ACTION

Semiannual Regulatory Agenda

ACTION (ACTION)**ACTION****45 CFR Ch. XII****Executive Order 12291 "Federal Regulation"; Semiannual Agenda of Regulations**

AGENCY: ACTION.

ACTION: Publication of semiannual agenda.

SUMMARY: This agenda announces the regulations that ACTION will have under development, revision, or review during the next year. The purpose for publishing this agenda is to give notice

of any regulatory activity by the Agency in order to provide the public an opportunity to participate in the rulemaking process.

FOR FURTHER INFORMATION CONTACT: The public is encouraged to contact the agency official listed for the particular agenda item. For other information concerning ACTION regulations or this semiannual agenda, contact Stewart A. Davis, Acting General Counsel, ACTION, 1100 Vermont Avenue NW., Washington, DC 20525, (202) 606-4833.

SUPPLEMENTARY INFORMATION: In accordance with Executive Order 12291 "Federal Regulation" and the Regulatory Flexibility Act (5 U.S.C.

601), executive agencies are required to publish in the **Federal Register** semiannual regulatory agendas in April and October of each year.

ACTION has determined that the regulations under consideration will not impose compliance costs or reporting burdens on the public and that the regulations will not have a significant economic impact on a substantial number of small entities. Accordingly, no Regulatory Analysis is required under 5 U.S.C. 602.

Dated: July 13, 1993.

Gary Kowalczyk,
Acting Director.

Proposed Rule Stage

3590. FREEDOM OF INFORMATION ACT REGULATIONS

Legal Authority: 16 USC 470 Nat. Historic Preservation Act of 1966, as amended

CFR Citation: 36 CFR 810.5

Legal Deadline: None

Abstract: The regulation will increase the fees charged to requesters of information to better reflect the cost to the Government of locating and copying the documents requested. Copying charges would be increased from \$0.10 to \$0.13 per page; fees for searches by professional staff from

\$2.00 to \$4.65 per quarter hour; and fees for searches by clerical staff from \$1.00 to \$2.30 per quarter hour. The regulation would thus impose a "user's fee" to users of the Government FOIA system which is more consistent with other agencies' fees.

Semiannual Regulatory Agenda

ENVIRONMENTAL PROTECTION AGENCY (EPA)**ENVIRONMENTAL PROTECTION AGENCY****40 CFR Ch. I**

[FRL-4726-2]

Regulatory Agenda

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA's regulatory agenda is published each April and October. It serves as a semiannual summary of current and projected rulemakings, reviews of existing regulations, and Agency actions completed since the previous publication of the agenda. By providing the public with current and advance information about pending regulatory activities, the Agency hopes to encourage more effective public participation in the regulatory process.

ADDRESSES: To be placed on the mailing list for future agendas, contact Bridgette Dent, Regulatory Development Branch (PM-223Y), EPA, 401 M Street SW., Washington, DC 20460, (202) 260-5475.

If you have suggestions to improve this publication or need general information about the agenda, contact Angela Suber, Regulatory Development Branch (PM-223Y), EPA, 401 M Street SW., Washington, DC 20460, (202) 260-7205.

FOR FURTHER INFORMATION CONTACT: The name, address, and telephone number of an agency contact are provided for each entry.

SUPPLEMENTARY INFORMATION: The agenda provides the title, an abstract, legal authority, CFR reference, any analysis EPA is preparing, contact person, and schedule for completing the action for each regulation under review. The following statutes are covered in the agenda:

Asbestos Hazard Emergency Response Act (AHERA)
Atomic Energy Act (AEA)
Clean Air Act (CAA)
Clean Water Act (CWA)
Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA)
Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA)
Federal Food, Drug, and Cosmetics Act (FFDCA)
Hazardous and Solid Waste Amendments (HSWA)

Marine Protection, Research, and Sanctuaries Act (MPRSA)
National Environmental Policy Act (NEPA)
Resource Conservation and Recovery Act (RCRA)
Safe Drinking Water Act (SDWA)
Superfund Amendments and Reauthorization Act (SARA)
Toxic Substances Control Act (TSCA)
Water Quality Act of 1987 (WQA)
General (Other acts, including grant and procurement regulations that apply to several program areas.)

EPA's agenda also illustrates the Agency's compliance with various mandates. Included among these is the requirement of Executive Order 12498 to submit the Agency's priority regulatory activities for inclusion in the Administration's annual "Regulatory Program." Those priority activities are noted in the "Significance" section of the rule entry.

EPA's agenda entries also provide evidence of compliance with the requirements in Executive Order 12291 that the Agency ensure that the costs of a rule are justified by its benefits. This compliance is noted in the "Analysis" section of an entry, which indicates the Agency's performance of a Regulatory Impact Analysis (RIA) for any proposed or final regulation that may have:

1. A minimal economic effect of \$100 million annually;
2. a major effect on the general economy in terms of costs, consumer prices, or production;
3. a major increase in costs or prices for any notable segment of the population; or
4. significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Regulatory Flexibility Act (RFA) requires the identification of those regulations which are likely to have a "significant economic impact on a substantial number of small entities" (i.e., small governments, small businesses, and small nonprofit organizations). Under the requirements of the Act, such regulations must be subjected to a "regulatory flexibility analysis." This analysis must consider the likely economic impacts on small

entities, as well as any significant alternatives to the rule which accomplish the objectives of applicable statutes and which minimize significant economic impacts of the rulemaking on small entities.

In April 1992, EPA adopted a new policy which exceeds the requirements of the Regulatory Flexibility Act (this new policy applies to rulemakings that were initiated after April 8, 1992). For rulemakings subject to this new policy, EPA will perform a regulatory flexibility analysis if the rule is likely to have any economic impact on any small entity. For rulemakings not subject to the new policy (i.e., initiated prior to April 9, 1992), a regulatory flexibility analysis will be conducted only if the rulemaking will meet the Regulatory Flexibility Act's standard of having a "significant impact on a substantial number of small entities."

Under each rulemaking listed in this regulatory agenda, the "Analysis" section indicates whether EPA expects to conduct a regulatory flexibility analysis. If EPA believes small entities will be affected by a rulemaking, this is indicated under the "Small Entities Affected" and/or the "Government Levels Affected" section of the summary for each listed rule. EPA invites public comment regarding EPA's assessment of which of the listed rulemakings are appropriate for regulatory flexibility analysis.

The RFA requires that, at least once every 10 years, Federal departments and agencies review existing regulations that have a significant economic impact on a substantial number of small entities. As part of that process, EPA invites public comment identifying any existing EPA rules believed to have a significant economic impact on a substantial number of small entities. Comments should be provided in the following format:

- Title
- Authorizing statute and CFR citation
- Description of economic effects on small entities, especially on the commenting person or organization
- Recommendations for changes

Any additional detailed comments or data are welcome.

When the EPA completes its review of an existing rule, it will indicate in the agenda whether or not that rulemaking will be continued without change or will be amended or rescinded consistent

EPA

with the stated objectives of applicable statutes to minimize any significant economic impact of the regulations upon a substantial number of small entities.

The agenda is organized by statute and ordered numerically within each statutory area. Entries within each statute are divided into four categories: (1) Prerule, (2) proposed rule, (3) final rule, and (4) completed actions (i.e., regulations that EPA is deleting from the agenda because the Agency has completed, withdrawn, or postponed them indefinitely). Detailed information on each of these categories is presented below. A dot (•) preceding an entry indicates that this is the first time this entry appears in an agenda.

I. Prerulemakings

Prerulemaking actions are activities intended to determine whether to initiate rulemaking. These activities include anything that influences or leads to rulemaking, such as advance notices of proposed rulemaking, significant studies or analyses of the possible need for regulatory action,

requests for public comment on the need for regulatory action, or important pre-regulatory policy proposals.

This section also includes a review of existing EPA regulations. The purpose of such reviews is to determine whether the Agency should revise, rescind, or leave the existing rule unchanged. If EPA decides to revise or rescind an existing regulation, that action will appear in the next agenda in the proposed rule section along with a timetable for completing the revision or rescission.

II. Proposed and Final Rules

This section includes all "significant" EPA regulations. EPA generally lists regulations in this category of the agenda once they are within a year of proposal or promulgation. The listings, however, exclude (a) specialized categories of actions (e.g., EPA approvals of State plans and other actions that do not apply nationally) and (b) routine actions (e.g., pesticide tolerances and minor amendments to existing rules).

The Agency has attempted to list all regulations and regulatory reviews except those considered as minor, routine, or repetitive actions. There is no legal significance to the inadvertent omission of an item from the listing. The agenda reflects dates for actions on each item; these dates are honest estimates but should not be construed as an Agency commitment to act on or by the date shown. The Administrator of EPA will be reviewing the items contained in this agenda over the next 6 months. Items in this agenda may be deleted, or new items may be added, as a result of that review.

III. Completed Actions

These are actions that appeared in the previous agenda, which EPA is deleting because they are completed or are no longer under consideration for rulemaking.

Deputy Assistant Administrator,
Office of Policy, Planning, and Evaluation.

3602. REVOCATION OF PESTICIDE FOOD ADDITIVE TOLERANCES SUBJECT TO THE DELANEY CLAUSE OF THE FFDCA

Legal Authority: 21 USC 348/FFDCA 409

CFR Citation: 40 CFR 185; 40 CFR 186

Legal Deadline: None

Abstract: The Agency is proposing to revoke food additive tolerances for a number of pesticide carcinogens in processed food because of the Delaney clause. The Delaney clause prohibits chemicals in processed foods that induce cancer in man or lab animals. This rulemaking is the result of a decision by the Court of Appeals for the Ninth Circuit which rejected the Agency's de minimis interpretation of the applicability of the Delaney clause.

Abstract: EPA sets tolerances under FFDCA section 408 for pesticide residues in raw agricultural commodities (RACs). To promote greater consistency in tolerance setting and enforcement, EPA is now proposing to amend its pesticide regulations to clarify how RACs are defined.

Abstract: EPA will define which pesticides produced in plants (plant-pesticides) will be exempt from the provisions of FIFRA and FFDCA. For those plant-pesticides that will be subject to Agency requirements, the Agency will outline the process by which these pesticides will be regulated. Modifications will be made to the regulatory processes under both FIFRA and FFDCA to reflect the characteristics of these products.

Legal Authority: 7 USC 136/FIFRA 2; 7 USC 136d/FIFRA 3

CFR Citation: 40 CFR 156

Legal Deadline: None

Abstract: This rule would require that pesticide total release foggers be labeled with additional flammability precautionary statements (including possibly a graphic symbol), and more precise use directions. Total release foggers have been implicated in a number of fires and explosions because of their flammable propellants. The labeling of these products has been determined to be inadequate to mitigate this potential hazard.

Significance: Regulatory Program

Legal Authority: 7 USC 136/FIFRA 3, 5, and 25

CFR Citation: 40 CFR 158

Legal Deadline: None

Abstract: This amendment will update the existing data requirements (40 CFR 158) for evaluating the registrability of pesticide products. Reasons for the revisions include recent health and environmental concerns (e.g.,

groundwater contamination, worker exposure and neurotoxicity) advancements in testing technology, and new ecological risk testing approaches. The revisions will clarify all data requirements to reflect current practice. Procedural and explanatory sections of 40 CFR 158 will be amended to make them consistent with the revised data requirements and new use indexing implemented pursuant to 1988 FIFRA amendments.

Legal Deadline: None

Abstract: The Agency is proposing to amend its regulations to establish standards for claims that a water treatment unit or product (whether a pesticide or device) will microbiologically purify water for human consumption. The rule would establish standards for when microbiological water purification claims may be legally made on the label. This proposal would base the acceptability of purifier-related claims on efficacy data demonstrating that the product met the criteria for microbiological reductions indicated in EPA's Guide Standard and Protocol for Testing Microbiological Water Purifiers.

