow devices, replace them with new tank systems, or close them in accordance with the regulatory requirements.

According to a study conducted for EPA in 1987, corrosion of tanks and piping was a major cause of UST system releases. At that time, most installed USTs and piping were constructed of "bare steel"—steel without corrosion protection. When buried in the ground, steel without corrosion protection can be destroyed by external corrosion, resulting in leaks. One type of corrosion protection is cathodic protection, which is a technique to prevent corrosion of a surface by making that surface the cathode of an electrochemical cell. For UST systems, this can be done by

applying either galvanic anodes or impressed electric current.

The UST regulations include requirements for the operation and maintenance of corrosion protection of steel UST systems. As part of these requirements, owners and operators of steel UST systems equipped with cathodic protection must ensure that all cathodic protection systems are tested within 6 months of installation and at least every 3 years thereafter, or according to another reasonable time frame established by the implementing agency. See 40 CFR 280.31(b)(1). The Preamble to the rule noted that, after consultation with groups of industry experts during the public comment period, EPA now agrees with the commenters who recommended that all cathodic protection systems should be tested at the same frequency and the Agency is now requiring in the final rule that all cathodic protection systems be tested within 6 months of installation and at least every 3 years thereafter. These intervals are sufficient to detect any damage or failure of the system and to take remedial action in time to prevent structural failures due to corrosion. EPA understands that this time interval is consistent with sound practice as is now recommended in the recently revised NACE (National Association of Corrosion Engineers) code and by major tank manufacturers. See 53 FR 37137.

B. Steel Tank Institute Request and Study Report

The Steel Tank Institute (STI) is a trade organization comprised of steel tank manufacturers. STI members manufacture pre-engineered underground storage tanks built to the "sti-P3" specification, for storage of liquids at atmospheric pressure. Tanks meeting the sti-P3 specification employ three types of corrosion protection: (1) Dielectric coating, (2) electrical isolation, and (3) cathodic protection through factory-installed anodes. More than 200,000 sti-P3 tanks have been fabricated and placed in use since 1969, the vast majority since 1985, and they are commonly installed today.

Single-wall sti-P3 tanks in service for storage of Federally regulated substances are covered by the cathodic protection monitoring requirements outlined above. Those tank owners who installed sti-P3 tanks in Federally regulated service between late 1988 and February of 1993 were eligible to enroll in STI's "Watchdog" cathodic protection monitoring service. The Watchdog service, performed through STI, provides cathodic protection monitoring in compliance with the EPA

requirements. Since February of 1993, a simplified, user-friendly cathodic protection monitoring test system with a buried reference cell is installed with new sti-P3 tanks subject to Federal UST regulations. Those sti-P3 systems installed prior to 1988 have been operated without cathodic protection monitoring in most cases.

In the spring of 1992, STI requested that EPA alter the frequency of cathodic protection monitoring from the current requirements, to monitoring within 6 months of installation and subsequently only after any disturbance of the excavation (e.g., retrofit of Stage II vapor recovery systems). Periodic monitoring would therefore not be required. STI provided data on the performance of sti-P3 tanks and on potential costs for cathodic protection monitoring of sti-P3 tanks in support of its request.

STI and its members believe that the mandated frequency for cathodic protection monitoring should be changed for the following reasons:

- * The sti-P3 tank has a very good performance record;
- * The much more frequent monthly leak detection checks required by the UST regulations supersede the need for cathodic protection monitoring;
- * There is inequity in that thousands of existing steel tanks without corrosion protection, which are much more likely to fail before phase-out in 1998, are not subject to the cathodic protection monitoring requirement;
- * Periodic tank deflection monitoring for fiberglass-reinforced plastic (FRP) tanks was not required in EPA's UST regulations due to the low incidence of failure in FRP tanks (less than 0.5 percent), and sti-P3 tanks have similarly low failure rates;
- * UST buyers consider cathodic protection monitoring and the associated recordkeeping required with steel tanks to be an inconvenience, and this affects buyers' choices among UST technologies;
- * There is a high cost of compliance to industry; and
- * Regulatory enforcement efforts are directed at clean-ups and leak detection, not cathodic protection—an indicator that monitoring cathodic protection is not an essential activity towards protecting human health and the environment.

The Agency took no regulatory action in response to STI's request and the supporting information. STI asked Tillinghast, an international risk management and actuarial consulting firm with experience in underground storage issues, to conduct an independent, third-party audit of STI's data. In May of 1993, STI provided the

Agency with a report prepared by Tillinghast titled "Evaluation Of The Potential For External Corrosion And Review Of Cathodic Protection Monitoring Associated With sti-P3 Underground Storage Tanks." An abstract of the report follows.

The pollution prevention components of the UST regulations (including corrosion protection) are very important to the UST program. Therefore, the Agency has decided to publish this Notice of Data Availability and solicit public comment on the report to ensure a more complete understanding of the issue at hand. This Notice includes several questions to help guide public discussion. The Agency is interested in responses to any of the questions listed below, and other issues the public may identify, such as the costs/benefits of the monitoring requirement itself.

II. Abstract

In May 1993, Tillinghast completed a study on behalf of the Steel Tank Institute (STI) which surveyed tank owners, tank installers, and regulators to identify any instances of failures of sti-P3 tanks attributed to external corrosion and to obtain experience information on cathodic protection monitoring practices. A summary of Tillinghast's methodology, findings, and conclusions follows.

Methodology

Tillinghast telephone-surveyed randomly selected sti-P3 underground storage tank (UST) owners and tank installers as well as Federal and State UST regulators about the condition and general maintenance of sti-P3 tanks. These individuals, along with data from the STI Watchdog program (a corrosion monitoring program initiated by STI in 1988 to assist tank owners in complying with EPA corrosion monitoring requirements) provided information on the frequency, conditions, and other aspects of the cathodic protection monitoring practices for sti-P3 tanks. In addition, the survey sought performance history on sti-P3 tanks which were not subject to cathodic protection testing. Tillinghast also examined environmental impairment, warranty, and product liability insurance claims from the Steel Tank Insurance Company (STICO, a captive insurance company formed by steel tank manufacturers).

Tillinghast selected a sample of owners and installers through STI's computer data base containing over 200,000 registered tanks. The sample covered the following nine states: Washington, Virginia, Vermont, South Dakota, Colorado, Florida, Texas, Missouri and Kentucky. The nine states

represented a variety of climates, tank environments, saturation periods, water tables, and soil conditions. Tillinghast's sample also included a variety of tank sizes (from 500 to 20,000 gallons) and contained petroleum marketers and non-marketers. Tillinghast examined the following registration periods: 1970-75, 1980-81, 1985, and 1990. The examined registration periods began in 1970 when sti-P3 tanks first became well known to owners/operators and continue to the present.

Tillinghast successfully contacted 110 owners with immediate supervision over 385 sti-P3 tanks and secondary responsibility for approximately 2500 sti-P3 tanks at other locations. In addition, researchers contacted 37 installers throughout the geographic sample who had experience in over 5000 sti-P3 tank installations. Finally, Tillinghast contacted the Environmental Protection Agency's ten Regional UST offices as well as each of the nine State UST regulatory offices included in the sample.

Tillinghast obtained summary information on 103 environmental impairment and product liability insurance closed claims for sti-P3 tanks from STICO to identify any instances where payment was made due to a product release. Tillinghast also randomly selected eight of the 103 claims to specifically review the "cause of incident" data.

Findings

Tillinghast identified findings related to the following areas: Testing of cathodic protection systems, cathodic protection monitoring practices, environmental and product liability claims, and understanding of and compliance with EPA's technical requirements.

Tillinghast's survey of tank owners and installers covered over 8,000 sti-P3 tanks. Within the surveyed population, respondents reported three instances of sti-P3 tank external corrosion—one of which involved a product release. Of the regulators Tillinghast surveyed, those who had witnessed the removal of sti-P3 tanks reported that the tanks and sacrificial anodes were in "excellent condition upon removal." Regulators did not provide information on the ages of the tanks that were considered to be in "excellent condition upon removal."

Tillinghast reported that corrosion monitoring requirements (and the technical basis for those requirements) are not well understood by most tank owners, installers, or regulators. Furthermore, Tillinghast reported that unless an sti-P3 owner/installer signed up for STI's Watchdog program,

cathodic protection monitoring for sti-P3 tanks installed since the promulgation of EPA's technical regulations was generally not being performed, although some large sti-P3 tanks users did perform independent testing.

Tillinghast's review of data from STI and from owners' research indicated that test variability can be high for corrosion monitoring tests conducted on any given site. Watchdog participants and major oil companies (many of whom conduct their own corrosion monitoring) reported few readings less than the 850 millivolt compliance point for corrosion monitoring. Tillinghast identified human error (in tank installation or testing) as one cause for obtaining disreputable corrosion monitoring results. Unusually dry soil conditions and other physical factors also influenced the accuracy of cathodic protection system testing.

Tillinghast obtained data from installers, tank owners, and major oil companies on the annual cost of corrosion monitoring. The data showed the annual cost of corrosion monitoring to range from \$130 to \$500 per location (each location having an average of 3.2 tanks). The impact of these costs was greatest on small, single location owners due to the necessity of hiring a contractor to travel to the site to perform the monitoring.

Tillinghast's investigation of STICO limited warranty and environmental and product liability insurance closed claims revealed that most of the sti-P3 claims that entailed both administrative and investigative costs involved improper installation techniques or errors in tank manufacturing workmanship. Fifty-six of the 103 claims incurred administrative expense but no claims costs or expenses, leaving 47 others which incurred some sort of investigative cost (e.g., tightness test). Only four of the 47 incidents in which investigative cost was incurred actually involved a claims payment. Tillinghast's review of eight randomly chosen closed claims for "cause of incident" data demonstrated that a pattern of faulty workmanship, bad installation, or a combination of both resulted in corroded sti-P3 tanks.

Conclusions

Tillinghast found no instances of external corrosion of sti-P3 tanks that had been properly fabricated, transported, and installed. Of the more than 8000 sti-P3 tank installations represented by owners and installers, only three instances of external corrosion were reported, a frequency of 0.04%, and only one involved a product

release. Tillinghast did not have enough corrosion monitoring data to statistically determine an optimum monitoring frequency for cathodic protection.

Tillinghast's survey concluded that less than 10% of the Watchdog participants or major oil companies who maintain their own corrosion monitoring programs and installed sti-P3 tanks in 1990, reported readings below the 850 millivolt compliance point for corrosion monitoring. Finally, Watchdog monitoring data from 1991, 1992, and the first quarter of 1993 indicate that based on cathodic protection monitoring readings, the number of sti-P3 tanks with cathodic protection readings of -850 millivolts or greater is increasing.

III. Public Comments

EPA is interested in any comments that the public may have on the content of this report, and is especially interested in any additional quantitative data commenters may provide. In particular, the Agency is interested in receiving answers to the questions listed below.

* What data are available that confirm or refute the report's findings on corrosion protection of sti-P3 USTs? In particular, have problems with corrosion protection (such as external corrosion) on sti-P3 tanks been observed? If so, what were the numbers, types, severity, and impacts of these problems? What were the ages of any sti-P3 tanks with problems with corrosion protection, and were these problems caused during, before, or after installation? What are the sti-P3 label numbers, if available, for verification purposes?

* For any sti-P3 tanks observed to have problems with corrosion protection, including tanks and piping, did cathodic protection monitoring indicate a lack of protection? If so, when was a lack of protection found—within 6 months of installation or during a later test? If monitoring was not performed, would it have indicated a lack of protection if it had been done?

* What data are available addressing the above issues for cathodically protected steel USTs that are not sti-P3 USTs? If problems were observed, were they observed with field installed or with factory installed cathodic protection systems?

* What information is available confirming or refuting the study's representation of the costs and benefits of cathodic protection monitoring of UST systems?

* How does the simplified, permanently installed cathodic protection monitoring system, now installed with new Federally regulated

sti-P3 tanks, change cathodic protection monitoring practices and its costs and benefits?

* If the study were performed 10 years later and again 20 years later, would the findings be expected to be the same? Why or why not?

* What experiences or studies in other applications of cathodic protection may provide insights into the long-term performance of cathodic protection on USTs and the costs and benefits of cathodic protection monitoring?

IV. Schedule for Final Determination

After review and evaluation of the public comments on this notice, EPA will conduct internal deliberations to arrive at a final determination of the Agency's position on the required frequency of cathodic protection monitoring. The Agency plans to reach a determination within 120 days after the conclusion of the comment period. This determination may take the form of no action, guidance, changes to the technical regulations, or some other regulatory action.

Dated: September 20, 1993.

Richard J. Guimond,

Acting Assistant Administrator.

BILLING CODE 6560-50-P

[FRL-4793-8]

National Advisory Council for Environmental Policy and Technology of the Policy Integration Project, Lead Subcommittee; Meeting

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463) the Environmental Protection Agency (EPA) gives notice of a meeting of the Lead Subcommittee of the Policy Integration Project of the National Advisory Council for Environmental Policy and Technology (NACEPT). The Lead Subcommittee meeting will be held on November 9th and will discuss draft-working papers on selected topics, which will be used as background for the Subcommittee's Report. The Subcommittee will also receive a briefing from a representative of the Occupational Safety and Health Commission (OSHA) on recent policy activities related to occupational lead exposures. The Committee will also be scheduling its next meeting, which will be held early in December, 1993. The purpose of the December meeting will

be to discuss the draft report to be presented to the EPA Administrator.

DATES: The Subcommittee will meet on November 9, 1993. The meeting will start at 9 a.m. and end at 4:30 p.m.

ADDRESSES: Hall of States, 444 North Capitol Street, NW., Washington, DC 20001-1572.

The meeting is open to the public, with limited seating available on a first-come, first-served basis.

FOR FURTHER INFORMATION CONTACT: Mr. Robert L. Hardaker, Designated Federal Office, U.S. EPA, Office of Cooperative Environmental Management, telephone (202) 260-9741.

Dated: October 20, 1993.

Robert L. Hardaker,

Designated Federal Official, NACEPT-Lead Subcommittee.

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collections Approved by Office of Management and Budget

The Federal Communications Commission (FCC) has received Office of Management and Budget (OMB) approval for the following public information collections pursuant to the Paperwork Reduction Act of 1980, Pub. L. 96-511. For further information contact Shoko B. Hair, Federal Communications Commission, (202) 632-6934.

Federal Communications Commission

OMB Control No.: 3060-0515

Title: Miscellaneous Common Carrier and Record Carrier Annual Letter

Filing Requirement—Section 43.21(d)

Expiration Date: 09/30/95

Estimated Annual Burden: 33 total hours; 1.43 hours per response.

Description: Pursuant to 47 CFR 43.21(d) each miscellaneous common carrier with operating revenues over \$100 million for a calendar year shall file with the Common Carrier Bureau Chief a letter showing its operating revenues for that year and the value of its total communications plant at the end of that year. Each record carrier with operating revenues over \$75 million for a calendar year shall file a letter showing selected income statement and balance sheet items for that year with the Common Carrier Bureau Chief. These letters must be filed by March 31 of the following year.

OMB Control No.: 3060-0470

Title: Computer III Remand Proceedings: Bell Operating Company Safeguards and Tier 1 Local Exchange Company Safeguards, (CC Docket No. 90-623) and Implementation of Further Cost Allocation Uniformity (MO&O).

Expiration Date: 07/31/95

Estimated Annual Burden: 27,000 total hours; 300 hours per response.

Description: Section 64.903 of the Commission's rules requires local exchange carriers with annual operating revenues of \$100 million or more to file cost allocation manuals. The manuals are used by Commission staff to detect improper cross-subsidization. In the Memorandum Opinion and Order (MO&O) in AAD 92-42, (released 7/1/93), the Acting Chief, Common Carrier Bureau under delegated authority implemented cost allocation uniformity requirements. The MO&O clarifies distinction among apportionment methods; establishes a minimum number of cost pools for ten accounts; standardizes allocation procedures for those accounts; disaggregates mandated cost pools into additional pools; and, sets implementation. Local exchange carriers are required to file a revised cost allocation manual by 11/1/93 pursuant to the requirements contained in the MO&O and in Responsible Accounting Officer Letter No. 19.

OMB Control No.: 3060-0400

Title: Tariff Review Plan

Expiration Date: 06/30/96

Estimated Annual Burden: 1,840 total hours; 40 hours per response.

Description: Certain local exchange carriers are required annually to submit a Tariff Review Plan in partial fulfillment of cost supported material required by 47 CFR part 61. The information is used by FCC and the public to determine the justness and reasonableness of rates, terms and conditions in tariffs as required by the Communications Act of 1934, as amended.

OMB Control No.: 3060-0484

Title: Amendment of Part 63 of the Commission's Rules to Provide for Notification by Common Carriers of Service Disruptions (Section 63.100)

Expiration Date: 06/30/96

Estimated Annual Burden: 129 total hours; 2.3 hours per response.

Description: Section 63.100 of the Commission's rules requires that local exchange and interexchange common carriers that operate either transmission or switching facilities file service disruption reports whenever telephone services provided by their networks are

disrupted to 50,000 or more potential customers for 30 or more minutes. The reporting requirement permits the Commission to detect more promptly and reliably the causes and frequency of major failures in telecommunication services and to take remedial action if necessary.

OMB Control No.: 3060-0392

Title: Pole Attachment Complaint Procedures, Sections 1.1401-1.1415.

Expiration Date: 06/30/96

Estimated Annual Burden: 42 total hours; 3 hours per response.

Description: Sections 1.1401-1.1415 of the Commission's rules contain information required by primarily cable television operators in regards to complaints concerning the rates, terms and conditions for pole attachments. The information will be used to either determine the merits of the complaint including calculating the maximum rate under the Commission's formula. The respondents affected are cable television operators and utility companies.

OMB Control No.: 3060-0510

Title: Regulatory Reform for Local Exchange Carriers Subject to Rate of Return Regulation (CC Docket No. 92-135).

Expiration Date: 08/31/95

Description: The Commission established rules affecting rate of return regulated local exchange carriers in CC Docket No. 92-135. The proceeding established optional regulatory reforms that compliment the price cap system applicable to the largest local exchange carriers, by providing incentives for smaller companies to become more efficient and by encouraging technological development. Because these smaller companies provide service primarily to rural areas, these options will help bring ratepayer benefits gained from incentive regulation to rural Americans as well as urban populations served by the largest carriers. These options also reduce administrative burdens, and increase flexibility, while continuing to assure high service quality and universal service at reasonable rates. The Commission therefore established a continuum of options to be made available to the over 1300 carriers not required to be regulated under price caps.

Federal Communications Commission.

William F. Caton,

Acting Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Information Collection Submitted to OMB for Review

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice of information collection submitted to OMB for review and approval under the Paperwork Reduction Act of 1980.

SUMMARY: In accordance with requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the FDIC hereby gives notice that it has submitted to the Office of Management and Budget a request for OMB review of the information collection system described below.

Type of review: Extension of the expiration date of a currently approved collection without any change in the substance or method of collection.

Title: Foreign Branch Report of Condition.

Form number: FFIEC 030.

OMB number: 3064-0011.

Expiration date of OMB clearance: October 31, 1993.

Respondents: Insured state nonmember banks with foreign branches.

Frequency of response: Annually.

Number of respondents: 44.

Number of responses per respondent: 1.

Total annual responses: 44.

Average number of hours per response: 3.25.

Total annual burden hours: 143.

OMB reviewer: Gary Waxman, (202) 395-7340, Office of Management and Budget, Paperwork Reduction Project 3064-0011, Washington, DC 20503.

FDIC contact: Steven F. Hanft, (202) 898-3907, Office of the Executive Secretary, room F-400, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.

Comments: Comments on this collection of information are welcome and should be submitted before December 27, 1993.

ADDRESSES: A copy of the submission may be obtained by calling or writing the FDIC contact listed above.

Comments regarding the submission should be addressed to both the OMB reviewer and the FDIC contact listed above.

SUPPLEMENTARY INFORMATION: This report contains asset and liability information for foreign branches of insured state banks. The information is used to monitor the level of activity and growth of the overseas offices of U.S. banks and for planning the examination of these offices.

Dated: October 19, 1993.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Agency Forms Under Review

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice.

BACKGROUND: On June 15, 1984, the Office of Management and Budget (OMB) delegated to the Board of Governors of the Federal Reserve System (Board) its approval authority under the Paperwork Reduction Act of 1980, as per 5 CFR 1320.9, to approve of and assign OMB control numbers to collection of information requests and requirements conducted or sponsored by the Board under conditions set forth in 5 CFR 1320.9. Board-approved collections of information will be incorporated into the official OMB inventory of currently approved collections of information. A copy of the SF 83 and supporting statement and the approved collection of information instrument(s) will be placed into OMB's public docket files. The following forms, which are being handled under this delegated authority, have received initial Board approval and are hereby published for comment. At the end of the comment period, the proposed information collection, along with an analysis of comments and recommendations received, will be submitted to the Board for final approval under OMB delegated authority.

DATES: Comments must be submitted on or before November 3, 1993.

ADDRESSES: Comments, which should refer to the OMB Docket number (or Agency form number in the case of a new information collection that has not yet been assigned an OMB number), should be addressed to Mr. William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, 20th and C Streets, NW., Washington, DC 20551, or delivered to the Board's mail room between 8:45 a.m. and 5:15 p.m., and to the security control room outside of those hours. Both the mail room and the security control room are accessible from the courtyard entrance on 20th Street between Constitution Avenue and

C Street, NW. Comments received may be inspected in room B-1122 between 9 a.m. and 5 p.m., except as provided in § 261.8 of the Board's Rules Regarding Availability of Information, 12 CFR 261.8(a).

A copy of the comments may also be submitted to the OMB desk officer for the Board: Gary Waxman, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, room 3208, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: A copy of the proposed form, the request for clearance (SF 83), supporting statement, instructions, and other documents that will be placed into OMB's public docket files once approved may be requested from the agency clearance officer, whose name appears below.

Federal Reserve Board Clearance

Officer: Mary M. McLaughlin, Division of Research and Statistics (202-452-3829), Board of Governors of the Federal Reserve System, Washington, DC 20551. For the hearing impaired only, Telecommunications Device for the Deaf (TDD), Dorothea Thompson (202-452-3544), Board of Governors of the Federal Reserve System, Washington, DC 20551.

Proposal To Approve Under OMB Delegated Authority the Extension Without Revision the Following Report(s):

- 1. Report title:** Consumer Satisfaction Questionnaire.
Agency form number: FR 1379.
OMB Docket number: 7100-0135.
Frequency: On occasion.
Reporters: Consumers who have filed complaints against state member banks.
Annual reporting hours: 9.
Estimated average hours per response: 0.25 (15 minutes).
Number of respondents: 34.
Small businesses are affected.

General description of report: This information collection is voluntary to obtain or retain a benefit [15 U.S.C. 57(a)(f)(1)] and is not given confidential treatment.

The Federal Reserve Board sends this questionnaire to consumers whose complaints against state member banks were received by the Board and referred to Federal Reserve Banks for resolution, and to a sample of consumers whose complaints were received directly by the Federal Reserve Banks. Complainants are requested to answer the questions voluntarily about the effectiveness of the Reserve Bank's efforts in handling the consumer complaint.

2. Report title: OTC Margin Stock Report.

Agency form number: FR 2048.
OMB Docket number: 7100-0004.
Frequency: Quarterly.
Reporters: Certain corporations with over-the-counter stock.
Annual reporting hours: 75.
Estimated average hours per response: 0.25 (15 minutes).
Number of respondents: 75.
Small businesses are not affected.

General description of report: This information collection is voluntary to obtain or retain a benefit [15 U.S.C. 78g, w] and is not given confidential treatment.

This report is used to gather stock information on certain corporations that have stock trading over-the-counter and that are being considered for inclusion on the Federal Reserve Board's List of Marginable OTC Stocks.

3. Report title: Report of Brokers Carrying Margin Accounts.

Agency form number: FR 2240.
OMB Docket number: 7100-0001.
Frequency: Annually.
Reporters: Brokers and dealers.
Annual reporting hours: 267.
Estimated average hours per response: 2.7.
Number of respondents: 99.
Small businesses are affected.

General description of report: This information collection is mandatory [15 U.S.C. 78q(g)] and is given confidential treatment [5 U.S.C. 552(b)(4)].

This report is used to insure compliance of brokers and dealers with the Federal Reserve Margin Regulations and Security Credit as authorized by Section 17 of the Securities and Exchange Act of 1934. This report collects certain balance sheet information from securities brokers and dealers carrying margin accounts and is used by the Federal Reserve to regulate securities credit extended by brokers.

Proposal To Approve Under OMB Delegated Authority the Extension With Revisions, of The Following Report:

- 1. Report title:** Monthly Survey of Debits to Demand and Savings Deposits Accounts.

Agency form number: FR 2573.
OMB Docket number: 7100-0081.
Frequency: Monthly.
Reporters: Commercial banks.
Annual reporting hours: 3,000.
Estimated average hours per response: 1.0.
Number of respondents: 250.
Small businesses are affected.

General description of report: This information collection is voluntary [12 U.S.C. 248(a)(2)] to obtain or retain a

benefit is given confidential treatment [5 U.S.C. 552(b)(4)].

This report collects debits (total withdrawals during the month) to three categories of deposits accounts (demand deposits of individuals, partnerships, and corporations and state and political subdivisions; ATS and NOW accounts; and savings deposit accounts including money market deposit accounts) from a sample of commercial banks. The debits data from this report are used in conjunction with deposit balances from other reports for the calculation of universe estimates of bank debits and deposit turnover rates for the major types of deposit accounts that money stock holders can use directly or indirectly for transactions purposes. The turnover rates have been used by the Federal Reserve primarily in analysis of the behavior of the monetary aggregates and in money demand studies. The data are published in the monthly G.6 release, *Debits and Deposit Turnover at Commercial Banks*.

The authorized reporting panel will be reduced from 300 to 250 banks. The ATS and NOW accounts deposit category will be expanded to include telephone and preauthorized transfer accounts. In addition, the title of the report will be changed to "Survey of Debits to Selected Deposit Accounts" to reflect its content more accurately. A trillion-dollar column will be added to the reporting form, and the instructions will reflect changes corresponding to current definitions in Regulation D.

Board of Governors of the Federal Reserve System, October 19, 1993.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6780-01-M

FEDERAL TRADE COMMISSION

[File No. 922 3295]

White Castle System, Inc.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would prohibit, among other things, an Ohio-based chain of fast-food restaurants from misrepresenting the extent to which any product or package is capable of being recycled or the extent of the availability of recycling collection programs for such products. In addition, the consent agreement would prohibit the respondent from representing the environmental benefit of any product or packaging it uses unless it possesses competent and reliable evidence to substantiate the representation.

DATES: Comments must be received on or before [Insert date 60 days after Federal Register publication date.

ADDRESSES: Comments should be directed to: FTC/Office of the Secretary, room 159, 6th Street and Pennsylvania Avenue NW., Washington, DC 20580. *

FOR FURTHER INFORMATION CONTACT: C. Steven Baker or Theresa McGrew, FTC/Chicago Regional Office, 55 East Monroe Street, suite 1437, Chicago, IL 60603, (312) 353-8156.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with

and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(6)(ii) of the Commission's Rules of Practice (16 CFR 4.9(b)(6)(ii)).

Agreement Containing Consent Order to Cease and Desist

The Federal Trade Commission having initiated an investigation of certain acts and practices of White Castle System, Inc., a corporation ("proposed respondent"), and it now appears that proposed respondent is willing to enter into an agreement containing an order to cease and desist from the acts and practices being investigated,

It is hereby agreed by and between White Castle System, Inc., by its duly authorized officer, and its attorney, and counsel for the Federal Trade Commission that:

1. Proposed respondent White Castle System, Inc., is a corporation organized, existing and doing business under and by virtue of the laws of the State of Delaware, with its principal office or place of business at 555 West Goodale Street, Columbus, Ohio 43215.
2. Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint here attached.
3. Proposed respondent waives:
 - a. Any further procedural steps;
 - b. The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;
 - c. All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and
 - d. All claims under the Equal Access to Justice Act.

4. This agreement shall not become a part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft of the complaint contemplated hereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and

decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the attached draft complaint or that the facts as alleged in the attached draft complaint, other than the jurisdictional facts, are true.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules the Commission may without further notice to proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding, and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the decision containing the agreed-to order to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it might have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or in the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the complaint and the order contemplated hereby. It understands that once the order has been issued, it will be required to file one or more compliance reports showing it has fully complied with the order. Proposed respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

Definitions

For purposes of this Order, the following definitions shall apply:

The term "product or package" means any product or package, including, but not limited to, any item used by respondent to contain, serve, or package goods, offered for sale, sold or distributed to the public by respondent, its successors and assigns, under the White Castle brand name or any other

brand name of respondent, its successors and assigns; and, also means any product or package sold or distributed to the public by third parties under private labeling agreements with respondent, its successors and assigns.

The term "competent and reliable scientific evidence" shall mean tests, analyses, research, studies or other evidence based on the expertise of professionals in the relevant area, that has been conducted and evaluated in an objective manner by persons qualified to do so, using procedures generally accepted in the profession to yield accurate and reliable results.

I

It is ordered, That respondent, White Castle System, Inc., a corporation, its successors and assigns, and its officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the manufacturing, labeling, advertising, promotion, distribution, or use of any product or package in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from misrepresenting, in any manner, directly or by implication, the extent to which any such product or package is capable of being recycled or the extent to which recycling collection programs for such product or package are available.

II

It is further ordered, That respondent, White Castle System, Inc., a corporation, its successors and assigns, and its officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the manufacturing, labeling, advertising, promotion, distribution, or use of any product or package in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from representing, in any manner, directly or by implication, that any product or package offers any environmental benefit, unless at the time of making such representation, respondent possesses and relies upon competent and reliable evidence, which when appropriate must be competent and reliable scientific evidence, that substantiates such representation.

III

It is further ordered, That for five (5) years after the last date of dissemination of any representation covered by this Order, respondent, or its successors and assigns, shall maintain and upon

request make available to the Federal Trade Commission for inspection and copying:

A. All materials that were relied upon in disseminating such representations; and

B. All tests, reports, studies, surveys, demonstrations, or other evidence in its possession or control that contradict, qualify, or call into question such representation, or the basis relied upon for such representation, including complaints from consumers.

IV

It is further ordered, That the respondent shall distribute a copy of this Order to each of its operating divisions and to each of its officers, agents, representatives, or employees engaged in the preparation and placement of advertisements, promotional materials, product labels or other such sales materials covered by this Order.

V

It is Further Ordered, That respondent shall notify the Commission at least thirty (30) days prior to any proposed change in the corporation such as a dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporation which may affect compliance obligations under this Order.

VI

It is Further Ordered, That respondent shall, within sixty (60) days after service of this Order upon it, and at such other times as the Commission may require, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this Order.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement, subject to final approval, to a proposed consent order from respondent White Castle System, Inc.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement and take other appropriate action or make final the agreement's proposed order.

This matter concerns environmental claims made on the labels of packaging used to contain respondent's food products. The Commission's compliant charges that respondent made false and unsubstantiated claims that its packaging was recyclable after ordinary use. In fact, the complaint alleges, while the respondent's packaging is capable of being recycled, the vast majority of consumers cannot recycle it because there are virtually no collection facilities that accept food contaminated paper packaging for recycling.

The proposed consent order contains provisions designed to remedy the violations charged and to prevent the respondent from engaging in similar acts and practices in future. The proposed order extends to all products or packages that are used by the respondent to package its food products or that are sold to the public.

Part I of the proposed consent order prohibits the respondent from misrepresenting the extent to which any product or packaging is capable of being recycled or the extent to which recycling collection programs for such products or packaging are available. Part II of the proposed order prohibits the respondent from misrepresenting the environmental benefit of any product or packaging it uses unless at the time such representation is made the respondent possesses and relies upon competent and reliable evidence that substantiates the representation.

The remaining parts of the proposed consent order require the respondent to maintain materials relied upon to substantiate claims covered by the order, to distribute copies of the order to each of its operating divisions and to certain company officials, to notify the Commission of any changes in corporate structure that might affect compliance with the Order, and to file one or more compliance reports.

The purpose of this analysis is to facilitate public comment on the proposed consent order. It is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Donald S. Clark,

Secretary.

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[Announcement Number 408]

Data-Management Capacity-Building Grants for Preventive Health and Health Services Block Grant Recipients

Introduction

The Centers for Disease Control and Prevention (CDC) announces the availability of funds in fiscal year (FY) 1994 for grants to build capacity for data collection, analysis, evaluation, and utilization within governmental agencies designated as recipients of Preventive Health and Health Services (PHHS) Block Grants.

The Public Health Service (PHS) is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS-led national activity to reduce morbidity and mortality and improve the quality of life. This announcement is related, generally, to all the priority areas of Health Promotion and Preventive Services and, specifically, to the priority area of Surveillance and Data Systems. (For ordering a copy of Healthy People 2000, see the Section Where to Obtain Additional Information.)

Authority

This grant program is authorized under sections 301(a) and 317(a) of the Public Health Service Act (42 U.S.C. 241(a) and 247b(a)), as amended.

Eligible Applicants

Assistance will be provided only to the 21 recipients of PHHS Block Grants under title XIX, part A, section 902 of the Public Health Service Act that were not previously funded for data-management capacity-building grants by the CDC in FY 1992 and FY 1993 under Program Announcement Number 255, entitled: Data-Management Capacity-Building Grants For Preventive Health And Health Services Block Grant Recipients (minigrants), or by the Public Health Foundation in FY 1990 or FY 1991. The eligible applicants include: American Samoa, Arizona, Connecticut, Delaware, District of Columbia, Florida, Kansas, the Kickapoo Tribe of Kansas, the Santee Sioux Tribe of Nebraska, Marshall Islands, Maryland, Minnesota, Montana, New Jersey, North Dakota, Northern Mariana Islands, Pennsylvania, the Commonwealth of Puerto Rico, South Dakota, Vermont,

and the Virgin Islands. No other applications will be solicited.

Availability of Funds

Approximately \$300,000 will be available in FY 1994 to fund approximately 10 grants. It is expected that the average award will be \$30,000 ranging from \$29,000 to \$31,000. It is expected that the awards will begin on or about April 1, 1994, for one 12-month budget period within a project period of one year. Funding estimates may vary and are subject to change.

Purpose

The purpose of these grants is to assist recipients of PHHS Block Grant funds in building the capacity to systematically collect, analyze, interpret, disseminate, and use health data as specifically addressed by Objectives 22.1 through 22.7 of Healthy People 2000: National Health Promotion and Disease Prevention Objectives.

Program Requirements

Activities supported through this program announcement must be directly related to the improvement of data-management systems for monitoring and evaluating PHHS Block Grant funded programs and activities. Grantees must propose to carry out one or more of the following activities:

- A. Design and implement methods for identifying and using systemwide (state and local) program data.
- B. Conduct surveys and establish data-collection procedures.
- C. Develop protocols for the analysis of data and the evaluation of program-specific accomplishments.
- D. Develop referral and tracking systems of patients identified with risk factors of chronic disease (e.g., smoking, hypertension, poor nutrition).
- E. Develop new surveillance systems to monitor service delivery and impact. Grantees may purchase computer hardware and software to assist in the surveillance and analysis activity.

Evaluation Criteria

Applications will be reviewed and evaluated according to the following criteria:

- A. The degree to which the applicant demonstrates an understanding of the purpose for this program announcement, the data-management needs, and problems to be addressed. (20 points)
- B. The degree to which the applicant's objectives are measurable, specific, time framed, and consistent with the stated purpose of this announcement. (20 points)

- C. The adequacy of the applicant's plan to carry out the activities proposed and meet the stated objectives within the time periods specified. (20 points)
- D. The adequacy of the applicant's plan to monitor progress toward meeting the objectives of the project. (20 points)
- E. The adequacy of the applicant's plan to provide the appropriate, qualified staff and resources necessary to achieve the program objectives. (20 points)
- F. The extent to which the budget is reasonable, adequately justified, and consistent with the intended use of grant funds. (Not scored)

Executive Order 12372 Review

Applications are subject to Intergovernmental Review of Federal Programs as governed by Executive Order 12372. E.O. 12372 sets up a system for state and local government review of proposed Federal assistance applications. Applicants (other than federally-recognized Indian tribal governments) should contact their state Single Point of Contact (SPOC) as early as possible to alert them to the prospective applications and receive any necessary instructions on the state process. For proposed projects serving more than one state, the applicant is advised to contact the SPOC for each affected state. A current list of SPOCs is included in the application kit. If SPOCs have any state process recommendations on applications submitted to CDC, they should reference this announcement number (408) and forward recommendations to Edwin L. Dixon, Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control and Prevention (CDC), 255 East Paces Ferry Road, NE., room 300, Mailstop E-18, Atlanta, Georgia 30305. The due date for state process recommendations is 60 days after the application deadline date for new and competing continuation awards. CDC does not guarantee to "accommodate or explain" state process recommendations it receives after that date.

Public Health System Reporting Requirements

This program is not subject to the Public Health System Reporting Requirements.

Catalog of Federal Domestic Assistance Number

The Catalog of Federal Domestic Assistance number assigned to this program is 93.283.

Other Requirements

Paperwork Reduction Act

Data collection initiated under this grant has been approved by the Office of Management and Budget under number 0920-0106, "Preventive Health and Health Services Grant Reporting Requirements", Expiration date 9/30/94.

Application Submission and Deadline

The original and two copies of the application PHS Form 5161-1 (Revised 7/92) must be submitted to Edwin L. Dixon, Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers For Disease Control and Prevention (CDC), 255 East Paces Ferry Road, NE., room 314, Mailstop E-18, Atlanta, Georgia 30305, on or before February 1, 1994.

1. **Deadline:** Applications shall be considered as meeting the deadline if they are either:

(a) Received on or before the deadline date; or

(b) Sent on or before the deadline date and received in time for submission to the objective review group. Applicants must request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks shall not be accepted as proof of timely mailing.

2. **Late Applications:** Applications which do not meet the criteria on 1.(a) or 1.(b) above are considered late applications. Late applications will not be considered in the current competition and will be returned to the applicant.

Where To Obtain Additional Information

A complete program description and information on application procedures are contained in the application package. Business management technical assistance may be obtained from Locke Thompson, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers For Disease Control and Prevention (CDC), 255 East Paces Ferry Road, NE., room 314, Mailstop E-18, Atlanta, Georgia 30305, telephone (404) 842-6595.

Programmatic technical assistance may be obtained from C. Joseph Webb, Office of Surveillance and Analysis, National Centers for Chronic Disease Prevention and Health Promotion, Mailstop K-30, Centers for Disease Control and Prevention (CDC), 4770 Buford Highway, NE., Atlanta, Georgia 30341-3724, telephone (404) 488-5299.

Please refer to Announcement Number 408 when requesting information and submitting an application.

Potential applicants may obtain a copy of Healthy People 2000 (Full Report: Stock No. 017-001-00474-0) or Healthy People 2000 (Summary Report: Stock No. 017-001-00473-1) referenced in the Introduction through the Superintendent of Documents, Government Printing Office, Washington, DC 20402-9325, telephone (202) 783-3238.

Dated: October 18, 1993.

Robert L. Foster,

Acting Associate Director for Management and Operations, Centers for Disease Control and Prevention (CDC).

[FR Doc. 93-26125 Filed 10-22-93; 8:45 am]

BILLING CODE 4160-10-P

Hospital Infection Control Practices Advisory Committee and Subcommittee on Prevention and Control of Antimicrobial Resistant Microorganisms in Hospitals; Meetings

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control and Prevention (CDC) announces the following Federal advisory committee meetings.

Name: Hospital Infection Control Practices Advisory Committee

Times and dates: 8:30 a.m.-5 p.m., November 15, 1993; 8:30 a.m.-4 p.m., November 16, 1993.

Place: CDC, Auditorium A, 1600 Clifton Road, NE, Atlanta, Georgia 30333.

Status: Open to the public, limited only by the space available.

Purpose: The committee is charged with providing advice and guidance to the Secretary, the Assistant Secretary for Health, the Director, CDC, and the Director, National Center for Infectious Diseases (NCID), regarding the practice of hospital infection control and strategies for surveillance, prevention, and control of nosocomial infections in U.S. hospitals and updating of guidelines and other policy statements regarding prevention of nosocomial infections.

Matters to be discussed: This is the fourth meeting of the Hospital Infection Control Practices Advisory Committee. The agenda will include review of the final draft of the proposed revision of the CDC Guideline for Prevention of Nosocomial Pneumonia, the second draft of the proposed revision of the CDC Guideline for Isolation Precautions in Hospitals, and the first draft of the proposed revision of the CDC Guideline for Prevention of Intravascular Infections; discussion of an approach to control resistant microorganisms in U.S. hospitals; and an update on CDC activities of interest to the committee. Agenda items are subject to change as priorities dictate.

Name: Subcommittee on Prevention and Control of Antimicrobial Resistant Microorganisms in Hospitals.

Time and date: 8:30 a.m.-5 p.m., November 14, 1993.

Place: CDC, Lobby Conference Room, 1600 Clifton Road, NE, Atlanta, Georgia 30333.

Status: Open to the public, limited only by the space available.

Purpose: This subcommittee will review current knowledge about the epidemiology and laboratory aspects of antimicrobial resistance among nosocomial pathogens and revise and/or develop recommendations to control these pathogens in acute care settings.

Matters to be discussed: The subcommittee will hold its first meeting to review current knowledge about the epidemiology and laboratory aspects of antimicrobial resistance among nosocomial pathogens and develop an approach to control resistant microorganisms in U.S. hospitals. Agenda items are subject to change as priorities dictate.

Contact person for more information: Julia S. Garner, R.N., M.N., Nurse Consultant, Hospital Infections Program, NCID, CDC, 1600 Clifton Road, NE, Mailstop A-07, Atlanta, Georgia 30333, telephone 404/639-1552.

Dated: October 19, 1993.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control and Prevention (CDC).

BILLING CODE 4160-18-M

Food and Drug Administration

[Docket No. 93G-0246]

ALKO Ltd. Biotechnology; Filing of Petition for Affirmation of GRAS Status

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that ALKO Ltd. Biotechnology has filed a petition (GRASP 2G0381), proposing to affirm that phytase derived from culture of *Aspergillus niger* is generally recognized as safe (GRAS) as a direct human food ingredient.

DATES: Written comments by December 27, 1993.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: F. Owen Fields, Center for Food Safety and Applied Nutrition (HFS-207), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-254-9523. **SUPPLEMENTARY INFORMATION:** Under the Federal Food, Drug, and Cosmetic Act (sec. 201(s) and 409 (21 U.S.C. 321(s)

and 348)) and the regulations for affirmation of GRAS status in § 170.35 (21 CFR 170.35), notice is given that ALKO Ltd. Biotechnology SF-052000, Rajamäki, Finland, has filed a petition (GRASP 2G0381), proposing that phytase enzyme preparation from *A. niger* be affirmed as GRAS for use as a direct human food ingredient.

The petition has been placed on display at the Dockets Management Branch (address above).

Any petition that meets the requirements outlined in §§ 170.30 and 170.35 is filed by the agency. There is no pre-filing review of the adequacy of data to support a GRAS conclusion. Thus, the filing of a petition for GRAS affirmation should not be interpreted as a preliminary indication of suitability for GRAS affirmation.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the *Federal Register* in accordance with 21 CFR 25.40(c).

Interested persons may, on or before December 27, 1993, review the petition and file comments with the Dockets Management Branch (address above). Two copies of any comments should be filed and should be identified with the docket number found in brackets in the heading of this document. Comments should include any available information that would be helpful in determining whether the substance is, or is not, GRAS for the proposed use. In addition, consistent with the regulations promulgated under the National Environment Policy Act (40 CFR 1501.4(b)), the agency encourages public participation by review of and comment on the environmental assessment submitted with the petition that is the subject of this notice. A copy of the petition (including the environmental assessment) and received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: October 14, 1993.

Douglas L. Archer,

Acting Director, Center for Food Safety and Applied Nutrition.

National Institutes of Health

National Institute on Deafness and Other Communication Disorders; Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the National Institute on Deafness and Other Communication Disorders Special Emphasis Panel.

The meeting will be conducted as a telephone conference call and will be closed in accordance with the provisions set forth in sec. 552b(c)(4) and 552b(c)(6), title 5, U.S.C. and sec. 10(d) of Public Law 92-463, for the review, discussion and evaluation of individual grant applications, contract proposals, and/or cooperative agreements. These applications and/or proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable materials, and personal information concerning individuals associated with the applications and/or proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Panel: National Institute on Deafness and Other Communication Disorders Special Emphasis Panel.

Dates of Meeting: November 4, 1993.

Time of Meeting: 2:30-4:30 p.m.

Place of Meeting: Executive Plaza South, room 400C.

Agenda: Review of three training grant applications and one conference grant application.

Contact Person: Dr. Mary Nekola, Scientific Review Administrator, NIDCD/SRB, Executive Plaza South, room 400C, Bethesda, Maryland 20892 (301) 496-8683.

BILLING CODE 4160-01-M

National Institute on Drug Abuse; Meetings

Pursuant to Public Law 92-463, notice is hereby given of the meetings of the advisory committees of the National Institute on Drug Abuse for November 1993.

The initial review groups will be open to the public for approximately one-half hour at the beginning of the first day of the meeting for announcements and reports of administrative, legislative, and program development. Attendance

by the public will be limited to space available.

As indicated below in accordance with provisions set forth in sec. 552b(c)(4) and 552b(c)(6), title 5, U.S.C. and sec. 10(d) of Public Law 92-463, the initial review groups will be closed to the public for the review, discussion, and evaluation of individual grant applications on the dates indicated below. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

The Extramural Science Advisory Board will discuss NIDA's program areas and monograph series. This meeting will be open on the dates indicated below; however, attendance by the public will be limited to space available.

Summaries of the meetings and rosters of committee members may be obtained from: Ms. Camilla L. Holland, NIDA Committee Management Officer, National Institutes of Health, Parklawn Building, room 10-42, 5600 Fishers Lane, Rockville, MD 20857 (Telephone: 301/443-2755).

Substantive program information may be obtained from the contacts whose names, room numbers, and telephone numbers are listed below.

Committee name: Extramural Science Advisory Board, NIDA.
Meeting date: November 1-2, 1993.
Place: Bethesda Marriott Hotel, 5151 Pooks Hill Road, Bethesda, Maryland 20814.
Open: November 1-2, 9 a.m. to 5 p.m.
Contact: Jacqueline P. Downing, room 10A-55, Parklawn building, Telephone (301) 443-1056.

Committee name: Sociobehavioral Subcommittee, Drug Abuse AIDS Research Review Committee.
Meeting date: November 9-10, 1993.
Place: Hyatt Regency Bethesda, One Bethesda Metro Center, Bethesda, Maryland 20814.

Open: November 9, 9 a.m. to 9:30 a.m.
Closed: 9:30 a.m., November 9, to adjournment on November 10.
Contact: H. Noble Jones, room 10-22, Parklawn Building, Telephone (301) 443-9042.

Committee name: Biobehavioral/Clinical Subcommittee, Drug Abuse AIDS Research Review Committee.
Meeting date: November 16-17, 1993.
Place: Hyatt Regency Bethesda, One Bethesda Metro Center, Bethesda, Maryland 20814.

Open: November 16, 9 a.m. to 9:30 a.m.
Closed: 9:30 a.m., November 16, to adjournment on November 17.

Contact: Mary Custer, Ph.D., room 10-42, Parklawn Building, Telephone (301) 443-2620.

Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodation, should contact the contact persons named above in advance of the meeting.

This notice is being published less than 15 days prior to the meeting due to the difficulty of coordinating the attendance of members because of conflicting schedules.

(Catalog of Federal Domestic Assistance Program Numbers: 93.277, Drug Abuse Research Scientist Development and Research Scientist Awards; 93.278, Drug Abuse National Research Service Awards for Research Training; 93.279, Drug Abuse Research Program)

Dated: October 20, 1993.

Susan K. Feldman,
Committee Management Officer, NIH.

BILLING CODE 4140-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Public and Indian Housing

[Docket No. N-93-3666; FR-3557-C-02]

Notice of Funding Availability for Fiscal Year 1993, for the Section 8 Set-Aside for Homeless Veterans With Severe Psychiatric or Substance Abuse Disorders, Notice of Funding Availability for Fiscal Year 1993; Correction

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, (HUD).

ACTION: Notice of funding availability (NOFA) for fiscal year (FY) 1993; Correction.

SUMMARY: On September 30, 1993 (58 FR 51192), the Department published in the Federal Register, a notice of funding availability (NOFA) for Fiscal Year (FY) 1993, that announced the availability of \$19.1 million in FY 1993 budget authority for a national competition established by the Department of Housing and Urban Development (HUD) and the Department of Veterans Affairs (VA) to award funding under the section 8 rental voucher program for homeless veterans with severe psychiatric or substance abuse disorders. The purpose of this document is to add a sentence to section III(A)(1), "Letter from VA Medical Center," to limit the number of PHAs who can apply for the funding to one per VA Medical Center. This document will also add Charleston, SC Medical Centers to the listing of eligible VA, to submit applications.

FOR FURTHER INFORMATION CONTACT: Gerald J. Benoit, Director, Operations Branch, Rental Assistance Division, Office of Assisted Housing, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410-8000, telephone number (202) 708-0477. Hearing or speech-impaired individuals may call HUD's TDD number (202) 708-4594. (These telephone numbers are not toll-free).

SUPPLEMENTARY INFORMATION:

Accordingly, FR Doc. 93-24113, the Notice of Funding Availability (NOFA) for Fiscal Year 1993, for the Section 8 Set-Aside for Homeless Veterans With Severe Psychiatric or Substance Abuse Disorders, published in the Federal Register, on September 30, 1993 (58 FR 51192), is corrected as follows:

1. on page 51196, in column one, the following sentence is added to the end of section III(A)(1) to read:

III. Checklist of Application Submission Requirements

(A) * * *

(1) * * * HUD will accept only one letter from each VA Medical Center and the letter may identify only one HA.

2. On page 51204, in column three, add "Charleston, SC" to Attachment 7—List of Eligible VA Medical Centers.

Dated: October 19, 1993.

Myra L. Ransick,
Assistant General Counsel for Regulations.
[FR Doc. 93-26130 Filed 10-22-93; 8:45 am]
BILLING CODE 4210-33-M

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

Quarterly Status Tabulation of Water Service and Repayment Contract Negotiations

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice.

SUMMARY: Notice is hereby given of proposed contractual actions pending through December 1993. This notice is one of a variety of means being used to inform the public about proposed contractual actions for capital recovery and management of project resources and facilities. Additional Bureau of Reclamation (Reclamation) announcements of individual contract actions may be published in the Federal Register and in newspapers of general circulation in the areas determined by Reclamation to be affected by the proposed action. Announcements may be in the form of news releases, legal notices, official letters, memorandums,

or other forms of written material. Meetings, workshops, and/or hearings may also be used, as appropriate, to provide local publicity. These public participation procedures do not apply to proposed contracts for the sale of surplus or interim irrigation water for a term of 1 year or less. Either of the contracting parties may invite the public to observe any contract proceedings. All public participation procedures will be coordinated with those involved in complying with the National Environmental Policy Act.

ADDRESSES: The identity of the approving officer and other information pertaining to a specific contract proposal may be obtained by calling or writing the appropriate regional office at the address and telephone number given for each region in the supplementary information.

FOR FURTHER INFORMATION CONTACT: Dick L. Porter, Chief, Contracts and Repayment Division, Bureau of Reclamation, 1849 C St. NW., Washington, DC 20240; telephone 202-208-3014.

SUPPLEMENTARY INFORMATION: Pursuant to section 226 of the Reclamation Reform Act of 1982 (96 Stat. 1273) and 43 CFR 426.20 of the rules and regulations published in 52 FR 11954, April 13, 1987, Reclamation will publish notice of proposed or amendatory contract actions for any contract for the delivery of project water for authorized uses in newspapers of general circulation in the affected area at least 60 days prior to contract execution. Pursuant to the "Final Revised Public Participation Procedures" for water resource-related contract negotiations, published in 47 FR 7763, February 22, 1982, a tabulation is provided below of all proposed contractual actions in each of the five Reclamation regions. Each proposed action listed is, or is expected to be, in some stage of the contract negotiations process during October, November, or December of 1993. When contract negotiations are completed, and prior to execution, each proposed contract form must be approved by the Secretary, or pursuant to delegated or redelegated authority, the Commissioner of Reclamation or one of the Regional Directors. In some instances, congressional review and approval of a report, water rate, or other terms and conditions of the contract may be involved.

Public participation in and receipt of comments on contract proposals will be facilitated by adherence to the following procedures:

1. Only persons authorized to act on behalf of the contracting entities may negotiate the terms and conditions of a specific contract proposal.

2. Advance notice of meetings or hearings will be furnished to those parties that have made a timely written request for such notice to the appropriate regional or project office of Reclamation.

3. Written correspondence regarding proposed contracts may be made available to the general public pursuant to the terms and procedures of the Freedom of Information Act (80 Stat. 383), as amended.

4. Written comments on a proposed contract or contract action must be submitted to the appropriate Reclamation officials at the locations and within the time limits set forth in the advance public notices.

5. All written comments received and testimony presented at any public hearings will be reviewed and summarized by the appropriate regional office for use by the contract approving authority.

6. Copies of specific proposed contracts may be obtained from the appropriate Regional Director or his designated public contact as they become available for review and comment.

7. In the event modifications are made in the form of a proposed contract, the appropriate Regional Director shall determine whether republication of the notice and/or extension of the comment period is necessary.

Factors considered in making such a determination shall include, but are not limited to: (i) The significance of the modification, and (ii) the degree of public interest which has been expressed over the course of the negotiations. As a minimum, the Regional Director shall furnish revised contracts to all parties who requested the contract in response to the initial public notice.

Pacific Northwest Region: Bureau of Reclamation, 1150 North Curtis Road, Boise, Idaho 83706-1234, telephone 208-378-5342.

1. Cascade Reservoir Water Users, Boise Project, Idaho: Repayment contracts for irrigation and M&I water; 19,201 acre-feet of stored water in Cascade Reservoir.

2. Irrigation, M&I, and Miscellaneous Water Users; Columbia Basin, Crooked River, Minidoka, Rathdrum Prairie, Rogue River Basin, and Umatilla Projects; Idaho, Montana, Oregon, and Washington: Temporary or interim repayment and water service contracts for irrigation or M&I use to provide up to 10,000 acre-feet of water annually for terms up to 5 years; long-term contracts for similar service for up to 1,000 acre-feet of water annually.

3. Rogue River Basin Water Users, Rogue River Project, Oregon; Water service contracts; \$5 per acre-foot or \$50 minimum per annum for the term of the contract.

4. Willamette Basin Water Users, Willamette Basin Project, Oregon; Water service contracts; \$1.75 per acre-foot or \$50 minimum per annum for the term of the contract.

5. American Fall Reservoir District Number 2, Burgess Canal Company, Clark and Edwards Canal and Irrigation Company, Craig-Mattson Canal Company, Danskin Ditch Company, Enterprise Canal Company, Ltd., Farmers Friend Irrigation Company, Ltd., Lenroot Canal Company, Liberty Park Canal Company, Long Island Irrigation Company, Parks and Lewisville Irrigation Company, Ltd., Parson Ditch Company, Peoples Canal and Irrigation Company, Poplar ID, Rigby Canal and Irrigating Company, Rudy Irrigation Canal Company, Ltd., Wearyrick Ditch Company, all in the Minidoka Project, Idaho; Juniper Flat ID, Wapinitia Project, Oregon; Roza ID, Yakima Project, Washington: Amendatory repayment and water service contracts; purpose is to conform to the Reclamation Reform Act of 1982 (Pub. L. 97-293).