Legal Authority: 7 USC 136(a)/FIFRA 3

CFR Citation: 40 CFR 152

Legal Deadline: None

Abstract: The regulation will designate certain individual pesticides to be subject to EPA approved State Management Plans (SMPs) as a condition of legal sale and use. This regulation would establish SMPs as a new regulatory requirement for those pesticides; absent an EPA-approved state plan specifying risk-reduction measures, use of the chemical would be prohibited. The rule would also specify procedures and deadlines for development, approval and implementation of SMPs.

Significance: Regulatory Program

Legal Authority: 7 USC 136 to 136y

CFR Citation: 40 CFR 152.175

Legal Deadline: None

Abstract: EPA will propose to restrict a number of pesticides to use by certified pesticide applicators. The goal of the action is to prevent or mitigate the potential for groundwater contamination. The pesticides subject to this proposal will be selected from those which meet EPA's proposed criteria for restricted use consideration due to groundwater concerns. Those criteria were published for comment on May 13, 1991 at 56 FR 22076 (RIN 2070-AB60).

Legal Authority: 7 USC 136w/FIFRA 25(b)

CFR Citation: 40 CFR 152.20

Legal Deadline: None

Abstract: Under FIFRA, EPA regulates antimicrobial products, including sterilants, used to control microorganisms on treated environmental surfaces. Specifically, EPA regulates all sterilant products typically used on invasive medical devices and other critical devices/surfaces. Under the Federal Food, Drug and Cosmetic Act (FFDCA), the Food and Drug Administration (FDA) has jurisdiction over chemical germicides used as sterilants for medical devices. FIFRA section 25(b) allows EPA to exempt from FIFRA a pesticide which is adequately regulated by another federal agency. In accordance with a Memorandum of Understanding signed on June 4, 1993, EPA and FDA propose to eliminate the redundant regulation of these sterilants. EPA proposes to exempt from FIFRA regulation and to transfer sole jurisdiction over these sterilants to FDA.

3617. • REGULATORY RELIEF FOR LOW-RISK PESTICIDES

Legal Authority: 7 USC 136w(h)/FIFRA 25(b)

CFR Citation: 40 CFR 152

Legal Deadline: None

Abstract: Pesticides which are substances or mixtures intended to control or mitigate pests, are regulated under FIFRA and are required to be registered prior to sale or distribution in the United States. This requires pre-market review of scientific data to ensure that the pesticide use will not cause unreasonable adverse effects on human health and the environment. Some substances that fit the definition of a pesticide may be widely used in foods or for other non-pesticidal purposes, e.g., natural cedar wood. These pesticides are considered innocuous or are otherwise of a character that do not require registration. EPA proposes to exempt appropriate pesticides (to be cited in the proposal) from registration and develop criteria for future pesticides that may qualify for exemption from FIFRA requirements. A proposal to exempt natural cedar products is the first rule.

Significance: Regulatory Program**Legal Authority:** 21 USC 346a/FFDCA 408; 21 USC 348/FFDCA 409**CFR Citation:** 40 CFR 180**Legal Deadline:** None

Abstract: EPA is proposing to amend its current pesticide tolerance regulations to clarify how raw agricultural commodities are defined for conducting residue data development and analysis used in establishing and enforcing a tolerance. This proposed rule amendment restates, updates, clarifies, and makes more uniform the analytical practices that have been developed over the years, and therefore, should facilitate and improve efficiency in pesticide residue analysis on food commodities.

Abstract: Pesticides are necessary for production of agricultural food and fiber commodities, yet have the potential to harm threatened or endangered species. EPA will develop and implement an endangered species pesticide labeling program designed to conserve federally listed species and to minimize the impacts to persons who use pesticides. The program will

include development of species maps and pesticide use limitation bulletins to be distributed as an extension of pesticide labels. Pesticides that are determined to cause harm to endangered species will require label changes which display precautionary statements and directions on how to obtain county bulletins. EPA will coordinate the program with the U.S. Fish and Wildlife Service of the Department of Interior and the U.S. Department of Agriculture.

Significance: Regulatory Program

Legal Authority: 7 USC 136a/FIFRA 3; 7 USC 136c/FIFRA 5

CFR Citation: 40 CFR 172

Legal Deadline: None

Abstract: EPA is amending its experimental use permit regulations for pesticides to clarify the circumstances under which an experimental use permit is presumed not to be required. As part of that clarification, EPA is implementing a screening procedure that requires notification to the Agency before initiation of small-scale testing of certain microbial pesticides. The Agency will review notifications to assess the potential for adverse impacts on human health or the environment and will then determine whether to approve the test and/or whether to require an experimental use permit.

Abstract: FIFRA section 6(a)(2) requires that registrants report to EPA additional factual information regarding unreasonable adverse effects of their products. In September 1985, EPA revised its 1979 section 6(a)(2) enforcement policy by publishing a notice which expanded upon the types of factual information which must be reported and established uniform timeframes for compliance. In response to comments received on this notice, the Agency is reissuing it as a proposal to clarify the types of information which registrants must report to EPA.

Legal Authority: 21 USC 346/FFDCA 408

CFR Citation: 40 CFR 180.34 (f) (Revision)

Legal Deadline: None

Abstract: EPA is developing a proposal to revise the crop grouping regulations to promote the greater utilization of crop grouping for pesticide tolerance-setting purposes. These revisions will establish crop subgroups, smaller groups of more closely related commodities for larger crop groups. Tolerances established for a subgroup would apply to all members of the subgroup. EPA will also propose other revisions to the crop groups that should promote greater utilization of crop groupings. Revisions to the crop grouping scheme that would increase its utilization will reduce the regulatory burden associated with residue data development in support of pesticide tolerances and registration.

Significance: Agency Priority

Legal Authority: 42 USC 11013;11023;11048;11076/EPCRA 313

CFR Citation: 40 CFR 372

Legal Deadline: None

Abstract: The current Toxics Release Inventory is limited, both in the numbers of chemicals and types of facilities required to report. EPA is considering an expanded list of chemicals and facilities that will have to submit information for the Toxics Release Inventory. Rather than attempting a broad revision to the current regulation, EPA is attempting to selectively propose groupings of chemicals and industries to be added.

Part of this activity would consider the addition of seventeen chemicals, previously described in RIN 2070-AC40/SAN 3007. Sixteen of these chemicals are from a list of hazardous air pollutants subject to requirements of the Clean Air Act Amendments of 1990. The seventeenth chemical being considered for addition is extremely toxic to aquatic organisms.

This is an amendment to a regulation that carries with it significant demands in the form of reporting requirements and data management. Therefore, the Agency is also considering options for reducing the reporting burden, particularly for small sources.

Abstract: This proposed rule will amend the TSCA Inventory Update Rule promulgated in 1986 to require chemical manufacturers to provide reasonably ascertainable information on how the chemicals they manufacture are used in commerce and in what volumes. This data, coupled with production volume data that is currently reported, will provide a

significant new source of information on toxics that will enhance the effectiveness of chemical risk management programs of EPA, other Federal agencies, state and local governments and other organizations.

Legal Authority: 15 USC 2605; 15 USC 2607(c)

CFR Citation: 40 CFR 763 subpart G

Legal Deadline: None

Abstract: EPA is proposing to amend the Asbestos Abatement Projects; Worker Protection rule (WPR), by incorporating certain revisions to the Occupational Safety and Health Administration (OSHA) asbestos workplace standards issued since EPA's WPR was promulgated in 1987. The proposal would generally extend the coverage provided under the OSHA Asbestos Standard for Construction to State and local government employees who are not covered by OSHA or EPA-approved State plans. It would also extend coverage provided under OSHA's Asbestos standard for general industry for brake and clutch repair to such employees, and would clarify that they include prisoners and students employed by the State and/or local government. EPA also proposes to delegate authority to grant or deny State exclusions under the WPR to EPA

NPRM must be published within one year of ITC designation.

Abstract: The following table lists chemicals for which EPA will initiate rulemaking to require testing, obtain testing through negotiated consent orders, or publish a notice which provides the reasons for not doing so. The list includes chemicals which have been designated for priority testing consideration by the Interagency Testing Committee as well as those chemicals (i.e., recommended and non-designated chemicals) for which the 12-month statutory requirement does not apply. The list also includes chemicals or categories of chemicals which have been identified for testing consideration by other EPA program offices and through EPA review processes.

Significance: Regulatory Program

Legal Authority: 15 USC 2603/TSCA 4

CFR Citation: 40 CFR 799.5050

Legal Deadline: None

Abstract: A multi-chemical endpoint test rule will require the testing of many chemicals for a specific effect or endpoint, e.g., bioaccumulation. This type of rule is an alternative to single chemical rules which require testing of one chemical for many effects. The multi-chemical endpoint rule approach will obtain testing while conserving on Agency resources. The multi-chemical rule for persistent bioaccumulators will obtain environmental effects and chemical fate data on chemicals that are believed to persist and bioaccumulate in the environment. Emerging environmental concerns have focused on sediments contaminated with chemicals which are persistent (do not degrade) and bioaccumulate (may enter the human food chain). In addition, such chemicals are also typically toxic to aquatic and terrestrial organisms. EPA has identified over 30 chemicals for possible inclusion in the bioaccumulator test rule. EPA is also considering developing a multi-chemical test rule to obtain needed health and environmental effects testing

Abstract: The generic acrylate significant new use rule may require any person who proposes to manufacture, import, or process an acrylate/methacrylate subject to the category definition contained within the proposed rule to notify EPA at least 90 days in advance of the initiation of manufacture or processing for a significant new use. The significant new use rule will apply to a subset of acrylates added to the inventory after the effective date of the rule. Significance: Regulatory Program

Legal Authority: 15 USC 2604/TSCA 5

CFR Citation: 40 CFR 700; 40 CFR 720; 40 CFR 721

Abstract: EPA is planning to propose a regulation under the Toxic Substances Control Act (TSCA) for the oversight of certain microbial products of biotechnology. The proposed rule would be issued under the authority of Section 5 of TSCA, which generally requires that new chemical substances must be reviewed by EPA before they are introduced into commerce.

The proposed rule will contain mechanisms for exemption as well as actual proposed exemptions, guidance on how the TSCA Inventory will be used, and EPA's approach to Research and Development with biotechnology microorganisms.

Significance: Regulatory Program

Legal Authority: 15 USC 2604/TSCA 5; 15 USC 2605/TSCA 6

CFR Citation: 40 CFR 721; 40 CFR 750

Abstract: This action initiates a regulatory investigation under the Toxic Substances Control Act (TSCA) section 6 to determine if uses of lead (Pb) present an unreasonable risk to human health and the environment. The investigation will involve examination of the potential sources of human or other exposure to lead throughout the life cycle. Based on information gathered EPA may propose TSCA section 6(a) rules to control existing or new uses of Pb which pose an unreasonable risk to human health or the environment, and to explore the desirability and feasibility of discouraging overall consumption of Pb in general. In particular, EPA has begun regulatory investigation on three uses of lead: solder in drinking water systems, plumbing fixtures, and fishing sinkers.

Abstract: The Agency is investigating the need to reduce residential exposure to formaldehyde, an irritating gas, that is emitted by urea-formaldehyde (UF) resins contained in pressed wood building materials and products using regulatory and non-regulatory options. UF pressed woods are used to build conventional and manufactured homes and to construct cabinets and furniture. In 1992, the Agency supported voluntary efforts by industry to reduce emissions from UF particleboard flooring products and to codify such reductions in a voluntary national consensus product standard. The Agency is also: (1) implementing an exposure testing program to characterize formaldehyde concentrations in newly-built homes and to determine how long high concentrations of the gas persist, (2) preparing information on formaldehyde for public dissemination, and (3) supporting research to evaluate the effectiveness of furniture product emission standards for reducing formaldehyde in office buildings. Activities are being coordinated with the Department of Housing and Urban Development (HUD) and the consumer Product Safety Commission (CPSC). Significance: Regulatory Program

Legal Authority: 15 USC 2605(e)(1)(A)/TSCA 6(e)

CFR Citation: 40 CFR 761, subparts C, D, E, G

Legal Deadline: None

Abstract: The ANPRM solicits comments on alternate disposal methods for non-liquid PCBs and invites public input on modifications to the PCB disposal regulations. In February 1990, several parties petitioned EPA under Section 21 of TSCA to amend the regulations at 40 CFR 761, which govern the disposal of PCBs, and issue an interpretive rule or declaratory order construing the existing PCB disposal regulations. In responding to the petition, EPA agreed to initiate a regulatory investigation to determine whether or not to amend the disposal regulations. After analyzing the comments received in response to the ANPRM, a proposed rule will be drafted which will also address alternative disposal methods for newly identified scenarios such as large volume solids; mixed wastes such as PCB/radioactive wastes; and other issues, such as disposal of household wastes, small capacitors, and used paints. This notice will also solicit comments on a modification to the disposal regulations which would allow for the recognition of PCB waste management activities under other Federal or State authorities. Finally, this rule incorporates a reproposal of the April 6, 1990 proposed rule (cont)

Legal Authority: 15 USC 2605/TSCA 6(e)

CFR Citation: 40 CFR 761

Legal Deadline: None

Abstract: This rule would relax the regulatory requirements for reclassifying PCB transformers to a lower regulatory status by modifying the current reclassification requirements of 50 degree centigrade temperature and 90-day testing. Results of a preliminary analysis indicate that many transformers never reach the required temperature, but still reduce PCB concentrations and that safety risks to employees and to the general public occur in mandating the continued adherence to the current regulations.

Abstract: This proposed rule will amend certain aspects of the CAIR. The CAIR is a model rule designed to gather production, use, and exposure information from chemical manufacturers, importers, and processors of listed chemical substances and mixtures. In response to public comments, EPA is considering revision of the CAIR to: establish exemptions for small and de minimis volumes; refine trade name reporting requirements; reduce certain advance substantiation requirements for Confidential Business Information (CBI) claims; and require automatic reporting for substances added to CAIR by the Interagency Testing Committee (ITC).

Abstract: This proposed regulation would implement the "Source Reduction and Recycling Report" provision of the Pollution Prevention Act of 1990. Under this requirement, facilities that file EPA Form R must include information on the amount of the chemical entering wastestreams prior to treatment, recycling or

disposal, amounts that are treated or recycled both on-site and off-site and projections for the following two years of expected amounts treated and recycled. Additional information will identify types of pollution prevention activities employed by the facility and other information that will allow the

**3651. MULTI-CHEMICAL ENDPOINT(S)
TEST RULE**

Legal Authority: 15 USC 2603/TSCA 4

CFR Citation: 40 CFR 799.5050

Legal Deadline: None

Abstract: A multi-chemical endpoint test rule will require the testing of many chemicals for a specific effect or endpoint, e.g., neurotoxicity. This type of rule is an alternative to single chemical rules which require testing of one chemical for many effects. The multi-chemical endpoint rule approach will obtain a significant amount of testing while conserving on Agency resources. The multi-chemical rule for developmental and reproductive toxicity testing will require testing of twelve chemicals for developmental and/or reproductive effects; the multi-chemical rule for neurotoxicity testing will obtain base set neurotoxicity testing of ten high production solvents. These rules may be amended in the future to require the same testing for other chemicals. Also, future multi-chemical rules will require testing of additional endpoints and chemicals. The testing requirements for each chemical in a multi-chemical rule will be listed in a single table by chemical under section 799.5050. This table will be amended with each publication of a new multi-chemical rule.

Abstract: EPA has instituted a program to regulate the commercial development of new chemicals that have completed premanufacture notice (PMN) review where activities described in the PMN did not present an unreasonable risk but uncontrolled manufacture, import, processing, distribution, use, or disposal outside the activities described in the PMN may present an unreasonable risk. EPA will issue Significant New Use Rules (SNURs) requiring 90-day notification to EPA from any manufacturer, importer, or processor who would engage in activities that are designated as significant new uses. Under the Expedited Follow-up Rule which became effective on October 12, 1989, EPA will identify such new chemicals and publish them in a batch SNUR 6-12 times per year. Chemicals that were subject to a proposed SNUR before the effective date of the EFUR or do not qualify under the EFUR may be regulated individually by notice and comment rulemaking.

3654. CHEMICAL SPECIFIC SIGNIFICANT NEW USE RULES (SNURs) TO EXTEND PROVISIONS OF SECTION 5(E) ORDERS

Legal Authority: 15 USC 2604/TSCA 5

CFR Citation: 40 CFR 721

Legal Deadline: None

Abstract: When the Agency determines that uncontrolled manufacture, import, processing, distribution, use or disposal of a premanufacture notification notice (PMN) substance may present an unreasonable risk, it may issue a section 5(e) consent order to limit these activities. However, such orders apply only to the PMN submitter. Once the new substance is entered on the Toxic Substances Control Act (TSCA) chemical inventory, others can manufacture, import or process the substance without controls. Therefore, EPA extends the controls to apply to others by designating manufacture, import or processing of the substances for uses without the specified controls as significant new uses. Under the Expedited Follow-Up Rule, which became effective on October 10, 1989 (54 FR 31314), EPA routinely publishes batch SNURs containing routine section 5(e) and non-5(e) SNURs. However, certain activities, such as modifications, withdrawals, revocations, and SNURs upon which comments are received in the direct final publication process, are subject to notice and comment rulemaking and are listed below.

Legal Authority: 15 USC 2604; 15 USC 2607; 15 USC 2613/TSCA 5

CFR Citation: 40 CFR 720 to 723

Legal Deadline: None

Abstract: This action will amend the PMN rules (40 CFR 720 to 723) under Section 5 of the Toxic Substances Control Act (TSCA) to conform to current policy needs. These changes are necessary to increase efficiency and incorporate proposed program improvements. They are expected to reduce the administrative burdens/cost of the New Chemicals Program and the overall number of Section 5 submissions while maintaining an effective and environmentally sound program. EPA has identified "low-risk" categories that meet certain established criteria and can be screened out of the full PMN review process at an early date based on low health/environmental concern or low exposure scenarios. EPA would like to reduce the burden to PMN submitters and maximize the efficiency and resources of the program by modifying the rule to reduce reporting requirements for low risk categories. This would enable the Agency to reduce the number of Section 5 submissions and concentrate its resources on PMNs with potential health or environmental concerns.

CFR Citation: 40 CFR 744

Legal Deadline: NPRM, Judicial, April

1992.

The Consent Decree between EPA, EDF,
and NWF signed July 27, 1988, requires
that EPA make best efforts to issue a
final rule by November 30, 1992.

Abstract: The objective of this project
is to reduce the unreasonable risks
posed by dioxins and furans in
bleached wood pulp and paper mill
industrial sludge. In response to a July
1988 Consent Decree with the
Environmental Defense Fund and the
National Wildlife Federation, EPA
announced on April 30, 1990, its
schedule for a proposed rule under the
Toxic Substances Control Act (TSCA),
addressing the practice of industrial
sludge land application, including mine
reclamation and distribution/marketing.
The Consent Decree required that this
rule be proposed by April 30, 1991, and
that EPA make its best efforts to issue
a final rule by November 30, 1992. The
proposed rule was published on May
10, 1992 at 58FR 21802. The analysis
of new data received during the public
comment period and by the Office of
Water under section 308 of the Clean
Water Act may require an additional
comment period and delay
promulgation of the final rule. On
December 14, 1992, EPA informed EDF
and NWF of the status of its efforts to
evaluate and control risks from the land
application of sludge produced from
the treatment of wastewater from pulp

ABSTRACT CONT: and paper mills
using chlorine and chlorine-derivative
bleaching processes. It is EPA's
position that following this notification,
EPA has fulfilled its obligations under
the settlement for the sludge rule and
is no longer subject to court
supervision regarding those obligations.

EPA—TSCA

Final Rule Stage

EPA's Office of Water and Office of Air Quality Planning and Standards are developing integrated effluent guidelines and emission standards for the pulp and paper industry. In light of these proceedings and to promote multi-media pollution prevention the Agency has chosen to defer the decision on promulgation of the final land application rule to take into account the effect of the process changes under consideration for these rules on the resulting levels of dioxin and furan contamination in the sludge. Once this determination has been made, the Agency will reevaluate the risk from sludge land application and will be able to choose, if necessary, the appropriate regulatory or nonregulatory mechanism to address the situation. The Agency expects to make this determination in 1995.

3660. USE OF ACRYLAMIDE AND N-METHYLOLACRYLAMIDE (NMA) FOR GROUTING

Significance: Regulatory Program

Legal Authority: 15 USC 2605/TSCA 6

CFR Citation: 40 CFR 764

Legal Deadline: None

Abstract: On October 2, 1991, EPA proposed a regulation of acrylamide and NMA grouts based on the unreasonable risk associated with their usage. EPA's proposed rule would prohibit the manufacture, distribution in commerce, and use of acrylamide grout; and would prohibit all uses of NMA grout, except its use for sewer line repair. The proposed rule would also prohibit, after a period of three years, the manufacture and distribution in commerce of NMA grout for any purpose, and the use of NMA grout for sewer line repair. EPA will review the public comments and develop a final rule.

Legal Authority: 15 USC 2646/TSCA 6

CFR Citation: 40 CFR 763, app C to subpart E

Legal Deadline: Final, Statutory, November 28, 1992.

Abstract: The Asbestos School Hazard Abatement Reauthorization Act (ASHARA) amended TSCA to require that EPA revise its asbestos model accreditation plan to extend training and accreditation requirements to include persons performing certain asbestos-related work in public and commercial buildings, to increase the minimum number of training hours required for accreditation purposes and to effect other changes necessary to implement the amendments. This action will increase regulatory costs for the owners and managers of public and commercial building, but will also reduce asbestos exposures in these buildings.

Legal Authority: 15 USC 2607a/TSCA 8(a)

CFR Citation: 40 CFR 712

Legal Deadline: None

Abstract: These rules add chemicals to the list of chemicals and designated mixtures subject to the requirements of the Toxic Substances Control Act Section 8(a) Preliminary Assessment Information Rule (40 CFR part 712). These chemicals have been identified by the Office of Pollution Prevention and Toxics, other EPA offices, and other federal agencies, as well as recommended for testing consideration by the Interagency Testing Committee. Manufacturers and importers are required to submit exposure-related data (EPA Form No. 7710-35) on the chemicals. These data will be used to monitor the levels of production, import and/or processing of these substances and the avenues of human and environmental exposure to these substances. These data will also support risk assessment and test rule decisions.

Legal Authority: EO 12803
CFR Citation: 40 CFR Not yet determined
Legal Deadline: None

Abstract: Executive Order 12803 promotes private investment in local infrastructure including Federally-funded wastewater treatment works. Public-private partnerships provide an additional opportunity to communities for addressing the continuing and unmet needs for capital to construct and upgrade wastewater treatment and conveyance systems necessary to meet the requirements of the Clean Water Act. EPA's implementation of the Executive Order 12803 through regulatory development will assist States and communities to find innovative and flexible ways to obtain

private-sector investment and assistance for wastewater system needs while protecting the public interest in Federally-funded facilities.

Proposed Rule Stage

Abstract: On April 10, 1992, EPA proposed a rule to limit the discharge of pollutants into waters of the United States and into publicly owned treatment works by existing and new facilities that manufacture pesticide active ingredients. EPA also proposed new test procedures for the analysis of pesticide pollutants in the Pesticide Chemicals Category. The agency will take final action by July 1993. In a separate action, EPA intends to propose effluent guidelines and standards for facilities which formulate, package and/or repackage pesticide active ingredients into final products, by January 1994.

Abstract: This action will revise EPA's existing 404(c) regulations, in effect since October 9, 1979. It will amend the procedures to be used when EPA is considering the use of Section 404(c) of the CWA to prevent the discharge of dredged or fill material into a defined area of the waters of the United States. Section 404(c) gives the Administrator authority to prohibit or withdraw the specification of a site as a disposal site or to deny or restrict

use of a disposal site. The revisions will reflect our experiences to date under Section 404(c), and more clearly address use of 404(c) in advance of a specific proposed discharge.