6. City of Cle Elum, Yakima Project, Washington: Amendatory or replacement M&I water service contract; 2,200 acre-feet (1,350 gallons per minute) annually for the term of the contract.

7. Baker Valley ID, Baker Project, Oregon: Irrigation water service contract on a surplus interruptible basis to serve up to 13,000 acres; sale of excess capacity in Mason Reservoir (Phillips Lake) for the term of the contract.

8. Willow Creek Water Users, Willow Creek Project, Oregon: Repayment or water service contracts for a total of up

to 3,500 acre-feet of storage space in Willow Creek Reservoir.

9. Bridgeport ID, Chief Joseph Dam Project, Washington: Warren Act contract for the use of an irrigation outlet in Chief Joseph Dam.

10. Hermiston ID, Umatilla Project, Oregon: Repayment contract for reimbursable cost of dam safety repairs to Cold Springs Dam.

11. Ochoco ID and Various Individual Spaceholders, Crooked River Project, Oregon: Repayment contract for reimbursable cost of dam safety repairs to Arthur R. Bowman and Ochoco Dams.

12. The Dalles ID, The Dalles Project, Oregon: SRPA loan repayment contract; proposed loan obligation of approximately \$2,000,000.

13. State of Idaho, Payette Division of the Boise Project, Idaho: Proposed repayment contracts with the State of Idaho for the sale of uncontracted space in Cascade and Deadwood Reservoirs.

14. Sidney Irrigation Cooperative, Willamette Basin Project, Oregon: Irrigation water service contract for approximately 2,300 acre-feet; \$1.75 per acre-foot for the term of the contract.

15. Douglas County, Milltown Hill Project, Oregon: SRPA loan repayment contract; proposed loan obligation of approximately \$24.5 million and grant of approximately \$5.8 million.

16. Mitigation, Inc., Palisades/Ririe Projects, Idaho: Contract for storage space in Palisades and Ririe Reservoirs (18,980 and 80,500 acre-feet, respectively) pursuant to section 5(a) of the Fort Hall Indian Water Rights Act of 1990.

17. U.S. Fish and Wildlife Service, Boise Project, Idaho: Irrigation water service contract for the use of approximately 200 acre-feet of storage space annually in Anderson Ranch Reservoir. Water to be used on crops for wildlife mitigation purposes.

18. City of Madras, Deschutes Project, Oregon: Renewal or replacement of municipal water service contract for approximately 125 acre-feet annually from the project water supply.

19. Willamette Basin water users, Willamette Basin Project, Oregon: Add language to water service contract to provide for periodic reviews, with adjustments if necessary to mitigate for impacts to natural resources.

20. Willamette Basin water users, Willamette Basin Project, Oregon: Two water service contracts for the exchange of up to 225 acre-feet of water for diversion above project reservoirs.

21. Lewiston Orchards ID, Lewiston Orchards Project, Idaho: Repayment contract for reimbursable cost of dam safety repairs to Reservoir "A."

22. North Unit ID, Deschutes Project, Oregon: Repayment contract for reimbursable cost of dam safety repairs to Wickiup Dam.

Mid-Pacific Region: Bureau of Reclamation, 2800 Cottage Way, Sacramento, California 95825-1898, telephone 916-978-5030.

1. Tuolumne Utility District (formerly Tuolumne Regional WD), CVP, California: Water Service Contract for up to 9,000 acre-feet from New Melones Reservoir.

2. Irrigation water districts, individual irrigators, M&I and miscellaneous water users, California, Oregon, and Nevada: Temporary (interim) water service contracts for available project water for irrigation, M&I, or fish and wildlife purposes providing up to 10,000 acre-feet of water annually for terms up to 5 years; temporary Warren Act contracts for use of project facilities for terms up to 1 year; long-term contracts for similar service for up to 1,000 acre-feet annually. *Note.* Copies of the standard forms of temporary water service contracts for the various types of service are available upon written request from the Regional Director at the address shown above.

3. Friant Division Contractors, CVP, California: Renewal of existing long-term water service contracts with contractors on the Friant-Kern and Madera Canals or diverters from Millerton Reservoir; most contracts expire 1994-1997, two contracts expire later; water quantities in existing contracts range from 1,200 to 175,440 acre-feet. These contract actions will be accomplished through 3-year interim contracts with subsequent 2-year interim contracts until the CVP Environmental Impact Statement is completed pursuant to Pub. L. 102-575.

4. Contra Costa WD, CVP, California: Amendatory water service contract to add the operation of the Los Vaqueros Project, including an additional point of delivery; the amendment will also conform the contract to current Reclamation policies, including the water ratesetting policy, and Pub. L. 102-575.

5. Redwood Valley County WD, SRPA, California: District is considering restructuring the repayment schedule pursuant to Pub. L. 100-516 or prepaying the loan at a discounted rate pursuant to Pub. L. 102-575.

6. Madera ID, Hidden Unit, CVP, California: Renewal of existing water service contract for 24,000 acre-feet of water which expires February 28, 1994. This contract action will be accomplished through a 3-year interim contract with a subsequent 2-year interim contract until the CVP

Environmental Impact Statement is completed pursuant to Pub. L. 102-575.

7. Chowchilla WD, Buchanan Unit, CVP, California: Renewal of existing water service contract for 24,000 acre-feet of water which expires February 28, 1994. This contract action will be accomplished through a 3-year interim contract with a subsequent 2-year interim contract until the CVP Environmental Impact Statement is completed pursuant to Pub. L. 102-575.

8. Truckee Carson ID, Newlands Project, Nevada: New repayment contract for the unpaid construction cost repayment obligation from the original contract which was terminated on August 17, 1983, by the U.S. District Court in Nevada.

9. San Luis WD, CVP, California: Amendatory water service contract to provide that the District pay full O&M rate for all deliveries resulting from the Azhdarian Pumping Plant enlargement and the cost of service rate for such deliveries beginning in 1996 and each year thereafter.

10. Delta Mendota Canal Contractors, CVP, California: Renewal of existing long-term water service contracts with contractors on the Delta-Mendota Canal whose contracts expire in 1994-2003; water quantities in existing contracts range from 70 to 50,000 acre-feet. These contract actions will be accomplished through 3-year interim contracts with subsequent 2-year interim contracts until the CVP Environmental Impact Statement is completed pursuant to Pub. L. 102-575.

11. City of Redding, CVP, California: Amendment to Contract No. 14-06-200-5272A to add a point of diversion at the turnout, Spring Creek Power Conduit, to facilitate proposed water treatment plant for Buckeye service area.

12. U.S. Department of Veteran Affairs, CVP, California: Long-term contract, which will conform to Pub. L. 102-575, for M&I water purposes in support of the new San Joaquin Valley National Cemetery near Santa Nella, California.

13. Century Ranch Water Company, Inc., CVP, California: Long-term exchange contract for M&I, less than 100 acre-feet; Stony Creek Watershed above Black Butte Dam.

14. State of California, Department of Forestry, CVP, California: Water right exchange agreement, less than 100 acre-feet, above Black Butte Dam.

15. San Luis WD, CVP, California: Amendment to Contract No. 14-06-200-7773A to include assigned lands and allocated share of CVP water supply to San Luis WD from Romero WD and comply with Pub. L. 102-575.

16. Romero WD, CVP, California: Amendment to Contract No. 14-06-200-7758 to assign lands and allocated share of CVP water supply to San Luis WD and comply with Pub. L. 102-575.

17. IDs and similar water user entities, CVP, California: Amendatory water service contracts; to change the definition of "year" to conform to the standard CVP water year of March 1 through the end of February.

18. Sacramento River water rights settlement contractors, CVP, California: Contract amendment for assignment under voluntary land ownership transfers to provide for the current CVP water rates and update standard contract articles.

19. Sierra Pacific Power Company, Pyramid Lake Tribe, Washoe County Water Conservation District; Washoe and Truckee-Storage Projects; Nevada and California: Interim storage contract, authorized under Pub. L. 101-618, and the provision of the Warren Act as supplemented by the Reclamation States Emergency Drought Act to convey and/or store non-project water in Stampede Reservoir and in Boca Reservoir.

20. Naval Air Station and Truckee Carson ID, Newlands Project, Nevada: Amend water service Agreement No. 14-06-400-1024 for the use of project water on Naval Air Station land.

21. Del Puerto WD, CVP, California: Amend water service Contract No. 14-06-200-922 to include M&I use.

22. El Dorado County Water Agency, San Juan Suburban WD, and Sacramento County Water Agency, CVP, California: M&I water service contract to supplement existing water supply: 15,000 acre-feet for El Dorado County Water Agency, 13,000 acre-feet for San Juan Suburban WD, and 22,000 acre-feet for Sacramento County Water Agency.

23. Non-Federal entity, CVP, California: Cost-sharing agreement with a yet to be determined non-Federal entity for the Folsom Dam and Reservoir reoperation.

24. Central Coast Water Authority, Cachuma Project, California: Long-term Warren Act contract for use of Cachuma Project facilities when excess capacity exists. A total of 13,750 acre-feet of water per year from the California State Water Project will be made available under a Warren Act contract to users along the South Coast of California.

25. Pershing County Water Conservation District, Humboldt Project, Nevada: Safety of Dams repayment contract for modification of Rye Patch Dam; reimbursable obligation of the District approximately \$1,050,000.

26. California Department of Fish and Game, CVP, California: Renewal of existing long-term agreement for

furnishing water for fish hatchery purposes.

27. Widren WD, CVP, California: Amend water service Contract No. 14-06-200-8018 to include M&I use, conform to Pub. L. 102-575 and assign water supply to City of Tracy.

28. Corning Canal, Tehama-Colusa Canal, and Cross Valley Canal; CVP; California: Renewal of existing long-term water service contracts with contractors on the Canals, whose contracts expire in 1995; water quantities in existing contracts range from 400 to 62,200 acre-feet. These contract actions will be accomplished through 3-year interim contracts with subsequent 2-year interim contracts until the CVP Environmental Impact Statement is completed pursuant to Pub. L. 102-575.

29. Bella Vista WD, CVP, California: Renewal of existing long-term water service contract which expires December 31, 1994; water quantity in existing contract is 24,000 acre-feet. This contract action will be accomplished through a 3-year interim contract with a subsequent 2-year interim contract until the CVP Environmental Impact Statement is completed pursuant to Pub. L. 102-575.

30. Clear Creek Community Services District, CVP, California: Renewal of existing long-term water service contract which expires December 31, 1994; water quantity in existing contract is 15,300 acre-feet. This contract action will be accomplished through a 3-year interim contract with a subsequent 2-year interim contract until the CVP Environmental Impact Statement is completed pursuant to Pub. L. 102-575.

31. Gateway WD, CVP, California: Combine by assignment twelve Delta-Mendota Canal water service contracts into 1-entity to be renamed Gateway WD for administrative and operation purposes.

32. U.S. Fish and Wildlife Service, California Department of Fish and Game, Grassland WD; CVP; California: Water service contracts to provide Level II water supplies for refuges within the CVP pursuant to Pub. L. 102-575; exchange agreements and wheeling contracts to deliver some of the increased refuge water supplies; quantity to be contracted for is approximately 416,000 acre-feet.

33. Monterey County Water Resources Agency, Castroville Irrigation Water Supply Project, SRPA, California: Loan repayment contract in the amount of \$32,600,000 to construct an irrigation distribution system to reduce sea water intrusion in the ground water aquifers.

34. Monterey Regional Water Pollution Control Agency, Water

Reclamation Facility for Crop Irrigation Project, SRPA, California: Loan repayment contract in the amount of \$20,544,400 to reduce sea water intrusion in the ground water aquifers.

35. San Juan Suburban WD, CVP, California: Renewal of existing long-term water service contract which expires February 28, 1995; water quantity in existing contract is 11,200 acre-feet. This contract action will be accomplished through a 3-year interim contract with a subsequent 2-year interim contract until the CVP Environmental Impact Statement is completed pursuant to Pub. L. 102-575.

36. Shasta Dam Area Public Utility District, CVP, California: Amendment of existing temporary contract to extend contract term and to comply with terms and conditions of Pub. L. 102-575.

37. State of California, CVP, California: Cost sharing agreement with State of California pursuant to CVP Improvement Act (Pub. L. 102-575). The cost sharing agreement with the State will provide for the general principles and administration of cost sharing and implementation of specific restoration actions identified in Pub. L. 102-575.

38. Santa Barbara County Water Agency, Cachuma Project, California: Renewal of existing long-term water service contract which expires May 14, 1995; water quantity in existing contract 32,000 acre-feet.

39. United Water Conservation District, SRPA, California: District to prepay the loan at discounted rate pursuant to Pub. L. 102-575.

40. San Juan Suburban WD and the Placer County Water Agency, CVP, California: Renewal of existing long-term wheeling contract allowing the Agency to use CVP facilities to deliver its water to the District for use on District land within Placer County.

Lower Colorado Region: Bureau of Reclamation, P.O. Box 61470 (Nevada Highway and Park Street), Boulder City, Nevada 89006-1470, telephone 702-293-8536.

1. Agricultural and M&I water users, CAP, Arizona: Water service subcontracts for percentages of available supply reallocated in 1992 for irrigation entities and up to 640,000 acre-feet per year allocated in 1983 for M&I use.

2. Southern Arizona Water Rights Settlement Act: Sale of up to 28,200 acre-feet per year of municipal effluent to the City of Tucson, Arizona.

3. Milton and Jean Phillips, Kenneth or Ann Easterday, Robert E. Harp, Cameron Brothers Construction Co., Ogram Farms, Bruce Church, Inc., Stephen Sturges, Sunkist Growers, Inc., Clayton Farms, BCP, Arizona: Water

service contracts, as recommended by Arizona Department of Water Resources, with agricultural entities located near the Colorado River for up to an additional 15,557 acre-feet per year total.

4. Arizona State Land Department, State of Arizona, BCP, Arizona: Contract for 6,607 acre-feet per year of Colorado River water for agricultural use and related purposes on State-owned land. This contract action reflects an increase in a prior contract recommendation in the amount of 6,292 acre-feet per year.

5. Armon Curtis, Arlin Dulin, Jacy Rayner, Glen Curtis, Jamar Produce Corporation, and Ansel T. Hall, BCP, Arizona: Water service contracts; purpose is to amend their contracts to exempt them from the Reclamation Reform Act of 1982 (Pub. L. 97-293).

6. Indian and non-Indian agricultural and M&I water users, CAP, Arizona: New and amendatory contracts for repayment of Federal expenditures for construction of distribution systems.

7. City of Kingman, BCP, Arizona: The City has requested a 2-year extension of the contract article that provides the United States the right to terminate the contract on November 14, 1993, based on the City's lack of use of their entitlement (not to exceed 18,500 acre-feet) over the last 25 years.

8. Cibola Valley IDD, BCP, Arizona: Cibola Valley IDD is considering transferring, leasing, selling, or banking its water entitlement of 22,560 acre-feet.

9. Ft. Yuma Indian Reservation (Quechan Indian Reservation), Yuma Project, Arizona and California: Surplus water contract to receive Colorado River water in the states of Arizona and California; contract may include surplus and unused apportionment entitlements (51,616 acre-feet or 7,743 acres, whichever is less) and wheeling arrangements with Bard ID.

10. Imperial ID, Lower Colorado Water Supply Project, California: Contracting providing for O&M of the project well field.

11. Lower Colorado Water Supply Project, California: Water service and repayment contracts with nonagricultural users in California adjacent to the Colorado River for an aggregate consumptive use of up to 10,000 acre-feet of Colorado River water per year in exchange for an equivalent amount of water to be pumped into the All-American Canal from a well field to be constructed adjacent to the canal.

12. County of San Bernardino, San Sevine Creek Water Project, SRPA, California: Repayment contract for a \$28.6 million loan.

13. Tohono O'odham Nation, SRPA, Arizona: Repayment contract for a \$7.3 million loan for the Schuk Toak District.

14. Bullhead City, Consolidated Water Co., Lake Havasu City, Havasu Water Co., Quartzsite, McAllister Subdivision, City of Parker, Marble Canyon, and Arizona State Land Department, BCP, Arizona: Contracts for additional M&I allocations of Colorado River water to entities located along the Colorado River in Arizona for up to 15,146 acre-feet per year as recommended by the Arizona Department of Water Resources.

15. National Park Service for Lake Mead National Recreation Area, Supreme Court Decree in *Arizona v. California*, and BCP in Arizona and Nevada: Memorandum of Understanding for delivery of Colorado River water for the National Park Service's Federal Establishment present perfected right of 500 acre-feet of diversions annually, and the National Park Service's Federal Establishment perfected right pursuant to Executive Order No. 5125 (April 25, 1930).

16. Imperial ID and/or The Metropolitan WD of Southern California, BCP, California: Construction and funding contract to conserve water along a portion of the All-American Canal in accordance with Title II of the San Luis Rey Indian Water Rights Settlement Act, dated January 25, 1988.

17. Coachella Valley WD and/or The Metropolitan WD of Southern California, BCP, California: Construction and funding contract to conserve water along a portion of the Coachella Branch of the All-American Canal in accordance with Title II of the San Luis Rey Indian Water Rights Settlement Act, dated January 25, 1988.

18. Elsinor Valley Municipal WD, Temescal Valley Project, SRPA, California: Repayment contract for a \$22.3 million loan.

19. Mohave Valley ID, BCP, Arizona: Amendment of current contract for additional Colorado River water, change in service areas, diversion points, and RRA exemption.

20. Miscellaneous present perfected rights entitlement holders, BCP, Arizona and California: Contracts for entitlements of Colorado River water as decreed by the U.S. Supreme Court in *Arizona v. California*, as supplemented or amended, and as required by section 5 of the BCP. Miscellaneous present perfected rights holders are listed in the *Arizona v. California* settlement.

21. Federal Establishment present perfected rights entitlement holders: Individual contracts for administration of Colorado River water entitlements of the Colorado River, Fort Mojave,

Quechan, Chemehuevi, and Cocopah Indian Tribes.

22. Yuma County Water Users' Association, Yuma Project, Arizona: Contract to enable the Association to administer non-irrigation water within its service area.

23. City of Yuma, BCP, Arizona: Stand alone contract or amendment to Contract No. 14-067-W-106 for additional points of diversion.

24. City of Yuma, BCP, Arizona: Amendment to Contract 14-06-W-106 for an additional point of diversion to provide water delivery to Yuma Cogeneration Associates for use at Cogeneration Plant.

25. Imperial ID and The Metropolitan WD of Southern California, BCP, California: Temporary contract to store approximately 200,000 acre-feet of water that is expected to be saved over a 2-year period under a test water savings program that involves land fallowing and a modified irrigation plan for alfalfa.

26. Crystal Beach Water Conservation District, BCP, Arizona: Contract for delivery of 132 acre-feet per year of Colorado River water for domestic use, as recommended by the Arizona Department of Water Resources.

27. Robert B. Griffith Water Project, BCP, Nevada: Revision of water delivery contract to amend points of diversion.

28. Southern Nevada Water Authority, BCP, Nevada: Assignment of 14,500 acre-feet of Basic Management, Inc.'s water entitlement to the Southern Nevada Water Authority.

29. HoHoKam ID: Central Arizona Water Conservation District; and the Cities of Chandler, Glendale, Mesa, Phoenix, Scottsdale, and Tempe; CAP; Arizona: Principles of agreement, agreement, and support arrangements to provide the cities with Cliff Dam replacement water and provide for the repayment of HoHoKam ID Federal indebtedness. This would include amendment to Contract No. 5-07-30-W0083 to increase HoHoKam's Federal indebtedness for HoHoKam's CAP distribution system.

30. Gila River Farms, SRPA, Arizona: Amendatory contract to reschedule May 1, 1991 payment over the remaining repayment period.

31. Bureau of Land Management, BCP, Arizona: Contract for 1,176 acre-feet per year, for agricultural use, of Arizona's Colorado River Water that is not used by higher priority Arizona entitlement holders.

32. Curtis Family Trust et al., BCP, Arizona: Contract for 2,100 acre-feet per year of Colorado River water for agricultural water.

33. Fort McDowell Indian Community, CAP, Arizona: Amendatory water service contract for 13,933 acre-feet per year under the Fort McDowell Indian Community Water Rights Settlement Act of 1990.

34. Town of Payson, CAP, Arizona: Assignment of Payson's CAP water entitlement of 4,995 acre-feet per year to the city of Scottsdale.

35. Beattie Farms SW, BCP, Arizona: Contract for 1,890 acre-feet per year of unused Arizona entitlement for agricultural use.

36. Section 10 Backwater, BCP, Arizona: Contract for 250 acre-feet per year of unused Arizona entitlement for environmental use until a permanent water supply can be obtained.

37. Central Arizona Water Conservation District, CAP, Arizona: Amendment of the contract between the United States and Central Arizona Water Conservation District for the delivery of water and repayment of costs of the CAP (Master Repayment Contract) to increase the repayment ceiling set forth in subarticle 9.3(e) from \$2.0 billion to \$2.3 billion.

Upper Colorado Region: Bureau of Reclamation, P.O. Box 11568, (125 South State Street), Salt Lake City, Utah 84147, telephone 801-524-5435.

1. Individual irrigators, M&I, and miscellaneous water users, Utah, Wyoming, Colorado, and New Mexico: Temporary (interim) water service contracts for surplus project water for irrigation or M&I use to provide up to 10,000 acre-feet of water annually for terms up to 10 years; long-term contracts for similar service for up to 1,000 acre-feet of water annually.

(a) The Benevolent and Protective Order of the Elks, Lodge No. 1747, Farmington, New Mexico: Navajo Reservoir water service contract; 20 acre-feet per year for municipal use.

2. Southern Ute Indian Tribe, Animas-La Plata Project, Colorado: Repayment contract of 26,500 acre-feet per year for M&I use and 2,600 acre-feet per year for irrigation use in Phase One and 700 acre-feet in Phase Two; contract terms to be consistent with binding cost sharing agreement and water rights settlement agreement.

3. Ute Mountain Ute Tribe, Animas-La Plata Project, Colorado and New Mexico: Repayment contract; 6,000 acre-feet per year for M&I use in Colorado; 26,400 acre-feet per year for irrigation use in Colorado; 900 acre-feet per year for irrigation use in New Mexico; contract terms to be consistent with binding cost sharing agreement and water rights settlement agreement.

4. Navajo Indian Tribe, Animas-La Plata Project, New Mexico: Repayment

contract for 7,600 acre-feet per year for M&I use.

5. La Plata Conservancy District, Animas-La Plata Project, New Mexico: Repayment contract for 9,900 acre-feet per year for irrigation use.

6. Vermejo Conservancy District, Vermejo Project, New Mexico: Amend contract pursuant to Pub. L. 96-550 to relieve the district of requirement to make annual payments until the Secretary of the Interior determines that further payments are feasible; the current obligation exceeds \$2 million.

7. San Juan Pueblo, San Juan-Chama Project, New Mexico: Repayment contract for up to 2,000 acre-feet of project water for irrigation purposes.

8. City of El Paso, Rio Grande Project, Texas and New Mexico: Amendment to the 1941 and 1962 contracts to expand acreage owned by the City to 3,000 acres; extend terms of water rights assignments; and allow assignments outside City limits under authority of the Public Service Board.

9. Mancos Water Conservancy District, Mancos Project, Colorado: Amendatory contract to remove contract restrictions that prevent the Mancos Water Conservancy District from developing hydropower on the Mancos Project.

10. The National Park Service, Bureau of Land Management, Colorado Water Conservation Board, Wayne N. Aspinall Unit, CRSP, Colorado: Contract for between 180,000 to 740,000 acre-feet of project water to provide specific river flow patterns in the Gunnison River through the Black Canyon of the Gunnison National Monument.

11. Upper Gunnison River Water Conservancy District, Wayne N. Aspinall Unit, CRSP, Colorado: Water service contract for 500 acre-feet for 1-year for municipal and domestic use.

12. Upper Gunnison River Water Conservancy District, Wayne N. Aspinall Unit, CRSP, Colorado: Substitute supply plan for the administration of the Gunnison River.

13. Collbran Conservancy District, Collbran Project, Colorado: Amendatory contract defining priority of use of project water.

14. U.S. Fish and Wildlife Service, North Fork Water Conservancy District, Paonia Project, Colorado: Contract for releases to support endangered fish in the Gunnison and Colorado Rivers; water available for releases will come from reserve capacity held by Reclamation as sediment pool, estimated to be 1,800 acre-feet annually; contract will define the terms and conditions associated with delivery of this water.

15. Rio Grande Water Conservation District, Closed Basin Division, San Luis Valley Project Colorado: Water service contract for furnishing priority 4 water to third parties; contract will allow District to market priority water, when available, for agricultural, municipal and/or industrial use.

16. Uncompahgre Valley Water Users Association, Upper Gunnison River Water Conservancy District, Colorado River Water Conservation District, Uncompahgre Project, Colorado: Water management agreement for water stored at Taylor Park Reservoir and the Wayne N. Aspinall Storage Units to improve water management.

Great Plains Region: Bureau of Reclamation, P.O. Box 36900, Federal Building, 316 North 26th Street, Billings, Montana 59107-6900, telephone 406-657-6413.

1. Individual irrigators, M&I, and miscellaneous water users; Montana, Wyoming, North Dakota, South Dakota, Colorado, Kansas, Nebraska, Oklahoma, and Texas: Temporary (interim) water service contracts for the conveyance, storage, and exchange of surplus project water and nonproject water for irrigation or M&I use to provide up to 10,000 acre-feet of water annually for terms up to 5-years; long-term contracts for similar service for up to 1,000 acre-feet of water annually.

2. Fort Shaw ID, Sun River Project, Montana: R&B loan repayment contract; up to \$1.5 million.

3. Green Mountain Reservoir, Colorado-Big Thompson Project, Colorado: Water service contracts for irrigation, municipal, and industrial purposes; contract negotiations for sale of water from the marketable yield to water users within the Colorado River Basin of Western Colorado.

4. Ruedi Reservoir, Fryingpan-Arkansas Project, Colorado: Repayment contracts; second round contract negotiations for municipal, domestic, and industrial water from the regulatory capacity of Ruedi Reservoir.

5. Cedar Bluff ID No. 6, Cedar Bluff Unit, P-SMBP, Kansas: In accordance with Section 901 of Pub. L. 102-575, 106 Stat. 4600, terminate the Cedar Bluff Irrigation District's repayment contract and transfer use of the District's portion of the reservoir storage capacity to the State of Kansas for fish, wildlife, recreation, and other purposes.

6. Garrison Diversion Unit, P-SMBP, North Dakota: Renegotiation of the master repayment contract with Garrison Diversion Conservancy District to conform with the Garrison Diversion Unit Reformulation Act of 1986; negotiation of repayment contracts with irrigators and M&I users.

7. Corn Creek ID, Glendo Unit, P-SMBP, Wyoming: Repayment contract for 10,350 acre-feet of supplemental irrigation water from Glendo Reservoir.

8. East Bench ID, East Bench Unit, P-SMBP, Montana: D&MC contract for \$300,000 for minor construction work for up to a 10-year period.

9. Foss Reservoir Master Conservancy District, Washita Basin Project, Oklahoma: Amendatory repayment contract for remedial work.

10. Arbuckle Master Conservancy District, Arbuckle Project, Oklahoma: Contract for the repayment of costs of the construction of the Sulphur, Oklahoma, pipeline and pumping plant (if constructed).

11. Chinook Water Users Association, Milk River Project, Montana: SRPA contract for loan of up to \$6,000,000 for improvements to the Association's water conveyance system.

12. Midvale ID, Riverton Unit, P-SMBP, Wyoming: Long-term contract for water service from Boysen reservoir.

13. Tom Green County Water Control and Improvement District No. 1, San Angelo Project, Texas: Continent upon passage of authorizing legislation, negotiate amendatory contract to increase irrigable acreage within the project.

14. Palmetto Bend Project, Texas: Amendment of the tripartite contract among the United States, the Lavac-Navidad River Authority and the Texas Water Development Board to transfer the Board's remaining repayment obligation and interest in the Palmetto Bend Project to the Authority.

15. Canadian River Municipal Authority, Canadian River Project, Texas: Amendatory contract to reflect credit for project lands transferred to the National Park Service under Pub. L. 101-628 for the Lake Meredith National Recreation Area.

16. Lakeview ID, Shoshone Project, Wyoming: New long-term water service contract for up to 3,200 acre-feet of firm water supply annually and up to 11,800 acre-feet of interim water from Buffalo Bill Reservoir.

17. Hidalgo County ID No. 6, Texas: SRPA contract for a 20-year loan for up to \$5,712,900 to rehabilitate the District's irrigation facilities.

18. City of Rapid City and Rapid Valley Water Conservancy District, Rapid Valley Unit, P-SMBP, South Dakota: Contract renewal for up to 55,000 acre-feet of storage capacity in Pactola Reservoir.

19. Thirty Mile Canal Company, Nebraska: SPRA contract for a loan of \$2,264,000 to reline the main canal, replace open laterals with buried pipe, and replace bridges.

20. City of Estes Park, Colorado-Big Thompson Project, Colorado: Modification of water service contract to change point of diversion and other administrative revisions.

21. Belle Fourche ID, Belle Fourche Unit, P-SMBP, South Dakota: Amendment to D&MC contract to extend work through 1995 and provide an additional \$1 million to complete the work.

22. North Platte Project and Glendo Unit, P-SMBP, Wyoming and Nebraska contractors: Repayment contracts under safety of dams programs for the modification of Pathfinder, Guernsey, and Glendo Dams.

23. State of Colorado, Armel Unit, P-SMBP, Colorado: Repayment contract under safety of dams program for the modification of Bonny Dam.

24. Ainsworth ID, Almena ID, Bostwick ID, Frenchman-Cambridge ID, Frenchman Valley ID, Kansas-Bostwick ID, Kirwin ID, Loup Basin Reclamation District, Webster ID; P-SMBP; Kansas and Nebraska: Renegotiation of existing water service and repayment contracts for irrigation water supplies.

25. Mountain Park Master Conservancy District, Mountain Park Project, Oklahoma: In accordance with Section 3102 of Pub. L. 102-575, 106 Stat. 4600, amend the District's contract to reflect a discounted prepayment of the City of Frederick's obligation for the reimbursable costs of its M&I water supply.

26. Northern Cheyenne Indian Reservation, Montana: In accordance with Section 9 of the Northern Cheyenne Reserved Water Rights Settlement Act of 1992, the U.S. and the Northern Cheyenne Indian Tribe are proposing to contract for 30,000 acre-feet per year of stored water from Bighorn Reservoir, Yellowtail Unit, Lower Bighorn Division, P-SMBP, in Montana. The Tribe will pay the U.S. both capital and O&M costs associated with each acre-foot of water the Tribe sells from this storage for M&I purposes.

27. Canadian River Municipal Water Authority, Canadian River Project, Texas: Contract for the United States to pay up to 33 percent of the costs of the salinity control project. These costs are to be used for the design and construction management of the project facilities.

28. Mid-Dakota Rural Water System, Inc.; South Dakota: Pursuant to the Reclamation Projects Authorization and Adjustment Act of 1992, the Secretary of the Interior is authorized to make grants and loans to Mid-Dakota Rural Water System, Inc., a non-profit corporation for the planning and construction of a rural water supply system.

Dated: October 19, 1993.

J. Austin Burke,

Assistant Commissioner, Program, Budget and Liaison.

INTERSTATE COMMERCE COMMISSION

Release of Waybill Data

The Commission has received a requests from the Reebie Associates for permission to use certain data from the 1992 ICC Waybill Sample.

A copy of the request (WB654-10/8/93) may be obtained from the ICC Office of Economics.

The waybill sample contains confidential railroad and shipper data; therefore, if any parties object to this request, they should file their objections (an original and 2 copies) with the Director of the Commission's Office of Economics within 14 calendar days of the date of this notice. The rules for release of waybill data (Ex Parte 385 (Sub-No. 2)) are codified at 49 CFR 1244.8.

Contact: James A. Nash, (202) 927-6196.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035-01-P

[Finance Docket No. 32354]

Chicago and North Western Transportation Co.—Trackage Rights Exemption—Line of Soo Line Railroad Co. in St. Paul, MN

Soo Line Railroad Company (Soo) has agreed to grant trackage rights to Chicago and North Western Transportation Company (CNW) over those portions of Soo Trackage located between Randolph Avenue and Chestnut Street, in St. Paul, MN. The parties proposed to consummate the transaction as of October 12, 1993.

This notice is filed under 49 CFR 1180.2(d)(7). If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction. Pleadings must be filed with the Commission and served on: Thomas F. Flanagan, 165 North Canal Street, Chicago, IL 60606-1551.

As a condition to use of this exemption, any employees adversely affected by the trackage rights will be

protected pursuant to Norfolk and Western Ry. Co.—Trackage Rights—BN, 354 I.C.C. 605 (1978), as modified in Mendocino Coast Ry., Inc.—Lease and Operate, 360 I.C.C. 653 (1980).

Decided: October 18, 1993.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

Atchison, Topeka and Santa Fe
Railway**

Kansas Southwestern Railway Company (KSW), a noncarrier, has filed a notice of exemption: (1) To lease and operate 297.5 miles of rail line owned by Missouri Pacific Railroad Company (MP)¹ in the State of Kansas; and (2) to acquire incidental trackage rights over approximately 2 miles of the Atchinson, Topeka and Santa Fe Railway Company (Santa Fe) line in the State of Kansas. KSW will become a class III rail carrier. The exemption became effective on October 4, 1993 and the transaction was expected to be consummated on or after that date.

The lines involved in the lease transaction consist of MP's lines: (1) Between milepost 572.677 on the east leg of the wye and 1,213 feet of the west leg of the wye at Genesco, KS, to milepost 486.003 of the northeast leg of the wye and 984 feet of the southeast leg of the wye at Wichita, KS; (2) the Hardtner Branch from milepost 485.938 at Wichita, KS to milepost 581.778 at Hardtner, KS; (3) the Stafford Branch from milepost 559.028 of the south leg of the wye and 955 feet of the north leg of the wye at Conway Springs, KS, to milepost 654.11 at Radium, KS; and (4) the Iuka Branch from milepost 609.97 at Olcott, KS, to milepost 630.13 at Iuka, KS. The incidental trackage rights that KSW will acquire as part of this transaction will be over Santa Fe's line at Kiowa, KS between milepost 306+3989.0 and milepost 308+1908.6, a total distance of approximately 2 miles.

This proceeding is related to Finance Docket No. 32362, The Broe Companies, Inc., The Great Western Railway

¹ The trackage rights were previously leased to Manufacturers' Junction Railway Company (MJR) in Finance Docket No. 31783, Manufacturers' Junction Railway Company—Lease and Operation Exemption—Missouri Pacific Railroad Company (not printed), served March 6, 1991.

Company, Railco, Inc., and Chicago West Pullman Transportation Corporation, Et Al.—Corporate Family Exemption, wherein The Broe Companies, Inc., Railco, Inc., and Chicago West Pullman Transportation Corporation have concurrently filed a notice of exemption to continue in control of KSW as part of a corporate family reorganization.

Any comments must be filed with the Commission and served on: Karl Morell, Taylor, Morell & Gitomer, suite 210, 919 18th Street, NW., Washington, DC 20006.

This notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: October 18, 1993.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Information Collections Under Review

The Office of Management and Budget (OMB) has been sent the following collection(s) of information proposals for review under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35) and the Paperwork Reduction Reauthorization Act since the last list was published. Entries are grouped into submission categories, with each entry containing the following information:

- (1) The title of the form/collection;
- (2) The agency form number, if any, and the applicable component of the Department sponsoring the collection;
- (3) How often the form must be filled out or the information is collected;
- (4) Who will be asked or required to respond, as well as a brief abstract;
- (5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond;
- (6) An estimate of the total public burden (in hours) associated with the collection; and,
- (7) An indication as to whether Section 3504(h) of Public Law 96-511 applies.

Comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the

estimated public burden and associated response time, should be directed to the OMB reviewer, Mr. Jeff Hill on (202) 395-7340 and to the Department of Justice's Clearance Officer, Mr. Lewis Arnold, on (202) 514-4305. If you anticipate commenting on a form/collection, but find that time to prepare such comments will prevent you from prompt submission, you should notify the OMB reviewer and the DOJ Clearance Officer of your intent as soon as possible. Written comments regarding the burden estimate or any other aspect of the collection may be submitted to Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, and to Mr. Lewis Arnold, DOJ Clearance Officer, SPS/JMD/5031 CAB, Department of Justice, Washington, DC 20530.

Extension of the Expiration Date of a Currently Approved Collection Without Any Change in the Substance or in the Method of Collection

- (1) Application for Transfer of petition for Naturalization
- (2) N-455. Immigration and Naturalization Service
- (3) On occasion
- (4) Individuals or households. This form is used by a petitioner for naturalization to request a transfer of his/her petition to another court; used by INS to make a recommendation to the court.
- (5) 100 annual respondents at .166 hours per response
- (6) 17 annual burden hours
- (7) Not applicable under section 3504(h)
- (1) Interagency Record of Individual Requesting Change
- (2) I-566. Immigration and Naturalization Service
- (3) On occasion
- (4) Individuals or households. This form facilitates the processing of applications for benefits filed by diplomatic and international organizational personnel, or by persons requesting said status. The information assists INS and the Department of State in exercising joint adjudicative responsibility.
- (5) 3,000 annual respondents at .25 hours per response
- (6) 750 annual burden hours
- (7) Not applicable under section 3504(h)
- (1) Affidavit of Support
- (2) I-134. Immigration and Naturalization Service
- (3) On occasion
- (4) Individuals or households. The information will be used to determine whether the applicant for benefits will become a public charge if admitted to the United States.

- (5) 44,000 annual respondents at .332 hours per response
 (6) 14,608 annual burden hours
 (7) Not applicable under section 3504(h)
 (1) Guam Visa Waiver Information Form
 (2) I-736. Immigration and Naturalization Service
 (3) Daily
 (4) Individuals or households. Public Law 396 provides for certain aliens to be exempt from the nonimmigrant visa requirement if seeking entry into and desiring to visit Guam for a maximum of fifteen days, provided that they pose no potential threat to the security of the U.S.; its territories and commonwealths.
 (5) 60,000 annual respondents at .083 hours per response
 (6) 4,980 annual burden hours
 (7) Not applicable under section 3504(h)
 (1) Application for Posthumous Citizenship
 (2) N-644. Immigration and Naturalization Service
 (3) On occasion
 (4) Individuals or households. The information collected will be used to determine an applicant's eligibility to request posthumous citizenship status for a decedent and to determine the decedent's eligibility for such status.
 (5) 100 annual respondents at 1.83 hours per response
 (6) 183 annual burden hours
 (7) Not applicable under section 3504(h)

Existing Collection in Use Without an OMB Control Number

- (1) Monthly Report Naturalization Papers Forwarded
 (2) N-4. Immigration and Naturalization Service
 (3) Monthly
 (4) State or local governments, Federal agencies or employees. This form will be used by the clerk of a naturalization court to report to INS the Oath Administration ceremonies held each month and to account for certificates of naturalization delivered to individuals by the court. INS will use this information to complete the records on naturalization cases, and to audit costs incurred by the courts, which are charged to INS.
 (5) 160 annual respondents, 12 responses per respondent at .25 hours per response
 (6) 480 annual burden hours
 (7) Not applicable under section 3504(h)

Public comment on these items is encouraged.

Dated: October 20, 1993.

Lewis Arnold,
 Department Clearance Officer, Department of Justice.

New Collection

- (1) Arrival and Departure Record (Transit Without Visa)
- (2) I-94T. Immigration and Naturalization Service
- (3) On occasion
- (4) Individuals or households. This form is used to aid the effectiveness of the Transit Without Visa (TWOV) process, and to enhance the accuracy of TWOV collection. This form provides the most efficient means for

collecting and processing the required TWOV data.

- (5) 200,000 annual respondents at .07 hours per respondent
 (6) 14.00 annual burden hours
 (?) Not applicable under section 3504(h)
 Public comment on these items is encouraged.

Dated: October 18, 1993.

Lewis Arnold,
 Department Clearance Officer, Department of Justice.

 BILLING CODE 4410-10-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Council on the Humanities; Meeting

October 18, 1993.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended) notice is hereby given that a meeting of the National Council on the Humanities will be held in Washington, DC on November 18-19, 1993.

The purpose of the meeting is to advise the Chairman of the National Endowment for the Humanities with respect to policies, programs, and procedures for carrying out his functions, and to review applications for financial support and gifts offered to the Endowment and to make recommendations thereon to the Chairman.

The meeting will be held in the Old Post Office Building, 1100 Pennsylvania Avenue, NW., Washington, DC. A portion of the morning and afternoon sessions on November 18-19, 1993, will not be open to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of title 5, United States Code because the Council will consider information that may disclose: Trade secrets and commercial or financial information obtained from a person and privileged or confidential; information of a personal nature the disclosure of which will constitute a clearly unwarranted invasion of personal privacy; and information the disclosure of which would significantly frustrate implementation of proposed agency action. I have made this determination under the authority granted me by the Chairman's Delegation of Authority dated July 19, 1993.

The agenda for the sessions on November 18, 1993, will be as follows:

8:30-9 a.m. Coffee for Council Members—Room 527.

(Open to the Public)

Committee Meetings

(Open to the Public)

Policy Discussion

9-10 a.m.:

Education Programs—Room M-14

Fellowship Programs—Room 315

Public Programs—Room 415

Research Programs/Preservation and
Access—Room M-07

State Programs and Office Outreach—
Room 507

(Closed to the Public)

10 a.m. until Adjourned. Discussion of specific grant applications before the Council.

The morning session on November 19, 1993, will convene at 9 a.m., in the 1st Floor Council Room, M-09, and will be open to the public, as set out below. The agenda for the morning session will be as follows:

(Coffee for Staff and Council Members will be served from 8:30-9 a.m.)

Minutes of the Previous Meeting Reports

- A. Introductory Remarks
- B. Introduction of the New Staff
- C. Contracts Awarded in the Previous Quarter
- D. Final Fiscal Year 1993 Budget Report
- E. Fiscal Year 1994 Appropriations
- F. Legislative Report
- G. Committee Reports on Policy and General Matters
 1. Overview
 2. Education Programs
 3. Fellowships Programs
 4. Public Programs
 5. Research Programs
 6. Preservation and Access
 7. State Programs and Office of Outreach

The remainder of the proposed meeting will be given to the consideration of specific applications (closed to the public for the reasons stated above).

Further information about this meeting can be obtained from Mr. David C. Fisher, Advisory Committee Management Officer, Washington, DC 20506, or call area (202) 606-8322, TDD (202) 606-8282. Advance notice of any special needs or accommodations is appreciated.

David C. Fisher,

Advisory Committee Management Officer.

NATIONAL SCIENCE FOUNDATION

Advisory Panel for Neurosciences; Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended) the National Science Foundation announces the following meeting.

Name: Advisory for Neurosciences.
Date and time: November 4th & 5th, 1993; 8 a.m.-5 p.m.

Place: National Science Foundation, Conference Room 310, 4201 Wilson Boulevard, Arlington, VA 22230.

Type of meeting: Part-Open.

Contact persons: Dr. Christopher Comer and Dr. Karen Sigvardt, Program Directors, Division of Integrative Biology and Neuroscience, suite 685, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230. Telephone: (703) 306-1416.

Purpose of meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: Closed session November 4th & 5th, 1993; 9 a.m.-5 p.m. and November 5th, 1993; except where noted below. To review and evaluate Behavioral & Computational Neuroscience proposals as part of the selection process for awards.

Open session: November 5th, 1993, 10 a.m.-11:30 a.m.; to discuss research trends and opportunities in Neuroscience.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the

proposals. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act.

Reason for late notice: Delay in obtaining a clearance to convene panel.

Dated: October 20, 1993.

M. Rebecca Winkler,

Committee Management Officer.

[FR Doc. 93-26139 Filed 10-22-93; 8:45 am]

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-482]

**Wolf Creek Nuclear Operating Corp.,
Wolf Creek Generating Station;
Issuance of Environmental
Assessment and Finding of No
Significant Impact**

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-42 issued to Wolf Creek Nuclear Operating Corporation (the licensee) for operation of the Wolf Creek Generating Station, Unit 1, located in Coffey County, Kansas.

Environmental Assessment

Identification of Proposed Action

This Environmental Assessment is written in connection with the proposed core uprate for the Wolf Creek Generating Station in response to the licensee's application dated January 5, 1993, as supplemented by letter dated October 1, 1993. The proposed action would increase the rated core power for Wolf Creek from the current level of 3411 Megawatts-thermal (MWt) to 3565 MWt, and upgrade the Nuclear Steam Supply System (NSSS) thermal power from 3425 MWt to 3579 MWt. This uprate would represent an increase of approximately 4.5 percent over the current rated core power and NSSS thermal power. As part of the proposed rerate of operating conditions, the licensee has included a reduction in reactor coolant hot leg temperature to address concerns related to the corrosion of steam generator tubes.

The Need for the Proposed Action

The proposed action is needed to increase the electrical output by approximately 28 Megawatts-electrical (MWe) and thus provide additional electrical power to the grids which service the commercial and residential areas of the owner utilities (Western Resources, Kansas City Power and Light, and the Kansas Electric Power Cooperative).

Environmental Impacts of the Proposed Action

A slight change in the environmental impact can be expected for an increase in plant power level, but the effects were found to be minimal and did not alter the findings stated in NUREG-0878, "Final Environmental Statement Related to the Operation of Wolf Creek Generating Station, Unit No. 1" (FES).

The proposed core uprating is projected to increase the rejected heat by approximately 4.5 percent. However, the expected thermal discharges from the circulating and service water systems remain bounded by the values evaluated in the FES. Thus, the 4.5 percent increase in rejected heat has been evaluated and determined to not significantly impact on the quality of the human environment.

The licensing basis analyses related to radiological source terms were originally performed assuming a core power of 3565 MWt which corresponds to the proposed rerate conditions. The NRC review of these calculations was documented in NUREG-0881, "Safety Evaluation Report Related to the Operation of Wolf Creek Generating Station, Unit No. 1." Additional assessments by the licensee related to the rerated conditions (power level and reactor coolant temperature) and other changes related to plant operation (Amendment 61 to Facility Operating License NPF-42) determined there would be no significant increase in the potential radioactive releases resulting from plant operation or design basis reactor accidents. In addition, no significant increases in individual or cumulative occupational radiation exposure would result from the proposed changes in operating conditions. Also, the proposed increase in the NSSS power involves no significant change in the amount of any nonradiological effluents that may be released offsite compared to those evaluated and approved in the FES.

Alternatives to the Proposed Action

Since the Commission has concluded that there are no significant environmental effects that would result from the proposed changes, any alternatives with equal or greater impacts need not be evaluated. The principal alternative to the proposed action would be to deny the requested amendment. Denial would not significantly reduce the environmental impact of plant operation and would restrict operation of the Wolf Creek Generating Station, Unit 1, to the currently licensed power level, thereby reducing operational flexibility.

Alternate Use of Resources

This action does not involve the use of resources not considered previously in the FES for Wolf Creek Generating Station, Unit 1.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and consulted with the Kansas State official. The State official had no comments regarding the NRC's proposed action.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed amendment. Based upon the foregoing environmental assessment, the NRC staff concludes that the proposed action will not have a significant effect on the quality of the human environment.

For additional details with respect to this action, see the application for amendment dated January 5, 1993, and supplemental letter dated October 1, 1993. These documents are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC 20555 and at the Local Public Document Rooms, Emporia State University, William Allen White Library, 1200 Commercial Street, Emporia, Kansas 66801 and the Washburn University School of Law Library, Topeka, Kansas 66621.

Dated at Rockville, Maryland, this 15th day of October 1993.

For the Nuclear Regulatory Commission.

Suzanne C. Black,

Director, Project Directorate IV-2, Division of Reactor Projects III/IV/V, Office of Nuclear Reactor Regulation.

[FR Doc. 93-26179 Filed 10-22-93; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 40-8027; License No. SUB-1010]

Order

In the Matter of Sequoyah Fuels Corporation General Atomics (Gore, Oklahoma, Site Decontamination and Decommissioning Funding).

I

Sequoyah Fuels Corporation (SFC or Licensee) is the holder of Source Material License No. SUB-1010 issued by the Nuclear Regulatory Commission (NRC or Commission) pursuant to 10 CFR part 40. SFC is a wholly-owned subsidiary of General Atomics (GA). The License authorizes SFC to possess and use source material in the production of uranium hexafluoride (UF₆) and depleted uranium tetrafluoride (DUF₄)

in accordance with the terms and conditions of the License. The License for UF₆ production was originally issued on February 20, 1970, by the Atomic Energy Commission (now the NRC). On March 25, 1987, the NRC granted Amendment 8, which authorized SFC to convert DUF₆ to DUF₄. The License was due to expire on September 30, 1990; on August 29, 1990, SFC submitted an application to the NRC to renew the License, so that pursuant to 10 CFR 40.43, the License currently remains in effect and has not expired. That application is currently pending in a proceeding before an Atomic Safety and Licensing Board.

II

SFC operates the Sequoyah Fuels Facility (the Facility), which is located near the intersection of Interstate 40 and Oklahoma State Highway 10 near Gore, Oklahoma. The Facility, soil, and groundwater on the site are contaminated with uranium that will require remediation in order for the site to be released for unrestricted use. The Commission's regulations in 10 CFR part 40 require licensees to provide financial assurance for decommissioning. They require applicants for and holders of licenses specified therein to have in place a funding assurance mechanism which satisfies 10 CFR 40.36. They also require, at the time of termination of all activities involving materials authorized under the license, an updated detailed cost estimate for decommissioning and a plan for assuring the availability of adequate funds for the completion of decommissioning. 10 CFR 40.42(c)(2)(iii)(D). In its August 29, 1990 application to renew the License, SFC included a decommissioning funding plan (1990 DFP) intended to satisfy the requirements of 10 CFR 40.36.

During 1991, extensive contamination was discovered near the Main Process Building and the Solvent Extraction Building and on October 3, 1991, the Commission issued an Order to suspend licensed activities at the Facility. At a public meeting with the Commission on March 17, 1992, at which the Commission was considering restart of Facility operations, SFC stated its expectation that it would fund the remediation of the contamination at the site through cash flows from operations at the Facility. This was supported by commitments made by GA, through its chairman, Mr. J. Neal Blue, to supply funding in order to guarantee that SFC will satisfy its obligations to provide financial assurance of funding for decommissioning. These commitments were confirmed by SFC's letter, with

attachments, of March 20, 1992 and by GA's letter to NRC Chairman Selin dated March 19, 1992, which reiterated GA's commitment to fund site remediation should SFC fail to do so. These commitments are discussed in greater detail in Section V, below. The Commission relied on the GA financial commitments in authorizing restart of the SFC Facility on April 16, 1992. In response to the May 6, 1992, NRC request to formalize those commitments, GA agreed by letter dated June 24, 1992, to execute an agreement with SFC and submitted a draft agreement to the NRC which was to be presented to the boards of directors of SFC and GA for approval. SFC and GA, however, have not executed that agreement.

However, by letter dated November 23, 1992, SFC informed the Commission that it intended to "clean out" the UF₆ facility and put it in a "standby" mode, that SFC intended to restart the DUF₄ facility in order to fulfill one existing contract, and that the unexecuted agreement between SFC and GA was "no longer applicable." Because of SFC's decision to continue with only short term limited operations at the Facility, GA and SFC asserted that those operations are expected to generate cash flow greatly reduced from that expected at the time of the March 17, 1992, public meeting. The November 23, 1992, letter indicated SFC's intent to cease permanently all production operations by the summer of 1993.

Additionally, the lack of financial and other information provided regarding SFC's plans raised serious questions as to whether SFC would have the financial resources to accomplish site remediation and decommissioning. For these reasons, the Commission held a public meeting on December 21, 1992, with the management of SFC and GA to obtain information concerning the plans for the Sequoyah Fuels Facility, particularly concerning assurance of financial resources needed to decontaminate and decommission the Facility and site. At the December 21, 1992, meeting, Mr. Blue again addressed the Commission regarding GA's support for the decommissioning of the Facility and site, but at this meeting Mr. Blue stated that GA could no longer provide financial assurance because the earlier commitment to do so was premised on license renewal and long term operation of the Facility. However, GA and SFC indicated that GA had restructured the business activities of SFC by entering into a joint venture with Allied Signal Corporation, creating a partnership, ConverDyn, to satisfy outstanding business commitments of SFC. GA and SEC asserted that funds for cleanup of

the Facility would be provided through anticipated revenues generated by ConverDyn.

Because the 1990 DFP did not consider the extensive additional contamination discovered during 1991, it is inadequate to satisfy 10 CFR 40.36 and the funding plan requirement of 10 CFR 40.42. SFC's Revision 1 to its application to renew the License, submitted on September 30, 1992, stated that:

[t]he revised and updated [Decommissioning Funding] Plan will be submitted by November 30, 1992 and will identify the decommissioning activities that will be performed after the 10-year license renewal term, and will summarize how they will be accomplished. While the estimated costs associated with these activities have not yet been fully quantified, they will be higher than the cost estimate previously submitted on August 29, 1990. (Revision 1 at 6-1)

SFC did not submit the revised DFP.

As a result of Mr. Blue's statements at the December 21, 1992 meeting, the Commission did not have an adequate basis to conclude that funding would in fact be available as needed to carry out necessary decontamination and decommissioning of the Facility and site.

The specific mechanisms for assurance of funding for decommissioning contained in 10 CFR 40.36 are important health and safety requirements of the Commission for providing adequate protection of the public health and safety. SFC and GA cannot escape the requirement to provide a description of the method of assuring funds for decommissioning pursuant to 10 CFR 40.36(d) and (e) by announcing termination of SFC's operations. In view of SFC's failure to submit a revised DFP, its stated intention to discontinue operations at the Facility, as described above, and the lack of an adequate basis to conclude that funding would in fact be available as needed to carry out necessary decontamination and decommissioning of the Facility and site, the NRC Staff issued a Demand for Information on December 29, 1992, to SFC and to GA. Further information was needed to determine whether NRC action was necessary to assure that SFC and GA would be able to satisfy their obligations to provide funding for the ultimate decommissioning of the Facility and whether the health and safety of the public would be protected. GA and SFC were required to submit the following information:

A. On or before February 16, 1993, a plan, including schedule, for decontaminating and decommissioning the SFC Facility, including the soil, buildings, and groundwater, for

release for unrestricted use in accordance with the criteria set forth in Appendices A, B, and C (APPENDIX A: Options 1 or 2 of Branch Technical Position (BTP), "Disposal or Onsite Storage of Thorium or Uranium Wastes From Past Operations," 46 FR 52061 (Oct. 23, 1981); APPENDIX B: "Guidelines for Decontamination of Facilities and Equipment Prior to Release for Unrestricted Use or Termination of Licenses for Byproduct, Source, or Special Nuclear Material" (August 1987); APPENDIX C: Proposed National Drinking Water Regulations, 40 CFR part 141, 56 FR 33050-51, 33066-69, 33126 (July 18, 1991)); and

B. On or before February 16, 1993, a decommissioning funding plan that contains a cost estimate for decommissioning the SFC Facility to the criteria identified in section IV.A above and a description of the method of assuring funds for decommissioning satisfying the requirements of 10 CFR 40.36 and the guidelines in Reg. Guide 3.66 * * *.