Abstract: This action would revise the definition of "waters of the U.S." by adding four examples to those currently contained under that definition. The intent of this action is to clarify aspects of the current definition which define waters, "the use, degradation or destruction of which would or could affect interstate or foreign commerce," as waters of the U.S. We are not proposing to address any aspects of the definition of "waters of the U.S." in this rulemaking other than those relating to these four examples.

Abstract: This action would revise the testing provisions of the Clean Water Act section 404(b)(1) Guidelines by providing for comparisons between dredged material proposed for discharge and reference sediment that reflects discharge site conditions had dredged material not previously been discharged at the discharge site. This action would make a technical improvement in the testing provisions and make dredged material testing more consistent with that conducted for ocean disposal of dredged material under section 103 of the Marine Protection, Research, and Sanctuaries Act, which currently employs a reference sediment approach.

Abstract: This rulemaking would revise the regulations applicable to the ocean dumping of dredged material. Issuance of these regulations is necessary to respond to the decision in National Wildlife Federation vs. Costle, 629 F. 2d. 118 (DC Circuit 1980) and to incorporate program experience. The revisions will make necessary technical changes and will improve the clarity of the regulations.

Abstract: The Administrator, in consultation with the Secretary of Transportation, is developing regulations which may include the following: (1) requiring waste sources, receiving facilities and vessels to assure that municipal or commercial waste will not be deposited into coastal waters during loading, offloading, and transport; (2) requiring the adoption by each responsible party of a manual identifying procedures to prevent, report, and clean up deposit of waste into coastal waters including

recordkeeping requirements; and (3) if the Administrator determines that tracking systems are required to assure adequate enforcement of laws preventing the deposit of waste into coastal waters, requiring installation of the appropriate systems within eighteen months after the Administrator makes that determination. Benefits resulting from regulation will be reduction of municipal and commercial waste deposited into coastal waters. This will also facilitate more effective enforcement programs to prevent such deposition.

Abstract: The Great Lakes are a valuable national resource, with unique environmental problems. In 1990 the Great Lakes Critical Programs Act was enacted, requiring States to adopt minimum water quality standards for the protection of the Great Lakes System. This regulation constitutes the Water Quality Guidance for the Great Lakes System required by section 118(c)(2) of the Clean Water Act (Pub. L. 92-500 as amended by the Great

Lakes Critical Programs Act of 1990, Pub. L. 101-596). This guidance specifies minimum water quality standards, antidegradation policies, and implementation procedures for the Great Lakes System to protect human health, aquatic life, and wildlife.

CFR Citation: 40 CFR 130

Abstract: EPA published a final rule in the Federal Register on January 4, 1989, amending 40 CFR Parts 122, 123, and 130. This regulation sets out EPA's interpretation of section 304(l) of the CWA. Section 304(l) requires states to list those waters that are adversely affected by toxic, conventional, and nonconventional pollutants. In addition, the regulation requires states to identify the point sources discharging to certain listed waters, and to prepare individual control strategies (ICSs) that will control point source discharges of toxic pollutants. On September 28, 1990, the Ninth Circuit remanded a portion of EPA's regulations. The remand requires EPA to amend its regulations to require an expanded list of point sources that impair water quality. On July 24, 1992 (57 FR 33040), EPA published a final rule requiring States to list the additional point sources. Also on July 24, 1992 (57 FR 33051), EPA published an NPRM responding to the Ninth Circuit decision reconsidering whether ICSs should be required for the expanded list of point source discharges.

Legal Authority: 33 USC 1311(h)/CWA 301(h)

CFR Citation: 40 CFR 125 subpart G

Legal Deadline: None

Abstract: The revisions to the regulations primarily are intended to respond to statutory changes made to sec. 301(h) of the Clean Water Act (33 USC 1311(h)), which governs secondary treatment waivers for municipal discharges into marine waters. The statutory changes to be addressed include, among other things, new requirements for minimum treatment levels and additional requirements for pretreatment programs for certain waiver applicants. In addition, the Agency is considering revising the regulations to address more specifically procedures and requirements for the renewal of secondary treatment waivers. The revised regulations will affect only the limited number of municipal treatment plants which met the 1982 statutory deadline for applying for a secondary treatment waiver.

Significance: Regulatory Program

Legal Authority: 33 USC 1342/CWA 402

CFR Citation: 40 CFR 122

Legal Deadline: None

Abstract: Approximately 1100 cities nationwide have combined sewer systems that overflow resulting in discharges of raw sewage, industrial and commercial wastewaters and stormwaters. Combined Sewer Overflows (CSO's) are responsible for significant public health and water quality problems such as beach closures and shellfish bed closures. CSOs are point source discharges that are subject to the technology and water quality requirements of the Clean Water Act (CWA) and are required to be permitted under the National Pollutant Discharge Elimination System (NPDES) under Section 402 of the Clean Water Act. This CSO policy establishes a common framework and provides guidance to cities with CSOs, NPDES Authorities and water quality standards authorities on how to bring CSOs into compliance with the CWA and existing EPA regulations. Implementation of the CSO Control Policy is within the existing authorities of the Act and EPA regulations. The Policy, in part, is the result of extensive discussions and negotiations of the key stakeholders (e.g., municipal governments, environmental groups, and States).

Abstract: EPA, Army Corps of Engineers, and Soil Conservation Service proposed to incorporate portions of the Federal Manual for Identifying and Delineating Jurisdictional Wetlands into the regulations governing the agencies' wetland protection programs. These portions reflect revisions to the manual proposed on August 4, 1991 (56 fr 40446). Abstract: This action would revise the Clean Water Act section 404(b)(1) Guidelines to provide an exception from the wetlands mitigation sequence (i.e., avoid, minimize, and compensate) for proposed discharges of dredged or fill material into wetlands in the State of Alaska. This rule was proposed to implement a provision of the August 1991 President's Wetlands Plan which provided for States with less than a one percent historic rate of wetlands development to satisfy permit requirements through minimization of impacts.

Abstract: In 1985, the Agency promulgated generally applicable environmental standards for the management and disposal of spent nuclear fuel, high-level and transuranic radioactive wastes. These standards applied to management and disposal of such materials generated by activities under the jurisdiction of the Department of Energy or regulated by the Nuclear Regulatory Commission. They established limits for the release of radioactive materials to the environment. In 1987, the U.S. Court

of Appeals for the First Circuit vacated and remanded Subpart b of the Standards to the Agency for revision consistent with its ruling. In PL 102-579, "The Waste Isolation Pilot Plant Land Withdrawal Act," Congress reinstated containment and assurance requirements vacated in 1987, and directed EPA to promulgate disposal regulations.

Safe Drinking Water Act (SDWA)

3707. ANALYTICAL METHODS FOR REGULATED DRINKING WATER CONTAMINANTS

Legal Authority: 42 USC 300g-1/SDWA 1412; 42 USC 300f/SDWA 1401; 42 USC 300j-9(a)/SDWA 1450(a)

CFR Citation: 40 CFR 141

Legal Deadline: None

Abstract: The U.S. Environmental Protection Agency (EPA) approves analytical methods for analyzing regulated drinking water contaminants. Periodically, the Agency withdraws approval of outdated methods, updates older methods, and/or approves new methods. In this regulatory effort, EPA will propose to accomplish all three actions for a number of contaminants regulated under the Safe Drinking Water Act. These revisions have been evaluated and recommended for use by EPA's Office of Research and Development and by various standards setting organizations. Laboratory acceptance limits, detection limits and other method performance requirements that were specified under previous rules will not be changed in this rulemaking. This rule should decrease the cost of monitoring by broadening the number of regulated chemicals that can be measured by a method. It will also improve monitoring accuracy and precision for many regulated contaminants, since better methods would replace older ones.

Legal Authority: 42 USC 300/SDWA 1412

CFR Citation: 40 CFR 141

Legal Deadline: NPRM, Judicial, September 1994. Final, Judicial, September 1996.

Abstract: This rule will set an MCLG and revised NPDWR for arsenic in drinking water, pursuant to the SDWA amendments of 1986. The SDWA requires EPA to promulgate national primary drinking water regulations for 83 specific contaminants of which arsenic is one. The SDWA directs EPA to promulgate MCLGs at a level at which, in the Administrator's judgment, "no known or anticipated adverse effects on the health of persons occur and which allows for an adequate margin of safety." MCLs are the federally enforceable standards and are set as close to the MCLGs as is feasible, taking costs into consideration.

Significance: Regulatory Program

Legal Authority: 42 USC 300/SDWA 1412

CFR Citation: 40 CFR 141

Legal Deadline: NPRM, Statutory, January 1, 1990. NPRM, Judicial, June 30, 1993. Final, Statutory, January 1, 1991.

Abstract: EPA is scheduled to propose MCLGs and NPDWRs for 25 contaminants from the Drinking Water Priority List, as required by the SDWA of 1986. The SDWA requires regulation of at least 25 contaminants, which are known or anticipated to occur in public water systems, every three years starting in 1991. The SDWA directs EPA to promulgate MCLGs at a level at which, in the Administrator's judgment, "no known or anticipated adverse effects occur and which allows for an adequate margin of safety." MCLs are federally enforceable standards and are set as close to the MCLGs as is feasible, taking costs into consideration. The 25 contaminants come from two groups of contaminants: disinfection by-products (Phase VI A) and organic and inorganic chemicals (Phase VI B). The disinfection by-products portion of this rule is currently undergoing regulatory negotiation.

Legal Authority: 42 USC 300f/SDWA 1421 to 1425

CFR Citation: 40 CFR 147

Legal Deadline: None

Abstract: The Safe Drinking Water Act (SDWA) requires EPA to develop regulations for the protection of underground sources of drinking water from contamination by injection wells. EPA is proposing amendments to its Underground Injection Control (UIC) program regulations for the Osage Mineral Reserve in Oklahoma (40 CFR 147 Subpart GGG) to allow the Regional Administrator flexibility to waive certain technical requirements for temporary abandoned wells and to designate a portion of the Happy Hollow and Z-Sand aquifers in Western Osage County, Oklahoma as exempted aquifers. The proposed changes will provide the Regional Administrator with the same flexibility that presently exists in the generic Federal regulations (40 CFR 144.28(c)(2)(iv) and 144.52(a)(6)) to waive certain technical requirements applicable to active injection wells upon a demonstration by the owner or operator that the well will not endanger underground sources of drinking water during the period of temporary abandonment.

Abstract: Part C of the SDWA directs EPA to develop regulations for the protection of underground sources of drinking water from contamination by injection wells. The greatest number of injection wells are Class II (oil and gas related) wells operated by the petroleum industry for disposal of produced brines and enhanced recovery projects. EPA is considering proposing standards for all newly constructed or converted (from production operations) Class II injection wells. These standards may establish new or incremental performance criteria to ensure protection of underground sources of drinking water (USDWs).

Abstract: The SDWA requires EPA to develop regulations for the protection of underground sources of drinking water from contamination by injection wells. Previously promulgated regulations specified minimum standards and technical requirements for Class I-IV wells. Class V wells, including certain septic systems and a

variety of drainage wells, are the subject of this action. EPA intends to establish a regulatory framework for the management of these wells that will protect against contamination of groundwater while recognizing the difficulties of this diverse well class. Development of any regulatory program will focus on providing maximum flexibility to State, sub-state, and local entities. EPA will characterize risks associated with various Class V injection wells since data are unavailable for risk assessments on an individual subcategory basis.