III

On February 16, 1993, SFC and GA responded separately to the Demand for Information. SFC supplied a Preliminary Plan for Completion of Decommissioning (PPCD), which included a plan and schedule for decontaminating and decommissioning the SFC site, and a preliminary cost estimate of \$21.1 million for activities directly related to decommissioning. The PPCD described the source of funds for decommissioning as the revenues from the ConverDyn arrangement. SFC described its plans as fitting "more closely the situation contemplated by 10 CFR 40.42", because of SFC's plans to terminate operations by July 31, 1992, and as providing a notification of termination of activities pursuant to 10 CFR 40.42, with information relevant to financial assurance as specified in 10 CFR 40.42(c)(2)(iii)(D). (Response of the Sequoyah Fuels Corporation to the Demand For Information Dated December 29, 1992, p. 4). By a separate letter dated February 16, 1993, SFC provided current notification that licensed activities involving the UF₆ facility had already been terminated, and advance notification that licensed DUF₄ activities would be terminated no later than July 31, 1993.

Neither SFC nor GA provided a description of the method of assuring funds for decommissioning which satisfies 10 CFR 40.36, as required by Section IV.B. of the Demand for Information. The ConverDyn arrangement is not a prepayment method, a surety method, insurance or other guarantee of financial assurance required by the Commission's regulations in 10 CFR part 40, § 40.36(e). The "voluntary assistance" proffered by GA in its letter of February 16, 1993, does not amount to a parent corporation

guarantee, and even if it did, it would not satisfy 10 CFR 40.36(e). Moreover, neither SFC nor GA have provided the financial assurance of adequate funds for completion of decommissioning required by 10 CFR 40.42, as explained below in Section IV.

IV

After review of the formal responses of SFC and GA to the December 29, 1992 Demand for Information, and of certain proprietary documents associated with the ConverDyn arrangement made available to the NRC Staff, the NRC Staff issued a "Supplement to December 29, 1992, Demand for Information" (Supplemental DFI) to GA and SFC on July 2, 1993. The Supplemental DFI requested additional information and certain documents associated with the ConverDyn arrangement. The formal answer to the questions of the NRC Staff and the additional documents requested were supplied by a response dated July 21, 1993.

ConverDyn is a partnership established by agreement between General Atomics Energy Services, Inc. and Allied-Signal Energy Services, Inc., subsidiaries of General Atomics and Allied-Signal, Inc., respectively. The arrangement establishes that ConverDyn will provide the services necessary for SFC to meet its contractual obligations to supply UF₆ conversion services; in return, SFC is given rights to a share of ConverDyn's revenues, defined by a system of payment priorities and calculated pursuant to certain guidelines established by the partnership documents.

SFC projects that it will receive, at the maximum, less than \$72 million in fees from the ConverDyn arrangement through the year 2003, and an income of more than \$17 million from other sources. SFC estimates that the cost of decontaminating and decommissioning the SFC site will consist of some \$21 million in direct costs and approximately \$65 million in indirect costs, which reflect overhead such as personnel costs, legal expenses, NRC fees, taxes, insurance, DUF₄ operating costs, transition costs, interest, and ranch costs.

Our review of the information provided by SFC and GA in response to the Demands for Information, indicates that the proposed ConverDyn arrangement appears to be a *bona fide* business arrangement among the various parties and their principals. Estimates of income from the ConverDyn arrangement are necessarily uncertain because they are based upon assumptions about the market for UF₆

conversion services over the next ten years, ConverDyn's ability to keep existing customers or to obtain new customers, and the costs of business operations, and because they are based upon some speculative assumptions about whether SFC will receive the maximum possible amount in fees, in view of the system of priorities for payments to be made under the ConverDyn arrangement. Nonetheless, the NRC Staff concludes that the proposed arrangement may be capable of producing a substantial portion of the funds that SFC estimates will be needed for Facility decommissioning.

However, there are a number of important shortcomings in the proposed arrangement from the standpoint of financial assurance that adequate funding will in fact be available to properly decommission the Facility as required by Commission regulations. Because of these shortcomings, the SFC funding plan based on the ConverDyn arrangement does not fully satisfy the requirements of 10 CFR 40.36 and 40.42. No financial assurance mechanism, as required by 10 CFR 40.36, is in place, and the ConverDyn arrangement does not constitute the equivalent. Additionally, the \$72 million in projected revenues from ConverDyn are of necessity based on inherently speculative assumptions about anticipated market conditions. Also, since there are a number of other claims on ConverDyn revenues that have higher payment priority than payments to SFC, there is significant uncertainty that SFC's projected revenues will in fact materialize. Furthermore, SFC's estimate of the amount of revenue projected to be derived from the ConverDyn arrangement is based upon the unsubstantiated assertion that ConverDyn's fixed costs of operation will steadily decline after 1994. Revenue estimates also assume that ConverDyn will operate at a 100% capacity utilization rate continuously through the year 2003. Finally, there is uncertainty concerning SFC's projected decommissioning costs. The proposed decommissioning plan has not yet been submitted to NRC, although a preliminary plan (the PPCD) has been submitted. SFC's cost estimate for decommissioning is based on assumptions as to acceptable decommissioning alternatives. If more costly decommissioning alternatives are required by NRC as a result of its review of SFC's decommissioning plan, the \$89 million in revenues from the ConverDyn arrangement and other sources are unlikely to be sufficient.

Thus, although the funding plan proposed by SFC based on the

ConverDyn arrangement may be capable of producing a substantial portion of the funding that may be required for Facility decommissioning and should be carried out in order to provide funding for this purpose, the funding plan does not provide the level of assurance required by the Commission that adequate funds will be available to fully decommission the Facility. Accordingly, to satisfy the Commission's requirements, the ConverDyn arrangement must be supplemented by funding assurances to protect against SFC revenue shortfalls, and to assure additional funding if more costly decommissioning alternatives are required. This Order imposes the supplemental conditions necessary to fully satisfy the Commission's financial assurance requirements. However, since the ConverDyn arrangement appears to be SFC's only source of income, SFC does not appear to be able to satisfy the Commission's financial assurance standards. Accordingly, supplemental financial assurance is required from SFC's parent corporation, GA.

V

GA made a number of commitments to the NRC concerning the operation and cleanup of the SFC Facility and GA has had direct involvement with the operation of SFC.

As mentioned above, in connection with the Commission's consideration of the restart of the Facility after the October 3, 1991 Order suspending operations, the Commission was concerned about funding for the required cleanup of the Facility site. At a public meeting of the Commission, Mr. J. Neal Blue, Chairman of GA, the parent corporation of SFC, made commitments on behalf of GA to the NRC to supply funding in order to guarantee that SFC will satisfy its obligations to provide financial assurance of funding for decommissioning. In a letter of NRC Chairman Selin dated March 19, 1992, GA confirmed this commitment. In addition, recognizing the need to remediate existing environmental concerns on a reasonable schedule, GA stated in the March 19, 1992 letter its commitment to fund site remediation during operation should SFC fail to do so. In the March 19, 1992 letter, GA set forth its commitments as follows:

To summarize the highlights of our commitments to the support of SFC's operations:

(1) SFC complies fully with all present regulatory requirements to provide financial assurance for the decommissioning of the facility. Further, GA supports SFC's program to minimize or prevent any adverse

environmental effects resulting from SFC's future operations and to remediate existing environmental concerns on a reasonable schedule as may be agreed to by SFC, the NRC and other governmental entities. SFC should be able to fund these programs from current revenues when operations are resumed. Should those revenues prove insufficient, the associated commitments will be fulfilled by GA.

(2) The longer term program to decontaminate and decommission the SFC facility will be backed by such guarantees from GA as may be required to satisfy NRC regulations. This is a matter which will be determined in connection with the NRC's action on the pending SFC license renewal application. SFC's renewal application utilizes alternative financial mechanisms permitted under the regulations. However, GA is prepared to provide its guarantee or financial support, if that proves necessary.

The Commission relied on the above GA financial commitments in authorizing restart of the SFC Facility on April 16, 1992. In addition, the NRC acknowledged GA's commitments in a letter dated May 6, 1992, in which the NRC requested GA to formalize those commitments and advised GA that these commitments were in addition to, and not in lieu of, satisfaction of the Commission's decommissioning funding requirements. See 10 CFR 40.36. By letter dated June 24, 1992, GA agreed to formalize its commitments by executing an agreement with SFC and submitted a draft agreement to the NRC which it stated would be presented to the boards of directors of SFC and GA for approval. SFC and GA, however, have not executed that agreement.

GA has had and now has de facto control over the day-to-day business of SFC. That control is demonstrated by, but not limited to, the following facts: GA owns all the capital stock of SFC indirectly through a subsidiary, Sequoyah Fuels International Company. GA and SFC have and have had common directors or officers. For example, Richard Dean, former Chairman of the SFC Board, was also a GA Engineering Director, and Max Kemp, Chief Executive Officer of SFC and a member of its Board of Directors, also was the GA Finance Manager. GA exercises management oversight of SFC activities through periodic oversight and program audits of SFC's QA program by the QA Director of GA, and through the Nuclear Committee of the SFC Board of Directors, which was chaired by a GA Engineering Director and which not only advises SFC but directs SFC activities such as cleanup and repair of piping structures in the SFC Solvent Extraction Building, and by the appointment of a GA Engineering Director to serve as Manager,

Engineering for SFC. GA supplies technical expertise and personnel to SFC; for example, the GA Quality Systems Manager acted as the SFC QA manager and a GA Engineering Director served as Manager, Engineering for SFC, while both remained on GA's payroll. In addition, the SFC Source Material License specifies that the Corporate Manager, Health Physics, the Corporate Manager, Licensing, Safety and Nuclear Compliance, and the Vice President, Human Resources, all of whom are GA employees, shall be responsible for auditing SFC licensed activities and ensuring the qualifications of certain SFC employees. Also, GA has directed SFC regarding satisfying requirements for site remediation and decommissioning and GA made "a strong commitment" to SFC that resources are available to SFC for site remediation and decommissioning. Moreover, GA's Chairman, J. Neal Blue, represented to the NRC at the Commission's March 17, 1992, public meeting, that GA would guarantee the financial resources necessary for SFC site remediation and decommissioning. As indicated above GA has now structured the business activities of SFC by entering into a joint venture with Allied Signal Corporation, creating a partnership, ConverDyn, in order to satisfy outstanding business commitments of SFC.

On November 23, 1992, SFC informed the Commission that it intended to continue with only short-term limited operations at the Facility and that the unexecuted funding guarantee agreement between SFC and GA was "no longer applicable." GA and SFC asserted that such limited operations are expected to generate cash flow greatly reduced from that expected at the time of the March 17, 1992, public meeting. The November 23, 1992, letter raised serious questions as to whether SFC would have the financial resources to accomplish site remediation and decommissioning. Accordingly, the Commission held a public meeting on December 21, 1992, with the management of SFC and GA to obtain information concerning the plans for the Sequoyah Fuels Facility, particularly concerning assurance of financial resources needed to decontaminate and decommission the Facility and site. At the December 21, 1992, meeting, Mr. Blue addressed the Commission regarding GA's support for the decommissioning of the Facility and site. Contrary to Mr. Blue's March 17, 1992, financial assurance commitments, as well as his March 19, 1992, letter affirming his "financial support and

guarantees", Mr. Blue stated on December 21st that GA could no longer provide financial assurance because the commitment to do so was premised on license renewal and long-term operation of the Facility.

Mr. Blue's December 21st statement that GA's March 17th and 19th commitments were conditional is contrary to the record. Mr. Blue's March 17th statements to the Commission and his March 19th letter to Chairman Selin were clear and unconditional financial assurance guarantees. On March 17 and 19, Mr. Blue represented that SFC's operating revenues would be sufficient to cover remediation and decommissioning costs. On December 21, he assured the Commission that revenues paid to SFC by ConverDyn likewise would be sufficient. This latter assurance is inconsistent with Mr. Blue's December 21 representation that the financial status of SFC was significantly deteriorated such that GA's financial assurance of remediation and decommissioning costs was no longer possible. Furthermore, Mr. Blue's characterization of Citicorp's reason for not approving GA's financial assurance guarantee is not supported by Citicorp's letter of December 18, 1992 (submitted to the NRC by GA as proprietary confidential information), which is a general prohibition on assuming financial liability and is not based on any changed financial conditions of SFC. In short, Mr. Blue's stated bases for GA's withdrawal of its financial assurance commitments not only appears to be internally inconsistent, but also contrary to the clear record of GA's financial assurance guarantees of March 17th and 19th on which the Commission relied in authorizing restart of the Facility on April 16, 1992. As a result of Mr. Blue's statements at the December 21, 1992 meeting, the Commission did not have an adequate basis to conclude that funding would in fact be available as needed to carry out necessary decontamination and decommissioning of the Facility and site. Accordingly, on December 29, 1992 the NRC Staff issued a Demand for Information to SFC and GA concerning this matter.

The December 29, 1992 Demand for Information required GA and SFC to submit a plan for decontaminating and decommissioning the SFC Facility and a decommissioning funding plan for decommissioning the SFC Facility in compliance with 10 CFR 40.36. Although SFC submitted a Preliminary Plan for Completion of Decommissioning (PPCD) the SFC site, and preliminary cost estimates for activities directly and indirectly related

to decommissioning, neither SFC nor GA provided a description of the method of assuring funds for decommissioning which satisfies 10 CFR 40.36, as required by Section IV.B. of the Demand for Information, or which satisfies 10 CFR 40.42, as discussed above.

Mr. J. Neal Blue states in his letter of February 16, 1993, transmitting the GA response to the Demand for Information, that GA has been consistent in its willingness, on a voluntary basis, to assist SFC in meeting its remediation objectives. For example, between October 1988 and October 1991, GA enabled SFC to commence clean-up of the environmental conditions at the site. Mr. Blue also states that the ConverDyn arrangement is a good-faith effort by GA to assist SFC in arranging resources necessary to meet SFC's obligations. Nevertheless, neither the voluntary assistance by GA nor the ConverDyn arrangement are sufficient to satisfy NRC requirements for financial assurance under 10 CFR 40.36 or 10 CFR 40.42, as discussed above.

In the "Response of General Atomics to December 29, 1992 Demand for Information" attached to Mr. Blue's letter of February 16, 1993, GA disputes that Mr. Blue's statements at the March 17, 1992, meeting constituted a commitment to provide financial guarantees by GA, and asserts that Mr. Blue only committed GA to make it possible for SFC to use its operating revenues and retained earnings for remediation and other capital improvements, and that any GA financial commitment would arise after a period of continued operation under a renewed license. GA also disagrees that Mr. Blue's letter of March 19, 1992, to Chairman Selin constituted a financial guarantee, asserts that it evidenced only an intention to provide "stop-gap" funding for items not covered by SFC operating revenues, and maintains that any offer of financial guarantees was dependent upon renewal of the SFC operating license. Notwithstanding GA's assertions, Mr. Blue's statements of March 17 and 19, 1992, constituted a guarantee of financial resources necessary for SFC site remediation and decommissioning.

Mr. Blue argues that his commitments must be viewed in the context of GA's acquisition of SFC, specifically, that in 1988, when GA's subsidiary, Sequoyah Holding Company, acquired the stock of SFC, the NRC "fully understood and accepted that GA explicitly refused to furnish any guarantee" for decontamination and decommissioning of the SFC Facility, and that the license makes only SFC financially responsible

for decontamination and decommissioning. (Letter of J. Neal Blue, dated February 16, 1993, to Robert M. Bernero, p. 2, and its Attachment, "1988 Acquisition of SFC and Subsequent NRC Financial Review", pp. 1-5) Although at the time of the purchase GA may have refused to guarantee SFC's obligation to decontaminate the facility, GA's actions in control over the day-to-day operations and business of SFC, and GA's representations of financial guarantees described above, on which the Commission has relied, make GA responsible, along with SFC to satisfy the NRC financial assurance requirements.

GA asserts that the DFI incorrectly states that the Commission relied on the GA financial commitments in authorizing restart of the SFC facility on April 16, 1992. Although the Staff Requirements Memorandum of March 27, 1992, specified that NRC Staff efforts to make the March 19, 1992, commitments legally binding were not a necessary precondition to restart, nonetheless, Mr. Blue's commitments of March 17 and March 19 were relied upon by the Commission in authorizing restart. The Commission reasonably took Mr. Blue at his word. The Commission's decision not to delay the SFC Facility restart to await legal documents formalizing Mr. Blue's commitments hardly means, as GA would have it, that the Commission was indifferent to GA's guaranty. To the contrary, Mr. Blue's promise to stand behind SFC reassured the Commission that SFC's cleanup effort was creditable and would proceed upon restart.

GA disputes the conclusions in the DFI that GA has had and now has *de facto* control over the day-to-day business of SFC, and that this control makes GA and SFC jointly and severally responsible for funding decontamination and decommissioning of the SFC site. In this regard, GA relies upon immaterial facts,¹ disputes the significance of virtually each individual indicia of control relied upon by the

¹ For example, GA asserts that none of the six members of GA's Board of Directors were simultaneously members of the SFC Board of Directors. See, "Response of General Atomics to December 29, 1992, Demand for Information" (February 16, 1993), p. 14. The NRC Staff did not assert that any of these individuals were simultaneously on both the GA and SFC Boards of Directors. The NRC Staff cited as indicia of GA's *de facto* control of SFC that GA and SFC shared "common directors or officers", specifically that Dr. Dean was on the SFC Board of Directors while at the same time he was the GA Engineering Director, and that Mr. Kemp was the GA Finance Manager while at the same time he was the Chief Executive Officer of SFC. See, Demand for Information (December 29, 1992), pp. 3-4.

DFI, and even provides additional evidence of GA's control over SFC.² GA, however, provides no basis to change the conclusion that the entire body of evidence establishes that GA exercised and exercises *de facto* control over the day-to-day business of SFC.

After review of the responses to the Demands for Information, the NRC Staff finds that there is no basis to change its conclusion that the degree of GA's control over the business of SFC and Mr. Blue's representations of financial assurance, on which the Commission relied, make GA responsible, along with SFC, for satisfying NRC financial assurance requirements.

VI

In summary, although SFC has outlined its plan for funding Facility decommissioning through the ConverDyn arrangement and while such arrangement may be a reasonable business arrangement, it does not satisfy the requirement of the Commission's regulations in 10 CFR 40.36(e) for financial assurance or in 10 CFR 40.42 to submit a plan assuring the availability of adequate funds for completion of decommissioning. Neither SFC nor GA proposed or established a funding mechanism in compliance with 10 CFR 40.36(e). Moreover, after review of the ConverDyn arrangement and SFC's financial projections, the NRC Staff has concluded for the reasons set forth above that SFC's funding plan must be supplemented with additional assurances before it can be accepted by NRC as providing reasonable assurance that SFC will be able to satisfy its obligations to provide adequate funding for the ultimate decommissioning of the Facility or that the health and safety of the public will be protected. Since decommissioning will likely commence in the near future, I find that steps must be taken now to assure the availability of adequate funding for decommissioning.

Independent of the NRC's activities regarding the cleanup of the Facility, the United States Environmental Protection Agency (EPA) recently issued an Administrative Order on Consent which required SFC to study and correct contamination at the SFC site in Gore, Oklahoma. Sequoyah Fuels Corporation, U.S. EPA Docket No. VI-005-(h)93-H (August 3, 1993). Although EPA's action

² For example, GA states that Mr. James R. Edwards is a Vice-President, General Counsel and Secretary of GA while also acting as SFC's Secretary and General Counsel and sitting on the SFC Board of Directors. See, "Response of General Atomics to December 29, 1992 Demand for Information" (February 16, 1993), pp. 14-15.

was taken under the authority of section 3008h of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, as further amended by the Hazardous Waste Amendments of 1984, 42 U.S.C. 6928h, it was coordinated with the NRC staff in an effort to avoid duplication of regulation by the Federal government and to maximize the benefits to the agencies' mutual objective of assuring a timely cleanup and decommissioning of the Facility. Thus, while the EPA Consent Order is directed only at nonradioactive materials under the terms of the EPA's authorizing statutes, the NRC believes that the conduct of the required activities may provide information that will satisfy some of the terms of this Order. Accordingly, SFC, in discharging its obligations under this Order, may avoid duplication by submitting to the NRC information prepared in fulfillment of the EPA Consent Order to the extent that it is also responsive to the provisions of this Order.

VII

Accordingly, pursuant to sections 62, 161b, 161c, 161i, 161o, 182 and 186 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.202 and 10 CFR part 40, it is hereby ordered that:

A. General Atomics Corporation and Sequoyah Fuels Corporation are and shall be jointly and severally responsible for:

1. Providing funding to continue remediation of existing contamination at the SFC Facility site, regardless of whether the Facility continues to operate or not;

2. Providing financial assurance for decommissioning in accordance with the requirements of 10 CFR 40.36; and

3. Providing an updated detailed cost estimate for decommissioning and a plan for assuring the availability of adequate funds for completion of decommissioning, in accordance with the requirements of 10 CFR 40.42(c)(2)(iii)(D);

B. Sequoyah Fuels Corporation shall: Carry out the funding plan described in its February 16, 1993 submission;

C.1. To the extent Sequoyah Fuels Corporation fails to or is unable to do so, GA shall complete the actions required of Sequoyah Fuels as described in Section VII;

2. If the revenues provided by ConvergDyn or other sources to SFC in any year are less than the revenue projected in the Preliminary Plan for Completion of Decommissioning, GA shall make up the shortfall by providing funds to SFC to carry out the

decommissioning activities up to the amount specified in the Preliminary Plan for Completion of Decommissioning, or by directly funding such activities so that total funding for decommissioning activities is not less than that specified in the Preliminary Plan for Completion of Decommissioning;

3. If the decommissioning alternative approved by NRC is more costly than those upon which the Preliminary Plan for Completion of Decommissioning is based, GA shall make up the shortfall by providing funds to SFC to carry out required decommissioning in accordance with schedules approved by NRC or by directly funding such decommissioning activities; and

4. On or before November 19, 1993, GA shall provide financial assurance for decommissioning and decontamination in the amount of \$86 million through (a) prepayment, (b) a surety method, insurance, or other guarantee method, or (c) an external sinking fund in which deposits are made at least annually, coupled with a surety method or insurance, the value of which may decrease by the amount being accumulated in the sinking fund, in accordance with the requirements of 10 CFR 40.36 and the guidelines in Reg Guide 3.66;

5. If GA demonstrates to the satisfaction of the Commission that the amount of financial assurance provided in satisfaction of Section VII, Paragraph C.4. of this Order exceeds the amount sufficient to properly decontaminate and decommission the SFC Facility and site, GA may request the Commission to authorize a reduction in that amount; and

6. If the Commission later determines that the amount of financial assurance provided in satisfaction of Section VII, Paragraph C.4. of this Order is insufficient to properly decontaminate and decommission the Facility and site, the Commission may direct an increase in the amount or take such other action as the Commission may deem appropriate;

The Director, Office of Nuclear Material Safety and Safeguards, may, in writing, relax or rescind any of the above conditions upon demonstration by the Sequoyah Fuels Corporation or General Atomics of good cause.

VIII

In accordance with 10 CFR 2.202, SFC and GA must, and any other person adversely affected by this Order may, submit an answer to this Order, and may request a hearing on this Order, within 20 days of the date of this Order. The answer may consent to this Order.

Unless the answer consents to this Order, the answer shall, in writing and under oath or affirmation, specifically admit or deny each allegation or charge made in this Order and set forth the matters of fact and law on which SFC, GA, or other person adversely affected relies and the reasons as to why the Order should not have been issued. Any answer or request for a hearing shall be submitted to the Secretary, U.S. Nuclear Regulatory Commission, ATTN: Chief, Docketing and Services Section, Washington, DC 20555. Copies also shall be sent to the Assistant General Counsel for Hearings and Enforcement at the same address, to the Director, Office of Nuclear Material Safety and Safeguards at the same address, to the Regional Administrator, NRC Region IV, 611 Ryan Plaza Drive, suite 400, Arlington, Texas 76011-8064, and to SFC and GA if the answer or hearing request is by a person other than SFC or GA. If a person other than SFC or GA requests a hearing, that person shall set forth with particularity the manner in which his interest is adversely affected by this Order and shall address the criteria set forth in 10 CFR 2.714(d).

If a hearing is requested by SFC, GA, or a person whose interest is adversely affected, the Commission will issue an Order designating the time and place of any hearing. If a hearing is held, the issue to be considered at such hearing shall be whether this Order should be sustained.

In the absence of any request for hearing, the provisions specified in Section VII above shall be final 20 days from the date of this Order without further order or proceedings.

For the Nuclear Regulatory Commission.

Dated at Rockville, Maryland this 15th day of October 1993.

Hugh L. Thompson, Jr.,

Deputy Executive Director for Nuclear Materials Safety, Safeguards, and Operations Support.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-33068; International Series Release No. 594; File No. SR-CBOE-93-08]

Self-Regulatory Organizations; Order Approving Proposed Rule Change, and Notice of Filing and Order Granting Accelerated Approval to Amendment No. 1 to the Proposed Rule Change by the Chicago Board Options Exchange, Inc., Relating to the Listing of Options on International Funds

October 19, 1993.

I. Introduction

The Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission"), on February 3, 1993, as amended on September 16, 1993, pursuant to Section 19(b) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² a proposed rule change to provide standards for the listing and trading of options on the securities issued by registered closed-end management investment companies that invest in securities of issuers located in particular foreign countries ("international funds").³

The proposed rule change was published for comment in Securities Exchange Act Release No. 31969 (March 9, 1993), 58 FR 14228 (March 16, 1993).⁴ Although the Commission did not receive any comment letters in response to publishing this notice, the Commission did receive letters generally opposed to the listing of international fund options in response

¹ 15 U.S.C. 78s(b) (1988).

² 17 CFR 240.19b-4 (1993).

³ To avoid confusion, this order refers to all registered closed-end management investment companies that invest in securities of issuers located in a particular foreign country, in a particular geographic region, or throughout the world as "international funds." In actuality, however, the foregoing are separated into three types of funds, respectively: country funds; regional funds; and global funds.

⁴ The CBOE submitted an amendment to the proposal on September 16, 1993 ("Amendment No. 1"). Amendment O. 1, as modified on October 11, 1993, clarifies that the CBOE may list options on international funds if (1) the Exchange has in place a market information agreement with the primary home exchange for each of the securities held in the underlying country fund's portfolio, or (2) the international fund is classified as a diversified fund under Section 5(b) of the Investment Company Act of 1940 ("Investment Company Act") and the fund's portfolio is comprised of securities from five or more countries. See letter from William J. Barclay, Vice President, Strategic Planning and International Development, CBOE, to Richard L. Zack, Branch Chief, Division of Market Regulation ("Division"), Commission, dated October 11, 1993.

to a CBOE proposal to list options on certain specific international funds.⁵

II. Description of Proposal

The current proposal would authorize the CBOE to list and trade options on the securities issued by international funds where the underlying securities meet or exceed the Exchange's established uniform options listing standards and (1) the Exchange has a market information sharing agreement ("market information agreement") with the primary home exchange on which each of the foreign securities comprising the fund's portfolio trade, (2) the fund is classified as a diversified fund, as that term is defined by Section 5(b) of the Investment Company Act,⁶ and the fund's portfolio is comprised of securities from five or more countries,⁷ or (3) the listing of a particular

⁵ The Commission published for comment a CBOE proposal to list and trade options on securities issued by certain specific international funds (i.e., Growth Fund of Spain, Inc.). Securities Exchange Act Release No. 31411 (November 5, 1992), 57 FR 53943 (November 13, 1992) (File No. SR-CBOE-92-21). In response to publishing that proposal, the Commission received comment letters from Kemper Financial Services, Inc. ("Kemper") and Alliance Capital Management Corporation ("Alliance") opposing the listing of international fund options. Further, the CBOE sent a letter to the Commission responding to the issues raised in those letters. Because those letters are relevant to the listing of options on international funds, in general, the Commission will address the issues raised in those letters in the current approval order. See letters from Robert J. Engling, Executive Vice President and General Counsel, Kemper, to Jonathan G. Katz, Secretary, Commission, dated December 3, 1992 ("Kemper Letter"); from David H. Dievier, Senior Vice President, Alliance, and Edmund P. Bergan, Jr., Vice President and Assistant General Counsel, Alliance, to Jonathan G. Katz, Secretary, Commission, dated December 3, 1992 ("Alliance Letter"); and from Alger B. Chapman, Chairman and Chief Executive Officer, CBOE, to Jonathan G. Katz, Secretary, Commission, dated January 7, 1993 ("CBOE Response Letter").

⁶ 15 U.S.C. 80a-5(b) (1988).

⁷ The CBOE has represented that it will look to the actual investment practices of an international fund to determine whether the fund invests in securities from five or more countries. The CBOE will evaluate the actual number of countries that are represented by the fund's investments and the concentration of such investments in each country represented. See *infra* note 37, and accompanying text. The CBOE also will review the fund's investment practices every six months to determine whether the fund continues to invest in five or more countries. If the CBOE finds that a fund no longer qualifies for listing without the existence of a market information agreement, the CBOE has represented that it will consult with the Commission to determine the appropriate course of action. Letter from William J. Barclay, Vice President, Strategic Planning and International Development, CBOE, to Richard L. Zack, Branch Chief, Division, Commission, *supra* note 4, and telephone conversation between William J. Barclay, Vice President, Strategic Planning and International Development, CBOE, and Richard L. Zack, Branch Chief, Division, Commission, on October 12, 1993.

international fund option is specifically authorized by the Commission.

First, to the eligible for listing and continued trading the proposal requires that either the CBOE have market information agreements in place with the foreign exchanges that serve as the primary markets for the foreign securities which comprise the portfolios of the underlying international funds, or the fund is classified as a diversified fund and invests in the securities from five or more countries. The proposal defines a market information agreement as an agreement that would permit the CBOE to obtain trading information relating to the securities held by the fund, including the identity of the exchange member executing a trade.⁸

Second, the initial listing standards would require that the securities underlying Exchange-listed international fund options (i.e., the securities issued by the international fund) have a "float" of 7,000,000 shares outstanding, 2,000 shareholders, trading volume of at least 2,400,000 over the prior twelve month period, and a minimum price of \$7½ for a majority of the business days during the preceding six month period.⁹ Moreover, options on international fund securities must meet or exceed the maintenance criteria for continued listing under the CBOE rules. Those criteria require that the securities underlying Exchange-listed international fund options maintain a "float" of 6,300,000 shares, 1,600 shareholders, trading volume of at least 1,800,000 over the prior twelve month period, and a minimum price of \$5 on a majority of the business days during the preceding six month period.¹⁰

In addition, the Exchange listing standards require that the security underlying an international fund option be registered and listed on a national securities exchange or traded through the facilities of a national securities association and be reported as a national market system security. The issuers of the international fund securities also must be in compliance with any other applicable requirements of the Act.

III. Comments Received on the Proposal

In response to publishing notice of the CBOE proposal to trade options on the securities issued by certain specific international funds, the Commission received comment letters from Kemper and Alliance opposing the listing of

⁸ Although a market information agreement provides for the exchange of information regarding the identity of exchange members executing trades, it does not require the exchange of information regarding the identity of the ultimate customer.

⁹ CBOE Rule 5.3.

¹⁰ CBOE Rule 5.4.

international fund options, in general. The CBOE sent a letter to the Commission responding to the issues raised in those letters.¹¹ The commenters objected to proposals to list options on international funds because they believe that the listing and trading of these options will increase fraudulent trading activity, increase speculative trading and price volatility of a fund's shares, increase the risks of investing in a fund's shares, and decrease the liquidity of a fund's shares.

A. Increase of Fraudulent Trading Activity

Alliance argues that it is not clear whether the U.S. options exchanges seeking to list international fund options will have sufficient access to surveillance information to detect and deter any possible fraudulent trading activity. Alliance believes that the foreign securities markets, in which international funds invest, are less liquid than the U.S. securities markets. Alliance further believes that a single international fund's investments in a particular foreign securities market can represent a high enough percentage of a foreign market's total capitalization to raise concerns that the proposed options could increase that market's susceptibility to manipulation.¹²

Because of these facts, Alliance believes that the trading of international fund options could facilitate intermarket frontrunning. In addition, Alliance believes that a person in possession of material inside information regarding a company that represents a significant portion of the international fund's portfolio could use options to engage in fraudulent market activity. Alliance further believes that a person with advance knowledge of an international fund's intention to issue new securities could profit from an anticipated rise in the net asset value and market price of the international fund's shares through the use of listed options. Because Alliance believes that the listing of international fund options could increase the likelihood of abusive trading practices, Alliance further believes that the Commission should amend Rule 17j-1 under the Investment Company Act¹³ to provide for liability or reporting obligations arising out of transactions in options on an investment company's shares.¹⁴

Finally, Alliance believes that there should be some assurance given that the surveillance sharing agreements

between the U.S. exchanges listing an international fund option and the foreign exchanges on which the securities comprising the underlying international fund's portfolio trade are adequate.¹⁵

B. Increase in Speculative Trading and Price Volatility

Alliance represents that under normal circumstances trading volume in an international fund's stock tends to be relatively low. Based on this fact, Alliance believes that trading options on international funds will increase the price volatility of their underlying shares by encouraging short-term traders to buy and sell such shares for speculation.¹⁶ Kemper also believes that trading options on international funds will encourage speculative trading in an underlying international fund's shares.¹⁷

C. Decrease in Liquidity

Kemper believes that the listing and trading of options on an international fund will reduce the demand for the underlying international fund shares, thus reducing liquidity in the market for such shares.¹⁸

D. Increase Risk of Investing in Fund Shares

Alliance believes that listing and trading options on international funds will increase the market risks involved in an investment in the shares of those funds. Although Alliance concedes that current law would not require the disclosure of these supposed risks, it believes that the law could evolve to the point that such a disclosure would be required in the future.¹⁹

IV. CBOE Response to Commentators

The CBOE sent a letter to the Commission responding to these comments. The CBOE notes that the Commission reviews the surveillance sharing arrangements between itself and the foreign exchanges on which the underlying foreign securities trade to be sure that they are adequate to detect and deter any possible abuse that might occur.²⁰ Further, the CBOE does not believe there is any basis for the assertion that the foreign markets are dominated by an international fund's trading and, thus, disagrees that the listing and trading of options on international funds will increase the likelihood of fraudulent trading

activity.²¹ The CBOE also states that since an international fund's shares do not trade at net asset value, the relationship between the price of a single foreign security and the price of a fund's shares should be too attenuated to insure any profit from fraudulent trading activities.²²

The CBOE does not believe that the listing and trading of options on international funds will increase speculative trading or price volatility of a fund's shares. The CBOE states that any claims that the introduction of options trading increases the volatility of the underlying security have been refuted by many studies.²³ The CBOE disagrees that the trading of options on international funds increases the risk of investing in the underlying shares. The CBOE further believes that because countless market factors may affect volatility in a stock, it would be impracticable for an international fund to disclose the listing of options on its shares as a specific market risk.²⁴

The CBOE also rejects the assertion that Rule 17j-1 under the Investment Company Act²⁵ needs to be amended to require the reporting of transactions in options on the securities of an investment company. The CBOE states that the reporting requirements of Rule 17j-1(c)(1) apply to any transaction by an "access person" in any security. The CBOE further states that, under paragraph (e)(5) of Rule 17j-1, an option on fund shares is defined as a security. Further, the CBOE states that the trading in fund shares or the options on such shares by a fund insider would be subject, under section 30(f) of the Investment Company Act,²⁶ to the same requirements and liabilities as those imposed by Section 16 of the Act²⁷ on corporate insiders.²⁸

Finally, the CBOE disagrees that the listing of options on international funds will decrease liquidity in the underlying international fund shares. The CBOE states that studies done on this subject have concluded that options trading

tends to increase liquidity of the underlying security.²⁹

V. Discussion

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of section 6(b)(5).³⁰ Specifically, the Commission finds that allowing the listing and trading of options on international funds, among other things, gives investors a better means to hedge their positions in international fund securities, as well as enhanced market timing opportunities.³¹ Further, the Commission believes that the pricing of the shares underlying the international fund options may become more efficient and market makers in these shares, by virtue of enhanced hedging opportunities, may be able to provide deeper and more liquid markets. In sum, the Commission believes that options on international funds likely engender the same benefits to investors and the market place that exist with respect to options on common stock.³²

The Commission also believes that it is appropriate to permit the CBOE to list and trade options on the securities issued by international funds given that these options meet specific requirements related to the protection of investors. First, the proposal requires that the underlying international fund securities meet the CBOE's uniform options listing standards in all respects. As described above, this would include the initial and maintenance criteria. These criteria ensure, among other things, that the underlying international fund securities will maintain adequate price and float to prevent them from being readily susceptible to manipulation. Second, the proposal requires that, prior to listing options on

securities issued by an international fund that is non-diversified or invests in the securities from less than five countries, the CBOE have in place market information agreements with the foreign exchanges which serve as the primary home exchanges for the securities that comprise the fund's portfolio. The proposal defines a market information agreement as a surveillance sharing agreement that provides for the exchange of information regarding market trading activity, including the identify of the exchange member executing a trade.³³

As a general matter, the Commission believes that the existence of a surveillance sharing agreement that effectively permits the sharing of information between an exchange proposing to list an equity option, such as international fund options, and the exchange trading the stock underlying the equity option is necessary to detect and deter market manipulation and other trading abuses. In particular, the Commission notes that surveillance sharing agreements provide an important deterrent to manipulation because they facilitate the availability of information needed to fully investigate a potential manipulation if it were to occur. These agreements are especially important in the context of derivative products based on foreign securities because they facilitate the collection of necessary regulatory, surveillance and other information from foreign jurisdictions.

In the case of international fund options, the Commission believes that market information agreements, which are surveillance sharing agreements that permit the exchange of information on market trading activity, are sufficient to detect and deter possible market manipulation. In contrast to other foreign products, international funds are comprised of a portfolio of securities chosen by portfolio managers. Although the composition of the fund is published on a semi-annual basis, the securities that make up the portfolio can be changed at any time at the discretion of the portfolio managers, as long as their investment decisions are consistent with the stated investment objectives and policies of the fund.

For this reason, the Commission believes that it generally would be difficult for someone to use options on

international funds to attempt a manipulation of the market. The Commission believes that the only people who would attempt such a manipulation would be people who have access to "inside" information about the composition of a fund and the trading activities of the fund's portfolio managers.³⁴

The Investment Advisers Act of 1940 ("Advisers Act"),³⁵ and the rules promulgated thereunder, contain provisions designed to detect and deter certain advisory employees and affiliates from trading in any securities based on "inside" information about the investment decisions of a fund. Rule 204-2(a)(12) under the Advisers Act³⁶ requires an investment adviser to make and keep accurate records of every transaction in a security in which the investment adviser or any advisory representative has a beneficial interest. Accordingly, the Commission believes that the Advisers Act gives it the authority to review the trading activities of anyone who is likely to have access to the information necessary to use options on international funds to attempt a manipulation of the market. The Commission believes, therefore, that it is sufficient for the U.S. exchanges seeking to list international fund options to have access to information about the trading activity occurring in the foreign market in which the securities comprising the underlying international fund's portfolio trade. If there is a suspicion that a market manipulation may have been attempted, the Commission believes that current legal requirements applicable to registered investment companies and investment advisers should give the Commission access to the information necessary to investigate that suspicion.

In reviewing the current proposal, the Commission believes that requiring market information agreements to be in place between the CBOE and primary home markets for the foreign securities

³⁴ The susceptibility of options on a particular international fund to manipulation could be increased if the fund's investment decisions were predictable, such as if the portfolio consisted of long-term or illiquid investments, or the composition of the portfolio was readily available to the public on a regular basis. In these cases, options on that international fund would present similar risks for market manipulation as would cash-settled index options. Although not raised by the current proposal, the Commission believes it to be appropriate that an exchange proposing to list an option on such a foreign product have a comprehensive surveillance sharing agreement in place with the foreign exchange on which the underlying foreign securities trade, which provides for the exchange of market trading activity, clearing activity, and the identity of the ultimate purchaser or seller of the securities traded.

³⁵ 15 U.S.C. 80b-1 et. seq. (1986).

³⁶ 17 CFR 275.204-2(a)(12) (1993).

²⁹ *Id.* at 6. See A Study of the Effects on the Economy of Trading in Futures and Options, *supra* note 23.

³⁰ 15 U.S.C. 78ff(b) (5) (1988).

³¹ For example, if an investor wants to invest in international fund shares but does not have sufficient cash available until a future date, he can purchase international fund options now for less money and exercise the options to purchase the international fund shares at a later date.

³² Pursuant to section 6(b)(5) of the Act, the Commission must predicate approval of any new securities product upon a finding that the introduction of such new product is in the public interest. Such a finding would be difficult for a derivative instrument that served no hedging or other economic function, because any benefits that might be derived by market participants likely would be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns.

³³ The Commission notes that it reviews surveillance sharing agreements and may require that parties to the agreement to provide additional representations confirming that there are no rules of the foreign exchange or laws of the foreign jurisdiction that would prevent or deter the foreign exchange from providing a U.S. exchange with the appropriate market surveillance information.

that comprise the portfolio of an international fund, that is non-diversified or invests in securities from less than five countries, provides an adequate mechanism to provide for the exchange of the surveillance sharing information necessary to detect and deter possible market manipulations. Further, the Commission believes that if the international fund is classified as a diversified fund, under the Investment Company Act, and a review of its actual investment practices show that the fund invests in securities from five or more countries, the portfolio of that fund is diverse enough to significantly reduce the likelihood that the price of the securities issued by the fund could be manipulated. The Commission, thus, believes that it is appropriate to permit the CBOE to list and trade options on such a fund's securities without obtaining market information agreements with the primary home markets for the foreign securities that comprise the fund's portfolio.³⁷

The Commission does not agree with the commenters' assertions that the listing and trading of international fund options will increase fraudulent trading activity, increase speculative trading and the price volatility of the underlying shares, increase the risks of investing in the underlying shares, or decrease the liquidity of the underlying shares. First, as explained in detail above, the Commission carefully analyzed the issues raised by the trading of international fund options and specifically tailored the applicable surveillance sharing requirements to address those issues. Further, the Commission reviews the surveillance sharing arrangements between the U.S. exchanges seeking to list international fund options and the foreign exchanges listing the foreign securities comprising the underlying fund's portfolio to

³⁷ The Commission believes that not requiring a market information agreement, under these circumstances, is consistent with the Commission's determination that cash-settled options and warrants may be listed on foreign indices where no more than 20% of the value of the index was comprised of securities from a particular country not covered by a surveillance sharing agreement ("uncovered securities") and no more than 30% of the value of the index was comprised of uncovered securities from two such countries. See e.g., Securities Exchange Act Release No. 30463 (March 14, 1992), 57 FR 9284 (March 17, 1992) (Approval of Amex proposal to trade Eurotop 100 options and warrants). The Exchange will consider the actual investment practices of an international fund to determine whether it can be classified as an international fund that invests in five or more countries. See *supra* note 7. The Commission, however, encourages the CBOE to obtain all relevant surveillance sharing agreements, because it continues to believe that surveillance sharing agreements are useful in deterring and detecting any potential manipulations or other improper or illegal trading involving international fund options.

ensure that those arrangements provide the surveillance information necessary to adequately detect and deter potential market manipulations.

Second, the Commission disagrees with the assertion that the current regulatory framework is insufficient to adequately monitor the trading activities of fund "insiders." As explained in detail above, the Advisers Act provides a regulatory framework by which a fund insider is required to report every transaction in a security in which he has a beneficial interest. Further, as noted by the CBOE, the requirements of section 30(f) of the Investment Company Act and Rule 17j-1 under that Act³⁸ also apply to the trading of international fund securities and options by fund insiders.

Third, the Commission notes that the arguments that the listing of options increases speculative activity and price volatility of the underlying shares, or that it decreases liquidity in the underlying shares are the same arguments that were advanced in opposition to the listing of options on common stock. The Commission carefully has considered these arguments and found that they are not supported by the available evidence.³⁹ To the contrary, the Commission believes that, similar to options on common stock, options on international funds will benefit investors by giving them a better means to hedge their positions in the underlying international fund shares, and by helping market makers in the underlying shares to provide deeper and more liquid markets.

Thus, for the reasons set forth above, the Commission finds that it is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6(b)(5)⁴⁰ to approve the proposed rule change.

The Commission finds good cause for approving Amendment No. 1 to the proposed rule change, as modified, prior to the thirtieth day after the date of publication of notice of filing thereof in the *Federal Register*. The Commission notes that the general requirement that there be a surveillance sharing agreement in place between the CBOE and the primary home exchanges on which the foreign securities comprising the underlying international fund's portfolio was published for comment on

³⁸ 15 U.S.C. 80a-29(f) (1988) and 17 CFR 270.17j-1 (1993).

³⁹ See e.g. A Study of the Effects on the Economy of Trading in Futures and Options, *supra* note 23.

⁴⁰ 15 U.S.C. 78f(b)(5) (1988).

March 16, 1993, as part of the original proposal. Amendment No. 1 merely clarifies the type of information that should be provided under the agreement and specifies the circumstances in which a surveillance agreement is needed to list an international fund option. The Commission believes that these modifications to the surveillance sharing requirement strengthens the proposal by tailoring the regulatory requirements to address the specific issues raised by international fund options. The Commission finds, therefore, that no new issues are raised by this amendment. Accordingly, the Commission believes it is consistent with sections 19(b)(2) and 6(b)(5) of the Act⁴¹ to approve Amendment No. 1 to the Amex's proposal on an accelerated basis.

VI. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning Amendment No. 1 to the proposed rule change. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by November 15, 1993.

It is therefore ordered, pursuant to section 19(b)(2) of the Act⁴², that the proposed rule change (SR-CBOE-93-08) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.⁴³

Margaret H. McFarland,
Deputy Secretary.

Self-Regulatory Organizations; Notice of Filing and Order Granting Accelerated Approval to Proposed Rule Change, Including Amendment No. 1 to the Proposed Rule Change, by the Philadelphia Stock Exchange, Inc., Relating to the Listing of Options on International Funds

October 19, 1993.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on October 14, 1993, the Philadelphia Stock Exchange, Inc., ("Phlx" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.¹

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Phlx proposes to amend Rule 1009 to provide standards for the listing and trading of options on the securities issued by registered closed-end management investment companies that invest in securities of issuers located in particular foreign countries ("international funds").² The proposal authorizes the Phlx to list and trade options on the securities issued by international funds where the underlying securities meet or exceed the Exchange's established uniform options listing standards and (1) the Exchange has a market information sharing agreement ("market information agreement") with the primary home exchange on which each of the foreign securities comprising the fund's portfolio trade, (2) the fund is classified

¹ The proposal was amended on October 19, 1993 to provide that the Phlx may list options on an international fund that invests in the securities from five or more countries without the existence of a market surveillance agreement only if the fund is classified as a diversified fund, as that term is defined by section 5(b) of the Investment Company Act of 1940 ("Investment Company Act") ("Amendment No. 1"). See Letter from Michele R. Weisbaum, Associate General Counsel, Phlx, to Richard L. Zack, Branch Chief, Division of Market Regulation ("Division"), Commission, dated October 19, 1993.

² To avoid confusion, this order refers to all registered closed-end management investment companies that invest in securities of issuers located in a particular foreign country, in a particular geographic region, or throughout the world as "international funds." In actuality, however, the foregoing are separated into three types of funds, respectively: country funds; regional funds; and global funds.

as a diversified fund, as that term is defined by Section 5(b) of the Investment Company Act,³ and the fund's portfolio is comprised of securities from five or more countries, or (3) the listing of a particular international fund option is specifically authorized by the Commission.

The text of the proposal is available at the Office of the Secretary, Phlx and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B) and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The Phlx proposes to adopt uniform criteria for listing and trading options on international funds. The proposed criteria permit the Exchange to list options on international funds where the underlying securities meet or exceed the Exchange's established uniform options listing standards and (1) the Exchange has a market information agreement with the primary home exchange on which each of the foreign securities comprising the fund's portfolio trade, (2) the fund is classified as a diversified fund, as that term is defined by Section 5(b) of the Investment Company Act,⁴ and the fund's portfolio is comprised of securities from five or more countries,⁵

³ 15 U.S.C. 80a-5(b) (1988).

⁴ 15 U.S.C. 80a-5(b) (1988).

⁵ The Phlx has represented that it will look to the actual investment practices of an international fund to determine whether the fund invests in securities from five or more countries. The Phlx will evaluate the actual number of countries that are represented by the fund's investments and the concentration of such investments in each country represented. See *infra* note 18, and accompanying text. The Phlx also will review the fund's investment practices every six months to determine whether the fund countries to invest in five or more countries. If the Phlx finds that a fund no longer qualifies for listing without the existence of a market information agreement, the Phlx has represented that it will consult with the Commission to determine the appropriate course of action. Letter from Michele R. Weisbaum, Associate General Counsel, Phlx, to Richard L.

or (3) the listing of a particular international fund option is specifically authorized by the Commission.

First, to be eligible for listing and continued trading the proposal requires that either the Phlx have market information agreements in place with the foreign exchanges that serve as the primary markets for the foreign securities which comprise the portfolios of the underlying international funds, or the fund is classified as a diversified fund and invests in the securities from five or more countries. The proposal defines a market information agreement as an agreement that would permit the Phlx to obtain trading information relating to the securities held by the fund, including the identity of the exchange member executing a trade.⁶

Second, the initial listing standards would require that the securities underlying Exchange-listed international fund options (*i.e.*, the securities issued by the international fund) have a "float" of 7,000,000 shares outstanding, 2,000 shareholders, trading volume of at least 2,400,000 over the prior twelve month period, and a minimum price of 7½ for a majority of the business days during the preceding six month period.⁷ Moreover, options on international fund securities must meet or exceed the maintenance criteria for continued listing under the Phlx rules.

Those criteria require that the securities underlying Exchange-listed international fund options maintain a "float" of 6,300,000 shares, 1,600 shareholders, trading volume of at least 1,800,000 over the prior twelve month period, and a minimum price of \$5 on a majority of the business days during the preceding six month period.⁸

In addition, the Exchange listing standards require that the security underlying an international fund option be registered and listed on a national securities exchange or traded through the facilities of a national securities association and be reported as a national market system security. The issuers of the international fund securities also must be in compliance with any other applicable requirements of the Act.

The Exchange believes that the proposed rule change is consistent with section 6(b) of the Act,⁹ in general, and

Zack, Branch Chief, Division, Commission, *supra* note 1.

⁶ Although a market information agreement provides for the exchange of information regarding the identity of exchange members executing trades, it does not require the exchange of information regarding the identity of the ultimate customer.

⁷ Phlx Rule 1009.

⁸ Phlx Rule 1010.

⁹ 15 U.S.C. 78f (1988).

further the objectives of Section 6(b)(5), in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of change, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system.

The Phlx believes that the proposed rule change will not impose a burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments on the proposed rule change were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has requested that the proposed rule change be given accelerated effectiveness pursuant to section 19(b)(2) of the Act.¹⁰

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6(b)(5).¹¹ Specifically, the Commission finds that allowing the listing and trading of options on international funds, among other things, gives investors a better means to hedge their positions in international fund securities, as well as enhanced market timing opportunities.¹² Further, the Commission believes that the pricing of the shares underlying the international fund options may become more efficient and market makers in these shares, by virtue of enhanced hedging opportunities, may be able to provide deeper and more liquid markets. In sum, the Commission believes that options on international funds likely engender the same benefits to investors and the market place that exist with respect to options on common stock.¹³

The Commission also believes that it is appropriate to permit the Phlx to list and trade options on the securities issued by international funds given that these options meet specific requirements related to the protection of investors. First, the proposal requires that the underlying international fund securities meet the Phlx's uniform options listing standards in all respects. As described above, this would include the initial and maintenance criteria. These criteria ensure, among other things, that the underlying international fund securities will maintain adequate price and float to prevent susceptibility to manipulation. Second, the proposal requires that, prior to listing options on securities issued by an international fund that is non-diversified or invests in the securities from less than five countries, the Phlx have in place market information agreements with the foreign exchanges which serve as the primary home exchanges for the securities that comprise the fund's portfolio. The proposal defines a market information agreement as a surveillance sharing agreement that provides for the exchange of information regarding market trading activity, including the identity of the exchange member executing a trade.¹⁴

As a general matter, the Commission believes that the existence of a surveillance sharing agreement that effectively permits the sharing of information between an exchange proposing to list an equity option, such as international fund options, and the exchange trading the stock underlying the equity option is necessary to detect and deter market manipulation and other trading abuses. In particular, the Commission notes that surveillance sharing agreements provide an important deterrent to manipulation because they facilitate the availability of information needed to fully investigate a potential manipulation if it were to occur. These agreements are especially important in the context of derivative products based on foreign securities because they facilitate the collection of necessary regulatory, surveillance and

derivative instrument that served no hedging or other economic function, because any benefits that might be derived by market participants likely would be outweighed by the potential for manipulation, diminished public confidence in the integrity of the markets, and other valid regulatory concerns.

¹⁴ The Commission notes that it reviews surveillance sharing agreements and may require the parties to the agreement to provide additional representations confirming that there are no rules of the foreign exchange or laws of the foreign jurisdiction that would prevent or deter the foreign exchange from providing a U.S. exchange with the appropriate market surveillance information.

other information from foreign jurisdictions.

In the case of international fund options, the Commission believes that market information agreements, which are surveillance sharing agreements that permit the exchange of information on market trading activity, are sufficient to detect and deter any possible market manipulation. In contrast to other foreign products, international funds are comprised of a portfolio of securities chosen by portfolio managers. Although the composition of the fund is published on a semi-annual basis, the securities that make up the portfolio can be changed at any time at the discretion of the portfolio managers, as long as their investment decisions are consistent with the stated investment objectives and policies of the fund.

For this reason, the Commission believes that it generally would be difficult for someone to use options on international funds to attempt a manipulation of the market. The Commission believes that the only people who could potentially attempt such a manipulation would be people who have access to "inside" information about the composition of a fund and the trading activities of the fund's portfolio managers.¹⁵

The Investment Advisers Act of 1940 ("Advisers Act"),¹⁶ and the rules promulgated thereunder, contain provisions designed to detect and deter certain advisory employees and affiliates from trading in any securities based on "inside" information about the invest decisions of a fund. Rule 204-2(a)(12) under the Advisers Act¹⁷ requires an investment adviser to make and keep accurate records of every transaction in a security in which the investment adviser or any advisory representative has a beneficial interest. Accordingly, the Commission believes that the Advisers Act gives it the authority to review the trading activities of anyone who is likely to have access

¹⁵ The susceptibility of options on a particular international fund to manipulation could be increased if the fund's investment decisions were predictable, such as if the portfolio consisted of long-term or illiquid investments, or the composition of the portfolio was readily available to the public on a regular basis. In these cases, options on that international fund would present similar risks for market manipulation as would cash-settled index options. Although not raised by the current proposal, the Commission believes it to be appropriate that an exchange proposing to list an option on such a foreign product have a comprehensive surveillance sharing agreement in place with the foreign exchange on which the underlying foreign securities trade, which provides for the exchange of market trading activity, clearing activity, and the identity of the ultimate purchaser or seller of the securities traded.

¹⁶ 15 U.S.C. 80b-1 *et. seq.* (1988).

¹⁷ 17 CFR 275.204-2(a)(12) (1993).

¹⁰ 15 U.S.C. 78a(b)(2) (1988).

¹¹ 15 U.S.C. 78f(b)(5) (1988).

¹² For example, if an investor wants to invest in international fund shares but does not have sufficient cash available until a future date, he can purchase international fund options now for less money and exercise the options to purchase the international fund shares at a later date.

¹³ Pursuant to section 6(b)(5) of the Act, the Commission must predicate approval of any new securities product upon a finding that the introduction of such new product is in the public interest. Such a finding would be difficult for a

to the information necessary to use option on international funds to attempt a manipulation of the markets. The Commission believes, therefore, that it is sufficient for the U.S. exchanges seeking to list international fund options to have access to information about the trading activity occurring in the foreign market in which the securities comprising the underlying international fund's portfolio trade. If there is a suspicion that a market manipulation may have been attempted, the Commission believes that current legal requirements applicable to registered investment companies and investment advisers should give the Commission access to the information necessary to investigate that suspicion.