CFR Citation: 40 CFR 248

Legal Deadline: None

Abstract: RCRA Section 6002(e) requires EPA to prepare guidelines for use by procuring agencies in complying with the requirements of section 6002. The guidelines must first designate items that are or can be produced with recovered materials for which a federal procurement guideline is appropriate. Second, the guidelines must provide product information concerning the availability and performance of products produced with recovered materials. Third, the guidelines are to set forth recommended procurement practices to aid procuring agencies in complying with section 6002. After the date specified in an applicable guideline, section 6002(c) requires each

procuring agency which procures any item designated in a guideline to procure the item composed of the highest percentage of recovered materials practicable except in statutorily specified circumstances. To date, EPA has issued five procurement guidelines. This action would designate plastic pipe products for which the procurement requirement of RCRA section 6002 apply.

Abstract: The Agency is proposing to amend the regulations for hazardous waste management under RCRA by amending the basis for listing a hazardous waste (i.e.; pentachlorophenol production wastes) under 40 CFR 261.31. The Agency is also proposing to amend one hazardous waste (i.e., delete part of FO27 - discarded unused formulations of pentachlorophenol and compounds derived from pentachlorophenol) listed in 40 CFR 261.33 and to add one waste (i.e., U242 - pentachlorophenol) to the list of hazardous wastes in 40 CFR 261. FO21 and U242 would no longer be subject to management standards for acute hazardous wastes. Lastly, the Agency is proposing to clarify the criteria used in 40 CFR 261.11 for listing solid wastes as hazardous. This rule proposes less stringent hazardous waste management standards for FO21 and discarded unused portions containing pentachlorophenol.

Abstract: The Omnibus Budget and Reconciliation Act requires EPA to raise \$38 million annually in user fees as part of an overall Federal deficit reduction program. To help achieve this level, EPA will use the authority of the Independent Offices Appropriations Act of 1951 to propose fees for RCRA Handler Notifications, Waste Export Notifications, and permit fees for EPA-issued RCRA permits.

Legal Authority: 42 USC 6905; 42 USC 6912; 42 USC 6921; 42 USC 6922; 42 USC 6938

CFR Citation: 40 CFR 261

Abstract: This action is deregulatory. Used fluorescent lamps often test hazardous under the Toxicity Characteristic because of their mercury content. However, available information indicates that these lamps may not create an environmental problem when disposed in municipal landfills or sent to mercury reclamation facilities. In addition, there are substantial environmental benefits from using fluorescent lamps, primarily due to energy savings. Therefore, the Agency is considering options for exempting fluorescent lamps from Toxicity Characteristic and options for reducing Subtitle C requirements by including lamps in the "Universal Waste" rule.

Abstract: The Draft Strategy for Combustion of Hazardous Wastes commits EPA to a rulemaking to provide for expanded public involvement during RCRA permitting, particularly for combustion units. This amendment may consider revisions to the public commenting procedures, including at different points in the permitting process, and when trial burn plans and risk assessments are developed for combustion units. Second, the regulations concerning permit modifications may be revised to incorporate more flexibility in classifying changes. Third, the permit appeal procedures may be amended for situations where a permit has been denied, yet the facility is still operating.

Legal Authority: 42 USC 6925/RCRA 3005

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: On January 13, 1992, the Utilities Solid Waste Activities Group (USWAG) petitioned EPA to create a conditional exemption from full Subtitle C permitting requirements for certain small commercial mixed waste generators that are already permitted by the NRC. The generators include medical schools, universities, biotechnology laboratories, and pharmaceutical companies. This new

category would include NRC licensees that generate less than 1000 kg/month of mixed waste, counting mixed waste as distinct from other hazardous waste. EPA and NRC must together determine how to ensure adequate protection of human health and the environment in order for any streamlined permitting of NRC licensed facilities to be implemented.

3750. RCRA SUBTITLE C INDIAN PROGRAM AUTHORIZATION

Legal Authority: 42 USC 6926(b)/3006(b)

CFR Citation: 40 CFR 271 (Revision)

Legal Deadline: None

Abstract: This action would authorize Indian Tribes to implement the Subtitle C program, establishing the definition of an Indian Tribe and the criteria an Indian Tribe must meet for authorization purposes. Since the Agency also decided that Indian Tribes may be authorized for partial programs (States are not allowed partial State programs under RCRA authorization), the action would address this program difference. The regulation would also address Indian capability, including criminal enforcement capability, and fulfills EPA's stated 1984 Indian Policy by ensuring the close involvement of tribal governments in making decisions and managing environmental programs affecting reservation lands.

Legal Authority: 42 USC 6944(a)/RCRA 4004(a); 33 USC 1345(d) and (e)/CWA 405

CFR Citation: 40 CFR 258.51(b)

Legal Deadline: None

Abstract: The RCRA Subtitle D Solid Waste Disposal Facility Criteria, among other provisions, require owners/operators of municipal solid waste landfills to monitor ground water to detect a release from their landfills.

EPA—RCRA

Proposed Rule Stage

The Criteria ban the filtering of ground-water samples in the field because filtering potentially removes some of the contamination found in the solid phase of the samples. Since promulgation of the Criteria, a number of States and industry groups have stated that it is important to field filter ground-water samples for metals to avoid potential false indications of a landfill release to ground water. The commenters maintain that the analytical results using filtered samples are sufficiently protective and are as effective as unfiltered samples required in the Criteria. This notice of proposed rulemaking (NPRM) would announce the Agency's intent to perform additional study on field filtering and solicit further public comment and data on this issue. In addition, this NPRM would seek comment on the appropriateness of allowing States/Tribes with EPA-approved permit programs to lift the ban on a site-specific basis.

Legal Authority: 42 USC 6945/RCRA 4005

CFR Citation: 40 CFR 239

Legal Deadline: None

Abstract: This action would describe procedures EPA would use to make determinations of adequacy for State/Tribal solid waste permitting programs, as required by Section 4005 of the Solid Waste Disposal Act, as amended (RCRA). This adequacy determination regulation is critical to the successful implementation of the Revised Criteria (40 CFR 258). Section 4005(c)(1)(B) requires States to adopt and implement a permit program, or other system of prior approval, within 18 months after the promulgation of revised criteria under Section 4004(a), as required by Section 4010(c). Section 4005(c)(1)(C) requires the Administrator to determine whether each State has developed an "adequate permit program" under this paragraph.

Legal Authority: 42 USC 6912(a)/RCRA 6002

CFR Citation: 40 CFR 250

Legal Deadline: None

Abstract: RCRA section 6002 states that if a procuring agency purchases certain designated items, such items must be composed of the highest percentage of recovered materials practicable. EPA is required to designate these items, prepare guidelines to assist procuring agencies in complying with the requirements of Section 6002, and revise these guidelines "from time to time." To date, EPA has issued five procurement guidelines, including one for paper and paper products containing recovered materials, promulgated on June 22, 1988. Much has changed in the papermaking industry over the past three years in terms of technological advancement and the willingness to respond to consumer demand for recycled products. The proposed notice would revise the existing paper procurement guideline by recommending new minimum recycled content standards for various grades of paper. These revised standards would better reflect the capabilities and practices of paper manufacturers and increase the utility of the paper guideline.

EPA—RCRA

Proposed Rule Stage

Abstract: RCRA Section 6002(e) requires EPA to prepare guidelines for use by procuring agencies in complying with the requirements of section 6002. The guidelines must first designate items that are or can be produced with recovered materials for which a federal procurement guideline is appropriate. Second, the guidelines must provide product information concerning the availability and performance of products produced with recovered materials. Third, the guidelines are to set forth recommended procurement practices to aid procuring agencies in complying with section 6002. After the date specified in an applicable guideline, section 6002(c) requires each procuring agency which procures any item designated in a guideline to procure the item composed of the highest percentage of recovered materials practicable except in statutorily specified circumstances. To date, EPA has issued five procurement guidelines. This action would designate hydraulic mulch products as products for which the procurement requirement of RCRA section 6002 applies.

Legal Authority: 42 USC 6991/RCRA 9003

Abstract: This action would establish, under Subtitle I of RCRA (as amended by SARA), requirements for demonstrating financial responsibility for taking corrective action and compensating third parties for bodily injury and property damage caused by releases from underground storage tanks (USTs) containing hazardous substances. An ANPRM was published to help gather data (e.g., frequency of releases from such USTs, costs of

Significance: Regulatory Program

Legal Authority: 33 USC 1321/CWA 311(j)(1)(C)

CFR Citation: 40 CFR 112

Legal Deadline: None

Abstract: Following a major inland oil spill with substantial environmental impacts (i.e., Ashland Oil in Floreffe, PA, in January, 1988) an interagency task force reviewed the adequacy of existing EPA regulations concerning the prevention and control of oil spills (40 CFR 112). The task force recommended a number of steps to improve and extend the regulations. The final rule would implement some of the task force recommendations. It would clarify that many provisions of the existing regulations that may be interpreted as recommended practices by the regulated community are in fact required practices.

CFR Citation: 40 CFR 234

Legal Deadline: Final, Statutory, October 28, 1990.

Abstract: Plastic ring carriers have been found in the marine environment and fish and other wildlife have become entangled in them. Ring carriers were identified as an article of concern in the marine environment in EPA's February 1990 report to Congress on plastics. Congress has determined

that degradable carriers should reduce the incidence of entanglement and has directed EPA to develop regulations that ring carriers be made of degradable material unless EPA finds that degradable rings pose more risk than non-degradable rings. EPA may specify degradability time frames and testing methods. A number of States currently require degradable rings. All rings manufactured in the United States are photodegradable.

Abstract: This action would establish part 282 for codification an approved State program and for incorporation by reference of those provisions of State statutes and regulations that will be subject to EPA's inspection and enforcement authorities under Sections 9005 and 9006 of Subtitle I of RCRA. As part of this action, part 282 would codify the prior approval of New Hampshire's underground storage tank program and incorporate by reference appropriate provision of State statutes and regulations. EPA is required under 40 CFR to codify its approved State UST programs. The first state program was approved July, 1990. Subsequently, eleven more state programs have been approved. None have yet been codified. This action would allow for the codification of all approved State programs while at the same time actually codifying one of these State programs, New Hampshire.

Legal Authority: 42 USC 6921/RCRA 3001; 42 USC 6912/RCRA 2002

CFR Citation: 40 CFR 261

Legal Deadline: None

Abstract: This action would suspend the Toxicity Characteristic (TC) rule in States with adequate petroleum response programs, as it applies to non-UST petroleum contaminated media and debris, for a period of three years. This action would generally be consistent with the UST deferral in the TC rule. During this period the Agency would collect additional data, perform additional analyses, and explore other administrative and legal options and issues in preparation for making a final decision as to the appropriate RCRA regulatory treatment for these materials.

3772. FINAL DETERMINATION OF THE APPLICABILITY OF THE TOXICITY CHARACTERISTIC RULE TO UNDERGROUND STORAGE TANKS CONTAMINATED MEDIA AND DEBRIS

Significance: Regulatory Program

Legal Authority: 42 USC 6921/RCRA 3001

CFR Citation: 40 CFR 261

Legal Deadline: None

Abstract: In the final hazardous waste Toxicity Characteristic (TC) rule, EPA decided to temporarily defer a final decision on the application of the TC rule to media and debris contaminated with petroleum from underground storage tanks (USTs) that are subject to UST corrective action requirements under 40 CFR Part 280. The Agency believed the UST regulations governing cleanups at these sites would be adequate in the interim. The application of the TC rule to UST cleanups was temporarily delayed so that the Agency could evaluate the extent and nature of these impacts and alternative mechanisms for implementing UST cleanups. The Agency has completed studies of the characteristics of UST corrective action sites, and current practices for management of media and debris under subtitle I State programs. After evaluation of public comments on the studies, EPA will make a final determination, through the issuance of a proposed and final rule, regarding the applicability of the TC rule to UST petroleum-contaminated media and debris.

Abstract: Under the existing exclusion, up to 1000 kg of non-acutely hazardous waste may be treated from a single waste stream with a maximum of 250 kg (less than two drums) per day. This quantity limit is insufficient for testing many pilot-scale technologies and serves as an impediment to the development of new technology and inhibits broader treatability testing at hazardous waste sites. The proposed action involves a revision of the RCRA Treatability Study Exemption Rule (40 CFR 261.4(e)-(f)). A new limit will be considered based on needs for testing and de minimis risk.