In reviewing the current proposal, the Commission believes that requiring market information agreements to be in place between the Phlx and primary home markets for the foreign securities that comprise the portfolio of an international fund, that is non-diversified or invests in securities from less than five countries, provides an adequate mechanism to provide for the exchange of the surveillance sharing information necessary to detect and deter possible market manipulations. Further, the Commission believes that if the international fund is classified as a diversified fund, under the Investment Company Act, and a review of its actual investment practices show that the fund invests in securities from five or more countries, the portfolio of that fund is diverse enough to significantly reduce the likelihood that the price of the securities issued by the fund could be manipulated. The Commission, thus, believes that it is appropriate to permit the Phlx to list and trade options on such a fund's securities without obtaining market information agreements with the primary home markets for the foreign securities that comprise the fund's portfolio.¹⁸

¹⁸ The Commission believes that not requiring a market information agreement, under these circumstances, is consistent with the Commission's determination that cash-settled options and warrants may be listed on foreign indices where no more than 20% of the value of the index was comprised of securities from a particular country not covered by a surveillance sharing agreement ("uncovered securities") and no more than 30% of the value of the index was comprised of uncovered securities from two such countries. See e.g., Securities Exchange Act Release No. 30463 (March 14 1992), 57 FR 9284 (March 17, 1992) (Approval of American Stock Exchange, Inc. ("Amex"), proposal to trade Eurotop 100 options and warrants). The Exchange will consider the actual investment practices of an international fund to determine whether it can be classified as an international fund that invests in five or more countries. See *supra* note 5. The Commission, however, encourages the Phlx to obtain all relevant surveillance sharing agreements because it

Thus, for the reasons set forth above, the Commission finds that it is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6(b)(5)¹⁹ to approve the proposed rule change.

The Commission finds good cause for approving the proposed rule change, including Amendment No. 1 to the proposed rule change, prior to the thirtieth day after the date of publication of notice of filing thereof in the Federal Register. The Phlx proposal to list and trade international fund options is substantially similar to a proposal by the Chicago Board Options Exchange, Inc. ("CBOE") to provide uniform standards for listing international fund options.²⁰ The CBOE proposal was subject to a full notice and comment period. Further, proposals by the Amex and CBOE to list and trade options on certain specific international funds also were subject to a full notice and comment period.²¹

Although the Commission did not receive any comment letters in response to publishing the proposal to provide uniform listing standards, the Commission did receive letters generally opposed to the listing of international fund options in response to the proposal to list options on certain specific international funds.²² As

continues to believe that surveillance sharing agreements are useful in deterring and detecting any potential manipulations or other improper or illegal trading involving international fund options.

¹⁹ 15 U.S.C. 78f(b)(5) (1988).

²⁰ Securities Exchange Act Release No. 31969 (March 9, 1993), 58 FR 14228 (March 16, 1993). The general requirement that there be a surveillance sharing agreement in place between the exchange seeking to list an international fund option and the primary home exchanges on which the foreign securities comprising the underlying international fund's portfolio trade was included in the published proposal. The current proposal includes additional provisions clarifying the type of information that should be provided under the agreement and specifying the circumstances in which a surveillance sharing agreement is needed to list an international fund option. The Commission believes that these modifications to the surveillance sharing requirements strengthen the proposal by tailoring the regulatory requirements to address the specific issues raised by international fund options.

²¹ The Commission published for comment proposals to list and trade options on securities issued by certain specific international funds (i.e., the Growth Fund of Spain, Inc.). Securities Exchange Act Release Nos. 31411 (November 5, 1992), 57 FR 53943 (November 13, 1992) (File No. SR-CBOE-92-21), and 31469 (November 16, 1992), 57 FR 55604 (November 25, 1992) (File No. SR-Amex-92-40).

²² The Commission received comment letters from Kemper Financial Services, Inc. ("Kemper") and Alliance Capital Management Corporation ("Alliance") opposing the listing of international fund options. Further, the CBOE sent a letter to the Commission responding to the issues raised in

described more fully in the order approving the proposal to adopt uniform standards for the listing of international fund options, the Commission found that the commenters' assertions that the listing and trading of international fund options will increase fraudulent trading activity, increase speculative trading and the price volatility of the underlying shares, increase the risks of investing in the underlying shares, or decrease the liquidity of the underlying shares to be without merit.²³

The Commission further notes that approving the current proposal, including Amendment No. 1, on an accelerated basis will permit the Phlx to compete on an equal basis with the CBOE and the Amex for orders in international fund options. The Commission believes that encouraging competition between the exchanges benefits investors by enhancing the quality of the products and services offered to investors. Accordingly, since the Commission finds that the current proposal involves the exact same issues as the above-noted proposals, the

those letters. Because these letters are relevant to the listing of options on international funds, in general, the Commission is addressing the issues raised in those letters in the current approval order. See letters from Robert J. Engling, Executive Vice President and General Counsel, Kemper, to Jonathan G. Katz, Secretary, Commission, dated December 3, 1992; from David H. Dievler, Senior Vice President, Alliance, and Edmund P. Bergan, Jr., Vice President and Assistant General Counsel, Alliance, to Jonathan G. Katz, Secretary, Commission, dated December 3, 1992; and from Alger B. Chapman, Chairman and Chief Executive Officer, CBOE, to Jonathan G. Katz, Secretary, Commission, dated January 7, 1993.

²³ For a discussion of the issues raised by the comment letters and the CBOE's response to those letters, see Securities Exchange Act Release No. 33068 (order approving the CBOE proposal to adopt uniform listing standards for international fund options). See also Securities Exchange Act Release No. 33069 (order approving CBOE and Amex proposals to trade options on the Growth Fund of Spain, Inc.). In general, the Commission notes that the arguments that the listing of options increases speculative activity and price volatility of the underlying shares, or that it decreases liquidity in the underlying shares are the same arguments that were advanced in opposition to the listing of options on common stock. The Commission carefully has considered these arguments and found that they are not supported by the available evidence. To the contrary, the Commission believes that, similar to options on common stock, options on international funds will benefit investors by giving them a better means to hedge their positions in the underlying international fund shares, and by helping market makers in the underlying shares to provide deeper and more liquid markets. The Commission also notes that it reviews the surveillance sharing arrangements between U.S. exchanges seeking to list international fund options and the foreign exchanges listing the foreign securities comprising the underlying fund's portfolio to ensure that those arrangements provide the surveillance information necessary to adequately detect and deter potential market manipulations.

Commission believes it is consistent with sections 19(b)(2) and 6(b)(5) of the Act²⁴ to approve the Phlx's proposal to provide standards for listing international fund options on an accelerated basis.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the proposed rule change, including Amendment No. 1 to the proposed rule change. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,²⁵ that the proposed rule change (SR-Phlx-93-44) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.²⁶

Margaret H. McFarland,
Deputy Secretary.

[FR Doc. 93-26146 Filed 10-22-93; 8:45 am]
BILLING CODE 8010-01-M

Life and Accident Insurance Company Separate Account One ("HLA Account One"), Hartford Life and Accident Insurance Company Putnam Capital Manager Trust Separate Account One ("HLA Putnam Account One"), ITT Hartford Life and Annuity Insurance Company ("ILA"), ITT Life Insurance Corporation Separate Account One ("ILA Account One"), ITT Life Insurance Corporation Putnam Capital Manager Trust Separate Account Two ("ILA Putnam Account Two") and Hartford Equity Sales Company, Inc. ("Hartford Equity").

RELEVANT 1940 ACT SECTIONS: Order requested under section 17(b) of the 1940 Act for exemptions from section 17(a) and for approvals under section 17(d) of the 1940 Act and Rule 17d-1 thereunder.

SUMMARY OF APPLICATION: Applicants seek an order permitting certain affiliated transactions arising out of the assumption reinsurance of certain HLA variable annuity contracts issued through HLA Account One and HLA Putnam Account One. Applicants also seek approval for certain joint arrangements associated with and arising out of the assumption reinsurance transactions.

FILING DATE: The application was filed on July 26, 1993 and amendment number one to the application was filed on October 15, 1993.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing on this application by writing to the Secretary of the SEC and serving Applicants with a copy of the request, personally or by mail. Hearing requests must be received by the Commission by 5:30 p.m. on November 12, 1993 and should be accompanied by proof of service on Applicants in the form of an affidavit or, for lawyers, by certificate. Hearing requests should state the nature of the interest, the reason for the request and the issues contested. Persons may request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549. Applicants: Kathleen A. McGah, Esq., HLA, P.O. Box 2999, Hartford, CT 06104-2999.

FOR FURTHER INFORMATION CONTACT: Barbara J. Whisler, Attorney, or Michael V. Wible, Special Counsel, both at (202) 272-2060, Office of Insurance Products, Division of Investment Management.

SUPPLEMENTARY INFORMATION: Following is a summary of the application, the

complete application is available for a fee from the Public Reference Branch of the SEC.

Applicants' Representations

1. HLA, a stock life and accident and health insurance company organized under the laws of Connecticut, is a wholly owned subsidiary of Hartford Fire Insurance Company and an indirect subsidiary of ITT Corporation.

2. HLA Account One, established on May 20, 1991, holds and invests the assets underlying certain variable annuity contracts (the "HLA Account One Contracts"). HLA Account One is registered with the Commission under the 1940 Act as a unit investment trust. The application incorporates by reference the registration statement, currently on file with the Commission, for HLA Account One. All of the assets in HLA Account One are invested in shares of one or more available funds (the "Hartford Funds") advised by Hartford Investment Management Company, a subsidiary of Hartford Life Insurance Company. Wellington Management Company serves as the sub-advisor to certain of the Hartford Funds.

3. HLA Putnam Account One (together with HLA Account One, the "HLA Accounts"), established on February 28, 1992, holds and invests the assets underlying certain variable annuity contracts (the "HLA Putnam Contracts," collectively with the HLA Account One Contracts, the "HLA Contracts"). HLA Putnam Account One is registered with the Commission under the 1940 Act as a unit investment trust. The application incorporates by reference the registration statement, currently on file with the Commission, for HLA Putnam Account One. All of the assets in HLA Putnam Account One are invested in shares (the "Putnam Funds") of Putnam Capital Manager Trust, an open-end diversified investment company of the series type. Putnam Management Company, Inc. manages the Putnam Capital Manager Trust.

4. ILA, a stock life insurance company organized under the laws of Wisconsin in 1956, is a wholly owned subsidiary of Hartford Life Insurance Company and an indirect subsidiary of Hartford Fire Insurance Company and ITT Corporation. ILA was formerly ITT Life Insurance Corporation.

5. ITT Account One, established on May 20, 1991, holds and invests the assets underlying certain variable annuity contracts (the "ITT Account One Contracts"). ITT Account One is registered with the Commission under the 1940 Act as a unit investment trust.

[Rel. No. IC-19800; File No. 812-8504]

Hartford Life and Accident Insurance Co. et al.; Application for Exemption

October 18, 1993.

AGENCY: Securities and Exchange Commission ("SEC" or the "Commission").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 (the "1940 Act").

APPLICANTS: Hartford Life and Accident Insurance Company ("HLA"), Hartford

²⁴ 15 U.S.C. 78s(b)(2) and 78f(b)(5) (1988).

²⁵ 15 U.S.C. 78s(b)(2) (1988).

²⁶ 17 CFR 200.30-3(a)(12) (1993).

The application incorporates by reference the registration statement, currently on file with the Commission, for ITT Account One. All of the assets in ITT Account One are invested in the Hartford Funds. The application states that except for the funding separate account and the issuing insurer, the ITT Account One Contracts are identical to the HLA Account One Contracts. The application further notes that both ITT Account One and HLA Account One invest in the Hartford Funds.

6. ITT Putnam Account Two (together with ITT Account One, the "ITT Accounts"), established on May 20, 1991, holds and invests the assets underlying certain variable annuity contracts (the "ITT Putnam Contracts", collectively with the ITT Account One Contracts, the "ITT Contracts"). ITT Putnam Account Two is registered with the Commission under the 1940 Act as a unit investment trust. The application incorporates by reference the registration statement, currently on file with the Commission, for ITT Putnam Account Two. All assets in ITT Putnam Account Two are invested in the Putnam Funds. The application states that except for the funding separate account and the issuing insurer, the ITT Putnam Contracts are identical to the HLA Putnam Contracts.

7. Hartford Equity is the principal underwriter for both the HLA and the ITT Contracts.

8. On July 12, 1993, HLA entered into an assumption reinsurance agreement (the "Agreement") with ILA relating to the HLA Contracts. Applicants anticipate an effective date of November 15, 1993 for the Agreement. Under the Agreement, HLA agrees to transfer all of its rights, title and interest under the HLA Contracts, as well as the obligations and liabilities of HLA under the HLA Contracts, to ILA on an assumption reinsurance basis. ILA agrees to assume all obligations and liabilities transferred to it to the maximum extent permitted by law. The application states that the parties to the Agreement anticipate that ILA will: Reinsure the HLA Contracts; notify each owner of an HLA Contract to be reinsured under the Agreement (a "Contractowner") of ILA's assumption of HLA's liabilities under the HLA Contracts; and issue an assumption reinsurance certificate to each Contractowner. Applicants represent that no fee or commission is payable by HLA or ILA to any other party with respect to the Agreement.

9. The Agreement is subject to various conditions, including: the making of all required filings; the obtaining of all necessary approvals of applicable state

insurance authorities and any other regulatory approvals required; the obtaining of all necessary orders from the Commission permitting the transactions contemplated in the Agreement; and the existence of effective registration statements under the Securities Act of 1933 relating to the ITT Contracts issued in exchange for the HLA Contracts.

10. Applicants note that the assumption reinsurance contemplated in the Agreement may take place at a date or dates subsequent to the date of the Agreement because all required clearances with respect to the assumption reinsurance may not have been obtained by the date of the Agreement. Until such time as any HLA Contracts that cannot be assumption reinsured on the initial closing date of the Agreement can be assumption reinsured, those contracts will be continued to be insured and administered by HLA.

11. When all conditions to the closing of the Agreement as it relates to the HLA Contracts have been met, HLA will transfer amounts attributable to the HLA Contracts from HLA Account One to ITT Account One and from HLA Putnam Account One to ITT Putnam Account Two. HLA will also transfer cash and liquid assets in an amount equal to the general account statutory reserves with respect to the HLA Contracts as of the effective date of the assumption reinsurance.

12. Upon the assumption reinsurance of an HLA Contract, ILA will issue an assumption certificate to the Contractowner. Applicants represent that the assumption certificate will have been previously approved for use by appropriate state insurance regulatory authorities. The assumption certificate will inform the Contractowner of the assumption by ILA of all of HLA's liabilities under the contract. Applicants state that the charges against assets of ITT Account One and of ITT Putnam Account Two under the ITT Contracts are identical to the charges against assets of HLA Account One and of HLA Putnam Account One under the HLA Contracts. Because the charges are identical, applicants represent that the assumption certificates will inform a Contractowner that there will be no impact on the contract value because of the assumption reinsurance transactions contemplated in the Agreement.

13. Upon the effective date of the assumption reinsurance applicable to a contract, a Contractowner will deal directly with ILA and any further premiums the Contractowner wishes to apply to the HLA Contract will be forwarded directly to ILA for allocation

to ITT Account One or ITT Putnam Account Two (the "Reinsuring Accounts"). Applicants represent that ILA will: Perform all contract administration; pay all claims, commissions, overrides, service fees, taxes and expenses due and owing in connection with the HLA Contracts; and maintain possession of all available files, records and correspondence relating to the HLA Contracts.

14. Applicants represent that there will be no change in the terms of the HLA Contracts resulting from the assumption reinsurance of the HLA Contracts by ILA other than changing the separate accounts and the depositor.

15. Applicants state that the assumption reinsurance will not change the number of accumulation or annuity units credited under the HLA Contracts or the value of such units. Number and value will continue to be affected only by the investment performance of the underlying Hartford Funds and Putnam Funds (collectively, the "Funds"). Because shares of the Funds held by the HLA Accounts will be transferred to the Reinsuring Accounts on the date an assumption reinsurance transaction is effected, no interruption of investment performance will occur. Applicants state that no charge or expense will be incurred by the HLA Accounts, the Reinsuring Accounts, or the Funds in connection with the transfer of the shares of the Funds. Applicants therefore represent that contract values under the ITT Contracts will be the same as those values would have been under the HLA Contracts had the assumption reinsurance transactions contemplated in the Agreement not occurred. Applicants further represent that there will be no tax consequences to Contractowners as a result of the assumption reinsurance of their HLA Contracts.

16. Applicants anticipate that some jurisdictions may require that Contractowners be afforded the right to opt out of the assumption reinsurance of their contracts by means of a negative consent or, by requiring an affirmative consent to the assumption reinsurance transaction. If, under such an opt out provision, timely objection from the Contractowner were received by ILA or the required affirmative consent were not received by ILA, the assumption reinsurance of the HLA Contract of that Contractowner would be cancelled. If the assumption reinsurance transaction has already occurred, assets equal to the contract liabilities attributable to such HLA Contract will be transferred from the applicable Reinsuring Account back to the appropriate HLA Account. Thus, Applicants represent that the

Contractowner will be restored to the same position he would have had if the assumption reinsurance transaction had not occurred. Applicants state that the number of accumulation units or annuity units credited under the HLA Contract would remain unchanged, and the value of such units would be identical to what it would have been had there been no assumption reinsurance transaction. Applicants note that there will be no tax consequences to a Contractowner electing to exercise the opt out right. HLA will continue to hold and administer those HLA Contracts which are not assumption reinsured. Contractowners who previously opted out of the assumption reinsurance may be given an option, at a later date, to accede to the assumption reinsurance of their contracts. Contractowners opting out of the reinsurance of their HLA Contracts at this time would thereafter remain with HLA and have their HLA Contract values based on the HLA Accounts. Applicants do note, however, that they anticipate that only a few Contractowners will exercise the opt out provision and remain with HLA. Accordingly, HLA may seek at a future date to deregister the HLA Accounts consistent with the 1940 Act or to take such other steps as HLA deems appropriate to reduce the number of outstanding HLA Contracts.

Applicants' Legal Analysis and Conditions

1. Applicants request that the Commission, pursuant to section 17(b) of the 1940 Act, grant the exemption from section 17(a) to the extent necessary to permit the transfers of the Funds' shares in connection with the assumption reinsurance of the HLA Contracts.

2. Section 17(a)(1) of the 1940 Act prohibits an affiliated person of a registered investment company, or an affiliated person of such an affiliated person, acting as principal, from knowingly selling any security or other property to such registered investment company. Section 17(a)(2) of the 1940 Act prohibits any of the persons described in section 17(a)(1) from purchasing any security or other property from a registered investment company.

3. The prohibitions of section 17(a) would apply to the sale of shares of the Funds by the HLA Accounts to ILA in connection with the assumption reinsurance of the HLA Contracts because the HLA Accounts are under common control with the Reinsuring Accounts and, therefore, are affiliated persons of a registered investment

company. Similarly, section 17(a) would prohibit purchase of shares of the Funds from the HLA Accounts by the Reinsuring Accounts because the Reinsuring Accounts are affiliated persons of the HLA Accounts, also registered investment companies. Further, section 17(a) applies to the Reinsuring Accounts' purchases of shares of the Funds because of HLA's and ILA's affiliation with Hartford Equity. Hartford Equity will continue to act as principal underwriter for the HLA Accounts pending full implementation of the Agreement.

4. Section 17(b) of the 1940 Act provides that the Commission may grant an order exempting transactions prohibited by section 17(a) of the 1940 Act, upon application, if evidence establishes that:

(a) The terms of the proposed transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching on the part of any person concerned;

(b) The proposed transaction is consistent with the policy of each registered investment company concerned, as recited in such company's registration statement and reports filed under the 1940 Act; and

(c) The proposed transaction is consistent with the general purposes of the 1940 Act.

5. Applicants argue that the proposed transfers of shares of the Funds meet the standards for relief set forth in section 17(b) of the 1940 Act. Applicants submit that the terms of the transfer are reasonable and fair in that the only consideration to be received by the HLA Accounts and to be paid by the Reinsuring Accounts is the Reinsuring Account's assumption of the contract liabilities held in the HLA Accounts with respect to the variable portion of the HLA Contracts to be assumption reinsured. Applicants state that the value of the shares of the Funds to be transferred will equal the amount of the liabilities assumed and such value will be computed in accordance with the provisions of the 1940 Act and the rules thereunder.

6. Applicants state that the terms of the transaction are consistent with the policies of each separate account because the policy of both the HLA Accounts and the Reinsuring Accounts is to invest exclusively in shares of the Funds. Finally, Applicants argue that the proposed transaction is consistent with the general purposes of the 1940 Act because the interests of the Contractowners are not adversely affected by the reinsurance of their HLA Contracts. Applicants note that the

terms of the HLA Contracts remain unchanged and the values attributable to the HLA Contracts will be unaffected by the transaction. Applicants submit that the proposed reinsurance of the HLA Contracts affords Contractowners the opportunity to have their HLA Contracts remain with a company that is committed to the issuance of variable annuities and other variable products. Applicants therefore submit that the requested exemption from section 17(a) should be granted.

7. Applicants also request, pursuant to section 17(d) of the 1940 Act and Rule 17d-1 thereunder, that the Commission grant the necessary approvals for any joint arrangement associated with the assumption reinsurance transactions contemplated in the Agreement.

8. Section 17(d) of the 1940 Act, in pertinent part, prohibits an affiliated person of or principal underwriter for a registered investment company, or any affiliated person of such affiliated person or principal underwriter, acting as principal, from effecting any transaction in which the registered company is a joint or a joint and several participant with such person, principal underwriter or affiliated person in contravention of rules and regulations adopted by the Commission.

9. Applicants note that because the terms of the Agreement call for the assets of the HLA Accounts to be transferred to the Reinsuring Accounts, the assumption reinsurance transaction may be deemed to be a joint transaction between ILA and the Reinsuring Accounts. Additionally, in requesting the approvals under section 17(d) and Rule 17D-1 thereunder, applicants note the joint involvement of the Reinsuring Accounts in the allocation between them of the HLA Contracts to be reinsured.

10. Rule 17d-1 provides, in pertinent part, that the Commission may grant approval for transactions prohibited by section 17(d) if the participation of the registered investment company is on a basis no different from that of any other participant. Rule 17d-1 provides that in passing upon an application, the Commission will consider whether the participation of the registered investment company is consistent with the provisions, policies and purposes of the 1940 Act and the extent to which the participation is on a basis different from or less advantageous than that of other participants.

11. Applicants argue that although the participation of each registered investment company in the assumption reinsurance arrangement is different from that of other participants, such

difference is attributable to the separate and distinct interests of each party to the Agreement. Further, Applicants argue that ILA's allocation of the HLA Contracts to be reinsured among the Reinsuring Accounts will not be inconsistent with the policies and purposes of the 1940 Act because the determinations made regarding allocation will have no adverse effect on the Reinsuring Accounts or upon Contractowners. Finally, Applicants argue that the Agreement is fair to Contractowners and will not affect underlying investments on which the performance of their HLA Contracts depends.

Conclusion

Applicants submit that for the reasons and upon the facts set forth above, the requested exemptions pursuant to section 17(b) from section 17(a) and the necessary approvals pursuant to section 17(d) and Rule 17d-1 thereunder should be granted.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,
Deputy Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC-19799; File No. 812-8546]

Templeton Variable Products Series Fund, et al.; Application for Order

October 18, 1993.

AGENCY: Securities and Exchange Commission (the "SEC" or the "Commission").

ACTION: Notice of application for an order under the Investment Company Act of 1940 (the "1940 Act").

APPLICANTS: Templeton Variable Products Series Fund (the "Trust"), Templeton Funds Annuity Company ("TFAC") and certain life insurance companies and their separate accounts investing now or in the future in the Trust (collectively, the "Applicants").

RELEVANT 1940 ACT SECTIONS: Order requested under section 6(c) of the 1940 Act for exemptions from the provisions of sections 9(a), 13(a), 15(a) and 15(b) of the 1940 Act and Rules 6e-2(b)(15) and 6e-3(T)(b)(15) thereunder.

SUMMARY OF APPLICATION: applicants seek an order to the extent necessary to permit shares of the Trust to be sold to and held by separate accounts funding variable annuity and variable life insurance contracts issued by both affiliated and unaffiliated life insurance companies.

FILING DATES: The application was filed on August 25, 1993 and amended on October 14, 1993.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving Applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on November 12, 1993, and should be accompanied by proof of service on Applicants in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the requester's interest, the reason for the request and the issues contested. Persons may request notification of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549. Applicants, 700 Central Avenue, P.O. Box 33030, St. Petersburg, Florida 33733-8030.

FOR FURTHER INFORMATION CONTACT: Wendy Finck Friedlander, Senior Attorney, or Michael V. Wible, Special Counsel, at (202) 272-2060, Office of Insurance Products (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from the SEC's Public Reference Branch.

Applicants' Representations

1. The Trust is an open-end management investment company organized as a Massachusetts business trust on February 25, 1988. The Trust currently consists of five separate series, each with its own investment objective or objectives and policies. The Board of Trustees may establish additional series of shares at any time.

2. TFAC, the business manager, provides certain administrative facilities and services to the Trust pursuant to a business management agreement. These services include providing trading desk facilities for each series of the Trust, payment of salaries of officers, authorization of expenditures and approval of bills for payment on behalf of the Trust, preparation and maintenance of books and records, daily pricing of each series' investment portfolio, supervision of publication of daily quotations of the bid and asked prices of the shares of each series of the Trust, preparation of tax and financial reports, and monitoring compliance with regulatory requirements. TFAC is

an indirect, wholly-owned subsidiary of Franklin Resources, Inc.

3. Templeton Investment Counsel, Inc. ("TICI"), which is registered as an investment adviser under the Investment Advisers Act of 1940, serves as the investment manager to three of the series of the Trust. The Templeton Global Bond Managers Division ("TGBM") of TICI serves as the investment adviser to the other two series of the trust. TICI and TGBM are indirect, wholly-owned subsidiaries of Franklin Resources, Inc.

4. Shares of the Trust are currently offered only to Phoenix Home Life Variable Accumulation Account and The Travelers Fund U for Variable Annuities to serve as the investment vehicle for variable annuity contracts issued by Phoenix Home Life Mutual Insurance Company ("Phoenix") and the Travelers Insurance Company ("Travelers"), respectively. The Trust intends, however, to offer shares of its existing and future series to separate accounts of other insurance companies, including insurance companies that are not affiliated with Phoenix and Travelers, and to serve as the investment vehicle for various types of insurance products, which may include variable annuity contracts, scheduled premium variable life insurance contracts, and flexible premium variable life insurance contracts ("Variable Contracts"). Insurance companies whose separate account or accounts own shares of the Trust are referred to herein as "participating insurance companies."

Applicants' Legal Analysis

1. In connection with the funding of scheduled premium variable life insurance contracts issued through a separate account registered under the 1940 Act as a unit investment trust ("Trust Account"), Rule 6e-2 (b)(15) provides partial exemptions from sections 9(a), 13(a), 15(a) and 15(b) of the 1940 Act. The relief provided by Rule 6e-2 is also available to a separate account's investment adviser, principal underwriter, and sponsor or depositor. The exemptions granted by Rule 6e-2 are available only where the management investment company underlying the Trust Account ("underlying fund") offers its shares exclusively to variable life insurance separate accounts of the life insurer, or of any affiliated life insurance company. Therefore, the relief granted by Rule 6e-2(b)(15) is not available with respect to a scheduled premium variable life insurance separate account that owns shares of an underlying fund that also offers its shares to a variable annuity or

a flexible premium variable life insurance separate account of the same company or of any affiliated life insurance company. The use of a common management investment company as the underlying investment medium for both variable annuity and variable life insurance separate accounts of the same life insurance company or of any affiliated life insurance company is referred to herein as "mixed funding."

2. In addition, the relief granted by Rule 6e-(b)(15) is not available with respect to a scheduled premium variable life insurance separate account that owns shares of an underlying fund that also offers its shares to separate accounts funding variable contracts of one or more unaffiliated life insurance companies. The use of a common management investment company as the underlying investment medium for variable life insurance separate accounts of one insurance company and separate accounts funding variable contracts of one or more unaffiliated life insurance companies is referred to herein as "shared funding."

3. In connection with the funding of flexible premium variable life insurance contracts issued through a Trust Account, Rule 6e-3(T)(b)(15) provides partial exemptions from sections 9(a), 13(a), 15(a), and 15(b) of the 1940 Act. The relief provided by Rule 6e-3(T) is also available to a separate account's investment adviser, principal underwriter, and sponsor or depositor. The exemptions granted by Rule 6e-3(T) are available only where the Trust Account's underlying fund offers its shares "exclusively to separate accounts of the life insurer, or of any affiliated life insurance company, offering either scheduled contracts or flexible contracts, or both; or which also offer their shares to variable annuity separate accounts of the life insurer or of an affiliated life insurance company." Therefore, Rule 6e-3(T) permits mixed funding while not permitting shared funding.

4. Applicants therefore request that the Commission, under its authority in section 6(c) of the 1940 Act, grant relief from sections 9(a), 13(a), 15(a), and 15(b) of the 1940 Act and Rules 6e-2(b)(15) and 6e-3(T)(b)(15) thereunder, to the extent necessary to permit shares of the Trust to be offered and sold to, and held by, variable life insurance separate accounts of one life insurance company and separate accounts funding variable contracts of unaffiliated life insurance companies.

5 Section 9(a) of the 1940 Act makes it unlawful for any company to serve as investment adviser to or principal

underwriter for any registered open-end investment company if an affiliated person of that company is subject to a disqualification enumerated in sections 9(a) (1) or (2). Rule 6e-2(b)(15) (i) and (ii) and Rule 6e-3(T)(b)(15) (i) and (ii) provide exemptions from section 9(a) under certain circumstances, subject to the limitations discussed above on mixed and shared funding. The relief provided by Rules 6e-2(b)(15)(i) and 6e-3(T)(15)(i) permits a person disqualified under section 9(a) to serve as an officer, director, or employee of the life insurer, or any of its affiliates, so long as that person does not participate directly in the management or administration of the underlying fund. The relief provided by Rules 6e-2(b)(15)(ii) and 6e-3(T)(b)(15)(ii) permits the life insurer to serve as the underlying fund's investment adviser or principal underwriter, provided that none of the insurer's personnel who are ineligible pursuant to section 9(a) participates in the management or administration of the fund.

8. Applicants state that the partial relief granted in Rules 6e-2(b)(15) and 6e-3(b)(15) from the requirements of section 9, in effect, limits the monitoring of an insurer's personnel that would otherwise be necessary to ensure compliance with section 9 to that which is appropriate in light of the policy and purposes of section 9. Applicants state that Rules 6e-2 and 6e-3(T) recognize that it is not necessary for the protection of investors or the purposes fairly intended by the policy and provisions of the 1940 Act to apply the provisions of section 9(a) to the many individuals in an insurance company complex, most of whom typically will have no involvement in matters pertaining to investment companies in that organization.

7. Rules 6e-2(b)(15)(iii) and 6e-3(T)(b)(15)(iii) provide partial exemptions from sections 13(a), 15(a) and 15(b) of the 1940 Act to the extent that those sections have been deemed to require "pass-through" voting with respect to management investment company shares held by a separate account, and to permit the insurance company to disregard the voting instructions of its contract owners in certain circumstances.

Rules 6e-2(b)(15)(iii)(A) and 6e-3(T)(b)(15)(iii)(A) provide that the insurance company may disregard the voting instructions of its contract holders in connection with the voting of shares of an underlying fund if such instructions would require such shares to be voted to cause such companies to make, or refrain from making, certain investments which would result in

changes in the subclassification or investment objectives of such companies or to approve or disapprove any contract between a fund and its investment adviser, when required to do so by an insurance regulatory authority, subject to the provisions of paragraphs (b)(5)(i) and (b)(7)(ii)(A) of such Rules.

Rules 6e-2(b)(15)(iii)(B) and 6e-3(T)(b)(15)(iii)(B) provide that the insurance company may disregard contractowners' voting instructions if the contractowners initiate any change in such company's investment policies, principal underwriter, or any investment adviser, provided that disregarding such voting instructions is reasonable and subject to the other provisions of paragraph (b)(5)(ii) and (b)(7)(ii) (B) and (C) of each Rule.

8. Applicants submit that shared funding by unaffiliated insurance companies does not present any issues that do not already exist where a single insurance company is licensed to do business in several or all states. In this regard, Applicants state that a particular state insurance regulatory body could require action that is inconsistent with the requirements of other states in which the insurance company offers its policies. Accordingly, Applicants submit that the fact that different insurers may be domiciled in different states does not create a significantly different or enlarged problem.

9. Applicants state further that, under Rules 6e-2(b)(15) and 6e-3(T)(b)(15), the right of the insurance company to disregard contractowners' voting instructions does not raise any issues different from those raised by the authority of state insurance administrators over separate accounts, and that affiliation does not eliminate the potential, if any, for divergent judgments as to the advisability or legality of a change in investment policies, principal underwriter, or investment adviser initiated by contractowners. The potential for disagreement is limited by the requirements in Rules 6e-2 and 6e-3(T) that the insurance company's disregard of voting instructions be reasonable and based on specific good faith determinations.

10. Applicants submit that mixed funding and shared funding should benefit variable contract owners by: (1) Eliminating a significant portion of the costs of establishing and administering separate funds; (2) allowing for a greater amount of assets available for investment by the Trust, thereby promoting economies of scale, permitting greater safety through greater diversification, and/or making the addition of new series more feasible;

and (3) encouraging more insurance companies to offer variable contracts, resulting in increased competition with respect to both variable contract design and pricing, which can be expected to result in more product variation and lower charges. Each series of the Trust will be managed to attempt to achieve its investment objectives and not to favor or disfavor any particular participating insurer or type of insurance product.

11. Applicants believe that there is no significant legal impediment to permitting mixed and shared funding. Separate accounts, organized as unit investment trusts have historically been employed to accumulate shares of mutual funds which have not been affiliated with the depositor or sponsor of the separate account. Applicants also believe that mixed and shared funding will have no adverse federal income tax consequences.

Applicants' Conditions

The Applicants have consented to the following conditions:

1. A majority of the Board of Trustees of the Trust shall consist of persons who are not "interested persons" of the Trust as defined by section 2(a)(19) of the 1940 Act and the Rules thereunder and as modified by any applicable orders of the Commission, except that, if this condition is not met by reason of the death, disqualification, or bona fide resignation of any trustee or trustees, then the operation of this condition shall be suspended: (i) For a period of 45 days if the vacancy or vacancies may be filled by the Board of Trustees; (ii) for a period of 60 days if a vote of shareholders is required to fill the vacancy or vacancies; or (iii) for such longer period as the commission may prescribe by order upon application.

2. The Board of Trustees will monitor the Trust for the existence of any material irreconcilable conflict between the interests of the contractowners of all separate accounts investing in the Trust. A material irreconcilable conflict may arise for a variety of reasons, including: (i) An action by any state insurance regulatory authority; (ii) a change in applicable federal or state insurance, tax, or securities laws or regulations, or a public ruling, private letter ruling, no-action or interpretive letter, or any similar action by insurance, tax or securities regulatory authorities; (iii) an administrative or judicial decision in any relevant proceeding; (iv) the manner in which the investments of a series of the Trust are being managed; (v) a difference in voting instructions given by variable annuity contractowners and variable life insurance contractowners;

or (vi) a decision by a participating insurance company to disregard the voting instructions of contractowners.

3. Participating insurance companies and the business manager will report any potential or existing conflicts to the Board of Trustees of the Trust. Participating insurance companies and the business manager will be responsible for assisting the Board of Trustees of the Trust in carrying out its responsibilities under these conditions, by providing the Board will all information reasonably necessary for the Board to consider any issues raised. This responsibility includes, but is not limited to, an obligation by each participating insurance company to inform the Board whenever contractowner voting instructions are disregarded. These responsibilities will be contractual obligations of all participating insurance companies investing in the Trust under their agreements governing participation therein, and such agreements shall provide that such responsibilities will be carried out with a view only to the interests of the contractowners.

4. If a majority of the Board of Trustees of the Trust, or a majority of its disinterested trustees, determine that a material irreconcilable conflict exists, the relevant participating insurance companies shall, at their expense and to the extent reasonably practicable (as determined by a majority of the disinterested Trustees) take whatever steps are necessary to remedy or eliminate the irreconcilable material conflict, up to and including: (i) Withdrawing the assets allocable to some or all of the separate accounts from the Trust or any series thereof and reinvesting such assets in a different investment medium (including another fund, if any) or submitting the question whether such segregation should be implemented to a vote of all affected contractowners and, as appropriate, segregating the assets of any appropriate group (i.e., annuity contractowners, life insurance contractowners, or variable contractowners of one or more participating insurance companies) that votes in favor of such segregation, or offering to the affected contractowners the option of making such a change; and (ii) establishing a new registered management investment company or managed separate account. If a material irreconcilable conflict arises because of a participating insurance company's decision to disregard contractowner voting instructions, and that decision represents a minority position or would preclude a majority vote, the participating insurance company may be required, at the election of the Trust,

to withdraw its separate account's investment therein, and no charge or penalty will be imposed as result of such withdrawal. The responsibility to take remedial action in the event of a Board determination of an irreconcilable material conflict and to bear the cost of such remedial action shall be a contractual obligation of all participating insurance companies under their agreements governing participation in the Trust and these responsibilities will be carried out with a view only to the interests of the contractowners.

For the purposes of this condition (4), a majority of the disinterested members of the Board shall determine whether or not any proposed action adequately remedies any irreconcilable material conflict, but in no event will the Trust or the business manager be required to establish a new funding medium for any variable contract. No participating insurance company shall be required by this condition (4) to establish a new funding medium for any variable contract if an offer to do so has been declined by vote of a majority of contractowners materially adversely affected by the irreconcilable material conflict.

5. The Board's determination of the existence of an irreconcilable material conflict and its implications shall be made known promptly in writing to all participating insurance companies.

6. Participating insurance companies will provide pass-through voting privileges to all variable contractowners so long as the Commission continues to interpret the 1940 Act as requiring pass-through voting privileges for variable contractowners. Accordingly, participating insurance companies will vote shares of each series of the Trust held in their separate accounts in a manner consistent with timely voting instructions received from contractowners. Each participating insurance company will vote shares of each series of the Trust held in its separate accounts for which no timely voting instructions from contractowners are received, as well as shares it owns, in the same proportion as those shares for which voting instructions are received. Each participating insurance company shall be responsible for assuring that each of its separate accounts participating in the Trust calculates voting privileges in a manner consistent with the other participating insurance companies. The obligation to calculate voting privileges in a manner consistent with all other separate accounts investing in the Trust shall be a contractual obligation of all participating insurance companies

under their agreements governing participation in the Trust.

7. The Trust will notify all participating insurance companies that prospectus disclosure regarding potential risks of mixed and shared funding may be appropriate. The Trust shall disclose in its prospectus that (1) Shares of the Trust may be offered to insurance company separate accounts that fund both annuity and life insurance contracts, (2) the interests of various contractowners participating in the Trust might at some time be in conflict because of differences of tax treatment or other considerations, and (3) the Board of Trustees will monitor for any material conflicts and determine what action, if any, should be taken.

8. All reports received by the Board of Trustees regarding potential or existing conflicts, and all Board action with respect to determining the existence of a conflict, notifying participating insurance companies of a conflict and determining whether any proposed action adequately remedies a conflict, will be properly recorded in the minutes of the Board of the Trust or other appropriate records, and such minutes or other records shall be made available to the Commission upon request.

9. If and to the extent Rule 6e-2 and Rule 6e-3(T) are amended, or Rule 6e-3 is adopted, to provide exemptive relief from any provision of the 1940 Act or the rules thereunder with respect to mixed or shared funding on terms and conditions materially different from any exemptions granted in the order requested, then the Trust, and/or the participating insurance companies, as appropriate, shall take such steps as may be necessary to comply with Rule 6e-2 and Rule 6e-3(T), as amended, and Rule 6e-3, as adopted, to the extent such rules are applicable.

10. The Trust will comply with all provisions of the 1940 Act requiring voting by shareholders (which, for these purposes, shall be the persons having a voting interest in the shares of the Trust), and in particular the Trust will either provide for annual meetings (except insofar as the Commission may interpret section 16 of the 1940 Act not to require such meetings) or comply with section 16(c) of the 1940 Act (although the Trust is not one of the trusts described in section 16(c) of the 1940 Act) as well as with sections 16(a) and, if and when applicable, 16(b). Further, the Trust will act in accordance with the Commission's interpretation of the requirements of section 16(a) with respect to periodic elections of directors (or trustees) and with whatever rules the Commission may promulgate with respect thereto.

11. The participating insurance companies and/or the business manager, at least annually, shall submit to the Board of Trustees of the Trust such reports, materials or data as the Board may reasonably request so that it may fully carry out the obligations imposed upon it by these stated conditions, and said reports, materials, and data shall be submitted more frequently if deemed appropriate by the Board. The obligations of the participating insurance companies to provide these reports, materials, and data to the Board of Trustees of the Trust when it so reasonably requests, shall be a contractual obligation of all participating insurance companies under their agreements governing participation in the Trust.

Conclusion

For the reasons stated above, Applicants assert that the requested exemptions are appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,
Deputy Secretary.

SMALL BUSINESS ADMINISTRATION

Reporting and Recordkeeping Requirements Under OMB Review

ACTION: Notice of reporting requirements submitted for review.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35), agencies are required to submit proposed reporting and recordkeeping requirements to OMB for review and approval, and to publish a notice in the *Federal Register* notifying the public that the agency has made such a submission.

DATES: Comments should be submitted on or before November 24, 1993. If you intend to comment but cannot prepare comments promptly, please advise the OMB Reviewer and the Agency Clearance Officer before the deadline.

COPIES: Request for clearance (S.F. 83), supporting statement, and other documents submitted to OMB for review may be obtained from the Agency Clearance Officer. Submit comments to the Agency Clearance Officer and the OMB Reviewer.

FOR FURTHER INFORMATION CONTACT:

Agency clearance officer: Cleo Verbillis, Small Business Administration, 409 3RD Street, SW., 5th Floor, Washington, DC 20416, Telephone: (202) 205-6629.

OMB Reviewer: Gary Waxman, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

Title: Small Business Development Center Counseling Evaluation Form.

Form No.: SBA Form 1419.

Frequency: On Occasion.

Description of Respondents: Small Business Clients.

Annual Responses: 7,000.

Annual Burden: 8,470

Dated: October 19, 1993.

Cleo Verbillis,

Chief, Administrative Information Branch.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Aviation Rulemaking Advisory Committee Meeting on Emergency Evacuation Issues

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of meeting.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of the Federal Aviation Administration's Aviation Rulemaking Advisory Committee to discuss emergency evacuation issues.

DATES: The meeting will be held on November 18, 1993 at 9 a.m. Arrange for oral presentations by November 11, 1993.

ADDRESSES: The meeting will be held at McDonnell Douglas, 1735 Jefferson-Davis Highway, suite 1200, Spirit Room, Crystal City, Virginia.

FOR FURTHER INFORMATION CONTACT: Ms. Kathy Ball, Aircraft Certification Service (AIR-1), 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267-8235.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. II), notice is given of a meeting of the Aviation Rulemaking Advisory Committee to be held on November 18, 1993, at McDonnell Douglas, 1735 Jefferson-Davis Highway, suite 1200, Spirit Room, Crystal City, Virginia. The agenda for the meeting will include:

- Opening Remarks.

- A status report by the Performance Standards Working Group.
- A possible presentation and discussion of a draft Notice of Proposed Rulemaking on Emergency Evacuation Demonstration Procedures.
- A discussion of future activities and plans.

Attendance is open to the interested public, but will be limited to the space available. The public must make arrangements by November 11, 1993, to present oral statements at the meeting. The public may present written statements to the committee at any time by providing 25 copies to the Assistant Executive Director for Transport Airplane and Engine Issuers or by bringing the copies to him at the meeting. In addition, sign and oral interpretation can be made available at the meeting, as well as an assistive listening device, if requested 10 calendar days before the meeting. Arrangements may be made by contacting the person listed under the heading "FOR FURTHER INFORMATION CONTACT."

Issued in Washington, DC, on October 19, 1993.

William J. Sullivan,

Assistant Executive Director for Emergency Evacuation Issues, Aviation Rulemaking Advisory Committee.

BILLING CODE 4910-13-M

Intent To Rule on Application To Impose and Use and Impose Only the Revenue From a Passenger Facility Charge (PFC) at Billings-Logan International Airport, Billings, MT

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to impose and use and impose only the revenue from a PFC at Billings-Logan International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101-508) and Part 158 of the Federal Aviation Regulations (14 CFR part 158).

DATES: Comments must be received on or before November 24, 1993.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: David P. Gabbert, Helena Airports District Office, HLN-ADO, Federal Aviation Administration, FAA

Building, suite 2, 2725 Skyway Drive, Helena, MT 59601.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. J. Bruce Putnam, Director of Aviation and Transit at the following address: Billings-Logan International Airport, room 216, Billings, MT 59105.

Air carriers and foreign air carriers may submit copies of written comments previously provided to City of Billings under § 158.23 of part 158.

FOR FURTHER INFORMATION CONTACT: Mr. David P. Gabbert, (406) 449-5271; Helena Airports District Office, HLN-ADO; Federal Aviation Administration; FAA Building, suite 2, 2725 Skyway Drive, Helena, MT 59601. The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to impose and use and impose only the revenue from a PFC at Billings-Logan International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101-508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

On October 15, 1993, the FAA determined that the application to impose and use and impose only the revenue from a PFC submitted by the City of Billings was substantially complete within the requirements of § 158.25 of part 158. The FAA will approve or disapprove the application, in whole or in part, no later than January 28, 1994.

The following is a brief overview of the application.

Level of the proposed PFC: \$3.00
Proposed charge effective date: April 1, 1994

Proposed charge expiration date: July 31, 2002

Total estimated PFC revenue:
\$5,802,957.00

Brief description of proposed project(s):

Impose and Use Projects:
Construction of Aircraft Rescue & Fire Fighting (ARFF) access road; purchase of airfield safety and maintenance equipment; preparation of airport utility master plan; purchase and replacement of communications equipment and command vehicle; upgrade of airside generator; preparation of airport access master plan; construction of an ARFF/Airfield maintenance building; replacement of ARFF vehicles; overlay of Runway 10R-28L; upgrade to water lines and sanitary sewer;

preparation of hangar site; installation of Distance-To-Go marker signing; installation of the terminal building access control system; expansion of regional airline ramp; expansion of the airfield access control system; changes to airfield guidance signs; upgrade and expansion of air carrier aprons; purchase of snow removal equipment; modification of the security check point and installation of interactive TV; improvements to the storm drainage system; impose Only projects: Relocation and upsizing of sanitary sewer; extension and upgrading of water lines; construction of terminal loop road access to Highway 3.

Class or classes of air carriers which the public agency has requested not be required to collect PFCs: None.

Any person may inspect the application in person at the FAA office listed above under "FOR FURTHER INFORMATION CONTACT" and at the FAA regional Airports office located at: Federal Aviation Administration, Northwest Mountain Region, Airports Division, ANM-600, 1601 Lind Avenue SW., suite 540 Renton, WA 98055-4056.

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the City of Billings.

Issued in Renton, Washington on October 15, 1993.

Edward G. Tatum,
Manager, Airport's Division Northwest Mountain Region.

BILLING CODE 4910-13-M

Intent To Rule on Application To Impose and Use the Revenue of a Passenger Facility Charge (PFC) at Corpus Christi International Airport, Corpus Christi, TX; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA invites public comment on the application to impose and use the revenue from a PFC at Corpus Christi International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101-508) and part 158 of the Federal Aviation Regulations (14 CFR part 158). This notice corrects the original notice published August 20, 1993.

DATES: Additional comments on this application must be received on or before November 24, 1993.

ADDRESSES: Additional comments on this application may be mailed or delivered in triplicate copies to the FAA at the following address: Mr. Ben Guttery, Planning and Programming Branch, ASW-610D, Airports Division, Southwest Region, Fort Worth, Texas 76193-0611.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. George D. Hext of Corpus Christi International Airport at the following address: Department of Aviation, Corpus Christi International Airport, 1000 International Drive, Corpus Christi, Texas 78406.

FOR FURTHER INFORMATION CONTACT: Mr. Ben Guttery, Federal Aviation Administration, Planning and Programming Branch, ASW-610D, Airports Division, Southwest Region, Fort Worth, Texas 76193-0611, (817) 624-5979.

SUPPLEMENTARY INFORMATION: Inadvertently left out of the original Federal Register Notice were the following proposed projects for impose and use of passenger facility charges:

Acquire Vacuum Sweeper
Acquire Handicap Lift
Acquire ARFF Vehicle
Prepare Master Plan Update

The FAA proposes to rule and invites public comment on these projects for impose and use of revenue from a PFC at Corpus Christi International Airport

under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101-508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

The FAA will approve or disapprove the application, in whole or in part, no later than November 29, 1993.

Any person may inspect the application in person at the FAA office listed above under "FOR FURTHER INFORMATION CONTACT" and at the FAA regional Airports office located at: Federal Aviation Administration, Airports Division, Planning and Programming Branch ASW-610D, 4400 Blue Mound Road, Fort Worth, Texas 76193-0611.

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at Corpus Christi International Airport.

Issued in Fort Worth, Texas, on October 7, 1993.

John M. Dempsey,

Manager, Airports Division.

BILLING CODE 4910-13-M

the authority vested in me by the Act of October 19, 1965 (79 Stat. 985, 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978 (43 FR 13359, March 29, 1978), and Delegation Order No. 85-5 of June 27, 1985 (50 FR 27393, July 2, 1985), I hereby determine that the objects to be included in the exhibit, "Gold of Meroe" (see list ¹), imported from abroad for the temporary exhibition without profit within the United States, are of cultural significance. These objects are imported pursuant to a loan agreement with the foreign lenders. I also determine that the temporary exhibition or display of the listed exhibit objects at the Metropolitan Museum of Art, New York, New York, from on or about November 22, 1993 to on or about April 3, 1994, is in the national interest.

Public Notice of this determination is ordered to be published in the **Federal Register**.

Dated: October 20, 1993.

R. Wallace Stuart,

Acting General Counsel.

[FR Doc. 93-26210 Filed 10-22-93; 8:45 am]

BILLING CODE 8230-01-M

UNITED STATES INFORMATION AGENCY

Culturally Significant Objects Imported for Exhibition; Determination

Notice is hereby given of the following determination: Pursuant to

¹ A copy of this list may be obtained by contacting Mr. Paul W. Manning of the Office of the General Counsel of USIA. The telephone number is 202/619-6827, and the address is room 700, U.S. Information Agency, 301 Fourth Street, SW., Washington, DC 20547.

Sunshine Act Meetings

Federal Register

Vol. 58, No. 204

Monday, October 25, 1993

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

DEPARTMENT OF AGRICULTURE

AGENCY: Rural Telephone Bank, USDA.
ACTION: Staff Briefing for the Board of Directors.

TIME AND DATE: 1 p.m., Wednesday, November 3, 1993.

PLACE: Room 107—Administration Building, Department of Agriculture, 14th and Independence Avenue, SW., Washington, DC.

STATUS: Open.

MATTERS OF BE DISCUSSED: The staff briefing will consist of matters relating to:

1. Update on program legislation.
2. RTB interest rate for FY 1993.
3. Privatization discussion with guest speaker.

ACTION: Regular Meeting of the Board of Directors.

TIME AND DATE: 9 a.m., Thursday, November 4, 1993.

PLACE: Williamsburg Room—Administration Building, Department of Agriculture, 14th and Independence Avenue, SW., Washington, DC.

STATUS: Open.

MATTERS TO BE CONSIDERED: The following matters have been placed on the agenda for the Board of Directors meeting:

1. Call to Order.
2. Swearing-in of new Board members.
3. Election of Chairperson.
4. Approval of Minutes of August 5, 1993, Board meeting.
5. Report on loans approved in the fourth quarter of FY 1993.
6. Review of fourth quarter, FY 1993, financial statements.
7. Report of ad hoc committee on privatization of the RTB
8. Report of ad hoc committee on prepayments.
9. Resolution to replace lost stock certificate.
10. Establish date and location of next regular Board meeting.
11. Adjournment.

CONTACT PERSON FOR MORE INFORMATION: Matthew P. Link, Assistant Secretary, Rural Telephone Bank (202) 720-0530. James B. Huff, Sr., Governor, Rural Telephone Bank. [FR Doc. 93-26359 Filed 10-21-93; 2:13 pm]

BILLING CODE 3410-15-M

U.S. CONSUMER PRODUCT SAFETY COMMISSION

TIME AND DATE: 10:00 a.m., Tuesday, October 26, 1993.

LOCATION: Room 556, Westwood Towers, 5401 Westbard Avenue, Bethesda, Maryland.

STATUS: Open to the Public.

MATTERS TO BE CONSIDERED:

1. Crib Toys

The Commission will consider options for Commission action with regard to a rulemaking proceeding initiated in 1990 to consider strangulation hazards associated with crib toys.

2. FY 1994 Year Operating Plan

The Commission will consider issues related to the Commission's Operating Plan for Fiscal Year 1994.

For a recorded message containing the latest agenda information, call (301) 504-0709.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Office of the Secretary, 5401 Westbard Ave., Bethesda, MD 20207 (301) 504-0800.

Date: October 20, 1993.

Sheldon D. Butts,

Deputy Secretary.

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

Last List October 21, 1993

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, stock numbers, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is \$775.00 domestic, \$193.75 additional for foreign mailing.

Mail orders to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250-7954. All orders must be accompanied by remittance (check, money order, GPO Deposit Account, VISA, or Master Card). Charge orders may be telephoned to the GPO Order Desk, Monday through Friday, at (202) 783-3238 from 8:00 a.m. to 4:00 p.m. eastern time, or FAX your charge orders to (202) 512-2233.

¹ Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

² The July 1, 1985 edition of 32 CFR Parts 1-189 contains a note only for Parts 1-39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1-39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

³ The July 1, 1985 edition of 41 CFR Chapters 1-100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

⁴ No amendments to this volume were promulgated during the period Apr 1, 1990 to Mar. 31, 1993. The CFR volume issued April 1, 1990, should be retained.

⁵ No amendments to this volume were promulgated during the period Apr 1, 1991 to Mar. 31, 1993. The CFR volume issued April 1, 1991, should be retained.

⁶ No amendments to this volume were promulgated during the period July 1, 1989 to June 30, 1992. The CFR volume issued July 1, 1989, should be retained.

⁷ No amendments to this volume were promulgated during the period July 1, 1991 to June 30, 1993. The CFR volume issued July 1, 1991, should be retained.

⁸ No amendments to this volume were promulgated during the period October 1, 1991 to September 30, 1992. The CFR volume issued October 1, 1991, should be retained.

Regulatory Information Service Center

Introduction to the Unified Agenda of
Federal Regulations

**REGULATORY INFORMATION
SERVICE CENTER****Unified Agenda of Federal Regulations**

AGENCY: Regulatory Information Service Center.

ACTION: Introduction to the Unified Agenda of Federal Regulations.

SUMMARY: The Regulatory Flexibility Act (5 U.S.C. 602) requires that agencies publish semiannual regulatory agendas describing regulatory actions they are developing. On September 30, 1993, President Clinton signed Executive Order 12866 "Regulatory Planning and Review" (58 FR 51735, October 4, 1993), which, among other things, requires agencies to publish agendas of all regulations under development or review. The April 1994 edition of the **Unified Agenda of Federal Regulations** will be prepared in accordance with the provisions of E.O. 12866.

This edition was prepared in accordance with Executive Order 12291 and OMB memoranda implementing section 5 of that Executive order, which were in effect at the time agencies prepared their submissions. Those documents established minimum standards for executive agencies' agendas, including specific types of information for each entry and publication in a uniform format. In addition, the Office of Federal Procurement Policy Act Amendments of 1988 (41 U.S.C. 402) require the development and semiannual publication of a report on procurement regulations. The Unified Agenda helps fulfill that requirement as well. All Federal regulatory agencies have chosen to publish their regulatory agendas as part of this **Unified Agenda of Federal Regulations**.

The following separate parts in this issue of the **Federal Register** are the agency agendas, which together comprise the October 1993 edition of the semiannual **Unified Agenda of Federal Regulations**.

ADDRESSES: Regulatory Information Service Center, 750 17th Street NW., Suite 500, Washington, DC 20006.

FOR FURTHER INFORMATION CONTACT: For further information about specific regulatory actions, please refer to the Agency Contact listed for each entry. To provide comment on or to obtain further information about the **Unified Agenda of Federal Regulations**, contact: Mark G. Schoenberg, Executive Director, (202) 634-6222, or Margaret M. Donohoe, Project Director, (202) 634-6220.

**INTRODUCTION TO THE UNIFIED
AGENDA OF FEDERAL
REGULATIONS****About the Unified Agenda**

The Regulatory Information Service Center (the Center) compiles the **Unified Agenda of Federal Regulations** (Unified Agenda) for the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB). The Center provides information about Federal regulatory activity to the President and his Executive Office, the Congress, agency managers, and the public. The Office of Information and Regulatory Affairs is responsible for overseeing the Federal Government's regulatory, paperwork, and information resource management activities.

The Unified Agenda provides uniform reporting of data on regulatory activities under development throughout the Federal Government. This edition of the Unified Agenda includes 59 regulatory agendas from all Federal departments, agencies, and commissions that publish agendas. Agencies of the United States Congress are not included. The Federal Mediation and Conciliation Service, the Institute of Museum Services, the National Capital Planning Commission,

and the Office of Special Counsel have published regulatory agendas in the past but have nothing to report for this edition.

The regulatory activities included in the agency agendas are those currently planned for the next 12 months. The agendas do not include regulations that were excluded from review under E.O. 12291, such as those concerning military or foreign affairs functions and regulations related to internal agency management.

The Regulatory Flexibility Act (5 U.S.C. 601) requires that agencies publish regulatory agendas identifying those rules that may have a significant economic impact on a substantial number of small entities. Agencies meet that requirement by including the information in their submissions for the **Unified Agenda of Federal Regulations**.

In addition, Executive Order 12612 of October 26, 1987, entitled "Federalism" (3 CFR, 1987 Comp., p. 252) directs executive departments and agencies to identify proposed regulatory provisions that have significant federalism implications. As part of this effort, agencies include in their submissions for the Unified Agenda information on whether their regulatory actions may have an effect on various levels of government.

The Unified Agenda also helps fulfill the statutory requirement that the Office of Federal Procurement Policy (OFPP) publish a **Procurement Regulatory Activity Report** as required by the Office of Federal Procurement Policy Act Amendments of 1988 (102 Stat. 4055; 41 U.S.C. 402). In their agendas, agencies indicate which regulatory actions are procurement-related, as well as whether or not there is a statutory requirement or a paperwork burden associated with the procurement-related actions. Information that agencies publish in the Unified Agenda is used by OFPP to produce its report.

The Unified Agenda is produced through a computer system designed and maintained by the Center with the advice and assistance of the Government Printing Office. The system was designed to save agencies time and money by automating the preparation and printing of their agendas in a uniform format and to make the Unified Agenda easier to use. In order to further facilitate producing the Unified Agenda, many agencies currently use computer terminals at their offices to enter agenda information into the Center's computer system.

All agendas contain uniform data elements -- regulation title, significance, legal authority, CFR citation, legal deadline, abstract, timetable, small entities affected, government levels affected, procurement, agency contact, and a unique Regulation Identifier Number. Agencies also include any additional information they consider important. If any of the data elements are not included, the agency either did not report the information or may provide an explanation in its preamble, the text that introduces the agency's section of the Unified Agenda. For further information, please contact the individual agency.

Congress generally authorizes a single Federal agency to implement, through regulation, a specific policy objective. Sometimes, however, a statute may require that several agencies issue regulations to accomplish the objective. In such cases, the agencies, working with a central coordinator, jointly publish the documents issued in the course of the rulemaking proceeding. These proceedings are referred to as Governmentwide common rules.

In this edition of the Unified Agenda, three Governmentwide common rules are reported by the agencies participating in their development.

They are:

- Debarment and Suspension
- New Restrictions on Lobbying
- Uniform Administrative Requirements for Grants and Cooperative Agreements With State and Local Governments

Agencies participating in the development of these common rules have reported them in their individual sections of the Unified Agenda.

Regulatory agendas have been required by Executive orders since 1978. The **Unified Agenda of Federal Regulations** has been published in April and October of each year since 1983. We welcome comments on this edition and suggestions for improving future ones.

How To Use the Unified Agenda

Each agency agenda appears as a separate part in this edition of the **Federal Register**. The parts are organized alphabetically in four groups: Cabinet departments, other executive agencies, joint authorities, and independent agencies. Departments are divided into agencies, which may in turn be divided into subagencies.

Each agency introduces its section of the Unified Agenda with a preamble providing information specific to that section. Each agency lists its rules in four groups:

1. Prerule Stage -- actions agencies will undertake in the next 12 months to determine whether or how to initiate rulemaking. Such actions occur prior to a Notice of Proposed Rulemaking and may include Advance Notices of Proposed Rulemaking (ANPRMs) and reviews of existing regulations.

2. Proposed Rule Stage -- actions for which agencies plan to publish a Notice of Proposed Rulemaking (NPRM) as the next step in their rulemaking process or for which the closing date of the NPRM Comment Period is the next step.

3. Final Rule Stage -- actions for which agencies plan to publish a final rule or an interim final rule or to take other final action as the next step in their rulemaking process.

4. Completed Actions -- actions or reviews the agency completed or withdrew since publishing its last agenda. This section also includes items that were begun and completed between issues of the Unified Agenda.

An agency may use a subheading to identify regulations that it has grouped according to a particular topic. When these subheadings are used, they appear above the title of the first regulation in the group.

A bullet (●) preceding an entry indicates that the entry appears in the Unified Agenda for the first time.

All entries are numbered sequentially from the beginning to the end of the Unified Agenda. The Sequence Number (Seq. No.) preceding the title of each entry identifies the location of the entry in this edition of the Unified Agenda. The same number is used in the indexes, to enable readers to find entries on specific subjects.

For each agency that requests it, the Center provides a computer-produced Table of Contents that appears after the agency preamble. The agency Tables of Contents help readers locate quickly those entries within an agency that may be of most interest to them. Sequence numbers also appear in agency Tables of Contents.

The Unified Agenda contains three indexes. The first two indexes list the regulatory actions that agencies believe may have effects on small entities or levels of government. In addition, the Unified Agenda contains a Subject Index based on the **Federal Register Thesaurus of Indexing Terms** to help readers locate entries from various agencies that may affect a particular area of interest. The index also contains cross references to assist the reader's search.

Entries describing regulations in the Unified Agenda should contain, at a minimum, the following information:

- **Title of the Regulation.**
- **Significance** -- an indication of the significance of the entry that appears when:
 - a. The action met the criteria for inclusion in the **Regulatory Program of the United States Government**, or
 - b. the agency otherwise considers the action a priority.
 The Significance heading appears only if the entry is a significant action.
- **Legal Authority** -- the section(s) of the United States Code (U.S.C.) or Public Law (P.L.) or the Executive order (E.O.) that authorize(s) the regulatory action. Agencies may provide popular name references to laws in addition to these citations.
- **CFR Citation** -- the section(s) of the Code of Federal Regulations that will be affected by the action.
- **Legal Deadline** -- an indication of whether the rule is subject to a statutory or judicial deadline, the date of that deadline, and whether the deadline pertains to an NPRM, a Final Action, or some "Other" action.
- **Abstract** -- a description of the problem the regulation will address; the need for a Federal solution; to the extent available, the alternatives that the agency is considering to address the problem; and the potential costs and benefits of the action.
- **Timetable** -- the dates and citations (if available) for all past steps and at least a projected date for the next step for the regulatory action. If a date appears in this section as 00/00/00, it means the date of the action is currently undetermined. Similarly, 04/00/94 means the agency can predict the month and year the action will take place but not the day it will occur.
- **Small Entities Affected** -- indicates whether the rule is expected to have a significant economic impact on a substantial number of "small entities" as defined by the Regulatory Flexibility Act (5 U.S.C. 601) and, if so, whether the small entities are businesses, governmental jurisdictions, or organizations.
- **Government Levels Affected** -- indicates whether the rule is expected to affect levels of government and, if so, whether the governments are local, State, or Federal.
- **Agency Contact** -- the name, title, address, and phone number of a person in the agency who is knowledgeable about the regulation.

- **Procurement** -- a statement identifying procurement-related actions and indicating whether there is a statutory requirement for the action and whether there is a paperwork burden associated with the action. The Procurement heading appears only if the entry is a procurement-related action.

Some agencies have provided other optional information at their discretion.

Data Limitations

Agencies prepared entries for this edition of the Unified Agenda to give the public notice of their plans to review, propose, and issue regulations. They have tried to predict their activities over the next 12 months as accurately as possible, but dates and schedules are subject to change. Agencies may withdraw some of the regulations now under development, and they may issue or propose other regulations not included in their agendas. Agency actions in the rulemaking process may occur before or after the dates they have listed. The Unified Agenda does not create a legal obligation on agencies to adhere to schedules within it or to confine their regulatory activities to those regulations that appear in it. The information in this edition is accurate as of August 27, 1993, in the judgment of the submitting agencies, except as otherwise noted in individual agency preambles. Where applicable, individual actions will be subject to review for compliance with applicable Executive orders, the Regulatory Flexibility Act, the Office of Federal Procurement Policy Act Amendments of 1988, and the Paperwork Reduction Act at appropriate points in the regulatory process.

List of Abbreviations

The following abbreviations appear throughout this edition of the Unified Agenda:

ANPRM -- An Advance Notice of Proposed Rulemaking is a preliminary notice that an agency is considering a regulatory action. The agency issues an ANPRM before it develops a detailed proposed rule. The ANPRM describes the general area that may be subject to regulation and usually asks for public comment on the issues and options being discussed. An ANPRM is issued only when an agency believes it needs to gather more information before proceeding to a notice of proposed rulemaking.

CFR -- The Code of Federal Regulations is an annual codification of the general and permanent regulations

published in the Federal Register by the departments and agencies of the Federal Government. The Code is divided into 50 titles, and each title covers a broad area subject to Federal regulation. The CFR is keyed to and kept up to date by the daily issues of the Federal Register.

EO -- An Executive order is a directive from the President to an executive agency, issued under constitutional or statutory authority. Executive orders are published in the Federal Register and in title 3 of the Code of Federal Regulations.

FR -- The Federal Register is a daily Federal Government publication that provides a uniform system for publishing Presidential documents, all proposed and final regulations, notices of meetings, and other official documents issued by Federal departments and agencies.

FY -- The Federal fiscal year runs from October 1 to September 30.

NPRM -- A Notice of Proposed Rulemaking is the document an agency issues and publishes in the Federal Register that describes and solicits public comments on a proposed regulatory action. Under the Administrative Procedure Act (5 U.S.C. 553), an NPRM must include, at a minimum:

- A statement of the time, place, and nature of the public rulemaking proceeding;
- a reference to the legal authority under which the rule is proposed; and
- either the terms or substance of the proposed rule or a description of the subjects and issues involved.

PL -- A Public Law is a law passed by Congress and signed by the President or enacted over his veto. It has general applicability, as opposed to a private law that applies only to those persons or entities specifically designated. Public laws are numbered in sequence throughout the 2-year life of each Congress; for example, PL 103-5 is the fifth public law of the 103rd Congress.

RFA -- A Regulatory Flexibility Analysis describes the impact of a proposed rule on small entities as required by the Regulatory Flexibility Act (5 U.S.C. 601). An RFA describes why the agency is considering the action; the objectives of and legal basis for the proposed rule; an estimate of the number of small entities that could be affected and the compliance requirements they would have to fulfill; any other duplicative, overlapping, or conflicting Federal rules; and alternatives to the proposed action. When required, an initial RFA

accompanies an NPRM, and a final RFA accompanies a final rule.

RIA -- A Regulatory Impact Analysis has been required by E.O. 12291 for all major rules and other regulations designated by the Office of Management and Budget. An RIA was prepared to determine whether a proposed regulatory action met the requirements of section 2 of E.O. 12291; namely, that it:

- Be based on adequate information concerning the need for and consequences of the action;
- not be undertaken unless the potential benefits outweigh the potential costs to society;
- maximize net benefits to society;
- entail the least net cost to society of the alternatives considered; and

- take into account the condition of particular affected industries, the national economy, and contemplated future regulatory actions.

RIN -- The Regulation Identifier Number is assigned by the Regulatory Information Service Center to identify each regulatory action listed in the Unified Agenda. Many agencies include RIN numbers in the headings of their Rule and Proposed Rule documents when publishing them in the **Federal Register**.

Seq. No. -- The Sequence Number identifies the location of an entry in this edition of the Unified Agenda.

USC -- The United States Code is a consolidation and codification of all general and permanent laws of the United States. The USC is divided into

50 titles, and each title covers a broad area of Federal law.

Information About Additional Copies

Additional copies of this edition of the **Federal Register** are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402-9325, (202) 783-3238.

Copies of individual agency agendas may be available directly from the agency. Please contact the particular agency for further information.

Dated: October 13, 1993.

Mark G. Schoenberg,

Executive Director.

Semiannual Regulatory Agenda, October 1993

AGENCY: Office of the Secretary, USDA.

ACTION: Semiannual regulatory agenda.

SUMMARY: This agenda provides summary descriptions of major and nonmajor regulations being developed in agencies of the U.S. Department of Agriculture in conformance with Executive Order 12291 "Federal Regulation." The agenda also describes regulations affecting small entities as required by section 602 of the Regulatory Flexibility Act, Public Law 96-354.

USDA has attempted to list all regulations and regulatory reviews pending at the time of publication except for minor and routine or repetitive actions, but some may have been inadvertently missed. There is no legal significance to the omission of an item from this listing. Also, the dates

shown for the steps of each action are estimated and are not commitments to act on or by the date shown.

FOR FURTHER INFORMATION CONTACT: For further information on any specific entry shown in this agenda, please contact the person listed for that action.

Requests for copies of the agenda should include a self-addressed, stamped envelope and be directed to: Regulatory Agenda, OBPA, Office of the Secretary, Room 147-E, Administration Building, U.S. Department of Agriculture, Washington, DC 20250, (202) 720-1272.

Dated: September 10, 1993.

Marvin J. Shapiro,

Chief, Legislative, Regulatory, and Automated Systems Division.

Agricultural Marketing Service—Prerule Stage

| Sequence Number | Title | Regulation Identifier Number |
|-----------------|--|------------------------------|
| 1 | Organic Certification of Organic Food Production Act of 1990 | 0581-AA40 |
| 2 | Relating to Inspection and Grading of Burley Tobacco | 0581-AB01 |
| 3 | Revision of Licensing Procedures for Cottonseed Samplers | 0581-AB05 |

Prerule Stage

1. ORGANIC CERTIFICATION OF ORGANIC FOOD PRODUCTION ACT OF 1990

Significance: Agency Priority

Legal Authority: PL 101-624, sec 2101 to 2123; 7 USC 6501 to 6522

CFR Citation: None

Legal Deadline: NPRM, Statutory, May 28, 1992. Final, Statutory, October 1, 1993. Other, Statutory, May 28, 1991. The Organic Foods Production Act calls for the Secretary to appoint the National Organic Standards Board 180 days after enactment and convene it within 60 days thereafter.

Abstract: Public Law 101-624 calls for necessary regulations to implement the Organic Foods Production Act of 1990. The legislation calls for a national program to develop standards for certifying products as organic. Actions called for under this Act include: (a) notice for applicants to apply for membership on the National Organic Standards Board; (b) notice of nominations to the Board and announcement of meetings; (c) notice inviting States and other individuals to apply to be Certifying agents; (d) notice, hearings and comments for development of regulations for standards for organic livestock products; (e) notice and comment on proposed and final National List of Approved and Prohibited Substances for Organic Production and Handling; (f) notice and comment on proposed amendments to the National List; (g) issue a proposed rule to implement the title for comment; and (h) issue a final rule to implement the program.

2. • RELATING TO INSPECTION AND GRADING OF BURLEY TOBACCO

Significance: Agency Priority

Legal Authority: 7 USC 511 et seq

CFR Citation: 7 CFR 29.3053

Legal Deadline: None

Abstract: This revision would require that the average bale weight in each lot of burley tobacco not exceed 100 pounds. The industry has requested the Agricultural Marketing Service be given this authority in order to improve the integrity and uniformity of lots resulting in more orderly marketing and enhancing desirability of American burley.

4. NATIONAL LABORATORY ACCREDITATION PROGRAM

Significance: Agency Priority

Legal Authority: PL 101-624, sec 1321 to 1330; 7 USC 138 to 1381

CFR Citation: Not applicable

Legal Deadline: None

Abstract: The 1990 Farm Bill authorized the creation of a National Laboratory Accreditation Program (NLAP) for laboratories that request

accreditation and conduct residue testing of agricultural products or that make claims to the public or buyers of agricultural products concerning chemical residue levels on agricultural products. The program is designed to protect human health by ensuring that laboratories which make claims to the public concerning pesticide residue levels meet minimum quality and reliability standards. The standards for the NLAP will be provided by the Food and Drug Administration with the

operation of the program under the Agricultural Marketing Service, USDA. The program costs will be offset by a fee schedule. The one-time appropriation was used to provide for a fully equipped pesticide laboratory to verify the findings of those laboratories applying for accreditation.

5. ESTABLISH A PROCESSOR-FUNDED MILK PROMOTION PROGRAM

Significance: Agency Priority

Legal Authority: PL 101-624, Sec 1999(A); 7 USC 6401 to 6417

CFR Citation: None

Legal Deadline: Final, Statutory, September 10, 1993.

A final order, if approved by fluid milk processors, shall become effective not later than 180 days following publication of the proposed order.

Abstract: The "Fluid Milk Promotion Act of 1990," authorized the establishment of a processor-funded milk promotion program which will provide an orderly procedure for developing, financing through assessments on fluid milk products produced in the United States, and carrying out a coordinated program of advertising designed to strengthen the position of the dairy industry in the market place.

6. REVISION OF REGULATIONS GOVERNING THE INSPECTION AND GRADING SERVICES OF MANUFACTURED OR PROCESSED DAIRY PRODUCTS

Legal Authority: 7 USC 1621 to 1627 Agricultural Marketing Act of 1946

CFR Citation: 7 CFR 58

Legal Deadline: None

Abstract: The regulations have not been updated since December 1, 1976. The revisions of regulations are needed to reflect more desirable ways of carrying out the dairy inspection and grading program. The changes are not expected to have any major impact on program participation, however, in that most participants are operating in a manner that is consistent with the proposed changes.

7. REGULATIONS UNDER THE FEDERAL SEED ACT

Legal Authority: 7 USC 1551 to 1611 Federal Seed Act

CFR Citation: 7 CFR 201 to 202

Legal Deadline: None

Abstract: Changes in the regulations of the Federal Seed Act (FSA) are to be proposed to eliminate differences between FSA and Association of Official Seed Analysts (AOSA) testing rules as well as differences between minimum seed certification standards of the FSA and those of the Association of Official Seed Certifying Agencies (AOSCA). The FSA regulates the interstate shipment of agricultural and vegetable seed, which is required to be labeled with certain information needed by the seed buyer. The Agricultural Marketing Service (AMS) has cooperative agreements with each

of the 50 states who inspect and test seed being sold in their state. Interstate shipments of seed found to be mislabeled can be submitted to AMS for action under the FSA. States test seed according to AOSA rules. AMS must test according to FSA rules. Any alternative to the changes, could in some cases cause seed labeled according to a test conducted by AOSA rules to be mislabeled when tested according to FSA rules, or cause seed certified by an AOSCA member agency to be not in compliance with the FSA. On balance these changes will likely result in no cost or a net savings to the seed industry.

8. POLICY STATEMENT AND REGULATIONS GOVERNING AVAILABILITY OF TOBACCO INSPECTION SERVICES TO BURLEY TOBACCO ON DESIGNATED MARKETS

Significance: Agency Priority

Legal Authority: 7 USC 511 et seq

CFR Citation: 7 CFR 29

Legal Deadline: None

Abstract: The proposed rule has been withdrawn and is being rewritten. We now plan to publish the proposed rule in September. The Department established the burley tobacco advisory committee effective May 14, 1990 to assist in the regulation of sales at designated markets selling burley tobacco. The committee has met three times and adopted a statement of policies and procedures for the 1991-92 season.

11. GRADING OF SHELL EGGS

Significance: Agency Priority
Legal Authority: 7 USC 1621 to 1627 Agricultural Marketing Act of 1946
CFR Citation: 7 CFR 56
Legal Deadline: None

Abstract: The proposal clarifies and updates provisions of the regulations in response to changing industry practices, program direction, and policy interpretation. Changes to reflect current industry practices would affect grading room requirements, references to the tape used to seal cartons, and the reuse of oil from shell egg protecting operations. Changes to clarify and strengthen existing regulations would affect the definition of "quality assurance inspector," the facilities and equipment required for graders, the temperature of the spray rinse in shell egg cleaning operations, and the "nest run B quality shell" definition. Other changes will be to require a specific level of humidity in cooler rooms to help maintain egg quality and to eliminate wholesale grades and weight classes because they are no longer used.

12. VOLUNTARY GRADING OF POULTRY PRODUCTS AND RABBIT PRODUCTS

Significance: Agency Priority
Legal Authority: 7 USC 1621 to 1627 Agricultural Marketing Act of 1946
CFR Citation: 7 CFR 70
Legal Deadline: None

Abstract: The proposal updates the poultry grade standards to reflect changes in marketing practices. Changes to reflect current industry practices will reclassify discolorations, will expand the range allowable, will eliminate the two procurement grades, will change new carcass weight categories, and will establish new grading criteria for large poultry parts. Change to clarify and strengthen existing regulations related to the definition of "exposed flesh."

13. FEES AND CHARGES, MANDATORY TOBACCO INSPECTION

Significance: Agency Priority
Legal Authority: 7 USC 511 et seq
CFR Citation: 7 CFR 29
Legal Deadline: None

Abstract: AMS will conduct a fee analysis January 1994 for presentation to the National Advisory Committee for Tobacco Inspection Services in March 1994.

Proposed fee docket would appear in Federal Register in April with effective date of July 1.

14. USER FEES FOR COTTON CLASSIFICATION SERVICES TO GROWERS

Legal Authority: 7 USC 473(a); 7 USC 473(d); 7 USC 55

CFR Citation: 7 CFR 28

Legal Deadline: Final, Statutory, June 1, 1993.

Abstract: This revision will decrease the 1993 user fees for growers cotton classification services from the level charged in 1992 under the Cotton Statistics and Estimates Act, as amended by Public Law 102-237. The revisions allow for the recovery of costs associated with this program. The economic impact of the revision is not yet known. A slight decrease would not have a major economic impact. All service are voluntary.

15. • USER FEES FOR COTTON CLASSIFICATION SERVICES TO GROWERS

Significance: Agency Priority

Legal Authority: 7 USC 473 (a); 7 USC 473 (d); 7 USC 55

CFR Citation: 7 CFR 27; 7 CFR 28

Legal Deadline: NPRM, Statutory, March 1, 1994. Final, Statutory, June 1, 1994.

7 USC 473a, requires Secretary of Agriculture to announce fee by June 1 each year, as harvesting begins in July and a uniform fee is mandated for entire crop.

Abstract: Annual revisions of the grower's fee for cotton classification for each crop year are mandated by formula in the Cotton Statistics and Estimates Act, as amended by Public Law 102-237. The revision provides for recovery of the cost of providing the service and allows for the variations in size of the crop and in other factors which affect the costs. The economic impact of revisions is not known, but a slight increase or decrease in the fee would not cause major impact. All services are voluntary.

21. • UNITED STATES STANDARDS FOR GRADES OF TOMATO SAUCE

Significance: Agency Priority

Legal Authority: 7 USC 1622; 7 USC 1624

CFR Citation: 7 CFR 52; 7 CFR 2371 to 2377

Legal Deadline: None

Abstract: A revision of the U.S. grade standards is proposed. The Agricultural Marketing Act of 1946 (AMA) provides for the development and improvement of standards of quality, condition, quantity, and grade to encourage uniformity and consistency in commercial practices. These standards are voluntary. A small entity may avoid incurring any additional economic impact by not employing the standards. The petition to revise these grade standards came from the Indiana Food

Processors Association, now the Mid-America Food Processors Association and several companies that produce tomato sauce. Alternatives to the revision are eliminating the grade standards or taking no action to change the standards. Eliminating the grade standards or taking no action would be difficult because it would impede trade. Many Federal and State food buying agencies rely on the U.S. grade standards as a basis for making their purchases. The revision is needed to reflect current processing and marketing practices and to facilitate trade.

23. • REVISION OF THE REGULATIONS GOVERNING INSPECTION CERTIFICATION AND STANDARDS FOR FRESH FRUITS, VEGETABLES, AND OTHER PRODUCTS

Legal Authority: 7 USC 1621 to 1627 Agricultural Marketing Act of 1946

CFR Citation: 7 CFR 51

Legal Deadline: None

Abstract: The objective is to promote uniformity in the grading and certification of fresh fruits, vegetables, and other products. The regulations governing activities of the grading program have not undergone a substantial revision since 1967. As a result of changes in Department, Agency, and Division policies and industry practices, there is a need to amend the present regulations to more effectively administer the grading program.

26. • AMENDMENT TO REGULATIONS FOR PROVIDING COTTON CLASSIFICATION SERVICES

Legal Authority: 7 USC 473a; 7 USC 473c

CFR Citation: 7 CFR 28

Legal Deadline: None

Abstract: In order to provide the most accurate cotton classification services possible for growers, the modification of the present classification system is proposed. This proposal is in response to industry recommendations that averaging of fiber quality measurements for all bales contained in field cotton storage modules provides a more accurate indication of the fiber quality than that provided by individual bale measurements, and that averaging of all factors be pilot tested for the 1993 crop. If the 1993 crop results are favorable, averaging would be implemented for the entire crop, beginning in 1994.

28. • REFRIGERATION AND LABELING REQUIREMENTS FOR SHELL EGGS

Significance: Agency Priority

Legal Authority: 7 USC 1621 to 1627 Agricultural Marketing Act; 7 USC 1031 to 1056 Egg Products Inspection Act

CFR Citation: 7 CFR 56; 7 CFR 59

Legal Deadline: None

Abstract: Research has shown that refrigeration is a significant factor in the reduction of bacterial growth in shell eggs. To reduce the risk of human illness from Salmonella bacteria, a shell egg industry task force believed that refrigeration of eggs was an appropriate course of action. The task force subsequently sought legislation to require that shell eggs be refrigerated at an ambient temperature no greater than 45 degrees F after packing for the ultimate consumer and be labeled to indicate that refrigeration is required. The Egg Products Inspection Act (EPIA) was amended to include these requirements, effective December 13, 1991. As the proposed regulations will implement the requirements of the EPIA, there is no alternative to this proposal. Based on USDA egg production and price data, estimated first year compliance costs are \$40.67 million and represent 1.37 percent of gross industry proceeds or \$0.0083 per dozen. Since the first year figures include nonrecurring expenditures for facilities and vehicles, the total industry cost will be less in subsequent years.

33. • SOYBEAN PROMOTION AND RESEARCH; RULES AND REGULATIONS

Significance: Agency Priority

Legal Authority: 7 USC 6301 to 6311

CFR Citation: 7 CFR 1220

Legal Deadline: None

Abstract: This proposed rule would: (1) Provide additional time for remittance of assessments by first purchasers to QSSB's and the Unified Soybean Board. It would provide consistency with reporting requirements of preexisting State checkoff programs for other commodities. Purchasers would remit the assessments by the last day of the month following the month in which soybeans were marketed; or, in specified States, by the last day of the month following the quarter in which soybeans were marketed, rather than by the 15th of the month as currently required. This change would reduce and standardize the workload for purchasers who also collect and remit assessments under other checkoff programs. (2) Abolish the requirement to use Board issued nonproducer status forms to exempt sales of soybeans from assessment and allow soybean producers to establish their own system. **ALTERNATIVES:** (1) Continue to operate under current rules and regulations as they have for over a year. However, since Government is committed to reducing reporting requirements and the (cont)

Additional Information: ABSTRACT CONT: paperwork burden imposed on the public, this does not seem to be a viable alternative. (2) Continue to require remittance of assessments as currently specified. Require each purchaser to request written approval from the Board to deviate from the use of the form as allowed under the current rules and regulations. This is also inconsistent with the commitment to reduce the public burden.

DEPARTMENT OF AGRICULTURE (USDA)
Agricultural Stabilization and Conservation Service (ASCS)

Proposed Rule Stage

49. COMMON PROVISIONS FOR THE 1994 WHEAT, FEED GRAIN, COTTON, AND RICE PROGRAMS

Significance: Regulatory Program

Legal Authority: 7 USC 1441-2; 7 USC 1444; 7 USC 1444-2; 7 USC 1444f; 7 USC 1445b-3a; The Agricultural Act of 1949, as amended

CFR Citation: 7 CFR 1413

Legal Deadline: None

Abstract: The objective of this action is to implement the Wheat, Feed Grain, Cotton, and Rice Programs as required by legislation. Primary determinations are 1) crops to be allowed to be planted on flexible acreage, 2) implementation of Targeted Option Payments, 3) planting of designated crops and conserving crops on Acreage Conservation Reserve (ACR) acreage, and 4) planting of oats on wheat and feed grain ACR. The net cost to the Government is expected to be \$100 million to \$200 million.

50. AMENDMENTS TO THE PRODUCTION ADJUSTMENT REGULATIONS—RECONSTITUTION OF BASES, ALLOTMENTS AND QUOTAS

Legal Authority: 7 USC 1379; The Agricultural Adjustment Act of 1938, sec 379, as amended

CFR Citation: 7 CFR 719

Legal Deadline: None

Abstract: This action is needed to amend the regulations regarding reconstitution of bases, allotments, and quotas in order to 1) clarify them, 2) make them more consistent with the payment limitation regulations, and 3) determine whether a spouse should be

considered the "same owner" when determining whether land is under the same ownership. No Federal outlays are expected.

51. PILOT VOLUNTARY PRODUCTION LIMITATION PROGRAM

Legal Authority: 7 USC 1444f; 7 USC 1445b-3a; The Agricultural Act of 1949, sec 105B(g), as amended

CFR Citation: 7 CFR 1413

Legal Deadline: None

Abstract: This action is needed to implement the Pilot Voluntary Production Limitation Program (PVPLP) for wheat and feed grains, as required by P.L. 101-624. This action will implement regulations to provide for 1) implementation of the PVPLP in at least 15 states, 2) Limiting the amount of wheat or feed grains that can be disposed of in excess of the production limitation quantity for the marketing year, 3) A production limitation quantity calculation, 4) Terms and conditions for producers who elect to participate, 5) Provisions for excess production, 6) Subsequent year marketing of excess production, and 7) Measures to prevent circumvention of the program, including refunds or forfeitures of commodities. Only minor administrative and program costs are expected.

53. • AMENDMENTS TO CCC DEBT SETTLEMENT REGULATIONS REGARDING WAIVER OF RESTRICTION ON PROGRAM ELIGIBILITY AND COLLECTION OF JUDGMENTS BY ADMINISTRATIVE OFFSET

Legal Authority: 28 USC 3201; 15 USC 714b; 15 USC 714c

CFR Citation: None

Legal Deadline: None

Abstract: This action is needed to allow for the waiver of restrictions on program eligibility, as authorized by the Federal Debt Collection Procedures Act of 1990 (the Act), and to facilitate the collection of judgments by

administrative offset. The Act provides that debtors who have judgement liens against their property for a debt owed to the United States are not eligible to receive grants or loans made by the United States until the debt is paid in full or otherwise satisfied. However, the Act also permits agencies to waive this restriction. In addition, the Commodity Credit Corporation is authorized to collect debts for other Federal agencies by administrative offset upon receipt of (1) a qualified offset request, (2) a Notice of Levy, or (3) a request or approval by the Department of Justice. This action would authorize ASCS to collect judgements in favor of the United States by administrative offset. This action will result in increased collection of debts owed to the Government.

RIN: 0560-AD09

54. • AMENDMENT TO THE U.S. WAREHOUSE ACT REGULATIONS—LICENSE AND INSPECTION FEES

Legal Authority: 7 USC 268

CFR Citation: 07 CFR 736

Legal Deadline: None

Abstract: The Omnibus Budget Reconciliation Act of 1981 required that U.S. Warehouse Act licensing and examination programs be operated on a fee basis. New regulations are required when an increase and/or decrease is warranted. Fixed fees were implemented in 1981 and were last increased in 1985. The interest accumulating in the Warehouse User Fee Account has been the major reason for not having to adjust the fee schedule before now. In more recent years, low interest rates and increased expenses (primarily salaries, travel, and administrative costs), coupled with collections which have not changed significantly over the past 10 years, will

result in a deficit in the "fee collection account" by FY 1994 if the fee schedule is not revised, and would thus require a reduction in service. The cost of Government of this action has not yet been determined.

55. • AMENDMENT TO THE U.S. WAREHOUSE ACT REGULATIONS—USE OF ELECTRONIC COTTON WAREHOUSE RECEIPTS

Legal Authority: 7 USC 268

CFR Citation: 07 CFR 735

Legal Deadline: None

Abstract: In response to a recent amendment to the U.S. Warehouse Act, this proposed action is the first stage in streamlining the marketing of cotton. The proposal would implement a central filing system that can be used by Federal and State licensed cotton warehouses. This system would be voluntary and replace paper warehouse receipts with electronically originated, filed, and transmitted electronic warehouse receipts. No cost to USDA is expected. The system, if implemented, would be supported by user fees.

56. • CONSERVATION ENVIRONMENTAL PROGRAMS REGULATIONS REGARDING WATER QUALITY INCENTIVES PROJECT, COST SHARE PROVISIONS OF THE EMERGENCY CONSERVATION PROGRAM, AND OTHER REVISIONS

Legal Authority: 16 USC 590 et seq; 16 USC 1503; 16 USC 2201 to 2205; 16 USC 2101 to 2111; PL 102-142

CFR Citation: 07 CFR 701

Legal Deadline: None

Abstract: This action is needed to amend the Conservation and Environmental Program regulations to: (1) add the Water Quality Incentives Project (WQIP) as provided by the 1992 Agricultural Conservation Program appropriations; (2) change the Emergency Conservation Program (ECP) cost share rates from three rates to one rate; (3) authorize cost-share assistance for confined livestock operations under the ECP as provided for in the Disaster Assistance Act of 1989; and (4) revise the regulations for clarity and ease of operation. No cost to Government is expected.

57. • 1994 RICE PROGRAM

Significance: Regulatory Program

Legal Authority: 7 USC 1441-2

CFR Citation: 07 CFR 1413; 07 CFR 1421

Legal Deadline: NPRM, Statutory, December 1, 1993. Final, Statutory, January 31, 1994.

Abstract: This action is needed to implement the 1994 Rice Program, as

USDA—ASCS

Proposed Rule Stage

required by the Food, Agriculture, Conservation, and Trade Act of 1990. The purpose of the program is to assure sufficient supplies of rice for domestic and export use, maintain adequate carryover stocks, and support farm income. Primary determinations are: 1) the loan and purchase rate, which must be set at no less than 85 percent of the simple average price for the 5 preceding marketing years (MY's), excluding the high and low years, and may not be reduced by more than 5 percent from the previous year; in addition, may not be less than \$6.50 per hundredweight, and 2) the Acreage Reduction Program (ARP)--whether to establish an ARP, and, if so, at what level between 0 and 35 percent, to achieve a stocks-to-use ratio, in percentage terms, between 16.5 and 20.0 percent. The expected cost of \$0.7 - \$1.0 billion.

58. • 1994 WOOL AND MOHAIR PROGRAM

Significance: Regulatory Program

Legal Authority: 7 USC 1781 et seq

CFR Citation: 07 CFR 1468

Legal Deadline: None

Abstract: This action is needed to implement the 1994 Wool and Mohair Program, as required by legislation. The purpose of the Program is to encourage the continued domestic production of wool at prices fair to both producers and consumers in a manner that will assure a viable domestic wool industry in the future, by supporting the prices of wool and mohair by means of loans, purchases, payments, or other operations. The support level for wool is set by statutory formula. The other determinations are to 1) support mohair at a level not more than 15 percent

above or below the comparable percentage of parity at which shorn wool is supported, and 2) support pulled wool through payments based on the liveweight of unshorn lambs marketed for slaughter. The expected cost is \$150 - 200 million.

59. • 1994-CROP PEANUTS NATIONAL POUNDAGE QUOTA

Significance: Agency Priority

Legal Authority: 7 USC 1358-1

CFR Citation: 07 CFR 729

Legal Deadline: Final, Statutory, December 15, 1993.

Abstract: The objective of this action is to balance supply with demand at a level that will assure stable supplies for domestic use and assure producers a stable income. This action is required by legislation, which provides a formula for computing the national quota. The quota must equal the amount estimated to be devoted to domestic food, seed, and related uses, and may not be less than 1.35 million tons. The expected cost is \$0.3 million.

RIN: 0560-AD22

62. • 1994-CROP MARKETING QUOTAS FOR MINOR KINDS OF TOBACCO

Significance: Agency Priority

Legal Authority: 7 USC 1312(a) et seq

CFR Citation: 07 CFR 723

Legal Deadline: None

Abstract: Marketing quotas and acreage allotments are required by legislation for these kinds of tobacco (Fire-cured (type 21), Fire-cured (types 22-23), Dark Air-cured (types 35-36), Virginia Sun-cured (type 37), and Cigar Filler and Binder (types 42-44 and 53-55)). The purpose of quotas and allotments is to balance supply with demand at levels that assure stable supplies for domestic and export use at prices that are fair to producers. Marketing quota and acreage allotment determinations are based on 10-year average marketings adjusted for trends to yield the "reserve supply level" as defined by legislation. Marketing quotas are implemented if approved by producers in referenda. Producers approved quotas for the 1994 crop of Virginia Sun-cured in March, 1992. Referenda for the other types are scheduled for March, 1993 and 1994. Producers of these types have historically voted in favor of quotas. No net cost to the Government is expected.

63. • DEDUCTION FROM PEANUT PRICE SUPPORT ADVANCES

Legal Authority: 7 USC 1445c-3

CFR Citation: 07 CFR 1446

Legal Deadline: None

Abstract: This action is needed to allow a deduction of \$2.00 per ton from the price support advances paid to producers of peanuts produced in the southwest marketing area. This would be an increase from the current maximum deduction of \$1.00 per ton. The money collected would be used by the Southwestern Peanut Producers Association (SWPGA) to fund non-program peanut activities on behalf of its members. The SWPGA Board of Directors authorized the SWPGA Manager to request that CCC increase the deduction to provide the SWPGA to carry out its activities that include, but are not limited to, education, communications, pesticide and other research projects. The cost to government would be negligible.

72. • 1994 OPTIONS PILOT PROGRAM

Legal Authority: 7 USC 1421 Note

CFR Citation: 07 CFR 1413

Legal Deadline: None

Abstract: This action is needed to implement the Options Pilot Program

for wheat, corn, and soybeans and possibly other program crops, for the 1994 crop year, as required by legislation. The program: (1) May be expanded to include additional States, counties and crops, in addition to the ones already administering the program. (2) Will provide means for farmers to buy put options that would provide price assurance equivalent to deficiency payments and price support benefits. (3) Provide terms and conditions for producers who elect to participate; (4) Provide provisions for administering the program, and (5) Provide measures to prevent circumvention of the program, including refunds and penalties. Only minor administrative and program costs are expected.

RIN: 0560-AD48

73. • AMENDMENT TO THE EMERGENCY LIVESTOCK ASSISTANCE REGULATIONS REGARDING FEED PRICES

Legal Authority: 7 USC 1471

CFR Citation: 07 CFR 1475

Legal Deadline: None

Abstract: This action will simplify the determination of livestock feed assistance by basing assistance on five-year average prices rather than Posted County Prices at the time of application and at the end of feeding periods. The cost of this change will depend on the size of the Livestock Feed Program (LFP) during a particular year and on feed prices over the previous 5 years. If this change had been in effect for the 1992 LFP, which cost about \$48 million, costs would have increased by about \$2.6 million.

RIN: 0560-AD49

74. • AMENDMENT TO THE ACREAGE CONSERVATION RESERVE AND THE CONSERVING USE ACREAGE REGULATIONS FOR PRODUCERS AFFECTED BY EXCESSIVE RAINFALL AND FLOODING

Legal Authority: 7 USC 1441-2; 7 USC 1444-2; 7 USC 1444f; 7 USC 1445b-3a

CFR Citation: 07 CFR 1413

Legal Deadline: None

Abstract: This action is needed to implement changes for the 1993 crop year only, to the minimum size and width requirements for Acreage Conservation Reserve (ACR) and Conserving Use for Payment (CU) acreage. These changes are necessary because excessive rainfall and flooding in the Midwest has prevented planting of enrolled 1993 crops, caused crop failure, or changed planting patterns. This action will provide terms and conditions for participating producers, permitting them to still be able to designate the required acreage for ACR or CU for payment. Only minor administrative costs are expected.

77. EXCESSIVE MANUFACTURING (MAKE) ALLOWANCES IN STATE MARKETING ORDERS FOR MILK

Significance: Agency Priority
Legal Authority: 7 USC 1446e-1; The Food, Agriculture, Conservation, and Trade Act of 1990

CFR Citation: 07 CFR 13

Legal Deadline: Final, Statutory, November 28, 1991.

Abstract: The Food, Agriculture, Conservation, and Trade Act of 1990 requires that, beginning 12 months after enactment, no State shall provide for (and no person shall collect, directly or indirectly) a greater allowance for the processing of milk ("make allowance") than is permitted under a Federal program to establish a Grade A price for manufacturing butter, nonfat dry milk, or cheese. The law provides for penalties and investigations by the Secretary if a producer provides evidence of such action. No Government outlays are expected.

78. ALLOCATION OF PROCUREMENT OF PROCESSED AGRICULTURAL COMMODITIES FOR DONATION ON A LOWEST LANDED COST BASIS

Significance: Agency Priority
Legal Authority: 46 USC 1241f(c); The Merchant Marine Act, 1936, as amended, sec 901b(c)

CFR Citation: 7 CFR 1496

Legal Deadline: None

Abstract: The objective of this action is to amend the regulations governing the procurement of commodities as required by the Food, Agriculture, Conservation, and Trade Act of 1990 (the 1990 Act). The 1990 Act requires that CCC shall, without detriment to any port range, allocate, on the principle of lowest landed cost (LLC) without regard to the country of documentation of the vessel, 50 percent of the bagged, processed, or fortified commodities for Title II (PL 480) donations. In addition, the 1990 Act provides that CCC limit the Great Lakes port range to a percentage share under this procedure that is no greater than in 1984, and that cargo allocated to Great Lakes ports may not be shipped from other port ranges except to meet U.S. flag cargo preference requirements. This action will result in no more than a \$5 million increase in annual Government outlays.

79. 1993 WOOL AND MOHAIR PROGRAM

Significance: Regulatory Program

USDA—ASCS

Final Rule Stage

Legal Authority: 7 USC 1781 et seq.; The National Wool Act of 1954, as amended

CFR Citation: 7 CFR 1468

Legal Deadline: None

Abstract: The objective of this action is to encourage the continued domestic production of wool at prices fair to both producers and consumers, in a manner that will assure a viable domestic wool industry in the future, by supporting the prices of wool and mohair by means of loans, purchases, payments, or other operations. The primary determinations are 1) support mohair at a level not more than 15 percent above or below the comparable percentage of parity at which shorn wool is supported (the price support level for shorn wool is determined by statutory formula), and 2) support pulled wool through payments based on the liveweight of unshorn lambs marketed for slaughter. The net cost is expected to be \$150 million to \$200 million.

RIN: 0560-AC75

81. AMENDMENT TO THE HIGHLY ERODIBLE LAND AND WETLAND CONSERVATION PROGRAM REGULATIONS—PERSON DETERMINATIONS

Legal Authority: 16 USC 3801; 16 USC 3811; 16 USC 3812; 16 USC 3821-23; The Food Security Act of 1985, sec 1201, as amended

CFR Citation: 7 CFR 12

Legal Deadline: None

Abstract: The objective of this action is to set a standard for a more consistent "person" determination by using an attribution method for determining benefits that shall be denied persons who are associated with the actual violators of the highly erodible land (HEL) and wetland conservation provisions. The current affiliated person rule for HEL and wetlands is difficult to administer because a strict interpretation of the rules could result in a chain of affiliated persons, all of whom would be ineligible for USDA benefits, when in fact many of the affiliated persons did not play a part in the violation. This action will provide a more equitable and understandable method for imposing sanctions on conservation compliance violations. No costs are expected as a result of this action.

82. AMENDMENTS TO THE SUGAR MARKETING ASSESSMENT REGULATIONS

Legal Authority: 7 USC 1446g; The Agricultural Act of 1949, sec 206i, as amended

CFR Citation: 7 CFR 1435

Legal Deadline: None

Abstract: The objective of this action is to amend regulations governing the sugar market assessment as required by the Food, Agriculture, Conservation, and Trade Act Amendments of 1991. The regulations will be amended to 1) provide that assessments will be effective for FY's 1992-96, rather than FY's 1991-95, 2) provide that the assessments will be collected, on a monthly basis, for sugar that has been marketed during the fiscal year, 3) clarify the term "marketed" to mean shipments from the first processor that involves a title transfer, and 4) provide that sugar subject to the assessment includes that processed from domestically produced cane and beet molasses, as well as from domestically produced cane and beets. No costs are expected as a result of this action.

RIN: 0560-AC91

83. AMENDMENTS TO THE WETLANDS REGULATION REGARDING ABANDONED ACREAGE AND DRAINAGE BY DRAINAGE DISTRICTS

Legal Authority: 16 USC 3801; 16 USC 3821-23

CFR Citation: 7 CFR 12

Legal Deadline: None

Abstract: This action is necessary to enhance the flexibility of wetland regulations for producers without imposing any significant cost to the Government or decreasing protection of wetlands. The determinations are 1) Allow any area used for production of any crop or for long term rotation to not be considered an "abandoned" wetland, and 2) Allow areas drained by a drainage district to be planted to forage crops and harvested by mechanical means. The "abandonment" determination will remove an incentive to keep land in intensive production. The drainage determination will allow production on a small number of acres that otherwise would not likely be farmed. The total acreage involved will likely be less than 50,000 acres, and no impacts on prices are expected. Producers' income could increase by up to \$2.5 million per year by the end of ten years through increased efficiency. No cost to Government is expected.

84. GENERAL PRICE SUPPORT REGULATIONS FOR GRAIN, RICE, OILSEEDS, COTTON, AND HONEY FOR THE 1991-95 CROPS

Significance: Agency Priority

Legal Authority: 7 USC 1421; 7 USC 1423; 7 USC 1425; 7 USC 1441z; 7 USC 1444f-1; 7 USC 1445b-3a; 7 USC 1445c-3; 7 USC 1445e; 7 USC 1446f; 7 USC 4601 et seq; 15 USC 714b; 15 USC 714c

CFR Citation: 7 CFR 1421; 7 CFR 1427; 7 CFR 1434

Legal Deadline: None

Abstract: The objective of this action is to amend the price support program regulations as required by sections 301-701, and 1001 of the Food, Agriculture, Conservation, and Trade Act of 1990 (P.L. 101-624), and by section 1105(a) and (d) of the Agricultural Reconciliation Act of 1990 (P.L. 101-508). The action will 1) clarify provisions relating to "beneficial interest" for payment eligibility purposes, loan advances by cotton loan clerks, recourse loans for seed cotton, settlement provisions, and loan deficiency payment provisions, 2) provide for gin-direct cotton loan deficiency payments, 3) amend the policy for soybean promotion fees, 4) remove high-moisture barley from recourse loan eligibility, 5) remove requirement for lease agreements for commodities stored in leased space, 6) provide new penalties for incorrect certification, unauthorized removal, unauthorized disposition of commodities, and 7) make other minor technical corrections.

85. 1993-CROP SUGAR BEET AND SUGARCANE PRICE SUPPORT LOAN RATES

Significance: Regulatory Program

Legal Authority: 7 USC 1446g; The Agricultural Act of 1949, sec 206, as amended

CFR Citation: 7 CFR 1435

Legal Deadline: None

Abstract: The objective of this action is to support the price of domestically produced sugarcane and sugar beets at a level that assures growers and processors of these commodities

sufficient income, as required by legislation. The primary determinations are 1) the loan rate for raw cane sugar, 2) the loan rate for refined beet sugar, 3) the minimum support price paid by processors for sugarcane, and 4) the minimum support price paid by processors for sugar beets. The Sugar Program is carried out at no net cost to the government. However, based on latest U.S. consumption and price data, the annual cost to U.S. consumers of sugar and corn sweeteners is around \$2 billion.

RIN: 0560-AC98

86. AGRICULTURAL CONSERVATION AND STABILIZATION SERVICE DEBT SETTLEMENT REGULATIONS

Legal Authority: 31 USC 3711, et seq.

CFR Citation: 7 CFR 792

Legal Deadline: None

Abstract: These rules and regulations are needed to clarify and codify the policies and procedures the Agricultural Stabilization and Conservation Service (ASCS) will use to settle debts owed to ASCS. The primary determinations are 1) Define terms applicable to the collection of debts by ASCS, 2) Provide procedures for making demand for payment of debts due ASCS, 3) Provide for collection of debts by installment payments if certain conditions are met, 4) Indicate when collection by administrative offset is appropriate, 5) List the priorities that are applicable to offsets and assignments, 6) State when withholding of a payment prior to the completion of an applicable offset procedure may be made from amounts payable to a debtor by ASCS, 7) State the circumstances when an administrative appeal is appropriate, 8) Specify when contact can be made with the debtor's employing agency, 9) State when a debt should be discharged, 10)

USDA—ASCS

Final Rule Stage

87. • FARMER-OWNED RESERVE (FOR) PROGRAM FOR THE 1993 CROP OF FEED GRAINS

Significance: Regulatory Program

Legal Authority: 7 USC 1445e

CFR Citation: 07 CFR 1421

Legal Deadline:

Other, Statutory, March 15, 1994, for an announcement.

Abstract: This action is needed to formulate and administer a FOR program as required by the Agricultural Act of 1949, as amended. The FOR program provides extended loans (at no less than the current loan rate) and storage payments to producers to enable them to store their crops when supplies are abundant, extend the time period for orderly marketing, and provide adequate carryover stocks to ensure a reliable supply. The Secretary may extend loans if: a) the market price of wheat during the 90-day period prior to 12/15/93 is less than 120 percent of the current loan rate, or b) the current year ending stocks-to-use ratio, in percentage terms, is more than 37.5 percent. The Secretary must extend

loans when both conditions are met. In addition, the maximum quantity of wheat that may be allowed in the FOR may not be less than 300 million bushels, nor more than 450 million bushels. Entry of wheat into the FOR would be expected to result in a net cost over the FY 1992-95 period of about \$50 to \$100 million.

RIN: 0560-AD17

88. • 1994-CROP MARKETING QUOTA AND PRICE SUPPORT LEVEL FOR FLUE-CURED TOBACCO

Significance: Agency Priority

Legal Authority: 7 USC 1314; 7 USC 1445

CFR Citation: 07 CFR 723; 07 CFR 1464

Legal Deadline: Final, Statutory, December 15, 1993.

Quota Announcement

Abstract: The flue-cured tobacco marketing quota and price support are required by legislation. The purpose of quotas and price support is to balance supply with demand at levels assuring stable supplies for domestic and export use at prices that are fair to producers. The national quota is based on manufacturers' intentions, 3-year average exports, an adjustment to maintain loan stocks, and a discretionary adjustment of plus or minus 3 percent. The price support level is based on a formula that weights average market prices (2/3) and a cost index (1/3), with discretion to limit any increase to 65 percent of the formula increase. No net cost to Government is expected.

RIN: 0560-AD25

90. • 1994 OILSEED PROGRAM

Significance: Agency Priority

Legal Authority: 7 USC 1446

CFR Citation: 07 CFR 1421

Legal Deadline: Final, Statutory, November 15, 1993.

Abstract: This action is needed to implement the Oilseed Program as required by the Food, Agriculture, Conservation, and Trade Act of 1990. The purpose of the program is to assure sufficient supplies of oilseeds for domestic and export use, maintain adequate carryover stocks, and support farm income. The primary determinations are the loan rates--not less than \$5.02/bu. for soybeans, and not less than \$8.90/cwt. for minor oilseeds, with rates for "other" oilseeds set in relation to that for soybeans. The expected cost ranges from -\$50 million (receipt) to \$50 million.

RIN: 0560-AD26

91. • 1994 NATIONAL AVERAGE LOAN RATE FOR QUOTA AND ADDITIONAL PEANUTS AND MINIMUM CCC EXPORT-EDIBLE SALES PRICE FOR ADDITIONAL PEANUTS

Significance: Agency Priority

Legal Authority: 7 USC 1445c-3

CFR Citation: 07 CFR 1446; 07 CFR 1421

Legal Deadline: Final, Statutory, February 15, 1994.

Abstract: This action is needed to determine the peanut price support levels for quota and additional peanuts, as required by the Agricultural Act of 1949, as amended. The price support levels provide a domestic price floor for quota and additional peanuts. The primary determinations are: 1) the price support level for quota peanuts, 2) the price support level for additional peanuts, and 3) the minimum CCC export-edible sales price for additional peanuts. The expected cost is \$0.3 million.

RIN: 0560-AD27

92. • 1994-CROP PRICE SUPPORT LEVELS FOR MINOR KINDS OF TOBACCO

Significance: Agency Priority

Legal Authority: 7 USC 1445 et seq

CFR Citation: 07 CFR 1464

Legal Deadline: None

Abstract: Price support is required by legislation to stabilize prices for five kinds of tobacco (Fire-cured (Type 21), Fire-cured (Types 22-23), Dark Air-cured (Types 35-36), Virginia sun-cured (Type 37), Puerto Rican Cigar Filler (Type 46), and Cigar Filler and Binder (Types 42-44 and 53-55)) when marketing quotas are in effect. No quotas are in effect for Type 46 because producers disapproved quotas for the 1992 crop, and that status will continue if producers again disapprove quotas for the 1993 and 1994 crops in upcoming referenda. No net cost to Government is expected.

94. • FARMER-OWNED RESERVE PROGRAM ELIGIBILITY REQUIREMENTS

Significance: Agency Priority

Legal Authority: 7 USC 1445e

CFR Citation: 07 CFR 1421

Legal Deadline: None

Abstract: This action is needed to amend the regulations governing the Farmer Owned Reserve (FOR) Program. Currently, regulations allow FOR entry for grain only upon expiration of a nine-month price support loan. This prevents entry of grain that has been redeemed and subsequently repledged for loan, and thus does not meet the nine-month loan requirement. In addition, current regulations do not allow entry of ear corn, which unnecessarily restricts farmers' opportunity to participate. This action will thus amend the regulations as follows: 1) Provide for price support

USDA—ASCS

Final Rule Stage

loan extensions for replighted grain, and 2) Provide that ear corn may enter the FOR. Approximately \$5 million in additional producer storage payments are expected.