Abstract: On March 30, 1992, the Organization for Economic Cooperation and Development (OECD) adopted the Council's Final Decision on the Control of Transfrontier Movements of Wastes Destined for Recovery Operations. The United States, a member of the OECD, supported the Decision, which is

EPA—RCRA

Final Rule Stage

legally binding. The Decision establishes a graduated system of procedural controls for the export and import of wastes for recovery, depending on whether a waste is included in the green, amber, or red lists. Green waste are subject only to controls imposed in normal international commercial shipments. Amber and red wastes that are considered hazardous are subject to additional controls regarding notification to and consent from the exporting, importing, and transit countries; contracts, tracking documents; and recordkeeping. These provisions are being codified in a final rule which would replace the current RCRA export/import regulations for hazardous waste destined for recovery within the OECD. (cont)

3775. REGULATORY DETERMINATION ON WASTES FROM THE COMBUSTION OF FOSSIL FUELS

Legal Authority: 42 USC 6921(b)(3)(C)/RCRA 3001(b)(3)(C)

CFR Citation: 40 CFR Not yet determined

Legal Deadline: Final, Judicial, April 1, 1998.

Abstract: As required by consent decree, the Agency determined on December 1, 1992, that additional study of the four large-volume wastes -- fly ash, bottom ash, boiler slag and flue gas emission control wastes -- from the combustion of coal by electric utility power plants was not necessary, and

that a Final Regulatory Determination would be made on these wastes by August 2, 1993. (This determination was signed on August 2, 1993 and published in the Federal Register on August 9, 1993). The Agency also determined that for the remaining fossil-fuel combustion wastes, additional data collection is necessary to make a Regulatory Determination on these wastes and a final regulatory determination will be made by April 1, 1998. The phrase "remaining wastes" refers to (1) fly ash, bottom ash, boiler slag, and flue gas emission control wastes from the combustion of coal by electric utility power plants when such wastes are mixed with, co-disposed, co-treated, or otherwise co-managed with other wastes generated in conjunction with the combustion of coal or other fossil fuels, (CONT)

Significance: Regulatory Program

Legal Authority: 42 USC 6921/RCRA 3001(b)(3)(A)(iii); RCRA 8002(o)

CFR Citation: 40 CFR Not yet determined

Legal Deadline: NPRM, Judicial, December 31, 1993. Final, Statutory, June 30, 1994. Final, Judicial, June 30, 1994.

Abstract: RCRA 8002(o) requires that the Cement Kiln Dust Report to Congress study the sources and volumes of cement kiln dust, current and alternative waste management practices and their costs and economic impacts, documented damages to human health and the environment from cement kiln dust disposal, and existing state and Federal regulation of these wastes. EPA will use this information to develop a recommendation as to whether regulation of cement kiln dust is warranted under Subtitle C of RCRA. After completion of the Report to Congress, and a opportunity for public comment, EPA will make a final regulatory determination.

By consent decree, the Cement Kiln Dust Report to Congress must be completed by December 31, 1993; the Regulatory Determination must be made by June 30, 1994.

Abstract: This action would change the subpart F groundwater monitoring regulations. The following is a summary of the changes the Agency is considering: (a) require use of site-

specific data and modeling predictions on containment fate and transport for groundwater monitoring variances; (b) clarify the definition of waste management area and provide flexibility in determining the appropriate monitoring or response programs for individual areas; (c) allow flexibility in schedules for submittal of the information upon approval by the Regional Administrator (RA); (d) clarify the RA's authority to require monitoring of any flow pathway in the uppermost aquifer and unsaturated zone; (e) clarify the RA's authority to designate supplemental monitoring wells when justified by complicated monitoring situations; and (f) allow a return to detection or compliance monitoring as appropriate; (g) add quality assurance and quality control requirements for groundwater monitoring devices and methods.

Abstract: This action would set forth the technical and procedural requirements for conducting corrective action to clean up significant releases to air, surface water, groundwater and soil at solid waste management units (SWMUs) at operating, closed, or closing RCRA facilities. The regulations would define the structure of the program, and the requirements for implementing remedial action, remedy selection and corrective measures. Currently, the permitting agencies must

Legal Deadline: Final, Statutory, May 1987. Final, Judicial, November 1994.

Abstract: The purpose of this action is to investigate the health and environmental impacts of non-combustion source air emissions from hazardous waste treatment, storage, and disposal facilities and to develop standards for monitoring and control as needed. Sources include tanks, surface impoundments, landfills, waste piles, land treatment operations and wastewater treatment facilities. Pollutants to be considered by such standards would include volatile organic compounds, particulate matter, specific toxic substances, or a combination of these. The mandate for

standards development under RCRA is to protect human health and the environment. The Agency has adopted a three-phase approach: Phase I regulates organic emission from equipment leaks and process vents; Phase II will address tanks, containers, surface impoundments, and miscellaneous units; and Phase III will address residual risk associated with particular hazardous organic constituents.

Abstract: The use of consumer and commercial products has been identified as a potential source of VOC emissions. Section 183(e) of the Clean Air Act, as amended in 1990, requires that EPA conduct a study of VOC emissions from consumer and commercial products. The objectives of the study are (1) to determine the

potential of these products to contribute to ozone nonattainment; and (2) to establish criteria for selecting categories of products for regulation under Section 183(e). Not later than November 1993, EPA must submit a report to Congress that documents the results of the study. Upon submission of the report to Congress, EPA must list those categories of consumer and commercial products that have been determined, based on the study, to account for at least 80 percent of the VOC emissions from consumer and commercial products. This list, which is to be divided into four groups by priority according to the selection criteria, will comprise the regulatory agenda.

3794. REVISION OF RULES FOR PREVENTION OF SIGNIFICANT DETERIORATION (PSD) AND NEW SOURCE REVIEW (NSR)

Significance: Regulatory Program

Legal Authority: Clean Air Act Amendments, title I

CFR Citation: 40 CFR 51.160 to 51.166; 40 CFR 51, appendix S; 40 CFR 52.21; 40 CFR 52.24

Legal Deadline: None

Abstract: The purpose of this action is to amend EPA's existing new source review regulations, including prevention of significant deterioration to reduce the level of program complexity. In addition, certain other revisions will be made to improve the clarity of the existing regulatory language. This rulemaking will satisfy obligations under Exhibit B of the settlement agreement in *Chemical Manufacturers vs. EPA*, No. 79-112 (D.C. Cir.). The regulations contain procedures for reviewing, permitting, and specifying controls for the construction and modification of major air pollution sources in attainment and nonattainment areas. Several new source review regulations will be affected, including the State implementation requirements for the review of new sources and modifications (40 CFR 51.160-166 and Appendix S), the Federal prevention of significant deterioration program (40 CFR 52.21), and Federal restrictions on

new source construction (40 CFR 54.24).

Significance: Regulatory Program

Legal Authority: 42 USC 7547

CFR Citation: 40 CFR 86

Abstract: The Clean Air Act Amendments of 1990 require EPA to promulgate emission standards for railroad locomotives. It is likely that railroad locomotives are significant contributors of pollution in some areas of the country for some pollutants. Abstract: The Clean Air Act requires States to reduce emissions to meet air-quality standards. Under this initiative, EPA will produce guidance for States which clarifies how the CAA requirements can be met by trading emission reductions among mobile and stationary sources. This guidance will encourage States to consider these trading opportunities as they develop their implementation plans for air-quality management. The guidance will also detail any restriction on the ability to trade among these source categories.

Legal Authority: 42 USC 7410 - Clean Air Act; 42 USC 7601(a) - Clean Air Act; 42 USC 7613 - Clean Air Act; 42 USC 7619 - Clean Air Act

CFR Citation: 40 CFR 58

Legal Deadline: None

Abstract: A new method for monitoring pollutants in ambient air has been developed and introduced to the EPA. This new monitor, called an open path analyzer, is capable of measuring pollutant concentrations over a path of several meters to a kilometer. Traditional monitoring methods measure gaseous pollutant concentrations by extracting an air sample through an inlet probe, resulting in a "point" measurement. The advent of open path technology has necessitated this revision of the existing regulations which govern the use of ambient air monitors. These revisions will parallel the existing criteria required for ambient air monitors used in the state and local air quality monitoring networks.

Legal Authority: 42 USC 7511; 42 USC 7410

CFR Citation: 40 CFR 51

Legal Deadline: None

Abstract: Emission statements and periodic inventories are new programs addressed in the 1990 Amendments to the Clean Air Act that calls for emissions reporting. In addition, requirements for the annual reporting of emissions from stationary sources are contained in 40 CFR 51.321 - 51.323. Each of these programs requires either sources or states to report emissions and other supporting data. The data reporting intervals, type of pollutant source, pollutant type, and geographic coverage varies for the three programs. This rule will address the streamlining and consolidation of reporting requirements of each of these programs. The emissions data made available by these programs will also provide a mechanism for tracking emissions on an annual basis.

Legal Authority: 42 USC 7410

CFR Citation: 40 CFR 51

Legal Deadline: None

Abstract: Instrumental test methods currently available require on-site, multi-point calibration with gaseous standards of known concentration. For testing contractor conducting multiple test methods, this can frequently mean the transportation of dozens of high pressure gas cylinders over long distances. Gas dilution systems are available which can be used to dilute a known, certified high level gas into lower concentration gases. This method, which has been available for comment through the Emission Measurement Technical Information Center since April, 1991, provides a standard procedure for certifying the accuracy and precision of these gas dilution systems for field applications. The purpose of this method is to provide the State and local administration with a tool for insuring correct instrument calibration, while providing considerable cost savings to the source.

3816. NSPS: REVIEW OF SUBPART (D)(A)—ELECTRIC UTILITY STEAM GENERATING UNITS (SO₂)

Significance: Regulatory Program

Legal Authority: 42 USC 7411/CAA 111; Clean Air Act Amendments of 1990, sec 403

CFR Citation: 40 CFR 60

Legal Deadline: Final, Statutory, November 1993.

Abstract: Subpart Da of 40 CFR part 60 applies to large electric utility steam generating facilities. EPA is revising this NSPS, pursuant to Section 403 of the Clean Air Act Amendments of 1990. This section requires the SO₂ emission limitations be revised to reflect changes in Section 111. The revised emission limitations are to result in emissions compliance with the existing NSPS. A regulatory schedule is currently under development.

3817. NESHAP: ASBESTOS PROCESSING STANDARD

Significance: Regulatory Program

Legal Authority: 42 USC 7412/CAA 112

CFR Citation: 40 CFR 63

Legal Deadline: None

Abstract: The asbestos processing source category was listed as an area source to be regulated under the Clean Air Act. The purpose of this action is

to develop maximum achievable control technology (MACT) or generally achievable control technology (GACT) standards for the asbestos processing source category that is comprised of the milling, manufacturing, and fabrication subcategories of the asbestos NESHAP (40CFR Part 61) Pollutants to be regulated include asbestos and other HAPs emitted by these subcategories.

Legal Authority: Clean Air Act Amendments of 1990, sec 112

CFR Citation: 40 CFR 63

Legal Deadline: Final, Judicial, November 23, 1994.

Abstract: Chromium compounds are among the pollutants listed as hazardous under Section 112 of the Clean Air Act Amendments of 1990. The EPA will propose to develop standards for chromium emissions from electroplating operations. Hard, decorative, and anodizing operations may be affected. The standards could require the use of maximum achievable control technology pursuant to the Clean Air Act Amendments of 1990.

CFR Citation: 40 CFR 63

Legal Deadline: NPRM, Judicial, November 15, 1993. Final, Judicial, November 15, 1994.

Abstract: An NSPS was proposed for this source category in 1980. Subsequently, in 1987, the Agency solicited public participation in information gathering in preparation for a decision on whether to regulate this source category under the NESHAP program, the NSPS program, or both. The NESHAP regulations are being developed and would apply to new and existing organic halogenated solvent cleaners (degreasers) using any of the hazardous air pollutants listed in the Clean Air Act, as amended. By consent decree, the Agency has to propose a rule for this project by November 15, 1993, and promulgate the rule within twelve (12) months of the proposal.

Significance: Regulatory Program

Legal Authority: Clean Air Act Amendments of 1990, sec 112

CFR Citation: 40 CFR 63

Legal Deadline: Final, Statutory, November 15, 1997.

Abstract: This standard would control air emissions of hazardous air pollutants from pulp and paper mills. The regulation could address air emissions from process vents, storage tank vents, spills, kraft, soda, sulfite, and semichemical mills, and wastewater collection and treatment associated with the following noncombustion mill areas: pulping, turpentine recovery, oil recovery, pulp washing, prebleaching, bleaching, evaporation, and paper making. This regulation may also control air emissions from units associated with the liquor recovery cycle such as the recovery of furnace, lime kiln, causticizing tanks, and smelt tanks. Air emission standards for noncombustion sources at kraft, soda, sulfite, and semichemical mills are being integrated with the Clean Water Act effluent guideline limitations under development for these mills (see RIN 2040-AB53). The standards for this industry will be proposed and promulgated on a phased schedule.

3824. RADIONUCLIDE MAJOR SOURCE DEFINITION

Significance: Agency Priority

Legal Authority: 42 USC 7607/CAA 112

CFR Citation: 40 CFR 63

Legal Deadline: None

Abstract: Section 112(a) of the CAA Amendments of 1990 defines major source as any source that emits 10 tons or more per year of any hazardous air pollutant (HAP) or 25 tons or more per year of any combination of HAP. The ton quantities are inappropriate for radionuclides, as very small emissions of radiation may be extremely hazardous. The statute authorizes different criteria to be established for radionuclides. This rulemaking will establish these criteria.

Significance: Agency Priority

Legal Authority: Clean Air Act Amendments of 1990, sec 112

CFR Citation: 40 CFR 63

Legal Deadline: Final, Statutory, November 15, 1994.

Abstract: Gasoline vapors contain about ten of the hazardous air pollutants HAPs listed in Section 112 of the Clean Air Act Amendments of 1990. These HAP emissions occur during transferring and storage operations. Facilities being analyzed are bulk gasoline terminals and plant pipe facilities, and gasoline service stations. Control alternatives of major sources of emissions (large size terminals and pipeline facilities) are the only alternatives being considered. Costs average about eighteen million dollars per year with benefits of about two thousand tons of HAP reduced, and about forty thousand tons of volatile organic compounds.

Legal Authority: Clean Air Act Amendments of 1990, sec 112

CFR Citation: 40 CFR 63

Legal Deadline: Final, Statutory, November 15, 1994.

EPA is required to promulgate 25% of the listed source categories by November 15, 1994. EPA plans to promulgate this standard by that date to satisfy part of this statutory obligation.

Abstract: Title III of the Clean Air Act Amendments of 1990 requires EPA to develop emission standards for 189 hazardous air pollutants (HAPs). Petroleum refining is among the potential source categories to be regulated under Section 112 of the CAA. Sources of emissions within

petroleum refineries include process vents, equipment leaks, wastewater collection and treatment facilities, transfer operations and storage vessels.

CFR Citation: 40 CFR 63

Legal Deadline: Final, Statutory, November 15, 1994. Final, Judicial, November 23, 1994.

Abstract: EPA is developing a NESHAP for the major source category of magnetic tape manufacturing. This industry manufactures audio video and computer tape by coating a plastic substrate (tape) with a solvent-based magnetic coating. The primary HAPs used in this industry are methyl ethyl ketone, methyl isobutyl ketone, and toluene. These are used both as a solvent for heating and as a cleaning solution for cleaning operations. EPA promulgated an NSPS for this industry in 1988. The standards for the NESHAP are to be technology-based and are to require the maximum achievable control technology (MACT) as described in section 112 of the CAA.

CFR Citation: 40 CFR 63

Legal Deadline: Final, Statutory, November 15, 1994. Final, Judicial, July 31, 1995.

Abstract: This NESHAP will be based on maximum achievable control technology (MACT). The NESHAP will address organic hazardous air pollutants (HAPs) emitted by all processes associated with the manufacture and rework of military and commercial aircraft, subassemblies, and aircraft parts. The majority of HAP emissions from the category come from solvent usage (i.e. MEK, MIBK, toluene, methylene chloride, etc.).

CFR Citation: 40 CFR 63

Legal Deadline: Final, Statutory, November 15, 1994. Final, Judicial, May 31, 1995.

EPA is required to promulgate 25% of the listed source categories by November 15, 1994. EPA plans to promulgate this standard by that date to satisfy part of this statutory obligation.

Abstract: Secondary lead smelters are a major source of hazardous air pollutants. Potential emissions include compounds of lead, antimony, and cadmium; hazardous organic compounds including benzene, methyl chloride, butadiene; and hydrochloric acid. 3835. STANDARDS OF PERFORMANCE FOR HAZARDOUS AIR POLLUTANTS FOR THE MINERAL WOOL PRODUCTION INDUSTRY

Legal Authority: 42 USC 1857 et seq; 44 USC 350 et seq; 4 USC 605; EO 12291

CFR Citation: 40 CFR 63

Legal Deadline: Final, Statutory, November 15, 1997.

Abstract: The Clean Air Act, as amended in 1990, requires the EPA to (1) publish an initial list of all categories of major and area sources of the hazardous air pollutants (HAPs) listed in Section 112(b) of the CAA, (2) promulgate a schedule establishing a date for the promulgation of emissions standards for each of the listed

categories of HAPs emission sources, and (3) develop emission standards for each source of HAPs. These standards are to be technology-based and are to require the maximum degree of emission reduction determined to be achievable by the Administrator. The Agency has determined that the mineral wool production industry may reasonably be anticipated to emit several of the 189 HAPs listed in Section 112(b) of the CAA. As a consequence, a regulatory development program is being pursued for the mineral wool production industry to promulgate emission standards within 7 years of enactment of the Clean Air Act Amendments.

CFR Citation: 40 CFR 63

Legal Deadline: Final, Statutory, November 15, 1997.

This standard must be promulgated within seven years of enactment of the Clean Air Act.

Abstract: Hazardous air pollutants (HAPs) known to be emitted from oil and gas production facilities include benzene, toluene, ethyl benzene, and xylene isomers (collectively referred to as BTEX), along with 2,2,4-trimethylpentane and hexane. Potential HAP emission sources are gas/liquid separators, natural gas processing operations, glycol dehydration units and reboilers, crude oil storage tanks, and waste water treatment facilities.

Legal Authority: Clean Air Act Amendments of 1990, sec 112

CFR Citation: 40 CFR 63

Legal Deadline: None

Abstract: Title III of the amended Clean Air Act requires development of emission standards for all major sources, and selected area sources, emitting any of the 189 hazardous air pollutants identified in Section 112(b) of the Act. Amino, acetal, and phenolic resins productions have been listed as categories of major sources based on documented emissions of phenol and/or formaldehyde. The purpose of the Formaldehyde-based Resin project is to initiate the regulatory process for sources engaged in the production of amino, acetal, and phenolic resins, and to ultimately develop a NESHAP based on candidate Maximum Achievable Control Technology. CFR Citation: 40 CFR 63

Legal Deadline: Final, Statutory, November 15, 1997. Clean Air Act Amendments of 1990

Abstract: The CAAA required EPA to publish an initial list of all categories of major and area sources of the hazardous air pollutants (HAPs) listed in Section 112(b) of the CAAA and, to establish dates for the promulgation of emission standards for each of the listed categories of HAP emission sources and develop emission standards for each source of HAPs such that the schedule is met. The standards are to be technology-based and are to require the maximum degree of emission reduction determined to be

achievable by the Administrator. The Agency has determined that the phosphoric acid manufacturing industry may reasonably be anticipated to emit several of the 189 HAPs listed in Section 112(b) of the CAAA. As a consequence, the source category is included on the initial list of HAP-emitting categories scheduled for standards promulgation within 7 years of enactment of the CAAA. The purpose of this action is to pursue a regulatory development program such that emission standards may be proposed and promulgated according to the mandated schedule.

Significance: Agency Priority

Legal Authority: Clean Air Act, sec 112 as amended, November 1990

CFR Citation: 40 CFR 63

Legal Deadline: Final, Statutory, November 15, 1995.

EPA is required to promulgate national emission standards for 50% of the source categories listed in Sect. 112(e) by Nov. 15, 1997. EPA plans to promulgate this standard by January 31, 1996.

Abstract: Hydrogen chloride (HC1) and chlorine are among the pollutants listed as hazardous air pollutants in Section 112 of the Clean Air Act Amendments of 1990. Steel pickling processes that use HC1 solution and HC1 regeneration processes have been identified by the EPA as potentially significant sources of HC1 and chlorine air emissions and, as such, a source category for which national emission standards may be warranted.

Significance: Agency Priority

Legal Authority: Clean Air Act, sec 112 as amended November 1990

CFR Citation: 40 CFR 63

Legal Deadline: Final, Statutory, November 15, 1997.

EPA is required to promulgate 50% of the source categories listed in Section 112(e) by November 15, 1997. EPA plans to promulgate this standard by 3/31/95, to satisfy part of the stat requirement

Abstract: Chromium chemical production emits at least one of the 189 hazardous air pollutants (HAPs) as listed in Section 112(b) of the Clean Air Act, as amended in 1990. As a consequence, chromium chemicals production has been included on the initial list of HAP emitting categories published July 16, 1992, in the Federal Register. Currently, only two chromium chemical manufacturing plants exist in the U.S.: Occidental Chemical Corporation in Castle Hayne, NC; and American Chrome & Chemical Inc. plant in Corpus Christi, TX.

Significance: Agency Priority

Legal Authority: Clean Air Act, sec 112 as amended November 1990

CFR Citation: 40 CFR 63

Legal Deadline: Final, Statutory, November 15, 1997.

EPA is required to promulgate 50% of the source categories listed in Section 112(e) by 11/15/97. EPA plans to promulgate this standard by 11/30/94 to satisfy part of the stat requirement.

EPA-CAA

Proposed Rule Stage

Abstract: Cyanide compounds are among the pollutants listed as hazardous air pollutants in Section 112 of the Clean Air Act Amendments of 1990. As a consequence, the EPA has determined that sources that manufacture cyanide compounds may reasonably be anticipated to emit cyanide compounds in quantities sufficient to qualify them as major sources. Three source categories that either produce hydrogen cyanide or use it in the production of other chemicals, specifically cyanuric chloride and sodium cyanide, are on the initial list of HAP emitting source categories selected for regulation. Emission standards would substantially reduce the amount of cyanide discharged to the atmosphere from cyanide chemical manufacturers.

Significance: Agency Priority

Legal Authority: Clean Air Act, sec 112 as amended November 1990

CFR Citation: 40 CFR 63

Legal Deadline: Final, Statutory, November 15, 1997.

EPA is required to promulgate 50% of the source categories listed in Section 112(e) by 11/15/97. EPA plans to promulgate this standard by 8/30/95, to satisfy part of this stat. requirement.

Abstract: The primary copper smelter industry is known to emit a number of the hazardous air pollutants listed in Section 112 of the Clean Air Act Amendments of 1990. Most smelters have extensive control systems for oxides of sulfur and HAPs. However, fugitive emissions may cause several smelters to exceed major source levels.

Additional emissions standards for several HAPs would decrease the amount of these pollutants emitted to the atmosphere and reduce adverse human health and environmental impacts.

Significance: Agency Priority

Legal Authority: Clean Air Act, sec 112 as amended November 1990

Legal Deadline: Final, Statutory, November 15, 1997.

EPA is required to promulgate 50% of the source categories listed in Section 112(e) by 11/15/97. EPA plans to promulgate this standard by 4/13/96 to satisfy part of this stat requirement.