96. • 1993 WHEAT FARMER-OWNED RESERVE (FOR) PROGRAM

Significance: Regulatory Program

Legal Authority: 7 USC 1445e

CFR Citation: 07 CFR 1421

Legal Deadline: Final, Statutory, December 15, 1993.

Abstract: The objective of this action is to formulate and administer a FOR program as required by legislation. The FOR program provides extended loans (at no less than the current loan rate) and storage payments to producers to enable them to store their crops when supplies are abundant, extend the time period for orderly marketing, and provide adequate carryover stocks to ensure a reliable supply. The primary determinations are 1) terms and conditions, and 2) maximum quantity of wheat to be stored in the FOR. Entry will likely reduce loan redemptions by about \$400 million in FY 1994. Loan redemptions and storage payments in FY's 1995 through 1997 would result in a net cost over the FY 1994-97 period of about \$50 million to \$100 million.

100. • AMENDMENTS TO REGULATIONS REGARDING PAYMENTS TO PERSONS CONVICTED OF CONTROLLED SUBSTANCE VIOLATIONS

Legal Authority: 21 USC 881a

CFR Citation: 07 CFR 796

Legal Deadline: None

Abstract: This action is necessary to amend the regulations regarding payments to persons convicted of controlled substance violations to reflect recent legislation. Current

regulations implement the Food Security Act of 1985 provisions but not the FY 1993 Appropriations Act provisions. This action will thus amend the regulations to implement the statutory provisions regarding controlled substance violations. The primary effect of this action will be to make most conservation programs subject to the controlled substance violation provisions and result in some people being declared ineligible for benefits. No Government outlays are expected.

108. • DISASTER PAYMENT PROGRAM

Significance: Regulatory Program
Legal Authority: 7 USC 1421 note; PL 102-229; PL 103-50; PL 103-75
CFR Citation: 07 CFR 1477
Legal Deadline: None
Abstract: This action will provide disaster benefits to producers as follows: 1) quality loss payments will be made available under the 1990, 1991, and 1992 disaster program for the 1990, 1991, and 1992 crops of wheat, corn, sorghum, barley, oats, upland cotton, rice, soybeans, sugar beets and sunflowers, 2) funds remaining from

the 1990, 1991, and 1992 programs will be made available for 1993-95 crop losses resulting from hurricanes Andrew and Iniki and Typhoon Omar, and 3) yield and quality loss payments will be made available for the 1993 crop losses due to flooding in the Midwest and drought in the Southeast. The net cost is expected to be about \$1.837 billion.

109. • COLORADO RIVER BASIN SALINITY CONTROL PROGRAM

Legal Authority: 43 USC 1592
CFR Citation: 07 CFR 702
Legal Deadline: None

Abstract: This action implements a program to reduce the amount of salt that flows into the Colorado River from irrigated land and canals and other conduits of irrigation water. It provides cost sharing and technical assistance to farmers, irrigation districts and canal companies to provide modern irrigation equipment and to improve or replace canals and laterals, which connect canals with on-farm irrigation systems.

RIN: 0560-AD06

111. • AMENDMENT TO THE 1993-1995 PEANUT PRICE SUPPORT REGULATIONS REGARDING FALL TRANSFERS

Legal Authority: 7 USC 1358b; PL 101-624
CFR Citation: 07 CFR 1446
Legal Deadline: None

Abstract: This action is needed to prevent peanut poundage quota from being transferred to a farm by a "fall transfer" and the quota used to enable the producer to transfer peanuts from the additional loan pool to the quota loan pool under the "disaster transfer" provisions of the regulations. The Commodity Credit Corporation (CCC) could potentially lose about \$350 to \$550 per ton for each ton transferred. Restricting the pounds available for "disaster transfer" to exclude any pounds transferred to the farm by a "fall transfer" will reduce the amount of transfers and limit the potential increased costs to CCC.

112. • ACRE-FOR-ACRE TRANSFER OF FIRE-CURED, DARK AIR-CURED, AND VIRGINIA SUN-CURED TOBACCO ACREAGE ALLOTMENTS

Legal Authority: 7 USC 1314d

CFR Citation: 07 CFR 723.216

Legal Deadline: None

Abstract: This action will amend the regulations governing the transfer of tobacco acreage allotments. Legislation requires that the sale or lease of allotments between owners or operators of farms for which a Fire-Cured, Dark Air-Cured, or Virginia Sun-Cured tobacco acreage allotment or acreage-poundage quota is established be approved by county committees on an acre-for-acre basis. Currently, a downward adjustment in the allotment transferred is required when the normal yield on the farm from which the allotment is transferred exceeds by more than 10 percent the normal yield on the farm to which the allotment is being transferred.

113. • 1993-95 WHEAT AND FEED GRAIN MARKETING LOAN PROGRAM REGULATIONS

Significance: Agency Priority

Legal Authority: 7 USC 1445b-3a; 7 USC 1444f; 7 USC 1421 note

CFR Citation: 07 CFR 1421

Legal Deadline: None

Abstract: The Omnibus Budget Reconciliation Act of 1990 required that if the U.S. did not enter into an agricultural agreement in the Uruguay Round of multilateral trade negotiations under the General Agreement on Tariffs and Trade (GATT) by June 30, 1992, that the Secretary shall permit producers to repay price support loans for the 1993-95 crops of wheat and feed grains at the levels permitted under the marketing loan provisions of the Food, Agriculture, Conservation, and Trade Act of 1990. This action is needed to implement the regulations for the marketing loan program. Primary determinations are 1) loan repayment rates, and 2) if prevailing world market prices are used as loan repayment rates, the formulas and mechanisms to periodically determine and announce the prevailing world market prices adjusted to U.S. quality and location. No outlays are projected under this program.

114. • OPTIONS PILOT PROGRAM

Legal Authority: 7 USC 1421 note; PL 102-237

CFR Citation: None

Legal Deadline: None

Abstract: This action is needed to implement the Options Pilot Program for wheat, feed grains, and soybeans,

as required by legislation. The Program will provide means for farmers to buy put options that would provide price assurance equivalent to deficiency payments and price support benefits. The Program will be implemented in at least 3 counties each in the States of Illinois, Indiana, and Iowa, with the program available for corn in all 9 counties in the 3 States, and for corn and soybeans in Illinois. Only minor administrative and program costs are expected.

115. • TREE ASSISTANCE PROGRAM, PHASE III

Legal Authority: 7 USC 1421 note

CFR Citation: 07 CFR 1477; 07 CFR 1478

Legal Deadline: None

Abstract: The Tree Assistance Program (TAP) was authorized by the Food, Agriculture, Conservation, and Trade Act of 1990 (the 1990 Act) and Dire Emergency Supplemental Appropriations Act of 1992. The TAP was appropriated \$48 million to reimburse part of the replanting or rehabilitation costs for small and medium-scale commercial tree and nursery inventory growers who experienced tree and nursery losses due to hurricane, typhoon, freeze, drought, earthquake or related condition during calendar year 1992. In addition, orchard trees lost in 1990 and 1991 due to freeze or earthquake, and forest tree seedlings lost in 1990 and 1991 due to drought or earthquake are also eligible under a separate crop disaster appropriation. The application period for the TAP phase III began on October 13, 1992 and ended on February 12, 1993. Aquaculture is also included. Cost to the Government will be \$48 million.

CFR Citation: 9 CFR 82

Legal Deadline: None

Abstract: Exotic Newcastle Disease (also known as viscerotropic velogenic Newcastle disease and as VVND) and psittacosis or ornithosis (now generally referred to as chlamydiosis) are communicable diseases of birds and poultry. The spread of these diseases

in the United States could have serious consequences for the United States poultry industry. A review of the Department's regulations to prevent the interstate spread of these diseases indicates the need for a complete revision to make the regulations more effective and to increase compliance with them.

USDA—APHIS

Proposed Rule Stage

CFR Citation: 9 CFR 92

Legal Deadline: None

Abstract: The Department currently regulates the importation of certain animals and animal products to prevent the introduction of communicable animal diseases into the United States. With certain exceptions, most animals imported into the United States must be quarantined upon arrival at facilities operated by the Federal Government; only sheep, birds, and horses may be quarantined in privately operated facilities. Some importers have expressed interest, however, in importing ruminants and swine, other than sheep, in greater numbers per shipment than can be handled at existing Federal facilities. The Department is considering amending the regulations to allow other species of domesticated ruminants and swine, from countries free of certain serious diseases, to be quarantined upon arrival in the United States at privately operated facilities.

120. REGULATION OF HORSES AND FARM ANIMALS UNDER THE ANIMAL WELFARE ACT

Significance: Agency Priority

Legal Authority: 7 USC 2131 to 2157

CFR Citation: 9 CFR 1; 9 CFR 2; 9 CFR 3

Legal Deadline: None

Abstract: Under the Animal Welfare Act, the Department regulates the treatment of horses used for biomedical or other nonagricultural research, or for nonagricultural exhibition. Currently, the Department regulates the treatment of such horses and other farm animals

under general standards for warmblooded animals for which standards are not otherwise included in the regulations. However, because of the increasing use of these animals for nonagricultural research and nonagricultural exhibition, the Department has given notice of its intent to develop specific standards for the animals' humane handling, housing, care, treatment, and transportation, and has requested comments regarding such standards.

121. NATIONAL ENVIRONMENTAL POLICY ACT IMPLEMENTING PROCEDURES

Significance: Regulatory Program

Legal Authority: 40 USC 4321

CFR Citation: 7 CFR 372

Legal Deadline: None

Abstract: The National Environmental Policy Act (NEPA) (42 USC 4321, et seq.) requires that every Federal agency establish procedures to implement the provisions of the Act. The proposed APHIS NEPA Implementing Procedures have been developed to ensure compliance with NEPA. These Agency-specific procedures will enable APHIS decision makers to reach decisions in which environmental concerns are fully reviewed and will ensure timely public involvement in the NEPA process. The procedures will identify Agency actions, requirements, guidance, and references for completion of environmental assessments, and environmental reviews. The new

APHIS NEPA Implementing Procedures will supersede the previous issues, APHIS Guidelines for Implementing NEPA Procedures (44 FR 50381-50384 and 44 FR 51272-51274), upon publication of the final rule.

122. CYCLICAL REVIEW OF 9 CFR PART 92, PHASE II

Significance: Regulatory Program

Legal Authority: 7 USC 1622; 19 USC 1306; 21 USC 102 to 105; 21 USC 111; 21 USC 134a; 21 USC 134b; 21 USC 134c; 21 USC 134d; 21 USC 134f; 21 USC 135; 31 USC 9701

CFR Citation: 9 CFR 92

Legal Deadline: None

Abstract: The Department is reviewing the regulations in 9 CFR part 92, which, among other things, govern the importation into the United States of certain animals and poultry, and certain animal and poultry products. This is in compliance with Executive Order 12291 and Departmental Regulation 1512-1, which requires agencies to periodically review regulations.

The Department is conducting this Cyclical Review in phases. Phase I, effective August 2, 1990, reorganized the regulations. The Department is now starting Phase II: Subpart F (Dogs) of 9 CFR Part 92 has been reviewed and a notice of proposed rulemaking will be published. Reviews of the other subparts will follow. If the Department determines those regulations should be changed, notices of proposed rulemaking will be published.

123. IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS—PREVENTION OF POULTRY DISEASES

Significance: Agency Priority

Legal Authority: 7 USC 1622; 19 USC 1306; 21 USC 102 to 105; 21 USC 111; 21 USC 134a to 134d; 21 USC 134f; 21 USC 135; 31 USC 9701

CFR Citation: 9 CFR 92

Legal Deadline: None

Abstract: The Department currently regulates the importation of poultry and poultry products, including eggs for hatching, to prevent the introduction of certain poultry diseases into the United States. We are considering revising these regulations to add restrictions to prevent the introduction of Salmonella enteritidis, serotype enteritidis, phage-type 4 (referred to below as S. enteritidis, phage-type 4), a virulent type of Salmonella that has not been detected in poultry flocks in the United States. Canada is the only country other than the United States in which poultry flocks are recognized as being free of S. enteritidis, phage-type 4. Safeguards under consideration include testing of individual poultry of the flock of origin in the country of origin, and testing and inspection during quarantine in the United States.

125. IMPORTATION OF UNMANUFACTURED WOOD

Significance: Regulatory Program

Legal Authority: 7 USC 150dd; 7 USC 150ee; 7 USC 150ff; 7 USC 151 to 167

CFR Citation: 7 CFR 319

Legal Deadline: None

Abstract: USDA is developing regulations to restrict the importation of certain types of manufactured wood, such as logs, lumber, wood chips, bark, and pulp wood. There are a variety of plant pests and diseases associated with these articles, and there has recently been increased interest in importing large quantities of these articles into the U.S. At this time we are considering prohibiting the importation of logs and unmanufactured wood from certain tree genera and species, unless they meet importation criteria contained in the regulations and are imported under a permit issued by APHIS. The trees we are considering regulating in this manner are: all coniferous species; Carya; Fagus; Juglans; Liquidambar; Liriodendron; Nyssa; Populus; Quercus; Salix; and Thuja. The importation criteria would address the genus or species of the tree; the nature of the wood article; the country or area of origin; and methods by which the trees were harvested, stored, and treated.

126. CHICKEN DISEASE CAUSED BY SALMONELLA ENTERITIDIS

Significance: Regulatory Program

Legal Authority: 21 USC 111; 21 USC 134a; 21 USC 134f

CFR Citation: 9 CFR 82

Legal Deadline: None

Abstract: Disease caused by the bacterium known as Salmonella enteritidis serotype enteritidis (referred to below as SE) is a serious problem in egg-type chicken breeding flocks and

USDA—APHIS

Proposed Rule Stage

egg production flocks, and is also a serious public health concern. The Animal and Plant Health Inspection Service (APHIS) has established regulations to control the spread of SE in egg-type chicken breeding flocks and egg production flocks, and continues to work to reduce the impact of SE on the poultry industry and consumer health. Under the current APHIS regulatory program, study flocks are identified through traceback of eggs implicated in human outbreaks of SE, these study flocks are subjected to testing for SE, and if the flocks test positive for SE, interstate movement of articles from the flocks is restricted. We are currently working with other agencies including the Agricultural Marketing Service, the Food and Drug Administration, and the Centers for Disease Control to evaluate the success of this approach and determine whether to propose changes to the regulatory procedures of the current program.

127. PSEUDORABIES

Significance: Agency Priority
Legal Authority: 21 USC 111 to 113; 21 USC 115; 21 USC 117; 21 USC 120; 21 USC 121; 21 USC 123 to 126; 21 USC 134b; 21 USC 134f
CFR Citation: 9 CFR 85
Legal Deadline: None
Abstract: Pseudorabies, also known as Aujeszky's disease, mad itch, and infectious bulbar paralysis, is caused by a herpes virus and is primarily a disease of swine. The spread of this disease in the United States could have

serious consequences for the United States livestock industry. A review of the Department's regulations to prevent the interstate spread of this disease indicates the need for a complete revision to make the regulations more effective and to increase compliance with them.

128. IMPORTATION OF CERTAIN DRIED PORK PRODUCTS

Significance: Agency Priority
Legal Authority: 7 USC 147a; 7 USC 150ee; 7 USC 161; 7 USC 162; 7 USC 450; 19 USC 1306; 21 USC 111; 21 USC 114a; 21 USC 134a; 21 USC 134b; 21 USC 134c; 21 USC 134f; 31 USC 9701; 42 USC 4331; 42 USC 4332
CFR Citation: 9 CFR 94
Legal Deadline: None
Abstract: The Federal government has responsibility for preventing the introduction into the United States of various diseases of livestock, including foot-and-mouth disease, rinderpest, African swine fever, and swine vesicular disease. To fulfill this responsibility, it is necessary for the Federal government to revise and update its regulations concerning the importation of pork products, based upon the methods and procedures used to process pork products. APHIS is developing regulations that would allow certain dry-cured pork products to be imported into the United States. Only hams and loins derived from certain breeds of swine and processed in a specified manner would be allowed to be imported.

129. ADDITION OF CERVIDAE TO THE REGULATIONS CONCERNING TUBERCULOSIS IN LIVESTOCK

Significance: Agency Priority
Legal Authority: 21 USC 111 to 113; 21 USC 114; 21 USC 114a; 21 USC 114a-1; 21 USC 115 to 117; 21 USC 120 to 126; 21 USC 134b; 21 USC 134f
CFR Citation: 9 CFR 77

Legal Deadline: None

Abstract: Bovine tuberculosis is a contagious, infectious, and communicable disease affecting cattle, bison, and other species, including humans. The spread of bovine tuberculosis in the United States could have serious consequences for the United States cattle and bison industries, as well as for human health. Currently, the regulations concerning control and eradication programs for bovine tuberculosis in livestock only regulate cattle, bison, and swine. Recent outbreaks in the United States of bovine tuberculosis in semi-domesticated herds of cervidae (such as deer and elk) have made apparent the need to also regulate these animals in order to prevent the spread of bovine tuberculosis.

130. • EXPORT CERTIFICATION

Significance: Regulatory Program

Legal Authority: 7 USC 147a

CFR Citation: 7 CFR 353

Legal Deadline: None

Abstract: The Department is proposing to revise the "Phytosanitary Export Certification" regulations, which concern inspection and certification of plants and plant products offered for export. The proposed rule would facilitate the phytosanitary certification of American agricultural products by ensuring that a sufficient number of qualified individuals are available to carry out Federal certification activities and by implementing new certification systems in conjunction with existing phytosanitary certification. Revising the regulations would make them easier to understand, thereby increasing compliance and the effectiveness of the regulations.

131. • BIRD IMPORTATIONS; QUARANTINE FACILITIES

Significance: Agency Priority

Legal Authority: 7 USC 1622; 19 USC 1306; 21 USC 102 to 105; 21 USC 111; 21 USC 134a; 21 USC 134b; 21 USC 134c; 21 USC 134d; 21 USC 134f; 21 USC 135; 31 USC 9701

CFR Citation: 9 CFR 92

Legal Deadline: None

Abstract: The Department currently regulates the importation of certain birds to prevent the introduction of communicable poultry diseases into the United States. Birds imported into the United States must be quarantined upon arrival, either at facilities operated by the Federal Government or

at "approved," privately operated facilities. A decrease in birds imported into the United States is expected as a result of the Wild Bird Conservation Act of 1992. Consequently, the Department is considering amending the regulations to allow imported birds to be quarantined upon arrival in the United States at any privately owned bird quarantine facility located near an international airport or land-border port served by U.S. Customs, provided the facility meets the standards of the Animal and Plant Health Inspection Service.

132. HONEYBEES AND HONEYBEE SEMEN; REMOVING CERTAIN RESTRICTIONS ON HONEYBEES AND HONEYBEE SEMEN FROM NEW ZEALAND

Significance: Agency Priority

Legal Authority: 7 USC 281

CFR Citation: 7 CFR 322

Legal Deadline: None

Abstract: The regulations governing the importation into the United States of honeybees and honeybee semen contain the criteria used for determining which countries may import honeybees and honeybee semen and under what conditions. This change will allow the importation of honeybees and honeybee semen from New Zealand, for other than research purposes, if accompanied by a certificate of origin.

133. USER FEES

Significance: Regulatory Program

Legal Authority: 21 USC 136; 21 USC 136a

CFR Citation: 7 CFR 354; 9 CFR 130

Legal Deadline: None

Abstract: The Omnibus Budget Reconciliation Act of 1990 (P.L. 101-508) and the Food, Agriculture, Conservation and Trade Act of 1990 (P.L. 101-624) authorize the Secretary of Agriculture to prescribe and collect fees to cover the cost of providing agricultural quarantine and inspection services in connection with the arrival at a port in the customs territory of the United States, or the preclearance or preinspection at a site outside the customs territory of the United States, of international passengers, commercial vessels, commercial aircraft, and commercial trucks or railroad cars.

USDA—APHIS

Final Rule Stage

APHIS is already collecting fees for certain services, including agricultural quarantine and inspection services, export services, and animal import services. APHIS plans to collect fees for veterinary diagnostics and reagents, additional animal import services, and preclearance or preinspection services at sites outside the customs territory of the United States.

134. • HARRY S TRUMAN ANIMAL IMPORT CENTER (HSTAIC); EXCLUSIVE USE

Significance: Agency Priority

Legal Authority: 7 USC 1306; 21 USC 102 to 105; 21 USC 111; 21 USC 134a to 134d; 21 USC 134f; 21 USC 135; 31 USC 9701

CFR Citation: 9 CFR 92

Legal Deadline: None

Abstract: Certain animals intended for importation into the United States must first be quarantined at the Harry S Truman Animal Import Center (HSTAIC) in Florida. However, in recent years, demand for use of the facility has exceeded its availability.

Therefore, space at HSTAIC is currently allocated by means of a lottery. However, because of a number of apparently frivolous applications and because of delays by lottery "winners," HSTAIC has been underutilized, and the number of importers able to bring animals through HSTAIC has been unnecessarily limited. To eliminate this unnecessary downtime, we are considering (1) requiring a deposit in cash or a payable cash equivalent for each application for the lottery, (2) requiring the lottery winner to pay the costs of maintaining HSTAIC for certain periods when it is reserved for that party, and (3) making certain administrative changes in the way the lottery is conducted.

CFR Citation: 7 CFR 318

Legal Deadline: None

Abstract: Current regulations allow otherwise prohibited fruits and vegetables from foreign sources to be shipped, under certain conditions, through the continental United States in transit to a third country. However, these same types of routes are closed to fruits and vegetables from Hawaii, Puerto Rico, and the Virgin Islands that are prohibited entry into the continental United States. Currently, cargo connections are such that very limited direct flights or shipping routes exist between the locations in question

USDA—APHIS

Significance: Agency Priority
Legal Authority: 42 USC 1480; 5 USC 301; 7 CFR 2.23; 7 CFR 2.70
CFR Citation: 7 CFR 1951, subpart I
Legal Deadline: None
Abstract: The Farmers Home Administration (FmHA) proposes to revise the regulation for the recapture of subsidy granted on Section 502 Rural Housing Loans. This action is necessary because of an accounting system change resulting from the September 1987 congressionally mandated rural housing asset sale. The intended effect of this action is to adjust the formula to coincide with the revised method of

USDA—FmHA

Proposed Rule Stage

applying monthly subsidy to interest credit accounts. In addition, this action will also shorten and simplify the recapture process.

Legal Deadline: None

Abstract: OMB Circular A-129 dated November 25, 1988, recommends that the processing of applications for

Federal direct loans be suspended and require private lenders to suspend processing of loan guarantee applications when an applicant is found to be delinquent on a Federal debt. The Federal Debt Collections Procedures Act of 1990 also requires that credit be denied if an outstanding judgment lien obtained by the United States in a Federal Court (other than the United States Tax Court), which has been recorded, is found.

Legal Deadline: None

Abstract: Will effectuate a comprehensive civil rights regulation implementing the following laws: The Equal Credit Opportunity Act (ECOA); Title VIII of the Civil Rights Act of 1968, as amended by the Fair Housing Amendments Act of 1988 (The Fair Housing Act); section 504 Federally conducted programs, Title IX of the Education Amendments of 1972; the Age Discrimination Act of 1975, and programs and activities; Amendments of 1972; the Age Discrimination Act of

USDA—FmHA

Proposed Rule Stage

1975; and Executive Order 11246. The revised regulations will provide detailed guidelines for field offices for improved enforcement and compliance with these laws which heavily impact FmHA's programs. Mechanisms for monitoring compliance by field offices and recipients of FmHA's financial assistance at all levels will decrease the Agency's vulnerability due to noncompliance with recently enacted Civil Rights legislation. Also includes section 504 of the Rehabilitation Act of 1973.

150. PLANNING AND PERFORMING SITE DEVELOPMENT WORK

Legal Authority: 7 USC 1989; 42 USC 1480; 5 USC 301

CFR Citation: 7 CFR 1924-C

Legal Deadline: None

Abstract: Under HR 5334 the Secretary is authorized to accept locally approved subdivisions. This regulation will be amended to no longer require approval of individual subdivisions before FmHA loans are approved within the subdivision. Instead, there will be individual site approval requirements. The cost of implementing the changes would include procedure development, training, and development of forms. The benefits would be that FmHA site requirements would be consistent with HUD and VA.

154. MANAGEMENT OF HAZARDOUS SUBSTANCES

Significance: Regulatory Program

Legal Authority: PL 96-510; PL 94-580; PL 94-469; PL 92-500

CFR Citation: 40 CFR 300; 40 CFR 260; 40 CFR 700; 40 CFR 400

Legal Deadline: None

Abstract: There are a number of federal environmental statutes which govern the management of hazardous substances, materials and wastes. At the present time, FmHA does not have implementing regulations for these federal statutes. The development of implementation procedures for managing hazardous substances is necessary to insure consistency in compliance with Federal, as well as State environmental statutes, and to develop appropriate "due diligence" policies to limit the Agency's liability with regard to environmental cleanups of hazardous waste in loan making/servicing and property management activities. FmHA has approximately 3,500 inventory properties. FmHA cannot be certain how many of these inventory properties will require hazardous waste cleanup prior to sale.

Legal Deadline: Final, Statutory, October 1, 1993. Other, Statutory, August 28, 1993.
 Sec. 23 of Pub. L. 102-554, requires that interim regulations be published by April 28, 1993, and final regulations published by October 1, 1993.

Abstract: The objectives of this action are to improve borrowers' prospects for a successful operation. These changes are intended to promote graduation to private credit in conjunction with Loan Assessment and Market Placement regulations. The expected outcome is more rapid borrower progress and greater numbers of borrowers achieving economic viability. The primary focus of the graduation effort will be those borrowers classified "commercial" and "standard". These classifications signify borrowers that possess a financial position that would normally be expected to enable them to obtain private credit.

161. • ELIMINATION OF CONSOLIDATION OF LOANS

Significance: Agency Priority
Legal Authority: 7 USC 1989
CFR Citation: 7 CFR 1951
Legal Deadline: None
Abstract: This rule is necessary to eliminate consolidation as a servicing action for insured farm loans. This action is taken as a result of the new requirements under the 1990 FACT Bill

regulation and the Federal Credit Reform Act (FCRA) which have made loan consolidation increasingly more difficult and costly. Elimination of consolidation will not eliminate an essential tool for servicing delinquent accounts or reduce program benefits to borrowers.

Significance: Agency Priority

Legal Authority: 42 USC 1480; 5 USC 301

CFR Citation: 7 CFR 1927-B; 7 CFR 2.23; 7 CFR 2.70

Legal Deadline: None

Abstract: Attorney and title companies close FmHA loans, provide title clearances, and disburses FmHA loans funds. In order to protect the security of the government in the execution of these functions, FmHA requires them to have in full force and effect, an acceptable liability insurance policy for errors and omissions, deductible and appropriate level of fidelity coverage in the amount prescribed by FmHA. If the attorney or the title company wishes to close FmHA loans and has a larger deductible or lower insurance liability coverage, the State Director has to obtain authorization or exception from the National Office. The process is

cumbersome and requires a great amount of paperwork and time.

Legal Authority: 7 USC 1989; 42 USC 1480; 5 USC 301

CFR Citation: 7 CFR 1951-C; 7 CFR 2.23; 7 CFR 2.70

Legal Deadline: None

Abstract: The Farmers Home Administration (FmHA) proposes to amend its regulations on offsets of Federal payments to FmHA borrowers by removing repetitious directions and ambiguous guidance used by FmHA field offices to determine salary offset feasibility. The intended effect of this action is to add further guidance on salary offset eligibility criteria and to clarify the language of the regulations. The additional guidance provided by these proposed revisions will help to increase delinquent debt collection. If no revisions are made, it could result in reduced collections using administrative, salary and IRS offset.

168. • IMPLEMENTATION PROCEDURES FOR HIGHLY ERODIBLE LAND AND WETLAND CONSERVATION PROVISIONS OF THE FOOD SECURITY ACT

Legal Authority: PL 101-624; PL 99-198

CFR Citation: 7 CFR 1940

Legal Deadline: None

Abstract: Subtitle B and subtitle C of Title XII of the Food Security Act of 1985, Public Law 99-198, established requirements for the conservation of Wetlands and Highly Erodible Lands. These requirements were subsequently amended by the Food Agriculture Conservation and Trade Act of 1990, Public Law 101-624. The amendments, among other changes, would allow in some cases for graduated payment reductions rather than a complete loss of USDA program benefits to producers who contribute to excess soil erosion or wetland conversion. FmHA proposes to revise existing regulations to reflect the amendments required by Public Law 101-624. In addition, the regulations will be reorganized and supplemented to improve understanding and ease of implementation.

169. • REVISION TO PLANNING AND PERFORMING CONSTRUCTION AND OTHER DEVELOPMENT AND RELATED CONSTRUCTION SECTIONS OF OTHER FMHA REGULATIONS

Significance: Agency Priority

Legal Authority: 42 USC 7701 et seq; PL 95-124; EO 12699

CFR Citation: 7 CFR 1924-A; 7 CFR 1942-A; 7 CFR 1942-C; 7 CFR 1948-C; 7 CFR 1980-E; 7 CFR 1980-G; 7 CFR 1944

Legal Deadline: Final, Statutory, September 15, 1993. Other, Statutory, February 28, 1994.

Executive Order 12699 requires agencies to plan and initiate by February 1, 1993, measures to assure appropriate consideration of Seismic Safety.

Abstract: The Earthquake Hazards Reduction Act of 1977 (PL 95-124, 42 USC 7701 et seq.) was passed to reduce the risk of personal injury and property damage from earthquakes through the establishment and maintenance of an effective earthquake hazards reduction program. Executive Order 12699 (EO) "Seismic Safety of Federal and Federally Assisted or Regulated New Building Construction" requires all Federal agencies to ensure that new Federally assisted buildings are designed and constructed in accord with appropriate seismic design and construction standards. Each agency is responsible for issuing or amending its regulations or procedures, planning for implementation through its own budget process, and regularly reviewing its regulations and procedures. The impact on National economic growth is considered to be negligible. For the typical FmHA/RDA funded new building, the additional cost associated with this requirement (1 to 2 percent of the total construction cost) is expected to be well worth the benefits gained.

170. • ENVIRONMENTAL PROGRAM

Legal Authority: PL 91-190

CFR Citation: 7 CFR 1940

Legal Deadline: None

Abstract: Section 1940.311 of FmHA Instruction 1940-G, Environmental Program, describes certain utility systems which meet the criteria for environmental review using the format for a Class I environmental assessment. There has been some confusion as to what constitutes a "substantial increase" in withdrawal or discharge, and there has also been some confusion as to what criteria should be used when calculating a 50,000 gallon per day withdrawal from surface or groundwater. It is expected that the effect of this action will be eliminate this unnecessary confusion, and reduce documentation and paperwork on the part of FmHA employees in the preparation and review of Class I environmental assessments based on these sections.

171. • ENVIRONMENTAL PROGRAM

Legal Authority: PL 91-190

CFR Citation: 7 CFR 1940

Legal Deadline: None

Abstract: Form FmHA 1940-21, Environmental Assessment for a Class I Action," and pertinent sections of FmHA Instruction 1940-G currently

USDA—FmHA

Proposed Rule Stage

state that a proposed action, identified as a Class I action, will lose its Class I status, if more than one protected resource will either be affected by the proposal or is located within the project site. In other words, the proposed action must receive a higher level of environmental review, e.g., a Class II assessment. This proposed rule and Form change will increase, from one to three, the number of protected environmental resources necessary for a proposed action to lose its Class I status. Additional changes will be made to clarify the nature of the documentation and analysis that is necessary when Form FmHA 1940-21 is used. It is expected that the effect of this action will be to reduce unnecessary documentation and confusion on the part of FmHA employees in the preparation and review of Class I environmental assessments, thus allowing the employees to concentrate on more complex environmental issues.

172. • ENVIRONMENTAL PROGRAM

Legal Authority: PL 91-190

CFR Citation: 7 CFR 1944

Legal Deadline: None

Abstract: Sec 1940.331 describes the public notice requirements for FmHA environmental reviews. There has been some confusion as to what constitutes individual notification of affected property owners. It is expected that the effect of this action will be to eliminate this confusion. Sec 2 b (3)(b) of Exhibit C to 1940-G, prescribes the length of the public review period for preliminary public notice of a possible impact to an important land resource. The present length of the public review period has caused some delays in the completion of Class I and Class II environmental assessments and consequently delays in processing applications for the agency's services. It is expected that the effect of this action will be to reduce the length of time during which further consideration of an application or proposal must be postponed thereby reducing the delays.

Significance: Agency Priority

Legal Authority: 7 USC 1989; 42 USC 1480; 5 USC 301; 7 CFR 2.70

CFR Citation: 7 CFR 1900 subpart B

Legal Deadline: None

Abstract: The Agency published an interim rule amending FmHA Instruction 1900-B to provide for multi-party appeals involving the sale of suitable farmland to eligible applicants and denials of leaseback/buyback and homestead protection rights. These changes were a result of Section 611 of the Agricultural Credit Act of 1987. Subsequently, passage of the 1990 Farm Bill P.L. 101-624 required further changes to appeals involving the sale of inventory property classified as suitable farmland. These changes superseded those made in the interim rule. Those changes were published in the Federal Register as an interim rule on April 30, 1992, Vol 57 No. 84 page 18612 (see RIN 0575-AA91).

177. FARMER PROGRAMS, GUARANTEED INTEREST ASSISTANCE PROGRAM

Significance: Regulatory Program

Legal Authority: 7 USC 1989; 42 USC 1480; 5 USC 301

CFR Citation: 7 CFR 1980(a); 7 CFR 1980(b); 7 CFR 1980(d); 7 CFR 1980(e); 7 CFR 1980(g); 7 CFR 2.23; 7 CFR 2.70

Legal Deadline: None

Abstract: This regulation will provide for a government subsidy to lenders for interest rates for guaranteed Farmer Programs loans so the borrower will be paying interest rates for guaranteed loans that are similar to insured loans. This should provide an incentive for using the guaranteed loan program. The potential cost to the Government will be reduced as the Government will only pay a lender up to 90 percent of the losses on loans and only part of the interest rate rather than loaning a borrower the full amount of the loan and paying an investor the full cost of the Government borrowing the money for an insured loan. The benefit is that the borrower will be paying an interest rate for guaranteed loans that is comparable to that for insured loans.

181. AGRICULTURAL RESOURCE CONSERVATION DEMONSTRATION PROGRAM

Significance: Regulatory Program

Legal Authority: 7 USC 1989; 7 USC 4201; 42 USC 1480; 5 USC 301

CFR Citation: 7 CFR 1980, subpart J; 7 CFR 2.23; 7 CFR 2.70

Legal Deadline: None

Abstract: The FACT Act as amended, authorized a demonstration program to preserve our national farmland resources for future generations. The program provides for Federal guarantees of timely payments of principal and interest due for 10 years and substantial interest assistance on loans made to States and instrumentalities of States. A number of States currently have programs in which the State purchases development rights from farmers so the farmland is not developed. The program was fashioned, to some extent, after several of these programs. States are required to share in this effort by contributing an amount equal to at least half the amount of the loan guaranteed by FmHA. Each eligible State may receive up to \$10 million in guarantees per fiscal year. Loan funds may be invested by the borrower to increase the capital available for farmland preservation.

Legal Authority: 7 USC 1989; 42 USC 1980; 5 USC 301

CFR Citation: 7 CFR 1924-A; 7 CFR 1944-A; 7 CFR 2.23; 7 CFR 2.70

Legal Deadline: None

Abstract: The proposed regulation would eliminate the use of FmHA's Thermal Standards for new construction in those States that have adopted either the Council of American Building Officials (CABO) 1989 edition of the Model Energy Code (MEC) or any other energy Code/Standard that is equal to or more stringent than the 1989 MEC. The alternatives being considered are adoption of this proposal or continued use of FmHA current thermal standards for new construction. Continued use of FmHA's current thermal standards will result in higher material and labor cost for new unit. Adoption of the proposed rule will require fewer materials and labor because new units will not be custom designed for FmHA.

Legal Deadline: None

Abstract: The Office of Management and Budget required all federal credit agencies to adopt similar appraisal requirements and to conduct appraisal reviews in accordance with the Uniform Standards of Professional Appraisal Practice (USPAP). FmHA must act to update its Farmer Program appraisal regulations to address the new appraisal environmental. FmHA's present farm real estate appraisal requirements are not current with the USPAP and private industry standards. Failure to act on this will leave the FmHA vulnerable to losses through weak appraisal requirements currently in place. The savings potential may be very significant over time.

189. FIVE-YEAR APPLICANT LOAN ELIGIBILITY CERTIFICATION BY COUNTY COMMITTEE

Legal Authority: PL 101-554, sec 12

CFR Citation: 7 CFR 1910-A; 7 CFR 1941-A; 7 CFR 1943-A; 7 CFR 1943-B; 7 CFR 1980-B

Legal Deadline: NPRM, Statutory, April 30, 1993.

Abstract: The objective of this action is to extend County Committee eligibility for Farmer Programs loan applications (except emergency loan applications) up to five years. The current policy requires a County Committee determination for each loan application. The proposed action will decrease the paperwork required for loan applications, and reduce the amount of time needed by the County Committee to review loan applications. The proposed action is required by Public Laws 101-554 and 101-624. No

additional costs to the Government or to the public will be incurred as a result of this action. Government costs will be reduced because County Committee members will spend less time reviewing applications.

190. IMPLEMENTATION OF CERTIFIED LENDER PROGRAM

Significance: Agency Priority

Legal Authority: 7 USC 1987; 42 USC 1480; 5 USC 301, sec 15 and 18; PL 102-554

CFR Citation: 7 CFR 1980 subpart A; 7 CFR 1980 subpart B; 7 CFR 2.23; 7 CFR 2.70

Legal Deadline: Final, Statutory, October 1, 1993. Other, Statutory, April 28, 1993.

Sec 23 of Pub. L. 102-554, requires that interim regulations be published by April 28, 1993, and final regulations published by October 1, 1993.

Abstract: Lenders participating in the Guaranteed Loan Program have cited the excessive amount of paperwork and time required to apply for and receive approval on guaranteed loans as a deterrent to participation in the program. The Agency assembled a Guaranteed Overview Task Force to identify specific forms and regulations that could be eliminated or revised without increasing the risk to the Government. Fewer forms and a streamlined process will reduce operating costs for both FmHA and lenders. Regulations were being drafted when a law was passed requiring a Certified Lender Program, along with a simplified application process for guaranteed loans of \$50,000 or less.

Small Entities Affected: Businesses

Government Levels Affected: Federal

Additional Information: This rule implements section 18 of the Agricultural Credit Improvement Act of 1992 which establishes a Certified Lender Program (CLP). Farm operating loans and farm ownership loans are excluded with the exception of non-farm enterprise activity from the scope of Executive Order 12372, which requires intergovernmental consultation with State and local offices.

191. • 1945-D EMERGENCY LOAN POLICIES, PROCEDURES, AND AUTHORIZATIONS—WAIVER OF CROP INSURANCE FOR CROPS PLANTED FOR HARVEST IN 1992 AND 1993

Significance: Agency Priority

Legal Authority: 7 USC 1989; 7 USC 301

CFR Citation: 7 CFR 1945-D; 7 CFR 2.23; 7 CFR 2.70

Legal Deadline: None

Abstract: The Food, Agricultural, Conservation and Trade Act of 1990 (FACT Act) (PL 101-624), as amended, waived the requirement for losses to the 1990 crop, and the Dire Supplemental Appropriations Act waived it again for 1991 crop losses. This action is necessary to implement the provisions of the Supplemental Appropriations, Transfers and Rescissions for the fiscal year ending September 30, 1992, and Other Purposes Act (PL 102-368 1992 Supplemental Appropriations Act).

193. • INSURED AND GUARANTEED OPERATING AND FARM OWNERSHIP LOAN AND RELATED INSTRUCTIONS TO IMPLEMENT SECTIONS 4, 5, 7, 8, 9, AND 19 OF THE AGRICULTURAL CREDIT IMPROVEMENT ACT OF 1992

Significance: Agency Priority

Legal Authority: PL 102-554

CFR Citation: 7 CFR 1910; 7 CFR 1924; 7 CFR 1941; 7 CFR 1943; 7 CFR 1945; 7 CFR 1980; 7 CFR 1955

Legal Deadline: Final, Statutory, October 1, 1993. Other, Statutory, April 28, 1993.

Sec 23 of Pub. L. 102-554, requires that interim regulations be published by

April 28, 1993, and final regulations published by October 1, 1993.

Abstract: The law was enacted to assist beginning farmers and ranchers in getting started in agriculture. The 1987 Census of Agriculture indicated an increase of 20.7 percent in the number of farmers in the 65 and over age group between 1978 and 1987. During the same period the number of farmers less than 25 years of age declined by 46.2 percent and the number of farmers between 25 and 34 years of age declined by 15 percent. The impact and cost on the farm ownership loan program should be minimal in view of the required 10 percent cash downpayment by beginning farmer applicants. The impact on the operating loan program should be minimal in view of FO loan restrictions during the first 5 years of participation in this program. Applicants have a choice of applying for FO and OL assistance under the new programs or under the existing FO and OL programs.

194. • FARMER PROGRAM ACCOUNT SERVICING POLICIES—60-DAY DEADLINE FOR REQUESTING BORROWERS LOAN SERVICING

Significance: Agency Priority

Legal Authority: PL 102-554, sec 10; PL 102-554, sec 23

CFR Citation: 7 CFR 1951

Legal Deadline: Final, Statutory, October 1, 1993.

The interim regulations must be issued within 180 days of enactment of the Act.

Abstract: The 60-day time period for submitting an application for Farmer Program loan servicing may be extended by the Farmers Home Administration (FmHA) State Director in certain cases when the State Director determines there has been extraordinary circumstances. This action is required by the Agriculture Credit Improvement Act of 1992. The intended effect is that in certain cases of extraordinary circumstances the State Director may determine that the borrower be allowed additional time to request loan servicing. No alternatives were considered because this regulation was mandated by statute. We do not anticipate any additional costs as the regulation only extends the time limit that a borrower has to apply for a loan if the State Director determines these as extraordinary circumstances.

197. • IMPLEMENT SECTIONS 11 AND 13 OF THE AGRICULTURE CREDIT IMPROVEMENT ACT 1993 (APPLICATION PROCESSING TIMEFRAME)

Significance: Agency Priority

Legal Authority: PL 102-554

CFR Citation: 7 CFR 1910; 7 CFR 1980

Legal Deadline: Final, Statutory, October 1, 1993. Other, Statutory, April 28, 1993.

Sec 23 of Pub. L. 102-554 requires interim regulations by publish published by April 28, 1993, and final regulations publish by October 1, 1993.

Abstract: The Agricultural Credit Improvement Act of 1992 requires FmHA to change its procedures for notifying applicants for farmer programs loans and loan guarantees when information is needed to complete an application. In addition, County Offices will now be required to report applications that remain pending 45 days after receipt, and the reasons they remain pending. The Agency is also required to report to the Congress every month each application pending more than 60 days after its receipt. In addition, FmHA County Committees are required under the Act to review all applications for direct and guaranteed farmer programs loans not later than 5 days after receipt if there is more than one other complete application pending, and not later than 15 days if there are no other complete applications pending. These changes will ensure more timely and consistent processing of applications. Otherwise, their impact on the Agency should be minimal. Impact on applicants and participating lenders should be favorable, because it will address some of their expressed concerns regarding timeliness in processing.

Significance: Agency Priority

Legal Authority: 7 USC 1989; 42 USC 1480; 7 USC 301; PL 103-50

CFR Citation: 7 CFR 1980

Legal Deadline: None

Abstract: This action will implement a provision of Public Law 103-50, which authorizes an interest rate buydown for certain Business and industry loans guaranteed through FY 1994 in areas affected by Hurricanes Andrew and Iniki and Typhoon Omar. Lenders must limit the interest rate charged to prime plus 100 basis points. The Government will pay one percentage point of interest on the loan to the lender, thereby reducing the effective rate paid by the borrower. This action is intended to assist with economic recovery in the disaster areas.

216. • SERVICING AND LIQUIDATION OF CHATTEL SECURITY

Significance: Agency Priority

Legal Authority: 7 USC 1989; 5 USC 301

CFR Citation: 7 CFR 1962-A; 7 CFR 2.23; 7 CFR 2.70

Legal Deadline: None

Abstract: This revision to FmHA Instruction 1962-A implements the requirement in the Food, Agricultural, Conservation, and Trade Act of 1990, that the County Supervisor will record, in the borrower's case file, any change in the disposition of Chattel securing. The revision also clarifies the difference between "Basic" security and "Normal Income" security and when either type of security can be released.

226. FEES FOR OFFICIAL INSPECTION AND WEIGHING SERVICES

Legal Authority: 7 USC 71 et seq

CFR Citation: 7 CFR 800.71

Legal Deadline: None

Abstract: The Federal Grain Inspection Service (FGIS) proposes to increase its fees on average by 3.7 percent for Official Inspection and Weighing Services performed in the United States under the United States Grain Standards Act (USGSA), as amended. The USGSA provides for establishment of fees which are to cover the costs for performance of these official services. FGIS's current fee does not generate sufficient revenue to cover any of the approved FY 1992 3.7 percent federal employee raise.

233. SYSTEMATIC ALIEN VERIFICATION FOR ENTITLEMENTS

Significance: Regulatory Program

Legal Authority: PL 99-603

Immigration Reform and Control Act of 1986, sec 121; PL 103-66

CFR Citation: 7 CFR 271; 7 CFR 272; 7 CFR 273; 7 CFR 275; 7 CFR 277

Legal Deadline: Other, Statutory, October 1, 1988.

Provision of PL 103-66 effective 4/1/94 unless State meets hardship definition.

Abstract: This rule establishes procedures for State agencies to use to participate in the Systematic Alien Verification for Entitlements (SAVE) system. As required by IRCA, the Immigration and Naturalization Service (INS) implemented this system. IRCA requires the Food Stamp Program (FSP) and certain other entitlement programs to use SAVE to verify the immigration status of aliens applying for benefits. The rule also provides guidelines for Federal reimbursement of administrative costs and proposes to implement a provision of PL 103-66 which reduces the level of Federal reimbursement for SAVE from 100% to 50%. In addition, the rule implements nondiscretionary provisions of IRCA requiring all household members to

attest to their citizenship or alien status and certain requirements relating to documentation of alien status. (87-009)

235. SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS, AND CHILDREN (WIC): FOOD DELIVERY SYSTEMS

Significance: Regulatory Program

Legal Authority: 42 USC 1786

CFR Citation: 7 CFR 246

Legal Deadline: None

Abstract: A proposed rule addressing WIC Food Delivery Systems was published on December 28, 1990. The Department provided a 120-day comment period for the proposed rule, which closed on April 29, 1991. Nearly 1100 comments were received from a wide variety of sources. Despite the degree of preliminary input to the December 28, 1990 proposed rule, many of the commenters responding during the formal comment period suggested that the Department's food delivery regulations needed to be proposed again, rather than proceeding

directly to a final rule. In addition, several members of Congress requested that the rule be re-proposed in light of its impact on State agency food delivery systems. Therefore, the Department intends to issue a second proposed rule addressing WIC food delivery systems and requirements. This second rule will address all of the provisions contained in the previous rulemaking, but will contain significant modifications to some of the proposed provisions, as well as clarifications to several provisions, which may not have been clearly understood in the earlier rule. Abstract: This action proposes to implement the provisions of Public Law 101-624 governing student eligibility for the Food Stamp Program and the treatment of educational assistance as excluded income or resources.

This action also proposes to implement provisions of PL 100-50 and PL 101-

392 and PL 102-325 governing the treatment of certain Federal educational assistance as excluded income and/or resources for food stamp purposes. (86-027)

238. FOOD STAMP PROGRAM: QUALITY CONTROL REVIEW OF NEGATIVE ACTIONS

Legal Authority: 7 USC 2025

CFR Citation: 7 CFR 272.1(g); 7 CFR 275.11; 7 CFR 275.13; 7 CFR 271.2; 7 CFR 275.3; 7 CFR 275.10

Legal Deadline: None

Abstract: This regulatory action will improve the efficiency of Food Stamp Program Quality Control (QC) negative reviews, which measure the accuracy of State agencies' denials and terminations of participation in the Food Stamp Program. This rule will address which negative actions are subject to review, when they will be sampled and how they will be reviewed. It is expected that the revised system will provide broader, more useful information at no higher cost.

239. SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS, AND CHILDREN (WIC): PART 246.10, FOOD PACKAGE III, CHILDREN/WOMEN WITH SPECIAL DIETARY NEEDS

Legal Authority: 42 USC 1786

CFR Citation: 7 CFR 246

Legal Deadline: None

Abstract: Food Package III will be revised to increase the maximum quantity of special formula authorized per month; clarify what formula is; add additional authorized WIC foods to the package; and address tailoring.

Need for Action:

This special dietary package currently provides special formula, juice, and cereal. It was designed specifically to assist low-income women and children who require special formulas due to medical conditions. Without WIC these individuals would have difficulty in obtaining special formulas, which tend to be quite expensive. Program administrators, participants and the National Advisory Council on Maternal, Infant and Fetal Nutrition recognize that current monthly maximum quantity of formula allowed is sometimes not sufficient and recommend that it be increased. They also recognized that there is a nutritional need for additional WIC foods to be made available to participants receiving this package. This is a very infrequently used package and the proposed rule will in no way affect the other WIC food packages. (89-505)

240. SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS AND CHILDREN (WIC): MISCELLANEOUS PROVISIONS

Legal Authority: 42 USC 1786

CFR Citation: 7 CFR 246

Legal Deadline: None

Abstract: This proposed rule responds to a variety of program concerns, most of which have been expressed by WIC State agencies. The proposal strengthens the provision of services to participants in the areas of eligibility determination and nutrition education and increases State agency flexibility regarding the age of medical data and the sharing of participant information with other programs. Several minor clarifications and technical corrections are also made. Principal provisions include: (1) mandatory minimum content requirements for nutrition education participant contacts; (2) State agency discretion to accept medical data over 60 days old under certain circumstances; (3) additional flexibility for State agencies to share participant information with related programs; and (4) mandatory eligibility determination within 20 days of initial request of program benefits, whether by phone, letter, or personal appearance.

Final, Statutory, October 1, 1990, for funding proviso.

Final, Statutory, October 1, 1991, for all other provis.

Abstract: This rule is being proposed in response to changes brought about by PL 101-624 and to strengthen other program areas. This proposed rule will implement those provisions of PL 101-624 which affect the Commodity Supplemental Food Program (CSFP) and which do not require Departmental discretion. The following list includes those provisions addressed in this rulemaking: (1) authorizes State agencies to operate elderly-only sites; (2) provides administrative funding to agencies not to exceed 20 percent of the annual appropriation; and (3) mandates that State agencies serving women, infants and children: (a) distribute written information on Food Stamps, AFDC, and Child Support Enforcement Programs; (b) provide each local agency with materials showing the income limits according to family size, applicable to pregnant women,

USDA—FNS

Proposed Rule Stage

infants, and children in the Medicaid Program; and (c) distribute written information on and referrals to the Medicaid Program, when appropriate. State agencies serving elderly persons shall ensure that written information is provided on Food Stamps, Supplemental Security Income benefits, and Medicaid. (cont)

Small Entities Affected: None

Government Levels Affected: Local, State

Additional Information: ABSTRACT CONT: This rulemaking is also responsive to a variety of program concerns. The proposal strengthens the provision of services to participants in the area of nutrition education. In addition the rule: revises and simplifies the caseload allocation and priority system processes; increases State agency flexibility in determining the share of administrative funding to be retained at the State level; revises the State Plan requirements; and incorporates an administrative appeals procedure. Several minor clarifications and technical corrections are also made, such as updating the Financial Management requirements. The Department also proposes a reorganization of Program regulations for ease of use. (91-015)

249. FOOD STAMP PROGRAM: QUALITY CONTROL TECHNICAL AMENDMENTS

Legal Authority: 7 USC 2013; 7 USC 2025

CFR Citation: 7 CFR 275.3; 7 CFR 275.11; 7 CFR 275.23

Legal Deadline: None

Abstract: The Food and Nutrition Service is proposing six technical changes to the Food Stamp Program's Quality Control System. These changes

would reduce the workload on State agencies and improve the efficiency of the quality control system. The six proposed changes would: (1) permit State agencies to reduce their sample sizes; (2) clarify sampling procedures; (3) change the way Federal subsample sizes are calculated; (4) change the way FNS avoids double-billing for non-compliance; (5) change the way State agencies request arbitration; and (6) change the way Federal findings are treated once FNS sends them to the State agencies. 250. FOOD STAMP PROGRAM: MISCELLANEOUS PROVISIONS OF THE FOOD, AGRICULTURE, CONSERVATION, AND TRADE ACT OF 1991 AND EARNED INCOME TAX CREDIT

Legal Authority: 7 USC 2011 to 2032; PL 102-237; PL 101-508

CFR Citation: 7 CFR 273.8; 7 CFR 273.21

Legal Deadline: Other, Statutory, September 1, 1994. PL 103-66, sec 13914 effective date

Abstract: This rule addresses two provisions of the Food, Agriculture, Conservation, and Trade Act of 1991. Pursuant to section 910 of that Act, in cases subject to Monthly Reporting and Retrospective Budgeting (MRRB), the rule prohibits proration during the certification period when a new member is added to the household except for the initial month. Pursuant to section 908 postpones until April 1993, a provision contained in final rules published on 12/04/91 (56 FR 63597) which mandates exclusion of households residing on Indian

reservations from monthly reporting effective 02/02/91. This rule addresses a provision of PL 101-508 which provides that Earned Income Tax Credits are excluded from consideration as a countable resource. This provision was implemented on 01/01/91 by Agency directive. This rulemaking formally incorporates the provision into the Code of Federal Regulations.

This rule also proposes to implement section 13913 of PL 103-66 to exclude from income earned income tax credits for 12 months for certain households. (92-001)

251. FOOD STAMP PROGRAM: RESOURCE PROVISION FROM THE MICKEY LELAND MEMORIAL DOMESTIC HUNGER RELIEF ACT OF 1990 AND THE FOOD, AGRICULTURE, CONSERVATION, AND TRADE ACT OF 1991

Legal Authority: 7 USC 2011 to 2032; PL 101-624; PL 102-237

CFR Citation: 7 CFR 273.8

Legal Deadline: None

Abstract: The NPRM was published on August 13, 1991. After full consideration of comments, the Department has decided that a new proposed rulemaking is warranted to take into consideration comments received and recent legislative changes to the provision as a result of PL 102-237.

The new proposed rule will exempt from consideration as a resource, resources which meet three tests. The tests are: (1) the resource is jointly owned by the household and other parties; (2) the household could not

USDA—FNS

Proposed Rule Stage

have access to its share without agreement of the other owners, i.e., the resource is not readily divisible; and (3) the sale of the resource would not yield a significant return or would not yield a significant amount of funds for the support of the household.

"Significant amount of funds" is defined as an amount greater than half the applicable resource limit for the household, in accordance with 7 CFR 273.8, after any expenses of the sale are deducted. (91-020)

253. • REVIEW OF FREE AND REDUCED PRICE APPLICATIONS ON ADMINISTRATIVE REVIEWS OF NATIONAL SCHOOL LUNCH PROGRAM

Significance: Agency, Priority

Legal Authority: PL 101-147

CFR Citation: 7 CFR 210

Legal Deadline: None

Abstract: Currently, State agencies must review all applications for free and reduced price meals on file as part of an administrative review of the school lunch program. Generally it is necessary to review all applications in order to determine whether or not the number of meals claimed, by type, is correct. In some instances, however, this level of review is not necessary due to the small number of errors discovered early in the review. This rulemaking will establish guidelines for curtailing such activity with FNS approval. (92-009)

254. • PROVISIONS OF COMPUTER MATCHING AND PRIVACY PROTECTION ACT OF 1988, AMENDMENTS OF 1990, AND IMPLEMENTATION OF THE DISQUALIFIED RECIPIENT SUBSYSTEM

Significance: Regulatory Program

Legal Authority: 5 USC 552(a) Computer Matching and Privacy Protection Act; 7 USC 2015(b) Food Stamp Act

CFR Citation: 7 CFR 272; 7 CFR 273

Legal Deadline: None

Abstract: In accordance with the Computer Matching and Privacy Protection Act, PL 100-503, and the Computer Matching and Privacy Protection Amendments of 1990, PL 101-508, the Food Stamp Program must extend certain protections to persons whose benefits could be adversely affected by computer matches. These protections include independent verification of computer information, notification to the affected individual and provision of an opportunity to respond to the information before an adverse action becomes effective.

In addition, this proposed rule describes requirements for State agencies to report information on individuals disqualified from the program for intentional program violations to FNS and the related FNS computer matching program known as the Disqualified Recipient Subsystem (DRS). (89-010)

258. • FOOD STAMP PROGRAM: MONTHLY REPORTING AND RETROSPECTIVE BUDGETING

Legal Authority: 7 USC 2011 to 2032

CFR Citation: 7 CFR 273; 7 CFR 271

Legal Deadline: None

Abstract: Current regulations do not reflect the optional nature of monthly reporting and retrospective budgeting, are complicated, and organized with a different intent than the current system.

This action proposes to revise, reorganize and simplify 7 CFR 273.21 through a reproposal of the entire section. It would be changed to reflect the optional nature of monthly reporting and retrospective budgeting, to provide greater flexibility to State agencies, and incorporate experience with waivers. (93-005)

259. • FOOD STAMP PROGRAM: PROVISIONS ON ANTICIPATING INCOME, REPORTING REQUIREMENTS, AND ACTION ON CHANGES

Legal Authority: 7 USC 2011 to 2032; PL 103-66

CFR Citation: 7 CFR 273

Legal Deadline: Other, Statutory, September 1, 1994.

Sections 13911 and 13915 of PL 103-66--effective date.

Abstract: This action proposes several revision in Food Stamp Program rules for determining eligibility and benefits of households not required to report changes in their circumstances monthly. The proposed changes are intended to improve the accuracy of benefits provided to households whose income varies from month to month, reduce the number of changes the household must report, and facilitate use of the same procedures in the Food Stamp and Aid to Families with Dependent Children Programs.

This rule also proposes to implement sections 13911 and 13915 of PL 103-66. Section 13911 provides for an income exclusion of the earnings of elementary and high school students under 21 years of age.

USDA—FNS

Proposed Rule Stage

Section 13915 revises the provision on the counting of general assistance vendor payments as income so that only those vendor payments provided to cover housing expenses, exclusive of energy or utility expenses, are counted. (93-008)

260. • FOOD STAMP PROGRAM: STANDARD UTILITY ALLOWANCES

Legal Authority: 7 USC 2011 to 2032; PL 103-66

CFR Citation: 7 CFR 273

Legal Deadline: Other, Statutory, September 1, 1994.

Section 13916 of PL 103-66 effective date.

Abstract: This action proposes several changes in Food Stamp Program rules relating to the development and use of standard utility allowances. The changes are proposed to facilitate use of standard amounts rather than actual utility expenses in determining the benefits of food stamp households.

This rule also proposes to implement section 13916 of PL 103-66 to eliminate proration of benefits unless the participant is off the program for more than one month. (93-006)

264. RULES OF PROCEDURE—ADMINISTRATIVE LAW JUDGES (ALJ)

Legal Authority: PL 100-435, Sec 603; PL 103-66, Sec 13951

CFR Citation: 7 CFR 275; 7 CFR 276; 7 CFR 283

Legal Deadline: NPRM, Statutory, October 1, 1991. Retroactive for Fiscal Year 1986 quality control payment error rate liability claims.

Abstract: This regulatory action is required because the Hunger Prevention Act of 1988 (PL 100-435) and the Mickey Leland Childhood Hunger Relief Act (PL 103-66, sec 13951) revised the Food Stamp Act of 1977, as amended, specifying that Food Stamp Program quality control (QC) payment error rate (PER) liability appeals by State agencies be conducted by Administrative Law Judges. The use of Administrative Law Judges replaces the current appeal process which is conducted by the State Food Stamp Appeals Board. This regulation will delineate the procedures to be followed in these QC appeals. (88-011)

Legal Authority: 7 USC 2011 to 2032

CFR Citation: 7 CFR 272; 7 CFR 273

Legal Deadline: None. Retroactive implementation date to date all State agencies directed to implement by FNS memorandum.

Abstract: Expands appeals court decisions on treatment of individuals receiving foster care payments when determining the eligibility and benefit level of households caring for such individuals from the districts covered by the appeals courts to all States so that policy is uniform for entire Food Stamp Program. All State agencies were directed to implement policy by court set date, if in district under jurisdiction of one of the appeals courts or by February 1, 1989. FNS implemented policy through memorandum to preclude further legal action. (88-014)

268. MISCELLANEOUS FARM BILL PROVISIONS RELATING TO THE AUTHORIZATION OF RETAIL FIRMS AND WHOLESALE FOOD CONCERNS

Significance: Agency Priority**Legal Authority:** 7 USC 2011 to 2031; PL 101-624**CFR Citation:** 7 CFR 271; 7 CFR 272; 7 CFR 274; 7 CFR 278**Legal Deadline:** Final, Statutory, October 1, 1991.

Effective 120 days from publication of implementing rules.

Abstract: This rule would implement three provisions of the 1990 Farm Bill (PL 101-624, 104 stat 3359) which revise the Food Stamp Act of 1977, as amended (7 USC 2011 et seq.). The first provision would amend the definition of "food" to include meals sold to the homeless program participants by restaurants approved by State agencies for this purpose. Such restaurants must contract with the State and must be authorized by the Food and Nutrition Service to provide meals at concessional prices to homeless participants. The second provision would allow a periodic reauthorization of retail food stores and wholesale food concerns to participate in the Food Stamp Program. The third provision prohibits a firm which is primarily in the business of selling food at wholesale from being authorized as a retail food store unless failure to authorize such a firm as a retail food store would cause hardship to food stamp households. 269. FOOD STAMP PROGRAM: DISCRETIONARY RETAILER WHOLESALER CHANGES

Legal Authority: 7 USC 2011 to 2031**CFR Citation:** 7 CFR 271; 7 CFR 276; 7 CFR 278; 7 CFR 279**Legal Deadline:** None

Abstract: The proposed rule clarifies the Department of Agriculture's policy on authorizing and educating retail grocers who take part in the Food Stamp Program. In addition, the rule sets forth changes in assigning penalties to retailers who violate program rules. The regulations clarify and emphasize the full and ongoing responsibility of retailers for their actions and the actions of their employees. Under the proposed regulations, the severity of the penalty would not be affected by any warning received by the retailer prior to an investigation. The penalty would be based on the seriousness of the violations committed during the investigation and the level of responsibility for store operations of persons who committed the violations. 270. RECIPIENT CLAIMS AND AUTOMATED DATA PROCESSING (ADP) FUNDING REQUIREMENTS FROM THE MICKEY LELAND MEMORIAL DOMESTIC HUNGER RELIEF ACT

Significance: Agency Priority**Legal Authority:** 7 USC 2011 to 2032; PL 101-624; PL 102-237**CFR Citation:** 7 CFR 272; 7 CFR 273; 7 CFR 276; 7 CFR 277**Legal Deadline:**

NPRM, Statutory, October 1, 1990, The provisions of PL legal deadline wheth. NPRM, Statutory, October 1, 1991, The provisions of PL legal deadline wheth.

Abstract: This rule implements three provisions from PL 101-624 that affect Food Stamp recipient claims and ADP funding. For recipient claims, effective October 1, 1990, the timeframe for household election of a repayment method for intentional Program violation (IPV) claims was reduced from 30 to zero days. Also, effective October 1, 1990 for a five-year period, retention rates for collections of recipient claims for State agencies were reduced from 50 to 25 percent for IPV claims and from 25 to 10 percent for inadvertent household errors. Finally, effective October 1, 1991, the enhanced funding rate for costs of planning, designing, developing or installing ADP and information retrieval systems was reduced from 75 to 63 percent. These provisions will increase amounts of recipient claims collected and returned to the Federal Government and decrease Federal Government administrative costs. This rule will also implement a provision of PL 102-237 which concerns the timeframe for timely electing a repayment method for inadvertent household error (IHE) claims, effective December 13, 1991. 271. SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS AND CHILDREN (WIC): FOOD COST CONTAINMENT REQUIREMENTS

Legal Authority: 42 USC 1786

CFR Citation: 7 CFR 246

Legal Deadline: Final, Statutory, March 10, 1991.

Abstract: This regulation implements the mandates of PL 101-147, enacted November 10, 1989, relative to food cost containment in WIC. In order to achieve further savings in the cost of WIC Program foods, principally the cost of infant formula, this rule implements two major legislative provisions. First, it restates and extends into future years the provisions of PL 100-460, which mandated that in order to receive its grant allocation a State agency must examine the feasibility of cost containment systems by 8/30/89 and implement a cost containment system where feasible. Second, the rule requires all WIC State agencies using a retail food delivery system, except certain Indian State agencies, to employ one of two infant formula rebate procurement methods. These two methods are the competitive method (single-supplier contract) and the comparative method, where the State agency fairly compares the cost savings of any alternative form of infant formula cost containment it may wish to implement. The rebate system generating the greatest savings of those compared must then be implemented. This rule establishes specific factors to be considered in the analysis of the systems after (cont)

272. SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS AND CHILDREN (WIC): COORDINATION RULE MANDATES OF THE CHILD NUTRITION AND WIC REAUTHORIZATION ACT OF 1989

Legal Authority: 42 USC 1786

CFR Citation: 7 CFR 246

Legal Deadline: Final, Statutory, July 1, 1990.

Abstract: This rule amends regulations governing the WIC Program to comply with mandates of Sections 123 and 213 of the Child Nutrition and WIC Reauthorization Act of 1989 (P.L. 101-147) which are not related to the allocation and use of program funds. The following major areas of WIC Program Operation are addressed in this rulemaking: adjunct income eligibility, program access, dissemination of program information, and breastfeeding promotion activities. This rule also expands State agencies' discretion to mail food instruments to participants and reduces the frequency in which all States must review their local agencies from annual to biennial. A number of minor mandates of PL 101-147 are also addressed in this rulemaking.

Finally, this rule incorporates into the WIC Program regulations by reference the following departmentwide rules: Uniform Administrative Requirements for Grants and Cooperative Agreements

to State and Local Governments, 7 CFR 3016; and governmentwide Department and (cont)

| Final Action | 10/00/93 | |
| Final Action Effective | 04/00/94 | |

Small Entities Affected: None

Government Levels Affected: Local, State

Additional Information: ABSTRACT CONT: Suspension (Non-Procurement) and governmentwide requirements for a drug-free workplace (Grants), 7 CFR part 3017. This rule also provides guidelines for the allocation of WIC program funds, including changes in the administrative funding structure, breastfeeding targets, and conversion of food funds to administrative funds. The revised funding structure eliminates the 20 percent limit on administrative and program services funds and bases such funding on a national administrative grant per person. State agencies must also spend their proportionate shares of at least \$8 million for breastfeeding promotion in addition to the current 1/6 nutrition education requirement. Curtailment of vendor abuse activities that enable States to convert food funds to cover administrative expenses. Finally, any State using a cost containment measure may temporarily borrow 1st quarter funds to pay a previous year's 4th quarters expenses. Timelines for the allocation and reallocation of program funds are also established by this rule. (89-521)

277. STATE ADMINISTRATIVE EXPENSE FUNDS: NATIONAL SCHOOL LUNCH PROGRAM, SPECIAL MILK PROGRAM, SCHOOL BREAKFAST PROGRAM, CHILD AND ADULT CARE FOOD PROGRAMS, FOOD DISTRIBUTION PROGRAM

Significance: Agency Priority

Legal Authority: PL 101-147

CFR Citation: 7 CFR 210; 7 CFR 215; 7 CFR 220; 7 CFR 235

Legal Deadline: Final, Statutory, October 1, 1991.

Abstract: Implements provisions of PL 101-147, Child Nutrition and WIC Reauthorization Act of 1989, which affected State Administrative Expense funding. Specifically, limits the amount of funds a State may carry over from one fiscal year to the next, specifies how funds returned by the State are to be redistributed and authorizes direct payments to alternate agencies operating the audit component of the Child and Adult Care Food Program. 278. BENEFIT DELIVERY RULE

Significance: Agency Priority

Legal Authority: 7 USC 2011 to 2032; PL 101-624; PL 100-435; PL 102-237; PL 103-11

CFR Citation: 7 CFR 272; 7 CFR 274; 7 CFR 273

Legal Deadline: Final, Statutory, February 1, 1992. Other, Statutory, January 31, 1994. See Abstract.

Abstract: This rule makes final two provisions from PL 101-624 which must be implemented by February 1, 1992: aggregate (combined) allotment of benefits to households applying after the 15th of the month, and mail issuance in rural areas where households may experience transportation difficulties obtaining benefits. This rule delays the implementation of staggered issuance on Indian reservations (PL 101-624) until January 31, 1994, in accordance with PL 103-11. This rule also makes final the combined allotment provision from an interim rule published June 7, 1989, at 54 FR 24518, and makes technical changes to current regulatory provisions considered appropriate to clarify and improve issuance. 279. PERMANENT AGREEMENTS/DIRECT CERTIFICATION IN NATIONAL SCHOOL LUNCH, SCHOOL BREAKFAST, AND SPECIAL MLK PROGRAMS

Significance: Agency Priority

Legal Authority: PL 101-147

CFR Citation: 7 CFR 210; 7 CFR 215; 7 CFR 220; 7 CFR 245

Legal Deadline: None

Abstract: The Child Nutrition and WIC Reauthorization Act of 1989 made the agreement between the school and the State agency to operate the school nutrition programs a permanent document to be amended as necessary. This law also authorized schools to certify children as eligible for free meals using information obtained directly from food stamp/AFDC offices attesting that these children are receiving food stamps or AFDC benefits. This rule implements these statutory provisions. (89-520)

280. FOOD STAMP PROGRAM: TECHNICAL AMENDMENTS CONCERNING DISABLED IN GROUP HOMES AND INCOME EXCLUSIONS FOR PLANS FOR ACHIEVING SELF-SUPPORT (PASS)—PUBLIC LAW 102-237

Legal Authority: 7 USC 2011 to 2032; PL 102-237

CFR Citation: 7 CFR 273.9

Legal Deadline: None

Abstract: This rulemaking addresses sections 901 and 903 of PL 102-237. Section 901 expands eligibility to

receive food stamps and to use them to purchase meals prepared by certain group living arrangements to all individuals who meet the definition of disabled in the Food Stamp Act and reside in certain group homes. This rulemaking resolves an inequity under which persons receiving disability or blindness payments under certain sections of the Social Security Act were eligible to use food stamps to purchase meals prepared and served by these homes while other persons considered disabled under the Food Stamp Act but not receiving disability or blindness payments under the Social Security Act were not eligible to use food stamp to purchase such meals. Section 903 adds an additional income exclusion. Certain recipients of Supplemental Security Income can have a Plan for Achieving Self-Support (PASS). Amounts held in PASS accounts to fulfill this Plan are currently excluded as a resource. Under this rulemaking, PASS amounts will also be excluded from income for food stamp purposes. (92-005)

281. PROVISIONS OF THE STEWART B. MCKINNEY HOMELESS ASSISTANCE ACT AND A PROVISION OF THE FOOD SECURITY ACT OF 1985

Legal Authority: PL 100-77, as amended by PL 101-220; PL 99-198

CFR Citation: 7 CFR 273

Legal Deadline: None

Abstract: This rulemaking places into final form an interim rule published on 9/29/87. The interim rule implemented all provisions of the Stewart B. McKinney Homeless Assistance Act and one provision of the Food Security Act of 1985. The majority of the provisions are intended to help

USDA—FNS

Final Rule Stage

homeless individuals obtain food stamp eligibility and benefits. The rule: 1) defines a homeless household; 2) allows for Federal funding of State outreach aimed at informing the homeless about the Program; 3) allows an income exclusion for certain housing assistance payments; 4) requires expedited service to households whose monthly rent/mortgage and utilities are more than its income and resources and to households in which all members are homeless; 5) allows certain parents with minor children to be considered a separate household from others they live with; 6) excludes from income public and general assistance vendor payments for medical and child care, energy assistance and special emergency assistance. 282. WIC FARMERS' MARKET NUTRITION PROGRAM

Significance: Agency Priority

Legal Authority: 42 USC 1786(m)

CFR Citation: 7 CFR 248

Legal Deadline: None

Abstract: This rulemaking would propose implementing regulations for the establishment of the WIC Farmers' Market Nutrition Program (FMNP) as mandated by PL 102-314. The FMNP is designed to provide fresh nutritious unprepared foods (such as fruits and vegetables) to WIC participants. The foods would be provided by farmers' markets and would also serve to expand the awareness and use of farmers' markets and to increase sales at such markets. The proposed rule would establish criteria for allocating grants to State agencies and for their operation of the FMNP (93-002)

283. NATIONAL SCHOOL LUNCH PROGRAM, SPECIAL MILK PROGRAM FOR CHILDREN, AND SCHOOL BREAKFAST PROGRAM: COORDINATED REVIEW EFFORT

Significance: Agency Priority

Legal Authority: PL 101-147

CFR Citation: 7 CFR 210; 7 CFR 215; 7 CFR 220

Legal Deadline: None

Abstract: This regulation will modify the existing Coordinated Review Effort (CRE) to give State Agencies larger measure of flexibility when they conduct reviews, take fiscal action, and withhold payments under CRE. The final CRE, published on July 17, 1991, was perceived by some to be unnecessarily rigid in its methodology. Its requirements for overclaims based on incorrectly determined applications and/or improper counting of meals were also seen to be potentially harmful to local programs, as was the requirement that, if a school does not take effective corrective action, all program payments must be withheld until the school does take corrective action. This new regulation would limit the scope of review in those situations where preliminary findings indicate no problems. Fiscal action would be limited to the review period in most instances. States would have the authority to withhold only a portion of program payments when it is considered to be in the best interests of the program to do so. Finally, this regulation initiates an appeal procedure for schools. (92-009)

284. ADMINISTRATIVE IMPROVEMENT AND SIMPLIFICATION PROVISIONS FROM THE HUNGER PREVENTION ACT OF 1988

Significance: Agency Priority

Legal Authority: 7 USC 2011 to 2032; PL 100-435

CFR Citation: 7 CFR 271; 7 CFR 272; 7 CFR 273

Legal Deadline: Final, Statutory, July 1, 1989.

Abstract: The regulation will put in final form the provisions of an interim Food Stamp Program rule published on June 7, 1989. The interim rule amended food stamp regulations to implement several food stamp program provisions contained in the Hunger Prevention Act of 1988. The provisions of that act addressed in this rule are: (1) verification; (2) expanded definition of disabled; (3) optional training for volunteer and nonprofit organizations; (4) program information for low-income households; (5) expanding hardship criteria for waiving in-office interviews; (6) simplified applications; (7) joint applications; (8) federally authorized cash-out benefits in other assistance programs; (9) simplified procedures for claiming the excess medical deductions; (10) telephone access to certification offices in order to receive

USDA—FNS

Final Rule Stage

program information or to report changes; (11) annualizing self-employment income and expenses from farming; (12) resource exclusions for farm households in transition from farming. (88-007)

285. FOOD STAMP PROGRAM: PERFORMANCE STANDARDS FOR THE EMPLOYMENT AND TRAINING PROGRAM

Legal Authority: PL 102-237

CFR Citation: 7 CFR 273

Legal Deadline: None

Abstract: The Food, Agriculture, Conservation, and Trade Act Amendments of 1991 (PL 102-237) mandate that the performance standard for the Food Stamp Employment and Training Program shall not exceed 10 percent in fiscal years 1992 and 1993, and 15 percent in fiscal years 1994 and 1995. The rule proposes a performance standard of 10 percent through fiscal year 1994 with an increase to 15 percent in fiscal year 1995. (92-004)

286. • SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS AND CHILDREN (WIC): INFANT FORMULA PROCUREMENT ACT OF 1992

Legal Authority: 42 USC 1786

CFR Citation: 7 CFR 246

Legal Deadline: Final, Statutory, April 24, 1993.

PL 102-512 requires that the mandates of these provisions be implemented within 180 days of enactment.

Abstract: This regulation is to amend the Child Nutrition Act of 1966 to encourage multi-State bidding for infant formula rebate contracts for the Special Supplemental Food Program for Women, Infants and Children (WIC), and for other purposes. The major objective of this action is to provide guidelines for the U.S Department of Agriculture, Food and Nutrition Service national office to: (1) solicit bids on behalf of interested State agencies for a cost-containment contract to be entered into by infant formula manufacturers and the WIC State agencies; and (2) disqualify and/or impose civil penalties of up to \$100 million per year for infant formula manufacturers that price-fix or engage in related anti-competitive activities. Small Entities Affected: None

Government Levels Affected: State, Federal

Analysis: Regulatory Impact Analysis

Procurement: This is a procurement-related action for which there is a statutory requirement. There is no paperwork burden associated with this action.

Additional Information: Under the law, USDA must develop procedures to solicit bids for a cost containment contract to be entered into by infant formula manufacturers and interested WIC State agencies who elect to have USDA perform their bid solicitation and selection process. If two or more

States are interested, USDA will solicit bids and select the winning bidder for a cost containment contract. USDA will, in consultation with interested State agencies, divide State agencies into one or more groups and solicit bids for group contracts. This regulation will encourage States to engage in multi-State bidding which is expected to generate an even greater savings to the WIC program, and will ultimately enable the program to significantly increase participation.

Need for Action: To set forth guidelines within 180 days of enactment, for solicitation of infant formula rebate contracts for two or more States or groups in an interim final rule.

293. • ALTERNATE FOODS FOR MEALS: ENRICHED MACARONI PRODUCTS WITH FORTIFIED PROTEIN

Legal Authority: 42 USC 1751 to 1760; 42 USC 1779

CFR Citation: 7 CFR 210, app A

Legal Deadline: None

Abstract: FNS is replacing the Protein Efficiency Ratio (PER) method of determining protein quality with the Protein Digestibility-Corrected Amino Acid Score method. Amendment of the regulations is necessary to alter the

protein quality test since the current regulation requires the PER test and allows for no alternatives. This change in the regulation accepts the most accurate, efficient and a less costly method for use in measuring protein quality of this food product used in the National School Lunch Program. This change will allow food companies to minimize costs, thereby allowing them to provide quality products at the lowest cost possible.

This regulation deletes reference to the Food and Drug Administration Standard of Identify (21 CFR 139.117) which has been stayed and clarifies that protein quality is to be determined on the dried cooked food in order to comply with Official Methods of Analytical Chemist. The rule also

requires manufacturers of enriched macaroni with fortified protein to notify the agency if there is change in the protein portion of their product since the original testing. (93-003)

299. • SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS AND CHILDREN (WIC): EMERGENCY FUNDING RULE

Significance: Agency Priority

Legal Authority: 42 USC 1786(m)

CFR Citation: 7 CFR 246

Legal Deadline: None

Abstract: This rule, effective through September 30, 1993, implements an emergency revision to the food funds

USDA—FNS

Completed Actions

allocation formula for the WIC Program, to allow the allocation of additional funds to certain WIC State agencies which can utilize such funds to serve additional Program participants who would otherwise not be served in fiscal year 1993. For the remainder of FY 1993 only, this rule will waive the regulatory and statutory provisions which limit any State agency to a 15-percent increase in food funding. This

waiver will apply to certain residual funds remaining after application of the current food funds allocation formula. (93-014)

300. DETERMINING THE AMENABILITY OF BIRDS TO MANDATORY FEDERAL INSPECTION

Significance: Agency Priority

Legal Authority: 21 USC 451 et seq; 21 USC 601 et seq

CFR Citation: 9 CFR 362; 9 CFR 381

Legal Deadline: None

Abstract: This advance notice of proposed rulemaking would solicit comments and recommendations regarding criteria to determine the amenability of various species of poultry to Federal inspection. Because

of increasing use of formerly wild species for food purposes and genetic variations of traditional species, the Agency is increasingly in need of a framework for deciding when a specific food animal is subject to inspection laws.

Proposed Rule Stage

Food Safety and Inspection Service (FSIS)

301. SODIUM/POTASSIUM LACTATE AS MEANS OF REDUCING CERTAIN PATHOGENIC MICROORGANISMS IN SPECIFIC MEAT AND POULTRY PRODUCTS

Legal Authority: 21 USC 451 et seq; 21 USC 601 et seq

CFR Citation: 9 CFR 318; 9 CFR 381

Legal Deadline: None

Abstract: This proposed rule would amend the Federal meat and poultry products inspection regulations to permit the use of sodium lactate and potassium lactate as means of reducing certain pathogenic microorganisms in cooked meat and poultry products, and would provide for additional protection against the growth and toxin development of *Clostridia botulinum* in these products. FSIS has received a petition from Oscar Mayer Foods Corporation, Madison, Wisconsin, to use these substances in various cooked meat and poultry products at levels not

to exceed 4.8 percent of the formulation.

302. ANTE-MORTEM INSPECTION OF DISABLED ANIMALS ON TRANSPORT VEHICLES

Legal Authority: 21 USC 601 et seq

CFR Citation: 9 CFR 309; 9 CFR 320

Legal Deadline: None

Abstract: This proposed rule would amend the Federal meat inspection regulations to permit an alternate method of ante-mortem inspection of disabled animals. This method would allow a transport vehicle to be an extension of an official establishment's premises for purposes of ante-mortem inspection of disabled animal(s) that are within the vehicle. FSIS received a request from the Western States Meat Association, Oakland, California, to allow ante-mortem inspection of disabled animals to be performed on a transport vehicle. This proposed rule would (1) specify establishment responsibilities for maintaining control over the transport vehicle, for providing proper ante-mortem inspection facilities, for complying with the veterinary disposition, and for providing assistance to the veterinary Medical Officer when performing the ante-mortem inspection; (2) prescribe the facility requirements needed for

USDA—FSIS

Proposed Rule Stage

safe ante-mortem inspection of disabled animals; and (3) provide the requirements for the written request for this inspection.

303. FOOD ADDITIVES AND GRAS SUBSTANCES USED AS INGREDIENTS IN MEAT FOOD AND POULTRY PRODUCTS

Legal Authority: 21 USC 451 et seq; 21 USC 601 et seq

CFR Citation: 9 CFR 318; 9 CFR 381

Legal Deadline: None

Abstract: This proposed rule would amend the Federal meat and poultry products inspection regulations to simplify the procedures by which FSIS approves food additives and Generally Recognized as Safe (GRAS) substances to be used as ingredients in meat food products and poultry products. The proposed rule will be developed in cooperation with the Food and Drug Administration to make the Federal regulation of food additives and other substances that may be used as ingredients in meat food and poultry products more efficient and uniform.

305. EXPORT CERTIFICATION PROCEDURES

Legal Authority: 21 USC 601 et seq; 21 USC 451 et seq

CFR Citation: 9 CFR 322; 9 CFR 381

Legal Deadline: None

Abstract: This proposed rule would amend the Federal meat and poultry products inspection regulations to provide electronic export certification of all meat and poultry products exported to foreign countries. Domestic inspectors would continue to certify that the product is USDA inspected and passed. Exporters would be required to certify that all foreign requirements have been met. In 1988, the Agency conducted a pilot test to determine the feasibility of streamlining export certification procedures by centralizing controls; utilizing contemporary communications technology; establishing plant review criteria; and modifying stamping requirements. FSIS is reviewing the current regulations to

determine what, if any, changes should be made to accommodate electronic issuance of export certificates.

308. NOTIFICATION OF RESIDUE VIOLATORS AND TESTING OF SUBSEQUENT SHIPMENTS OF ANIMALS

Significance: Agency Priority

Legal Authority: 21 USC 451 et seq; 21 USC 601 et seq

CFR Citation: 9 CFR 310; 9 CFR 381

Legal Deadline: None

Abstract: This proposed rule would amend the Federal meat and poultry products inspection regulations to provide the authority needed to permit FSIS to notify those entities determined to have marketed livestock or poultry with violative levels of residues and to test subsequent shipments of livestock or poultry marketed by the violators. These actions would not establish new policy in these areas but would, instead, permit the Agency to enforce current policy.

310. PRIOR LABEL APPROVAL PROCESS

Significance: Regulatory Program

Legal Authority: 21 USC 601 et seq; 21 USC 451 et seq

CFR Citation: 9 CFR 317; 9 CFR 381

Legal Deadline: None

Abstract: This proposed rule would amend the Federal meat and poultry products inspection regulations to streamline the labeling process. It could eliminate the need for manufacturers to submit final label applications, provided sketch applications of such labels have been approved by the Agency. It could also expand the types of labels eligible for generic approval. This would result in significant savings for manufacturers, as well as FSIS, while continuing to provide consumers with useful and truthful information on product labels.

311. SUBSTITUTE PRODUCTS IDENTIFIED BY STANDARDIZED TERMS AND NUTRIENT CONTENT CLAIMS

Significance: Agency Priority

Legal Authority: 21 USC 451 et seq; 21 USC 601 et seq

CFR Citation: 9 CFR 319; 9 CFR 381

Legal Deadline: None

Abstract: This proposed rule would amend the Federal meat and poultry products inspection regulations to establish standards of composition for meat and poultry products such as "low fat" and "low cholesterol," in conjunction with a standardized name. This action stems from the current nutrition labeling rulemaking proceeding which allows modified versions of certain standardized products.

312. LICENSE OR OTHER AUTHORIZATION FOR FEDERAL POULTRY INSPECTION

Legal Authority: 21 USC 451

CFR Citation: 9 CFR 381

Legal Deadline: None

Abstract: This proposed rule would amend the poultry products inspection regulations to remove the requirement for the licensing or other authorization of State employees to perform inspection in official poultry establishments. Assurance that only qualified employees are assigned to such establishments will now be covered under terms to be prescribed in Talmadge-Aiken or other cooperative agreements. This action is possible because of expanded training and certification requirements for veterinarians and food inspectors employed by the States under agreements to be concluded between the States and FSIS.

313. USE OF CARBON DIOXIDE IN THE HUMANE SLAUGHTER OF SWINE

Legal Authority: 21 USC 601 et seq

CFR Citation: 9 CFR 308

Legal Deadline: None

Abstract: This proposed rule would amend the Federal meat inspection regulations to permit the use of carbon dioxide to induce death in swine. Current regulations governing the humane slaughter of swine permit carbon dioxide to be used to render the animals unconscious, with death resulting from the bleeding operation. The proposed amendment is based on scientific research that shows the use of carbon dioxide to induce death in swine to be an effective and humane slaughtering method.

Significance: Regulatory Program

Legal Authority: 21 USC 451 et seq; 21 USC 601 et seq

CFR Citation: 9 CFR 327; 9 CFR 381

Legal Deadline: None

Abstract: FSIS plans to initiate discussions with its counterparts in Agriculture Canada which will focus on reducing or eliminating existing barriers that may now impede the import/export of meat and poultry products. FSIS has developed several discussion points concerning the trade of meat and poultry products. If agreement is reached in any or all of the discussion points, amendments to the regulations may be needed. Once the discussions are concluded, FSIS

will examine the need for regulatory changes to accommodate any such agreements.

315. • PROCEDURES FOR APPEALING MEAT AND POULTRY PRODUCT RETENTIONS

Significance: Agency Priority

Legal Authority: 21 USC 601 et seq; 21 USC 451 et seq

CFR Citation: 9 CFR 318; 9 CFR 381

Legal Deadline: None

Abstract: This proposed rule would amend the Federal meat and poultry products inspection regulations to (1) require establishments to document appeals above the circuit supervisor level related to disposition of retained meat or poultry products, (2) provide that an establishment has 20 days to (a) appeal a retention, (b) recondition or rework product, or (c) properly dispose of the product, and (3) establish procedures to ensure appropriate disposition of product immediately after a decision has been reached on an appeal. The proposal also provides procedures for accumulating retained product for the purpose of re-examination with specialized detection equipment.

Significance: Agency Priority

Legal Authority: 21 USC 451 et seq

CFR Citation: 9 CFR 381

Legal Deadline: None

Abstract: This proposed rule would amend the poultry products inspection regulations to establish labeling requirements for poultry products produced by mechanical deboning and products in which such poultry product is used. FSIS's current regulations do not contain labeling provisions for such product produced by mechanical deboning. An advanced notice of proposed rulemaking was published on June 15, 1993, soliciting comments, information, scientific data, and recommendations concerning the need for rulemaking to establish regulations on the labeling of poultry products produced by mechanical deboning. All comments received in response to this notice will be addressed in the proposed regulations.

Significance: Agency Priority

Legal Authority: 21 USC 601 et seq; 21 USC 451 et seq

CFR Citation: 9 CFR 320; 9 CFR 381

Legal Deadline: None

Abstract: This proposed rule would amend the Federal meat and poultry products inspection regulations to require that all official establishments maintain certain records to identify all the sources of meat, poultry, and nonmeat and nonpoultry ingredients intended for use and used in meat and poultry products. The records maintained would track the slaughtering, processing and distribution of incoming poultry or poultry products, or livestock or carcasses or parts thereof, meat or meat food products, and any other ingredients used to prepare or process

poultry or meat food products in official establishments. Additionally, the Federal meat inspection regulations would be amended to require the date of production or similar coding on the immediate or shipping container of all meat or meat food products prepared in official establishments.

Final Rule Stage

322. REQUIREMENTS FOR FOREIGN COUNTRY IMPORT CERTIFICATION AND LIVE ANIMAL IMPORTATION

Significance: Agency Priority

Legal Authority: PL 99-198

CFR Citation: 9 CFR 327; 9 CFR 381

Legal Deadline: None

Abstract: This rule will respond to amendments to the Federal Meat Inspection Act by the Food Security Act of 1985. The amendments require that FSIS periodically certify residue control programs submitted by foreign countries desiring to export meat and poultry products to the United States. The amendments also provide the Secretary with the authority to issue an order prohibiting the importation of livestock for immediate slaughter that have been administered a drug or antibiotic banned for use in the United States.

323. INCREASE IN USE LEVELS OF SODIUM CITRATE AS AN ANTICOAGULANT

Legal Authority: 21 USC 601 et seq

CFR Citation: 9 CFR 318

Legal Deadline: None

Abstract: This rule will amend the Federal meat inspection regulations to increase the level of sodium citrate allowed to be used as an anticoagulant in blood from 0.2 percent to 0.5 percent. FSIS has been petitioned by American Meat Protein Corporation,

Ames, Iowa, to approve an increased use level of this substance as an anticoagulant in blood to 0.5 percent to facilitate the cleaning of equipment and the separation of red blood cells from plasma, as well as to improve sanitation.

324. USE OF SORBITOL AS A FLAVORING AGENT IN SPECIFIC MEAT PRODUCTS

Legal Authority: 21 USC 601 et seq

USDA—FSIS

Final Rule Stage

CFR Citation: 9 CFR 318

Legal Deadline: None

Abstract: This rule will amend the Federal meat inspection regulations to permit the use of sorbitol to reduce charring in pizza toppings and other cured meat products subject to severe heat treatment. FSIS was petitioned by Quality Sausage Company, Inc., Dallas, Texas, to approve the use of sorbitol at a level of 2.0 percent of the product formula.

325. PFF FOR TURKEY HAM

Legal Authority: 21 USC 451 et seq

CFR Citation: 9 CFR 381

Legal Deadline: None

Abstract: This rule will amend the poultry products inspection regulations to permit the use of added water in turkey ham. The new standard provides for several categories of products that are delineated according to the protein content on a fat-free basis. FSIS was petitioned by the National Turkey Federation, Reston, Virginia, to establish protein fat-free values for turkey ham to promote product standardization and permit producers of turkey ham to compete more equitably with pork producers. This rule will replace the current provision which limits the amount of added water and other substances contained in turkey ham products by requiring the weight of the finished product to be no more than the original weight of the turkey thigh meat used prior to curing.

326. IMPORTED CANADIAN PRODUCT; PROVISION FOR "STREAMLINED" INSPECTION PROCEDURES; EXEMPTION FROM OFFICIAL MARK OF INSPECTION

Significance: Agency Priority

Legal Authority: 21 USC 451 et seq; 21 USC 601 et seq

CFR Citation: 9 CFR 327; 9 CFR 381

Legal Deadline: None

Abstract: This rule amended the Federal meat and poultry products inspection regulations to provide "streamlined" inspection procedures for the reinspection of Canadian meat and poultry products and to exempt Canadian meat and poultry products offered for importation from the requirement that such product and/or containers of product be marked with the official mark of inspection once they are passed for entry into the United States. These actions stemmed from the Canada-United States Free Trade Agreement Implementation Act of 1988, Pub. L. 100-449. These actions specifically responded to one goal of the Agreement whereby both countries are charged with liberalizing agriculture trade practices by seeking ways to eliminate technical or procedural requirements which now may serve to impede trade in agricultural products.

327. USE OF TRICALCIUM PHOSPHATE AS A SEQUESTRANT IN MECHANICALLY DEBONED CHICKEN

Legal Authority: 21 USC 451 et seq

CFR Citation: 9 CFR 381

Legal Deadline: None

Abstract: This rule will amend the poultry products inspection regulations to permit the use of tricalcium phosphate in mechanically deboned chicken during the dehydration process to preserve the color of such products. Use of tricalcium phosphate at a proposed level not to exceed 2 percent would sequester the iron present in the blood of mechanically deboned chicken during the dehydration process, thus preventing discoloration (browning) of the product. The regulation is in response to a petition submitted by Henningsen Foods, Inc., Omaha, NE.

328. POLICY FOR DIFFERENTIATING BETWEEN CALVES AND ADULT CATTLE

Significance: Agency Priority
Legal Authority: 21 USC 601 et seq
CFR Citation: 9 CFR 309; 9 CFR 310
Legal Deadline: None

Abstract: This rule will amend the Federal meat inspection regulations to define the term "calf" for inspection purposes, as a young bovine animal whose weight does not exceed 750 pounds live, or whose dressed carcass weight does not exceed 450 pounds. In addition, the rule will provide that certain indicators of maturity, such as teeth and bone formation, be used in conjunction with weight to determine if the animal is a "calf."

329. USER FEES FOR LABORATORY ACCREDITATION

Significance: Agency Priority
Legal Authority: 21 USC 601 et seq; 21 USC 451 et seq; PL 101-624
CFR Citation: 9 CFR 318; 9 CFR 381; 9 CFR 391
Legal Deadline: None

Abstract: This proposed rule would amend the Federal meat and poultry products inspection regulations to provide for user fees for FSIS laboratory accreditation. The Agency's accredited laboratory program was established in response to the demand by the meat

and poultry industry for acceptable alternate facilities (other than FSIS-operated laboratories) for chemical analysis of official samples. Under technical amendments to the 1990 Farm Bill, FSIS is authorized to collect user fees to offset the cost of its Accredited Laboratory Program. Under FSIS's program, laboratories may be accredited for food chemistry analysis and/or specific chemical residue analysis, including chlorinated pesticide residues, of official samples collected for meat and poultry inspection purposes. It should be noted that FSIS's Accredited Laboratory Program is different from the Department's Accredited Laboratory Program. The Department's Program was established by the 1990 Farm Bill. The Department's Program would also be funded by user fees and would accredit laboratories to conduct residue testing of various agricultural products.

330. PROMINENT LABELING DISCLOSURES ON MEAT AND POULTRY PRODUCTS

Significance: Agency Priority
Legal Authority: 21 USC 451 et seq; 21 USC 601 et seq
CFR Citation: 9 CFR 317; 9 CFR 318; 9 CFR 319; 9 CFR 381
Legal Deadline: None

Abstract: This rule will amend the Federal meat and poultry products inspection regulations to eliminate the requirement that the names and use of certain substances added to specific meat and poultry products be prominently disclosed on the product label as qualifiers to the product name.

FSIS believes that qualifying phrases can be eliminated because they duplicate information provided in ingredients statements.

331. NUTRITION LABELING: USE OF "HEALTHY" AND SIMILAR TERMS ON MEAT AND POULTRY PRODUCT LABELING

Significance: Agency Priority
Legal Authority: 21 USC 601 et seq; 21 USC 451 et seq
CFR Citation: 9 CFR 317; 9 CFR 381
Legal Deadline: None

Abstract: This rule will amend the Federal meat and poultry products inspection regulations to permit the use of the term "healthy" or any other derivative of the term "healthy," such as "healthful" or "healthier," on the labeling of meat and poultry products. On January 6, 1993, FSIS published a proposed rule soliciting comments on the appropriateness and usefulness of the term "healthy" on the labeling of meal-type products, and requested specific information on the criteria for the use of such term. This action was the result of a proposed rule titled "Nutrition Labeling of Meat and Poultry Products" published November 27, 1991, which was made final on January 6, 1993.

RIN: 0583-AB63

Abstract: This proposed rule would amend the Federal meat and poultry products inspection regulations to make safe-handling instructions mandatory on the labeling of all raw or not-fully-cooked meat and poultry products. The instructions would cover safe storage of raw product, prevention of cross-contamination, suggested cooking temperatures, indications of doneness, and proper handling of leftovers. This action would inform consumers on what actions to take to reduce the risk of illness from possible bacterial contamination of raw meat and poultry products.

Abstract: This final rule effects the regulations of the Commodity Credit Corporation (CCC) regarding the use of "direct credit." The CCC is issuing this final rule which deletes the regulations for the noncommercial risk assurance programs (GSM-101) and amends the regulations for financing of sales of agricultural commodities (GSM-5), the CCC intermediate credit export sales program for breeding animals (GSM-201) and the CCC intermediate credit export sales program for foreign market development facilities (GSM-301). The amendments to the GSM-5, GSM-201 and GSM-301 Programs are made to incorporate material required by provisions of the Agricultural Trade Act of 1978, as amended by the Food, Agriculture, Conservation, and Trade Act of 1990 (P.L. 101-624).

350. REGULATIONS GOVERNING THE FINANCING OF COMMERCIAL SALES OF AGRICULTURAL COMMODITIES (P.L. 480 TITLE I PROGRAM)

Legal Authority: 7 USC 1701 to 1705; 7 USC 1736 (a); 7 USC 1736 (c); 7 USC 5676; EO 12220

CFR Citation: 7 CFR 17

Legal Deadline: None

Abstract: The proposed rule would clarify the interim rule published Feb. 1, 1991 in response to the 1990 Food, Agriculture, Conservation, and Trade Act; it would change the basis for demurrage/despatch computations and the distribution of despatch; and it would limit brokerage payments to country agents and expand U.S. Government access to records. These actions would reduce the possibility of conflicts of interest, expedite loading of commodities, increase competition for ocean transportation and reduce ocean freight expenditures under the PL 480 Title I program.

CFR Citation: 36 CFR 222, subpart A

Legal Deadline: None

Abstract: This rulemaking seeks to strengthen management of National Forest System rangelands by revising provisions for livestock grazing, improving program efficiency, and clarifying regulatory language. Rulemaking is being closely coordinated with the Bureau of Land Management. It will address a variety of subjects, including ecosystem management, livestock management prescriptions, grazing permit provisions

to promote good stewardship, unauthorized use, grazing permit grant policy, minimum permit size, fees for processing charges, debarment, and national goals and objectives.

352. WHISKEYTOWN-SHASTA-TRINITY NATIONAL RECREATION AREA

Legal Authority: 16 USC 472; 16 USC 551

CFR Citation: 36 CFR 292, subpart B

Legal Deadline: None

Abstract: The rules at 36 CFR 292, subpart B govern joint administration of the Shasta and Clair Engle-Lewiston

units of the National Recreation Area by the Forest Service and the Bureau of Reclamation. The rules also set forth standards for defining compatible private land uses within the National Recreation Area to govern decisions by local zoning authorities, or in the absence of such authorities, decisions on land uses by the Secretary of Agriculture. The review has focused on experience under the rules and whether they still serve the public interest in ensuring that development and management of the NRA meet congressional intent.

354. PROHIBITION ON MECHANICAL TRANSPORT AND OTHER ACTIVITIES IN WILDERNESS

Legal Authority: 16 USC 113 to 136; 16 USC 528 to 531; 16 USC 577 to 577c; 16 USC 1133

CFR Citation: 36 CFR 293.6(a); 36 CFR 261

Legal Deadline: None

Abstract: Except where specifically provided for, the Wilderness Act (16 USC 1133) prohibits both motorized equipment and mechanical transport. Mechanical transport includes devices such as bicycles, hang gliders, wheeled carts, and other items designed to carry people or supplies and powered by either "nonliving" or "living" power sources. The objective of this action is

to clarify the definition of mechanical transport in 36 CFR 293.6(a) and to make corollary revisions to the prohibitions applicable to wilderness use, including prohibiting competitive events and expanding the definition of aircraft to include hang gliders, parachutes and parasails. (FS 86-009)

355. APPLICATION PROCEDURES AND FEES FOR HYDROELECTRIC USES ON NATIONAL FOREST SYSTEM LANDS

Legal Authority: 16 USC 551; 43 USC 1761

CFR Citation: 36 CFR 251.54; 36 CFR 251.57

Legal Deadline: None

Abstract: A revision of Agency procedures is needed to reduce confusion regarding the role of the Forest Service in permitting hydroelectric uses on National Forest

USDA—FS

Proposed Rule Stage

System lands. The goal of the directives will be to establish procedures, compatible with the procedures of the Federal Energy Regulatory Commission (FERC) for obtaining various approvals and involvement of the Forest Service in a timely manner.

In addition, the directives will establish a fee system for hydroelectric uses as required by Title V, Section 501 of the Federal Land Policy and Management Act of 1976. A Notice of Proposed Policy was published 6/8/84 and comments were received. The proposed policy will take those comments into account.

356. LOCATABLE MINERALS

Significance: Agency Priority

Legal Authority: 16 USC 478; 16 USC 551; 43 USC 1701 et seq

CFR Citation: 36 CFR 228, subpart A

Legal Deadline: None

Abstract: Since the regulations were promulgated in 1974, certain legal requirements have changed due to the provisions of the Wilderness Act and recent court decisions; some sections of the regulations no longer apply and revisions and updating are necessary. Major changes proposed will specifically address the requirements for wilderness operations and, secondly, will clarify the mechanism for administering locatable mineral activities not conducted on mining claims but which are nevertheless authorized by the 1872 mining law.

CFR Citation: 36 CFR 261; 36 CFR 262

Legal Deadline: None

Abstract: The rules at 36 CFR part 261 declare the range of unacceptable public behavior when visiting or using National Forest System lands. Among topics covered are prohibitions on setting campfires in certain areas, unlawful cutting of trees, and other unlawful uses of resources and property of the National Forest System. Violations of these prohibitions carry legal penalties. The rules at 36 CFR part 262 address impoundment of property and rewards for information leading to arrest.

Review has examined the adequacy of the rules for administration of the National Forest System and whether changes in conditions, laws, or other factors require revision. The Agency has completed its review and is now preparing a proposed rule to revise the prohibitions.

358. REVISE SMALL TRACTS ACT REGULATIONS

Significance: Agency Priority

Legal Authority: 16 USC 521(c) to 521(i)

CFR Citation: 36 CFR 254, subpart C

Legal Deadline: None

Abstract: Implementation of the Agency's Small Tracts regulations has revealed an inadvertent inconsistency between the regulations at 36 CFR 254.35(f) and 254.41(a) and the legislative history of the Small Tracts Act of January 12, 1983. The regulations imply that the disposal of mineral fractions by sale can only be made in response to an application from an abutting landowner, thus discouraging the conveyance by sale to the public. The Act clearly authorizes sale of mineral fractions to the public through public sale, as well as individual applications, provided that certain conditions are met. The revisions will clarify the application of the Act to ensure that both individual applications and public sale are permissible means of disposing of qualifying tracts.

359. ISOLATED CABIN POLICY

Legal Authority: 16 USC 477 to 482; 16 USC 551

CFR Citation: 36 CFR 251

Legal Deadline: None

Abstract: Agency policy is to terminate isolated cabin authorizations on National Forest System land that were constructed without advance authorization and subsequently authorized by special use permit. These cabins are used for part or full-time occupancy. These cabins differ from

USDA—FS

Proposed Rule Stage

recreation residences which were established in tracts specific for this purpose and built with Agency approval and supervision. Isolated cabins originated in several ways, including encroachment and mining claims. They restrict management of the surrounding National Forest land and deprive the public from the use and enjoyment of the land actually occupied and the surrounding area. The action proposed is to see input from the public as to whether the present policy should be continued, or whether it should be revised so as to examine each isolated occupancy and determine whether, in the interest of fairness and equity, the cabin should be converted to a recreation residence. This proposal to revise current policy was originally included in proposed policy on recreation residences (RIN No. 0596-AB06). Reconsideration of the issues involved led to the decision (cont)

360. HELLS CANYON NATIONAL RECREATION AREA—PRIVATE LANDS

Legal Authority: PL 94-199, Sec 10(a)

CFR Citation: 36 CFR 292, subpart E (New)

Legal Deadline: None

Abstract: The Forest Service proposes to issue regulations concerning use of private lands in the Hells Canyon National Recreation Area (HCNRA) on the Oregon-Idaho border, as required in

Pub. L. 94-199. The intended effect of this action is to establish standards for use and development of privately owned lands within the HCNRA.

The standards are intended to achieve the following management objectives for the Recreation Area: (1) conservation and continuance of forest land for forest uses and farm land for farm uses; (2) maintenance and protection of the free flowing nature of rivers within the HCNRA; (3) conservation of scenic, wilderness, cultural, scientific, and other values contributing to the public benefit; (4) preservation, especially in the area generally known as Hells Canyon, of all features and peculiarities believed to be biologically unique; (5) protection and maintenance of fish and wildlife habitat; (6) protection of archaeological and paleontological sites; (7) preservation of historic sites associated with and typifying the economic and social history of the region (cont)

361. • SOLID WASTE DISPOSAL POLICY

Significance: Regulatory Program

Legal Authority: 16 USC 497; 43 USC 931(c)

CFR Citation: 36 CFR 251

Legal Deadline: None

Abstract: Solid waste disposal sites (sanitary landfills) on National Forest System lands present the potential for resource degradation, hazardous waste dumping, and future liability. A proposal for solid waste disposal is being developed to reflect changes which have occurred as a result of the Resource and Conservation Recovery

Act, the Comprehensive Environmental Response, Compensation, and Liability Act, and an increased knowledge of solid waste disposal. The proposal would prohibit the authorization of new sites and provide for the phase out of existing sites. During the phase out period authorizations would be amended to provide resource protection and limit the Government's potential liability. Adoption of this policy would reduce administrative costs associated with administration of solid waste disposal sites, limit future liability, and protect the resources of the National Forest System lands. The proposal would impact 110 sites currently authorized.

362. IRREVOCABLE LETTER OF CREDIT

Significance: Agency Priority

Legal Authority: 16 USC 472a; 16 USC 528 to 531; 16 USC 1600 et seq; 12 USC 1 et seq

CFR Citation: None

Legal Deadline: None

Abstract: In a 1987 court decision, a letter of credit issued in lieu of surety bond was found to be unenforceable because the person who signed the letter of credit did not have authority to do so and because the bank had violated State law in regard to limits of liability. Others were invalid because they exceeded the expiration date. To remedy this problem, the Forest Service is proposing to issue a requirement that the bank president certify as to the authority of the person signing the letter of credit and the conformance

USDA—FS

Proposed Rule Stage

with State and Federal statutes. An automatic extension of the expiration date would also be required.

363. DISPOSAL OF QUARTZ MINERALS ON THE OUACHITA NATIONAL FOREST

Legal Authority: PL 100-446, Sec 323; 30 USC 601; 30 USC 603

CFR Citation: 36 CFR 228, subpart C

Legal Deadline: None

Abstract: This regulation is a direct response to the direction in Section 323 of Public Law 100-446 which classified quartz mineral on the Ouachita National Forest in Arkansas as no longer subject to location under the General Mining Law of 1872. These materials are now to be managed in the same manner as common varieties of mineral materials under regulations prescribed by the Secretary of Agriculture. Publication of this proposal is being delayed until publication of the final rule defining common variety mineral materials (RIN 0596-AA44).

364. PRE-AWARD INFORMATION REQUIREMENTS

Legal Authority: 16 USC 472(a); 16 USC 618

CFR Citation: 36 CFR 223.101

Legal Deadline: None

Abstract: Recently, as the number of timber sale defaults has increased, the number of debarred purchasers has increased, and the Government has initiated a policy of only doing business with responsible parties, it is becoming commonplace for bidders to form new affiliates in order to continue to be awarded Forest Service timber sale contracts. Unless the bidder voluntarily identifies affiliates, the Agency must make the determination through a time consuming process prior to award, prior to determining if double downpayment rules apply, and prior to taking debarment action. This rule would require bidders to disclose, prior to award of sales, all affiliates, and to certify that none are suspended or debarred. Filing a false certification would be cause for contract cancellation and debarment action.

365. HELLS CANYON NATIONAL RECREATION AREA—USE OF NATIONAL FOREST LANDS

Significance: Agency Priority

Legal Authority: 16 USC 460(gg) Hells Canyon National Recreation Area

CFR Citation: 36 CFR 292, subpart F (New)

Legal Deadline: None

Abstract: In Oregon Natural Resource Council v Lyng, the 9th Circuit Court of Appeals ruled that the Secretary must promulgate regulations as required by the Hells Canyon National Recreation Act (HCNRA) governing federal and private land uses in the

HCNRA. The Department had argued that such rules were discretionary and the Agency's comprehensive management plan for the NRA, which was prepared as required by the Act, was sufficient to guide management of the area. As a result of the court's ruling, the risk of litigation to halt ongoing activities, particularly timber sales, is high. Accordingly, there is an urgent need to promulgate an interim rule governing management of the federal lands in the HCNRA. While many existing regulations governing National Forest System lands remain applicable to the Hells Canyon NRA, pending projects and plans are vulnerable to continued litigation until final rules are effective. An interim rule is the most expeditious way to effect rules. Public comment will be invited on the interim rule and will be considered in development of the final rule. (cont)

Timetable:

| Action | Date | FR Cite |

366. EXPANDED USE OF PROSPECTING PERMITS AND PREFERENCE RIGHT SALES FOR MINERAL MATERIALS

Legal Authority: 30 USC 601 et seq

CFR Citation: 36 CFR 228, subpart C

Legal Deadline: None

USDA—FS

Proposed Rule Stage

Abstract: Currently rules pertaining to prospecting permits and preference right negotiated sales apply only to minerals on acquired National Forest lands. This limitation is felt to encourage parties to locate mining claims on other National Forest lands under the mining laws of 1872, when it would be more appropriate to apply for a sale of mineral materials. This proposed rule would expand the use of prospecting permits to other National Forest System lands and responds to a recent change in the definition of mineral materials and clarification of those minerals that are subject to mining claims and those that are subject to sale.

367. CLARIFICATION AND REVISION OF APPEALABLE DECISIONS UNDER 36 CFR PART 251, SUBPART C

Legal Authority: 16 USC 472; 16 USC 551

CFR Citation: 36 CFR 251, subpart C

Legal Deadline: None

Abstract: The current rules at 36 CFR part 251 subpart C provide appeal procedures for holders of or certain applicants for land use and occupancy authorizations. Experience under this rule indicates a need to revise the rule as to purpose and scope and appealable decision. Questions have arisen on whether terms and conditions of the permit and routine administration of the permit by the Forest Service are appealable. In addition, the rule is silent on administrative review of decisions regarding recomputation of timber volume shares for small timber purchasers and decisions related to determination for the need for structural changes in a market area under the Small Business Timber Set Aside program. This rulemaking will seek to address the problems.

368. LAND AND RESOURCE MANAGEMENT PLANNING

Significance: Agency Priority

Legal Authority: 16 USC 1600 et seq; 5 USC 301

CFR Citation: 36 CFR 219

Legal Deadline: None

Abstract: This rulemaking will revise the regulations governing forest land and resource management planning to reflect agency experience in preparing initial forest plans as required by the National Forest Management Act. The rule will articulate and clarify the forest planning and decisionmaking process, propose ways to streamline plan amendment and revision, and, in general, adjust and fine tune the rule and its requirements to make the planning process more realistic, meaningful, and efficient.

369. GOVERNMENT CANCELLATION OF TIMBER SALE CONTRACTS

Significance: Agency Priority

Legal Authority: 16 USC 551

CFR Citation: 36 CFR 223.40; 36 CFR 223.116

Legal Deadline: None

Abstract: Current regulations governing cancellation of National Forest timber sale contracts do not adequately protect the Government's financial interests in the event the Forest Service is forced to cancel contracts due to events beyond its control arising from compliance with environmental statutes. This rulemaking would remove an unworkable compensation of damages formula, remove limits applicable to length of contract term, and establish a termination for environmental protection clause in timber sale contracts, a standard in most Federal procurement contracts.

370. CHANGE EMPHASIS AWAY FROM RESIDUAL VALUE APPRAISAL TO TRANSACTION EVIDENCE APPRAISAL AS THE PRIME METHOD OF APPRAISING NATIONAL FOREST TIMBER

Legal Authority: 16 USC 1600

CFR Citation: 36 CFR 223.60

Legal Deadline: None

Abstract: The emphasis will be changed in 36 CFR 223.60 away from the Residual Value Appraisal method of appraising National Forest timber to the Transaction Evidence Appraisal method. The basic procedure will be the Transaction Evidence Appraisal system, except in Region 10 where, Residual Value appraising will continue to be used in light of the two long-term contracts that are currently in place. Other uses of the Residual Value and other appraisal systems may be used subject to approval from the Chief of the Forest Service.

USDA—FS

Proposed Rule Stage

The present 36 CFR 223.60 leans heavily to the Residual Value Appraisal System. National direction has been given to convert to the Transaction Evidence Appraisal system by October 1, 1992; thus the emphasis in the CFR needs to be changed.

371. SPECIES SURPLUS TO DOMESTIC MANUFACTURING NEEDS

Legal Authority: 16 USC 620 et seq

CFR Citation: 36 CFR 223.200

Legal Deadline: None

Abstract: This proposed rule would amend subpart F, part 223 of title 36 of the Code of Federal Regulations, section 223.200, to list species proposed to be surplus to domestic manufacturing needs.

This proposed rule would implement a portion of section 489(b) of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 USC 620 et seq). Section 489(a) of the Act provides that no person who acquires unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States may export such timber from the United States, or sell, trade, exchange or otherwise convey such timber from the United States, unless such timber has been determined under subsection (b) to be surplus to the needs of timber manufacturing facilities in the United States. Section 489(b) of the Act provides that the prohibition contained in subsection (a) shall not apply to specific quantities of grades and species of unprocessed timber originating in Federal lands which the Secretary concerned determines to be surplus to domestic manufacturing needs, issued in accordance with section 553 of title 5, USC.

372. PROPOSED POLICY NATIONAL FOREST SYSTEM LAND AND RESOURCE MANAGEMENT PLANNING FOREST SERVICE MANUAL (FSM 1920)

Significance: Agency Priority

Legal Authority: 16 USC 1600 et seq

CFR Citation: None

Legal Deadline: None

Abstract: The proposed manual policy would incorporate all direction for land and resource management planning into one Forest Service Manual chapter (FSM 1920). The proposed policy would clarify how the revised land and resource management planning regulations at 36 CFR 219 will be implemented. The proposal will focus on implementation of forest plans: monitoring, evaluation, amendment, and revision of forest plans; and clarifying the relationship between forest planning and project decisionmaking. The agency plans to make this policy available for review during the comment period on the proposed revised rule (see entry for 0596-AB20).

373. USE OF FIXED ANCHORS FOR ROCK CLIMBING IN WILDERNESS

Significance: Agency Priority

Legal Authority: 16 USC 1121; 16 USC 1131 to 1136

CFR Citation: 36 CFR 261.16; 36 CFR 293.9

Legal Deadline: None

Abstract: The sport of rock climbing is often accomplished by using fixed, rather than removable, metal bolts and anchors. These bolts are considered permanent improvements when installed. These improvements may detract from the wilderness experience and are not always compatible with management of the wilderness resource. The Forest Service proposes to reduce impacts on the wilderness resource by regulating use of fixed anchors for rock climbing in wilderness administered by the agency so that rock climbing occurs in a manner compatible with wilderness management. Alternatives to the proposed action are to prohibit all use of fixed anchors in wilderness, or permit unrestricted use of fixed anchors.

375. • EXERCISE OF OUTSTANDING MINERAL RIGHTS

Significance: Regulatory Program

Legal Authority: 16 USC 478; 16 USC 1613; 30 USC 181; 30 USC 228; 43 USC 1740

CFR Citation: 36 CFR 228, subpart F

Legal Deadline: NPRM, Statutory, December 24, 1992.

Abstract: This subpart will set forth the rules by which the Forest Service will carry out its statutory responsibilities for the management oil and gas operations involving outstanding mineral rights on National Forest System lands within the Allegheny National Forest. These rules will, as

required by the energy bill, PL 102-486, identify that information an owner of outstanding mineral rights must submit to the Forest Service 60 days prior to beginning operations and how the Forest Service will review such information.

The Forest Service did not consider other alternatives because these regulations are mandated by law. Public costs are insignificant but public benefits could be substantial in that Forest Service and industry cooperation should be enhanced.

Significance: Regulatory Program

Legal Authority: 16 USC 460bbb(6); 16 USC 478; 16 USC 551

CFR Citation: 36 CFR 292, subpart G

Legal Deadline: None

Abstract: This subpart will set forth the rules by which the Forest Service will carry out its statutory responsibilities for the management of mineral operations on National Forest System lands within the Smith River National Recreation Area, Six Rivers National Forest. These rules will, as required by the Smith River National Recreation Area Act (PL 102-612), promote and protect the recreation opportunities but still allow for mineral operations to take place. The Forest Service did not consider other alternatives because these regulations are mandated by law. Public costs are insignificant, but the public benefits could be substantial in that the Forest Service and industry cooperation should be enhanced.

377. • MARKET-RELATED TERM ADDITIONS

Significance: Agency Priority

Legal Authority: 16 USC 618(b)

CFR Citation: 36 CFR 233.52 (Revision)

Legal Deadline: None

Abstract: Based on General Accounting Office Testimony Report Number, T-RCED-92-58, 04/28/92, the Secretary of Agriculture agreed to reexamine the use of the Bureau of Labor Statistics unadjusted indices to determine whether wood product prices showed a drastic decline. The Secretary of Agriculture indicated the Forest Service would develop and publish for comment a proposed rule to use an alternative method to determine whether wood prices have drastically declined and warrant granting of a Market-Related Contract Term Addition. The proposed rulemaking will propose using seasonally adjusted producer price indices, adjusted to a constant dollar base, where available, to determine whether a drastic reduction in wood product prices occurred.

Significance: Agency Priority
Legal Authority: 16 USC 618(b)
CFR Citation: 36 CFR 223.50 (Revision); 36 CFR 223.53 (New)
Legal Deadline: None

Abstract: This proposed rule will provide for extension of certain National Forest System (NFS) timber sale contracts to allow upon request harvest of damaged timber located on other public or private lands which are in need of urgent removal because of catastrophic events beyond the control of the landowner. Catastrophic event which may result in the need for urgent removal of damaged timber include, but are not limited to, fire, flood, insect and disease infestations, drought, and windthrow. This proposed rule will also change Title 36 Code of Federal Regulations (CFR) 223.50, to provide for adjusting periodic payment determination dates that have not been reached when an urgent removal extension is granted.

Final Rule Stage

380. IMPROVING FINANCIAL SECURITY OF TIMBER SALE CONTRACTS

Significance: Regulatory Program; Agency Priority
Legal Authority: 16 USC 472a
CFR Citation: None
Legal Deadline: None

Abstract: The Forest Service proposes to strengthen the Government's contract financial position by: the elimination of the \$500,000 performance bond ceiling; increasing the bid guarantee to 10 percent of the advertised value; assessing damages for contract repudiation based on resale value; and conditions. In addition, the Forest Service is proposing to increase the amount of contract security to deter

speculative bidding, decrease the potential for contract defaulting, and provide additional guarantee for payment in the event of default damage claims. Following notice and comment, these changes will be issued in the form of instruction to agency contracting officers in the Forest Service Directive System.

382. INDIAN ALLOTMENTS ON NATIONAL FOREST SYSTEM LANDS

Significance: Agency Priority

Legal Authority: 16 USC 472; 16 USC 551; 16 USC 1603; 43 USC 1740; 25 USC 337

CFR Citation: 36 CFR 254, subpart D (New)

Legal Deadline: None

Abstract: Objectives are to set forth Forest Service procedures and role in the regulation of Indian allotments on National Forest System land. The Indian Allotment Act, as amended, authorizes the Secretary of the Interior to make allotments of National Forest System lands to Indians for homesteading and agricultural and grazing purposes. The Forest Service has relied upon USDI rules and procedures at 43 CFR 2533 to govern

its involvement in Indian allotment cases. Litigation and a decision by the Interior Board of Land Appeals indicate the need for the Forest Service to set forth its own regulations when the Forest Service determines that lands are not chiefly valuable for agricultural and grazing purposes.

383. REVISE RULES GOVERNING SPECIAL USES OF NATIONAL FOREST SYSTEM LANDS AND RESOURCES AT 36 CFR 251 TO REMOVE AMBIGUITIES REGARDING FIRST AMENDMENT RIGHTS

Significance: Agency Priority

Legal Authority: 16 USC 472; 16 USC 551; 16 USC 1134; 16 USC 3210; 30 USC 185; 43 USC 1740; 43 USC 1761 to 1771

CFR Citation: 36 CFR 251, subpart A; 36 CFR 251, subpart B; 36 CFR 251, subpart E (New); 36 CFR 251, subpart F (New)

Legal Deadline: None

Abstract: A Federal District Court has ruled that existing regulations discriminate against groups who wish to gather on National Forests to exercise their first amendment rights of assembly and free speech. The proposed rule will seek to remove ambiguities regarding these first amendment rights.

The Agency is reviewing the rules of other Federal land managing agencies for possible approaches and is considering establishing separate rules for authorizing short-term, noncommercial uses of National Forests.

There will be no additional costs as a result of the proposed rule change. The

benefit will be that the Forest Service will be able to adequately regulate large group use on the National Forests in a manner that ensures protection of the public health and safety and National Forest resources.

384. SURETY BOND FORM REVISION

Significance: Agency Priority

Legal Authority: 31 USC 9301 to 9309; 31 USC 223 to 225

CFR Citation: None

Legal Deadline: None

Abstract: Following a period of high-priced timber sales bid prior to 1982, the Forest Service experienced a number of contract defaults on these sales. Subsequently, the Forest Service has had difficulty collecting from some sureties on the bonds guaranteeing performance on these sales. As part of a financial security initiative affecting future sales, the Forest Service is proposing to revise the payment and performance bonds to clarify surety's obligation in regard to what is being guaranteed, when payment is due in case of default, what additional charges will be assessed if payment is not made when due and when collection action may be suspended. Other alternatives include eliminating surety bonds as a form of security, reducing surety guarantee to mid-point and periodic payment and retention of current bond forms. Upon adoption the final revised bond forms will be issued for use by Forest Service Contracting and Fiscal Officers for future timber sale contracts.

Significance: Agency Priority
Legal Authority: 16 USC 497
CFR Citation: 36 CFR 251
Legal Deadline: None
Abstract: The policy for administering recreation residences on National Forest lands was adopted August 16, 1988 (53 FR 30924) and subsequently appealed under the administrative appeal process (36 CFR 211.18). In rendering his decision on the appeal the Assistant Secretary of Agriculture for Natural Resources and Environment suspended certain provisions related to tenure and the offering of in-lieu sites; designated the remaining features interim policy; and directed the Chief of the Forest Service to review and reconsider the entire policy (54 FR 23499: June 1, 1989). The policy is being reformulated and consideration given to public comments received. The purpose of the policy is to improve the administration of recreation residence permits and implement a revised fee schedule that obtains fair market value for the use. The policy affects about 15,800 permittees.

387. FEDERAL TIMBER EXPORT AND SUBSTITUTION RESTRICTIONS (COMPREHENSIVE REVISION)
Significance: Agency Priority
Legal Authority: 16 USC 620 to 620j
CFR Citation: 36 CFR 223, subpart B; 36 CFR 223, subpart C; 36 CFR 223,

subpart D; 36 CFR 223, subpart F; 36 CFR 261, subpart A
Legal Deadline: Final, Statutory, May 20, 1991.
Abstract: These rules are necessary to carry out the restrictions placed on the export of unprocessed timber from Federal lands and the restrictions on the direct and indirect purchasing of Federal logs to be used in substitution for the export of unprocessed timber originating from private lands. The rules are mandated by the Forest Resources Conservation and Shortage Relief Act of August 20, 1990. The Act calls for various rules to be issued. The agency anticipates several rulemakings to achieve implementation of the act. See RIN 0596-AB25 for related rulemaking.

388. BELOW-COST TIMBER SALE PROGRAM POLICY AND GUIDELINES
Significance: Agency Priority
Legal Authority: 43 USC 1764
CFR Citation: None
Legal Deadline: None
Abstract: The Forest Service is proposing a policy and implementing guidelines to address below-cost timber sale programs on individual National Forests. The policy would be issued to Forest Service field employees, would address the costs and revenues associated with the management of National Forest timber sale programs, and would require use of the Timber Sale Program Information Reporting

USDA—FS

Final Rule Stage

System to assess each National Forest timber sale program.

389. NATIONAL FOREST SYSTEM NOTICE; COMMENT AND APPEALS PROCEDURES

Legal Authority: 16 USC 551; 16 USC 472

CFR Citation: 36 CFR 215

Legal Deadline: None

Abstract: This rule responds to Public Law 102-381, section 322, Forest Service Decisionmaking and Appeals Reform. This rule establishes procedures to require public notice and opportunity to comment on certain Forest Service actions for which environmental documentation is required. This rule establishes new appeal procedures in accord with those specified in Pub. L. 102-381, for certain actions which implement forest land and resource management plans. In addition, this rule recodifies the agency's administrative appeal process at 36 CFR part 217 for appeals of approvals or amendments of regional guides, and approval, significant amendment, and revision of forest land resource management plans to 36 CFR part 215, subpart C. The intended effect is to comply with the new law, expand opportunities for pre-decisional involvement of the public in Forest Service decisionmaking, and to minimize delay in providing a stable supply of resources to society.

390. STATE AND PRIVATE FORESTRY ASSISTANCE STEWARDSHIP INCENTIVE PROGRAM

Significance: Agency Priority

Legal Authority: 16 USC 2101 et seq

CFR Citation: 36 CFR 230

Legal Deadline: None

Abstract: This final rule would incorporate any changes resulting from public comments on the interim rule published December 4, 1991. The interim rule established the interim procedures for administration of the Stewardship Incentive Program. The Program is intended to encourage private landowners, through cost-share assistance, to manage their forest lands for economic, environmental, and social benefits. Only two alternatives were considered in detail: (1) to implement the Program in accordance with 16 USC 2101, et seq, and (2) not to implement the Program, in which case there would be no accelerated program for multiple resource management on nonindustrial private forest lands. The overall effects of the Program over time will be environmentally beneficial by enhancing wetlands, wildlife habitat, forest health, forest productivity, and recreation. The Program will help meet future demand for commodity and noncommodity forest resources. There

are no potential negative impacts anticipated for the Program.

391. SPECIAL-USE APPLICATIONS AND ADMINISTRATION OF SPECIAL-USE AUTHORIZATIONS

Significance: Agency Priority

Legal Authority: 43 USC 1764; 31 USC 483(a); 30 USC 181 Mineral Leasing Act; 16 USC 551

CFR Citation: 36 CFR 251(b)

Legal Deadline: None

Abstract: The Forest Service proposes to amend the regulations governing the use and occupancy of National Forest System lands to minimize application expenses, streamline and make more efficient environmental analysis of special use proposals, provide the ability to use one-time payments for easements as presently used in the market place, limit certain liability requirements to amounts determined by a risk assessment, make certain definitions more explicit, and clarify direction on renewal of existing special use regulations. The intended effect is to reduce costs to proponents and the agency, expedite decisionmaking, and administer authorizations in a more "user friendly" manner by removing certain requirements deemed unnecessary and/or outdated.

392. • REVISE LAND STATUS REGULATIONS

Significance: Agency Priority

Legal Authority: 5 USC 552; 16 USC 4721; 16 USC 521; 16 USC 1603

CFR Citation: 36 CFR 200.12

Legal Deadline: None

Abstract: Regulations adopted at 36 CFR 200.12 in 1991 (56 FR 29181) have resulted in confusion and possible conflict with regulations of the Bureau of Land Management, USDI, pertaining to public land records. The final rule would revise the 1991 regulations to clarify the relationship between the Forest Service's Land Status Records System and the Bureau of Land Management's Public Lands Record System. The intended effect of the regulations is to expedite the process of authenticating records in court proceedings and to provide adequate notice to the public of the content and availability of the records.

 FORFEITURE AND DENIAL OF
 PROPERTY RIGHTS**

Significance: Agency Priority
 Legal Authority: 7 USC 2024(g)
 CFR Citation: 7 CFR 271.5
 Legal Deadline: None

Abstract: The USDA Office of Inspector
 General is proposing this rule to
 implement section 15(g) of the Food
 Stamp Act of 1977, as amended by
 section 124 of the Food Stamp Act
 Amendments of 1980, Public Law 96-
 249, which authorizes the Secretary of
 Agriculture to subject to forfeiture and

denial of property rights any nonfood
 items, moneys, negotiable instruments,
 securities, or other things of value that
 are furnished or intended to be
 furnished by any person in exchange
 for food coupons, authorization cards,
 or other program benefit instruments or
 access devices in any manner not
 authorized by the Act or regulations
 issued pursuant to the Act, 7 USC
 2024(g). The proposed rule would
 establish procedures concerning the
 handling of forfeited property to be
 followed by the Inspector General and
 other Federal Law enforcement
 officials. Violations of the Food Stamp
 Act may cause the Government to

acquire property subject to forfeiture
 and denial of property rights.

Legal Deadline: None

Abstract: The Agency has proposed removal of sections 201.64 and 201.66 which prohibit specified business getting and employment practices of

selling agencies. Structural changes in the livestock marketing industries have reduced the importance of these regulations. The Agency proposes to remove sections 201.72(1), 201.78(1), 201.106(1) and 201.106(2) which provide outdated procedures for testing scales. Section 201.56 will be amended to improve clarity and user friendliness by removing examples concerning advertising and promotion allowances which create confusion. Eight other sections (201.11, 201.42, 201.43, 201.67, 201.72, 201.97, 201.99 and 203.10) have been reviewed and it has been determined that they should be retained in their present form.

Legal Authority: 42 USC 1480; 5 USC 301

CFR Citation: 7 CFR 1980, subpart A; 7 CFR 1980, subpart E

Legal Deadline: None

Abstract: This action is to implement a new program provided for in PL 102-341. The program will provide guaranteed lines of credit, where an emergency has been declared, for the purchase of grain for the production of alcohol fuel at cooperative facilities as necessary to meet deliveries under contract. The legislation provides for a program level of \$30,000,000 to remain available until expended but not beyond Fiscal Year 2009. Plans are to implement the program through a revision of the existing regulations for the Business and Industry (B&I) Guaranteed loan program, using the forms and procedures of the B&I program to the extent that they are appropriate.

Legal Deadline: Other, Statutory, May 28, 1991.

The Extension Service had \$1 million for the prog. in its FY '93 budget and has funds for FY '94.

Abstract: The Rural Development Administration proposes this action to

add a new regulation implementing a grant program to fund the establishment and operation of centers for rural technology or cooperative development. Grants will be available to public bodies and nonprofit organizations. This action is necessary to comply with PL 101-624. An aim of this program is to stimulate nonfederal participation in economic development activities and allow grant funds to reach a broad range of rural economic development efforts.

404. • LOCAL TECHNICAL ASSISTANCE AND PLANNING GRANTS

Legal Authority: 7 USC 1989; 7 USC 1926

CFR Citation: 7 CFR 4284; 7 CFR 1951; 7 CFR 2.23; 7 CFR 2.70

Legal Deadline: Other, Statutory, May 28, 1991.

Statutory date for implementation of program. In order to implement, both funds and regulations must exist. This program has not yet been funded.

Abstract: The Rural Development Administration (RDA) proposes this action to add a new regulation implementing a grant program to fund local technical assistance and planning activities in rural areas for the purpose of improving economic conditions in the areas. Grants will be available to public bodies and nonprofit organizations. This action is necessary

to comply with P.L. 101-624. Grants may be used for technical assistance and training for small businesses, identifying and analyzing business opportunities in rural areas, establishing business support centers, conducting local or multi-county economic development planning, coordination of economic development activities, and leadership development training of local government officials. RDA proposes to fund up to 75 percent of any project funded and require at least a 25 percent matching share from the applicant.

405. SOLID WASTE MANAGEMENT GRANTS

Legal Authority: PL 101-624, sec 2325

CFR Citation: 7 CFR 4284 subpart I; 7 CFR 1942 Subpart J

Legal Deadline: None

Abstract: FmHA implemented this authority by adding it to the existing Technical Assistance grant program for water and waste disposal facilities. In order to prevent confusion and to further refine the requirements of the program, FmHA is proposing to publish a separate regulation for two programs.

408. • LIQUIDATION OF LOANS AND ACQUISITION, MANAGEMENT AND DISPOSAL OF SECURITY PROPERTY

Legal Authority: 7 USC 1989; 42 USC 1480; 16 USC 1005; 5 USC 301
CFR Citation: 7 CFR 4287-A; 7 CFR 4287-B; 7 CFR 1951-E; 7 CFR 1955-A; 7 CFR 1955-B; 7 CFR 1955-C; 7 CFR 2.23; 7 CFR 2.70

Legal Deadline: None

Abstract: Farmers Home Administration (FmHA) regulations are amended to remove references to the Programs administered by the Rural Development Administration (RDA).

This action will provide RDA regulatory guidance for the liquidation of loans that are in non-compliance with loan agreements. As a result of such action, security property may be taken into inventory. The regulation outlines the policies and procedures for the management and disposition of property acquired by the agency. This change will also clarify the processing of over payments, under payments and refunds, subordinations, and releases from liability.

USDA—REA

Proposed Rule Stage

Abstract: REA is proposing to amend its regulation concerning general policies for telephone loans to provide for an increase in the Times Interest Earned Ratio (TIER) requirement when considering making either a concurrent REA - Rural Telephone Bank (Bank) loan or a 100 percent Bank loan. The primary objective of this proposed rule is to ensure that available funds are allocated equitably among borrowers. By increasing the TIER requirement for eligible Bank loans, REA expects to achieve maximum use of REA and Bank funds available.

432. • RURAL ECONOMIC DEVELOPMENT LOAN AND GRANT PROGRAM: GRANTS

Legal Authority: 7 USC 901 et seq; 7 USC 950 aaa et seq

CFR Citation: 7 CFR 1703, subpart B

Legal Deadline: None

Abstract: REA is proposing to amend its Rural Economic Development Loan and Grant Program in order to reflect additional information for the grant portion of the regulation. Previously, changes to the loans portion of this regulation had been published as a final rule on September 25, 1992. The amendment would add and revise procedures for approving and administering grants and would clarify eligible uses of grant funds, supplemental funds requirements, and administrative requirements for grant funds.

USDA—REA

Proposed Rule Stage

Abstract: The Rural Electrification Administration (REA) proposes to amend its regulation concerning general policies for telephone loans to make consistent for all telephone borrowers the adjusted net worth to assets requirement set forth in the mortgage between REA and its borrowers. The proposed rule would establish at 10 percent, the percentage of adjusted assets used in determining both the borrower's allowable distribution of capital and certain reporting requirements. This percentage would be incorporated into mortgages and would also apply to borrowers with outstanding loans regardless of the percentage stated in their existing mortgages.

436. • PRESERVATION OF RECORDS ACCOUNTING REQUIREMENTS FOR REA ELECTRIC BORROWERS

Legal Authority: 7 USC 901 et seq

CFR Citation: 7 CFR 1767, subpart D

Legal Deadline: None

Abstract: The Rural Electrification Administration (REA) proposes to amend its regulation by adding a new subpart on Preservation of Records. Current REA policy on this subject is set forth in REA Bulletin 180-2, Manual for Preservation of Borrower's Records.

In addition to codifying these policies and procedures, revisions are being proposed to the existing policy that will establish the proper record media forms for record retention. Once the final is effective, REA Bulletin 180-2 will be rescinded.

456. FARMLAND PROTECTION POLICY ACT

Significance: Agency Priority

Legal Authority: 7 USC 4201

CFR Citation: 7 CFR 658

Legal Deadline: None

Abstract: This proposed rule amends part 658 of title 7 of the Code of Federal Regulations, which implements the Farmland Protection Policy Act (FPPA), 7 USC 4201-4209. Congress amended the FPPA through section 1255 of the Food Security Act of 1985, Pub. L. 99-198. The proposed

amendments contained in this proposed rule will: (1) Remove definitions from the existing rule that restated the act; (2) remove the applicability and exemption section that restated the Act; (3) remove the "Technical Assistance" section that restated the requirements of the Act; (4)

USDA—SCS

Proposed Rule Stage

require Federal agencies to return a copy of the "Farmland Impact Rating Form AD-1006," to USDA once the final decision is made on a proposed conversion, and inform USDA of progress in reviewing and revising their policy and procedures to protect farmland. This information will be used to make the annual report to Congress as required in the 1985 amendments to FPPA. Since the elimination of these sections of the existing rule was not included in the 1987 proposed rule,

and the fact that almost 4 years have passed since the proposed rule, this proposed rule is being published for additional public comments.

Semiannual Agenda of Regulations

AGENCY: Office of the Secretary, Commerce.

ACTION: October 1993 regulatory agenda.

SUMMARY: In compliance with Executive Order (E.O.) 12291 entitled "Federal Regulation" and the Regulatory Flexibility Act (Pub. L. 96-354), the Department of Commerce, in April and October of each year, publishes in the Federal Register an agenda of the rulemaking actions covered by section 1 of E.O. 12291 that the Department plans to conduct or review over the next 12 months. Rulemaking actions are grouped according to prerulemaking, proposed rules, final rules, and rulemaking actions completed since the April 1993 agenda. The purpose of the agenda is to provide information to the public on regulations currently under review, being proposed, or issued by the Department. The agenda is intended to facilitate comments and views by interested members of the public.

The Department's October 1993 regulatory agenda includes regulatory activities that are expected to be conducted during the period October 1, 1993, through September 30, 1994.

FOR FURTHER INFORMATION CONTACT:

Specific: For additional information about specific regulatory actions listed in the agenda, contact the individual identified as the contact person.

General: Comments or inquiries of a general nature about the agenda should be directed to Michael A. Levitt, Assistant General Counsel for

Legislation and Regulation, U.S. Department of Commerce, Washington, DC 20230; telephone: 202-482-0846.

SUPPLEMENTARY INFORMATION: E.O. 12291 requires all executive agencies to publish semiannually an agenda of those regulations that are under consideration pursuant to this order. By memorandum of June 14, 1993, the Office of Management and Budget (OMB) issued guidelines and procedures for the preparation and publication of the October 1993 Unified Agenda of Federal Regulations. The Regulatory Flexibility Act, 5 U.S.C. 602(a), requires agencies to publish, in April and October of each year, a regulatory flexibility agenda which contains a brief description of the subject area of any rule which is likely to have a significant economic impact on a substantial number of small entities.

Explanation of Information Contained in the Agenda

Within the Department, the Office of the Secretary and various operating units may issue regulations. Operating units, such as the Economic Development Administration, the Bureau of Export Administration, the International Trade Administration, the National Institute of Standards and Technology (NIST), the National Oceanic and Atmospheric Administration (NOAA), and the Patent and Trademark Office, issue the greatest share of the Department's regulations.

A large number of regulatory actions reported in the agenda are proposed or final Federal Information Processing Standards (FIPS) issued by NIST under Public Law 100-235. FIPS consist of standards and guidelines to improve Federal Government use and management of computers and information technology. The standards, while often of great use to industry and the public, apply only to the Federal Government. In developing the standards and guidelines and in providing technical guidance and coordination to Federal agencies, NIST works closely with private industry standard-setting organizations.

Another large number of regulatory actions reported in the agenda deal with

fishery management programs of NOAA's National Marine Fisheries Service (NMFS). To avoid repetition of programs and definitions, as well as to provide some understanding of the technical and institutional elements of the NMFS programs, a section on "Explanation of Information Contained in NMFS Regulatory Entries" is provided below.

Explanation of Information Contained in NMFS Regulatory Entries

The Magnuson Fishery Conservation and Management Act of 1976 (16 U.S.C. 1801 *et seq.*) (Act) governs the management of fisheries within the Exclusive Economic Zone (EEZ). The EEZ refers to those waters from the outer edge of the State boundaries, generally 3 nautical miles, to a distance of 200 nautical miles. Fishery Management Plans (FMPs) are to be prepared for fisheries which require conservation and management measures. Regulations implementing these FMPs regulate domestic fishing and foreign fishing where permitted. Foreign fishing can be conducted in a fishery for which there is no FMP only if a preliminary fishery management plan has been issued to govern that foreign fishing. Under the Act, eight Regional Fishery Management Councils (Councils) prepare FMPs or amendments to FMPs for fisheries within their respective areas. In the development of such plans or amendments and their implementing regulations, the Councils are required by law to conduct public hearings on the draft plans and to consider the use of alternative means of regulating.

The Council process for developing FMPs and amendments makes it difficult for NMFS to determine the significance and timing of some regulatory actions under consideration by the Councils at the time the semiannual regulatory agenda is published.

The DOC October 1993 regulatory agenda follows.

Dated: August 25, 1993.

Carol C. Darr,
Acting General Counsel.

DEPARTMENT OF COMMERCE (DOC)
Office of the Secretary (OS)

Proposed Rule Stage

461. CONTRACT CLAUSES AND SOLICITATION PROVISIONS FOR THE COMMERCE AUTOMATED SOLICITATION SYSTEM

Legal Authority: 41 USC 251 et seq;
PL 98-369; PL 98-577

CFR Citation: 48 CFR 1301 to 1353

Legal Deadline: None

Abstract: The Department of Commerce is currently reviewing standardized contract clauses and solicitation provisions for inclusion in a planned departmentwide automated solicitation system. A proposed amendment to the Commerce Acquisition Regulation

(CAR) would illustrate and incorporate these standardized clauses and provisions. This should ultimately be less burdensome to Department contractors and potential contractors, since the clauses and provisions would be used uniformly throughout the Department.

Timetable: Next Action Undetermined

Small Entities Affected: Undetermined

Government Levels Affected: Undetermined

Procurement: This is a procurement-related action for which there is no statutory requirement. There is no

paperwork burden associated with this action.

Agency Contact: Hugh L. Brennan, Acting Director, Office of Procurement, Department of Commerce, Office of the Secretary, 14th Street and Constitution Avenue NW., Washington, DC 20230, 202 482-1200

RIN: 0690-AA08

462. SOURCE EVALUATION PROCEDURES AND MISCELLANEOUS REVISIONS TO THE COMMERCE ACQUISITION REGULATION

Legal Authority: 41 USC 251 et seq

DOC-OS

Proposed Rule Stage

CFR Citation: 48 CFR 1301 to 1353
Legal Deadline: None
Abstract: The proposed amendment will revise the CAR to incorporate references to the Department's Acquisition Manual chapter on formal source selection procedures and will also add agency procedures in those areas of the CAR where the FAR specifies that agency procedures are required. In addition, the proposed amendment will update the CAR to conform with the latest policies and procedures of the FAR.
Timetable: Next Action Undetermined
Small Entities Affected: Undetermined
Government Levels Affected: Undetermined.

Procurement: This is a procurement-related action for which there is no statutory requirement. There is no paperwork burden associated with this action.
Agency Contact: Hugh L. Brennan, Acting Director, Office of Procurement, Department of Commerce, Office of the Secretary, 14th Street and Constitution Avenue NW., Washington, DC 20230, 202 482-1200
RIN: 0690-AA13

463. MODIFY REQUIREMENT IN THE COMMERCE ACQUISITION REGULATION TO PUBLISH PRESOLICITATION NOTICES IN THE COMMERCE BUSINESS DAILY FOR DOC PROCUREMENTS WHICH WILL BE PERFORMED IN FOREIGN COUNTRIES

Legal Authority: 41 USC 251 et seq
CFR Citation: 48 CFR 1305
Legal Deadline: None

Abstract: Revise the Commerce Acquisition Regulation, part 5, to reflect class deviation that presolicitation Commerce Business Daily notices are not required for foreign procurements. The current procedures are burdensome and delay the procurements needlessly. Most of the potential sources are foreign firms and publishing the presolicitation notices does not achieve Government goals of increasing competition among U.S. firms. The revised regulation will require notices to be provided if there are a significant number of U.S. firms doing business in the location and these firms are able to provide the required supplies or services.
Timetable: Next Action Undetermined
Small Entities Affected: None
Government Levels Affected: Undetermined

Procurement: This is a procurement-related action for which there is no statutory requirement. There is no paperwork burden associated with this action.
Agency Contact: Hugh L. Brennan, Acting Director, Office of Procurement, Department of Commerce, Office of the Secretary, 14th Street and Constitution Avenue NW., Washington, DC 20230, 202 482-1200
RIN: 0690-AA18

464. MODIFY THE COMMERCE ACQUISITION REGULATION TO USE A DEVIATION VERSION OF A FEDERAL ACQUISITION REGULATION CLAUSE ON THE BUY AMERICAN TRADE AGREEMENT ACTS

Legal Authority: 41 USC 251 et seq

CFR Citation: 48 CFR 1325; 48 CFR 1352
Legal Deadline: None
Abstract: Revise the Commerce Acquisition Regulation to authorize the use of a contract clause which deviates from the FAR Clause at 52.225-9 "Buy American Act-Trade Agreements Act-Balance of Payments Program" and the provision at 52.225-7 "Buy American Act-Trade Agreement Act-Balance of Payment Program Certificate." The revision will permit the case of a provision and clause which does not give U.S. firms a disadvantage against foreign firms. Recently the FAR provision and clause were found to be in violation of the Trade Agreement Act. The proposed CAR Regulation will remain in effect only until the FAR is revised to correct this problem. The rule is in accord with the governmentwide policies established by the Office of Federal Procurement Policy.

466. • BENCHMARK SURVEY OF U.S. DIRECT INVESTMENT ABROAD—1994

Legal Authority: 22 USC 3101 to 3108 Int'l Investment & Trade in Svcs Survey Act

CFR Citation: 15 CFR 806

Legal Deadline: None

Abstract: This action will amend rule 15 CFR 806.16 to provide for the conduct of the BE-10, Benchmark Survey of U.S. Direct Investment Abroad—1994, as required by the International Investment and Trade in

Services Survey Act, 22 USC 3101 to 3108 (see especially section 4(b) of the Act). The existing rule covers a similar survey for 1989 which has been completed and which the new survey will update. Changes to the rule for the 1994 survey—e.g., to change the exemption levels—will be considered.

467. CHANGE IN LONG-FORM EXEMPTION LEVEL FOR BE-15, ANNUAL SURVEY OF FOREIGN DIRECT INVESTMENT IN THE UNITED STATES

Legal Authority: 22 USC 3101 to 3108 Int'l Investment & Trade in Svcs Survey Act

CFR Citation: 15 CFR 806

Legal Deadline: None

Abstract: This action will amend existing rule 15 CFR 806.15 to raise the exemption level for reporting on the

long form in the BE-15, Annual Survey of Foreign Direct Investment in the United States, to \$50 million, from \$20 million. The exemption level is being raised to conform with the exemption level proposed for reporting on the long form in the 1992 BE-12, Benchmark Survey of Foreign Direct Investment in the United States.

468. CHANGE IN REPORTING REQUIREMENTS FOR FOREIGN-OWNED BANKS REPORTING ON QUARTERLY REPORT FORMS BE-605 AND BE-606B

Legal Authority: 22 USC 3101 to 3108 Int'l Investment & Trade in Svcs Survey Act

CFR Citation: 15 CFR 806

Legal Deadline: None

Abstract: This action will amend existing rule 15 CFR 806.15 to bring reporting by foreign-owned banks in the United States on quarterly report

forms BE-605, Transactions of U.S. Affiliate, Except an Unincorporated Bank, With Foreign Parent, and BE-606B, Transactions of U.S. Banking Branch or Agency With Foreign Parent into conformity with new reporting requirements under consideration for banks on the BE-12, Benchmark Survey of Foreign Direct Investment in the United States--1992.

469. REVISION OF FOREIGN TRADE STATISTICS REGULATIONS

Legal Authority: 13 USC 301 to 307

CFR Citation: 15 CFR 30.1 to 30.92

Legal Deadline: None

Abstract: Review of 15 CFR 30 for changes to conform to the harmonized system for imports and exports as mandated by the Omnibus Trade and Competitiveness Act of 1988. This review will combine elements of housekeeping changes, updating obsolete information, clarification, conforming to the harmonized system (including metric measurements), and bringing the system in line with current reporting practices. There should be no added burden or costs to the public because there are no additional information or reporting requirements.

The benefits of these changes will be to allow direct comparisons between U.S. imports and exports and to allow comparisons between trade balances of the United States and its major trading partners.

Additionally, section 30.54 will be revised to raise the exemption from Shipper's Export Declaration filing requirements for exports by mail from \$500 to \$2500. This will reduce the

reporting burden on the public, particularly small shippers.

470. CHANGE IN THE DEFINITION OF "GENERAL USE" SOFTWARE FROM TECHNICAL DATA TO COMMODITY

Legal Authority: 13 USC 301 to 307

CFR Citation: 15 CFR 30.1

Legal Deadline: None

Abstract: The Census Bureau proposes to change the definition of "General Use" software from technical data to

commodity. This will involve changes to the Foreign Trade Statistics Regulations. "General Use" software as a commodity will be valued on the transaction value and will be included in the merchandise trade statistics.

This will complement data collected in surveys by the Bureau of Economic Analysis on software as a service transaction. There will be some increase in reporting burden on exporters.

471. REQUIREMENT THAT SHIPPERS' EXPORT DECLARATIONS (SEDS) FOR SHIPMENTS FROM THE UNITED STATES TO PUERTO RICO BE COLLECTED IN PUERTO RICO

Legal Authority: 13 USC 301 to 307

CFR Citation: 15 CFR 30.20 to 30.24

Legal Deadline: None

Abstract: The Census Bureau proposes to change the Foreign Trade Statistics Regulations to require the collection of SEDs for shipments from the United States to Puerto Rico in Puerto Rico. In addition, the U.S. Customs Service will revise their regulations in order to implement this change. In order to

ensure compliance with the new regulations, the Puerto Rico Planning Board will fund positions in the Census Bureau Office and the U.S. Customs Service Office in Puerto Rico.

Data users will benefit through improved quality and completeness of the data for shipments from the United States to Puerto Rico. The Census Bureau does not anticipate any change in reporting burden from these revisions or any significant cost impact on the exporting community.

483. UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS TO STATE AND LOCAL GOVERNMENTS

Legal Authority: 5 USC 301

CFR Citation: 15 CFR 24

Legal Deadline: None

Abstract: On June 9, 1987, a notice of a proposed rule establishing governmentwide administrative requirements for grants and cooperative agreements to States and local governments was published in the Federal Register (52 FR 21820-21862). On March 11, 1988, a final rule was published in the Federal Register (53 FR 8033-8103) and was made effective October 1, 1988. Subsequently, a November 4, 1988, NPRM was published in the Federal Register (53 FR 44715-44819) that proposed to amend the common rule to incorporate requirements for grantees that are universities or nonprofit organizations. Based on comments received in response to the NPRM, however, OMB published a notice (55 FR 45289-45290) cancelling plans for such changes.

Currently, an interagency task force is now in the process of updating and revising the requirements for States and local governments, and Commerce regulations published at 15 CFR 24 will be amended to accommodate these modifications.

487. • ANTIDUMPING DUTIES;
CALCULATION OF WEIGHTED
AVERAGE DUMPING MARGIN

Legal Authority: 19 USC 1673 et seq

CFR Citation: 19 CFR 353.2(f)(2)

Legal Deadline: None

Abstract: The antidumping law requires that in a calculating dumping margins the Department make an addition to U.S. price for taxes which are rebated, or not collected, on merchandise exported to the United States. The Department's existing methodology ensures that this adjustment neither inflates nor deflates a simple (or absolute) dumping margin. However, in the case of a weighted-average dumping margin, which is used for a variety of purposes, the Department has found that under its current methodology, as set forth in 19 CFR 353.2(f)(2), the tax adjustment distorts the calculation. Specifically, because a weighted-average dumping margin is calculated by dividing aggregated dumping margins by aggregated U.S. prices, the inclusion of home market taxes in the denominator distorts the calculation. To correct this problem, the Department is considering

an alternative pursuant to which such taxes would be subtracting from the denominator (aggregated U.S. prices) when calculating the weighted-average dumping margin. This alternative would result in more accurate weighted-average dumping margins at virtually no cost to the Department or private parties.

488. • ANTIDUMPING DUTIES;
PERIOD OF INVESTIGATION

Legal Authority: 19 USC 1673 et seq

CFR Citation: 19 CFR 353.42(b)

Legal Deadline: None

Abstract: 19 CFR 353.42(b) currently requires that in an antidumping investigation the Department normally examine sales occurring during a period of at least 150 days prior to and 30 days after the first day of the month during which an antidumping petition is filed or, absent the receipt of a petition, an investigation initiated. Because this time period often does not coincide with the time periods used by firms for purposes of their own accounting records, the application of the current regulation often requires additional work on the part of all parties concerned, as well as the Department. Therefore, the Department is considering amending section 353.42(b) so that the standard investigatory period would be the two calendar quarters preceding the date on which a petition is filed (or investigation initiated). The Department believes that the efficiency and fairness of the antidumping law will be

DOC—ITA

Prerule Stage

enhanced at no additional cost to the Department or the private parties involved.

489. • PROCEDURES FOR IMPOSING SANCTIONS FOR PROVIDING FALSE CERTIFICATIONS IN AN ANTIDUMPING OR COUNTERVAILING DUTY PROCEEDING

Legal Authority: 5 USC 301; 19 USC 1677e(a)

CFR Citation: 19 CFR ch III

Legal Deadline: None

Abstract: Section 776(a) of the Tariff Act of 1930, as amended, requires any person providing factual information in an antidumping or countervailing duty proceeding to certify that the information is accurate and complete to the best of that person's knowledge. Since the enactment of section 776(a), the Department has encountered instances in which false certifications arguably have been made, but the Department has not had a system in place for dealing with such false

certifications. Therefore, the Department is considering promulgating regulations that would set out the standards for finding a certification to be false, the sanctions that may be imposed, and the procedures for imposing sanctions. The Department believes that the efficiency of the antidumping and countervailing duty laws as a remedy against unfair trading practices would be enhanced, at little additional cost, by creating an effective deterrent against false submissions of data.

490. • PROCEDURES FOR IMPOSING SANCTIONS FOR VIOLATION OF AN ANTIDUMPING OR COUNTERVAILING DUTY PROTECTIVE ORDER

Legal Authority: 5 USC 301; 19 USC 1677f

CFR Citation: 19 CFR 354

Legal Deadline: None

Abstract: The Department needs to enhance the administrative efficiency of its investigations of alleged violations

of administrative protective orders (APOs) and of the process for imposing sanctions for violations, as well as the fairness of the procedures to all concerned parties. The Department is considering (1) expedited procedures for certain APO violations that are uncontested, inadvertent, and technical; (2) providing for warnings to be issued where a finding of a violation would lead to unjustifiably harsh sanctions; (3) where warranted, permitting the agency to dismiss a charge without prejudice without the appointment or approval of an administrative law judge; (4) providing for a sunset provision that is fairer to past violators and that eases the administrative burden; and (5) permitting a private reprimand as a sanction without requiring as a precondition that parties engage in settlement discussions. The Department expects to benefit from gains in administrative efficiency and fairness without incurring any additional costs.

Proposed Rule Stage

491. COUNTERVAILING DUTIES

Significance: Regulatory Program

Legal Authority: 19 USC 1303; 19 USC 1671 et seq

CFR Citation: 19 CFR 355

Legal Deadline: None

Abstract: Current countervailing duty regulations will be revised to codify existing administrative practice with respect to the identification and measurement of subsidies. Revisions also will take into account statutory amendments made by the Omnibus Trade and Competitiveness Act of 1988. The revisions will improve administrative efficiency and will make

the countervailing duty law more accessible to the public.

**493. ANTIDUMPING DUTIES;
 COUNTERVAILING DUTIES**
Significance: Regulatory Program
Legal Authority: 19 USC 1671 et seq;
 19 USC 1673 et seq
CFR Citation: 19 CFR 353; 19 CFR 355
Legal Deadline: None

Abstract: Revisions to the current
 antidumping duty and countervailing
 duty regulations are needed in order to
 conform those regulations to certain
 statutory amendments made by the
 Omnibus Trade and Competitiveness
 Act of 1988. Those amendments deal
 with (1) downstream product
 monitoring; (2) consultations with the
 International Trade Commission on
 certain scope rulings; (3) procedures for
 administrative protective orders; (4)
 correction of ministerial errors; and (5)
 effective dates. The revisions will
 enable the Department to apply the
 new statutory provisions in an orderly
 and efficient basis.

**496. LIMIT ON DUTY-FREE INSULAR
 WATCHES IN CALENDAR YEAR 1993**

Legal Authority: 19 USC 1202, Note

CFR Citation: 15 CFR 303

Legal Deadline: None

Abstract: This amendment to the watch
 duty regulations establishes the total
 quantity and respective shares of
 insular watches and watch movements
 which will be allowed to enter the
 United States free of duty during
 calendar year 1993. This amendment
 also removes two unnecessary

provisions. Sections 303.10 and 303.14
 are amended to remove the minimum
 average wage input per watch
 movement as a condition for duty-free
 treatment. Present minimum wage
 requirements and applicable minimum
 assembly requirements make this
 condition unnecessary. Also being

DOC—ITA

Completed Actions

removed is the provision in section 303.14 which required complete assembly in the territory of the setting mechanism and train assemblies for a watch to qualify for duty-free treatment. This provision is being removed so as not to discourage assembly operations which do, in fact, involve substantial labor input (e.g., chronographs).

497. DEFENSE PRIORITIES AND ALLOCATIONS SYSTEM (DPAS)

Legal Authority: 50 USC app 2061 et seq; 50 USC app 468; EO 10480; EO 12148; EO 12742

CFR Citation: 15 CFR 700

Legal Deadline: None

Abstract: The Defense Priorities and Allocations System (DPAS) implements the priorities and allocations authority of title I of the Defense Production Act of 1950, as amended, and the priorities authority of section 18 of the Selective Service Act of 1948. The DPAS was published as a final rule on July 30, 1984. Based on the findings and recommendations of an interagency sponsored study concerning the controlled materials program, and comments from both defense agency and industry users, this proposed rule would amend the DPAS to remove the controlled materials provisions and make certain revisions to its procedural requirements. These amendments will have no costs associated with them, would reduce the regulatory and information reporting burden on industry and make the DPAS more effective and efficient, and would result in cost savings for defense contractors.

498. REVISION OF FOREIGN BOYCOTT PROVISIONS OF EXPORT ADMINISTRATION REGULATIONS

Legal Authority: 50 USC 1701 et seq; 50 USC app 2401 et seq; EO 12002; EO 12058; EO 12214; EO 12730; EO 12735

CFR Citation: 15 CFR 769

Legal Deadline: None

Abstract: The Department proposes to revise the foreign boycott provisions of the Export Administration Regulations. The revisions would clarify the application of: (1) the intent provision to the reporting requirement; (2) the jurisdictional requirements relating to the implementation of letters of credit; (3) the furnishing information prohibitions to information about the nationality of directors and about blacklisted persons; (4) the shipping requirement exception to refusals to use blacklisted vessels; and (5) the import and shipping document exception to information about the nationality of carriers and residence of manufacturers or suppliers. The revisions are intended to clarify areas of confusion. In addition, the proposal would remove many references and provisions dealing with effective dates and grace periods that are no longer applicable.

499. TRANSFER OF DUAL-USE ITEMS FROM U.S. MUNITIONS LIST TO THE COMMERCE CONTROL LIST

Significance: Regulatory Program

Legal Authority: 18 USC 2510 et seq; 30 USC 185; 42 USC 6212; 10 USC 7420; 10 USC 7430(e); 50 USC 1701 et seq; 22 USC 3201 et seq; 42 USC 2139a; 43 USC 1354; 50 USC app 2401 et seq; 46 USC 466c; EO 11912; EO 12058; EO 12730; EO 12735; ...

CFR Citation: 15 CFR 799.1

Legal Deadline: None

Abstract: The COCOM Industrial List (IL) controls so-called dual-use items, which have both civil and military uses. There is not a direct correspondence between the IL and BXA's Commerce Control List (CCL) because some IL items are controlled by the State Department in the U.S. munitions list.

In his November 15, 1990, memorandum of disapproval of H.R. 4653, the President determined that, "By June 1, 1991, the United States will remove from the U.S. munitions list all items contained on the COCOM dual-use list unless significant U.S. national security interests would be jeopardized." This rule will implement BXA controls through the CCL on those items removed from the U.S. munitions list as a result of the President's decision.

500. SPECIAL LICENSE PROCEDURES; REVISIONS TO THE ELIGIBILITY REQUIREMENTS FOR COMPUTERS

Legal Authority: 18 USC 2510 et seq; 50 USC 1701 et seq; 22 USC 3201 et seq; 42 USC 2139a; 50 USC app 2401 et seq; EO 12002; EO 12214; EO 12058; EO 12730; EO 12735

CFR Citation: 15 CFR 773; 15 CFR 778

Legal Deadline: None

Abstract: The Distribution License (DL) is a special license issued to approximately 100 exporters, allowing exports of pre-approved goods without regard for quantity or value. This procedure allows firms that are willing to adopt rigorous control regimes to supply their regular customers without the burden of repetitively applying for export licenses. The Distribution License places limits on the export of computers (one of the main products shipped under the Distribution License) which may vary with the destination. On May 1, 1992, the Bureau of Export Administration published a rule (57 FR 18815) that expanded substantially the ability of Distribution License holders to export computers, to the extent that supercomputers may now be exported to 12 countries. To further implement the President's directive to revise eligibility level thresholds under the Distribution License, this rule raises the computer levels that may be exported under the DL to most countries listed in Supplement No. 3 to part 773 of the Export Administration Regulations, with more modest increases for certain other destinations.

Legal Deadline: None

Abstract: The Bureau of Export Administration (BXA) maintains the Commerce Control List (CCL), which identifies those items subject to the Department of Commerce export controls. The items on the CCL that are subject to nuclear nonproliferation controls are referred to as the Nuclear Referral List (NRL). This interim rule amends a number of Export Control Classification Numbers (ECCNs) on the CCL in order to make the NRL conform with the items contained in the Annex to the "Guidelines for Transfers of Nuclear-Related Dual-Use Equipment, Material, and Related Technology" (the Annex) published by the International Atomic Energy Agency and adhered to by the United States and other subscribing governments. The subscribing governments have agreed to establish export licensing procedures for the transfer of items identified on the Annex. This rule also establishes a new General License-GNSG that permits certain items subject to nuclear nonproliferation controls to be exported under general license to a number of countries whose governments have subscribed to the Annex.

503. REVISIONS TO SHORT SUPPLY REGULATIONS

Legal Authority: 18 USC 2510 et seq; 30 USC 185; 42 USC 6212; 10 USC 7420; 10 USC 7430(e); 50 USC 1701 et seq; 22 USC 3201 et seq; 42 USC 2139a; 43 USC 1354; 50 USC app 2401 et seq; 46 USC 466c; EO 11912; EO 12058; EO 12730; EO 12735; ...

CFR Citation: 15 CFR 771; 15 CFR 777; 15 CFR 799

Legal Deadline: None

Abstract: On July 12, 1985, the Export Administration Amendments Act of 1985 (PL 99-64) extended and amended the Export Administration Act of 1979 (50 USC app 2401, et seq.) (EAA). Certain changes were made to the Short Supply provisions of section 7 of the EAA. Accordingly, revision of the Short Supply provisions (15 CFR 777) and related licensing requirements (15 CFR 771 and 799) of the Export Administration Regulations (15 CFR 730-799) is necessary. An interim final rule was issued which included (1) elimination of the validated licensing requirement for exports of refined petroleum products so as to permit their export with certain restrictions under a general license; (2) a new definition of "crude oil" for purposes of the regulation; and (3) certain technical and housekeeping changes. There are no costs associated with this action which would promote the export of decontrolled products.

CFR Citation: 15 CFR 768 to 799

Legal Deadline: None

Abstract: The Bureau of Export Administration is amending the Export Administration Regulations to convert units of weight and measure to the metric system. This brings BXA into compliance with the 1988 Omnibus Trade and Competitiveness Act, which amends the Metric Conversion Act of 1975 to authorize the conversion of the weights and measures of "all U.S. trade and commerce" and all Federal agencies to the metric system. It also reflects the current situation of international trade, which is conducted almost exclusively in the metric system. Much of this was accomplished by the publication of the Core list in the fall of 1991.

CFR Citation: 15 CFR 776; 15 CFR 799

Legal Deadline: None

Abstract: In support of U.S. policies opposing the proliferation and use of chemical weapons the Department expanded foreign policy controls on the export of certain chemical precursors (i.e., chemicals that can be used in the manufacture of chemical weapons). On March 13, 1991 (56 FR 10756), the Department expanded the number of countries for which a validated license is required for 39 precursor chemicals. These chemicals require a validated license for export to all destinations,

except countries participating in the Australia Group. On December 18, 1992 (57 FR 60122), the Department imposed the same validated export license requirements on 4 additional precursor chemicals.

Abstract: This final rule amends the Commerce Control List (CCL) by adding a number of Advisory Notes that provide administrative exceptions treatment or favorable consideration treatment for exports to Country Group W (Czechoslovakia and Poland). These Advisory Notes significantly increase the number of items eligible for such treatment to these countries. This rule also expands the administrative exceptions treatment for the People's Republic of China. This rule adds new administrative exceptions procedures for the export of certain Category 5 Telecommunications items to Country Groups QWY. In addition this rule makes various revisions, certifications, and corrections to the CCL. Finally, this rule revises the instructions for completing the Shipper's Export Declaration (SED) by requiring exporters to designate the Export Control Classification Number on the