Abstract: Many of the chemicals used to treat wood products to protect them from deterioration are listed as hazardous air pollutants in Section 112 of the Clean Air Act Amendments of 1990. Treatment processes have been identified as potentially significant sources of these HAPs and, as such, are source categories for which for which national emission standards may be necessary. Emissions standards would decrease the amount of these HAPs emitted to the atmosphere and reduce adverse human health risks.

Significance: Agency Priority

Legal Authority: Clean Air Act, sec 112 as amended November 1990

Legal Deadline: Final, Statutory, November 15, 1993.

EPA is required to promulgate 50% of the source categories listed pursuant to Section 112(e) by November 15, 1997.

Abstract: The EPA has determined that integrated iron and steel mills emit several of the 189 hazardous air pollutants (including compounds of chromium, lead, manganese, and polycyclic organic matter) in quantities sufficient to designate these as major sources. Major operations include sinter production, iron production (blast furnaces), steelmaking (basic oxygen furnaces), and semifinished and finished product preparation. Currently, there are 29 integrated mills in the U.S. which are owned by 17 individual companies. The mills are distributed among 10 States with the majority located in four Mid-Western States (15) and Pennsylvania.

Abstract: Section 610(d) bans the sale or distribution, or offer for sale or distribution in interstate commerce aerosol and foam products containing or manufactured with class II substances. 3849. SEQUENCE OF APPLICATION OF MANDATORY SANCTIONS UNDER SECTION 179

Significance: Agency Priority

Legal Authority: Clean Air Act, sec 179

CFR Citation: 40 CFR 52

Legal Deadline: Final, Statutory, April 22, 1993.

EPA issued initial findings under section 179 on October 22, 1991. Consequently, it may be necessary to impose the first sanctions 18 months from that date.

Abstract: Section 179 of the CAA mandates the imposition of certain sanctions. These sanctions follow one of four types of findings: (1) finding of failure to submit a required SIP; (2) finding that a SIP submittal is incomplete; (3) finding of SIP disapproval; or (4) finding of nonimplementation. The two available sanctions are highway funding restriction and a 2-to-1 emission offset requirement for major new or modified stationary sources. Section 179(a) requires EPA to select one of these two sanctions to be applied 18 months after a finding if the deficiency prompting

the finding is not corrected, and the second sanction 6 months later if the deficiency remains uncorrected. The purpose of this action is to streamline, to the extent possible, the process of deciding the order of sanction application under section 179 by promulgating a rule which states, as a general matter, the order in which EPA would apply the sanctions.

Legal Authority: Clean Air Act Amendments of 1990, sec 183

CFR Citation: 40 CFR 90

Legal Deadline: Final, Statutory, November 1992. Final, Judicial, April 30, 1995.

Abstract: This regulation will control volatile organic compounds (VOCs) and hazardous air pollutants (HAPs) emissions from tank vessel loading operations. A regulation is required by Section 183 of the Clean Air Act Amendments of 1990. Approximately 65,000 megagrams of VOCs and 8,000 megagrams of HAPs are emitted annually from tank vessel loading operations.

Abstract: This action will establish procedures under which vehicle manufacturers will demonstrate durability of their emission control systems during certification of passenger cars and light-duty trucks beginning with the 1997 model year. Under a separate action (SAN 2949), EPA promulgated revised light-duty durability procedures for certification of model years 1994 through 1996, in line with revised useful life levels mandated by the Clean Air Act Amendments of 1990. The long term durability program will translate into regulation ongoing efforts by the EPA and vehicle manufacturers to develop durability procedures that will more accurately predict the emission deterioration of vehicles in actual use.

3854. COLD TEMPERATURE CARBON MONOXIDE EMISSIONS AVERAGING

Legal Authority: 42 USC 7521/CAA
202(j)

CFR Citation: 40 CFR 86 subpart A

Legal Deadline: None

Abstract: In the Cold Temperature Carbon Monoxide Emissions notice of proposed rulemaking published September 17, 1990 (55 FR 38250), EPA solicited and subsequently received comments regarding a cold temperature CO emissions averaging program, although it did not propose such a program. In the Final Rule, promulgated July 17, 1992 (57 FR 31888), EPA stated that it would publish a proposal regarding an averaging program in the near future, taking the comments received into consideration. The Agency intends to propose an averaging, banking and trading program modelled after such programs already in place for other mobile source pollutants and vehicle classes. Such a program would allow manufacturers additional flexibility to optimize their emission control systems, thus potentially reducing control costs while achieving emission reductions essentially equivalent to those required by the non-averaged standards. The expected effective model year is 1996, which is the first year the current regulations require 100% compliance with the cold temperature CO standards.

Abstract: The interest in adopting California emission requirements by other States under section 177 of the Clean Air Act has raised critical implementation and enforcement questions. These questions will affect manufacturers, dealers, and distributors who sell cars in section 177 and their bordering States. Basically, a system must be developed which will allow section 177 State dealers to sell Federal cars and for dealers in those surrounding States to sell California cars, as long as these cars are primarily used in the correct state. A general solution will be similar to the system for enforcing high and low altitude sales (40 CFR Part 86.091-30).

Legal Authority: 42 USC 7525/CAA 206(b)

CFR Citation: 40 CFR 86 subpart G (Revision); 40 CFR 86 subpart K (Revision)

Legal Deadline: None

Abstract: This action would consider an amendment to the existing regulations to include ports of entry as a location for EPA selection of foreign produced vehicles and engines for SEA emissions testing at laboratories in the U.S. While the regulations do not specify EPA authority to conduct such port selections, the increased flexibility provided by port selections warrants amending the regulations. Presently, EPA must travel overseas to conduct SEA audits of foreign manufactured vehicles and engines, even though most manufacturers now have access to laboratory facilities in the U.S. The benefits include a reduction in Agency cost since fewer overseas trips would be necessary. Also, EPA would be able

to conduct more audits of foreign manufactured vehicles and engines.

Abstract: This action will address the availability of nonconformance penalties (NCPs) and specific upper limits and penalty rates for 1998 and later emission standards for heavy-duty vehicles (HDVs) and engines (HDEs). The availability of NCPs will allow a manufacturer of HDVs and HDEs whose vehicle engines fail to conform to certain applicable emission standards, but do not exceed designated upper limits, to be issued a certificate of conformity upon payment of a monetary penalty. 3859. REVIEW OF THE FEDERAL TEST PROCEDURE FOR EMISSIONS FROM MOTOR VEHICLES AND MOTOR VEHICLE ENGINES

Significance: Regulatory Program

Legal Authority: PL 101-549, Sec 208

CFR Citation: 40 CFR 86

Legal Deadline: NPRM, Judicial, March 30, 1994. Final, Statutory, May 15, 1992. Final, Judicial, December 31, 1994. Other, Judicial, May 15, 1993. Original stat. deadline of 5/15/92 is from 11/90 Clean Air Act Amendments. Other Judicial date: Per U.S. District Court Consent Decree EPA issued a preliminary technical report on 5/15/93.

Abstract: Section 206(h) of the Clean Air Act (as amended, 1990) requires EPA to "review and revise as necessary" the regulations governing the Federal Test Procedure (FTP) to "insure that vehicles are tested under circumstances which reflect the actual current driving conditions under which motor vehicles used, including conditions relating to fuel, temperature, acceleration, and altitude." The driving cycle used for the FTP was adopted over twenty years ago and accumulated research suggests that it may no longer adequately represent overall vehicle emission control performance under current driving conditions. Extensive surveys of current driving behavior conducted by the EPA indicate significant differences between actual driving behavior. These cycles will be used to assess the benefits and feasibility of revising the FTP by comparing emissions predicted by the FTP with emissions that occur in actual driving.

3864. CONTROL OF AIR POLLUTION: STANDARDS FOR EXHAUST EMISSIONS FROM SPARK-IGNITED MARINE PROPULSION ENGINES

Legal Authority: PL 101-549, Sec 222; 42 USC 7547

CFR Citation: 40 CFR 91

Legal Deadline: NPRM, Judicial, September 30, 1994. Final, Judicial, November 22, 1995.

Abstract: This action will implement emission standards and test procedures for currently unregulated spark-ignited marine propulsion engines. Section 213 of the Clean Air Act (CAA) as amended requires the EPA to conduct a study to determine whether emissions of carbon monoxide (CO), oxides of nitrogen (NOx), and volatile organic compounds (VOCs) from nonroad engines and vehicles contribute to levels of ambient ozone and CO in more than one area not in compliance with the National Ambient Air Quality Standards (NAAQS) for these pollutants. EPA has proposed (50 FR 28809) that emissions from such sources significantly contribute to nonattainment of the NAAQS for ozone and CO in more than one area. If the Agency makes this positive determination, section 213 requires EPA to promulgate regulations that will result in reductions in emissions from non-road sources. Consequently, EPA is developing this proposal to reduce emissions from marine propulsion engines.

3865. ● STANDARDS OF PERFORMANCE FOR ELECTRIC UTILITY STEAM GENERATING UNITS REVISION

Legal Authority: Clean Air Act Amendments of 1990, sec 407(c)

CFR Citation: 40 CFR 60.40

Legal Deadline: NPRM, Statutory, January 1, 1993. NPRM, Judicial, May 30, 1994. Final, Statutory, January 1, 1994. Final, Judicial, April 30, 1995.

Abstract: The current NSPS for electric utility steam generating units was promulgated in 1979. A major feature of the NSPS is NOx control through the use of overfired air or low NOx burners. Section 407 of the Clean Air Act requires the EPA to revise existing NSPS for NOx emissions from fossil-fuel fired steam generating units, including electric utility units. These revised standards are to reflect improvements in methods for the reduction of NOx emissions. At this time no information has been developed which could be reviewed to estimate costs or benefits of possible revisions to the NSPS. Costs to industry and regulatory agencies arising from revised NSPS are unknown.

3867. FEDERAL OPERATING PERMIT RULES

Significance: Regulatory Program

Legal Authority: Clean Air Act Amendments of 1990, title V

CFR Citation: 40 CFR 71

Legal Deadline: None

Abstract: Title V of the Clean Air Act Amendments of 1990 requires EPA to promulgate regulations setting forth requirements for States to develop and implement operating permits programs for major stationary sources of air pollutants regulated under the Clean Air Act. These regulations were promulgated on July 21, 1992 (57 FR 32250). Title V also requires EPA to establish where States fail to submit an appropriate State program. These regulations are described in this notice. These regulations would be applied only in those cases where States failed to submit an appropriate State program, and would require sources to submit Federal operating permit applications containing a schedule of compliance. EPA would approve applications and issue Federal operating permits, as well as enforce the program.

Significance: Regulatory Program

Legal Authority: 42 USC 7545

CFR Citation: 40 CFR 80

Legal Deadline: Final, Statutory, November 15, 1992.

Abstract: The Clean Air Act Amendments of 1990 mandate EPA to promulgate regulations establishing specifications for additives in gasoline beginning in 1995 to prevent the accumulation of deposits in the engine or fuel supply systems. The establishment of such specifications should ensure the use of additives in the 10 to 25 percent of fuel projected not to contain additives by 1995, as well as the proper amount and type of additives to have the desired effect without causing negative side effects. Controlling Controlling engine and fuel supply system deposits is a better vehicle performance, a significant reduction in in-use emissions, and the potential for significant economic advantages due to a decreased need for premium gasoline use.

3869. REGULATIONS GOVERNING AWARDS UNDER SECTION 113(F) OF THE CLEAN AIR ACT

Legal Authority: 42 USC 7413(f)

CFR Citation: 40 CFR 65

Legal Deadline: None

Abstract: Section 113(f) of the Clean Air Act granted to the Administrator authority to pay an award to any person who furnishes information or services which lead to a criminal conviction or a civil penalty for any violation of Title I, III, IV, V, or VI of the Act enforced under section 113. Section 113(f) authorizes the Administrator to prescribe, by regulation, additional criteria for eligibility for such an award. EPA intends that the rule set forth such additional criteria. The rule also describes criteria for assessing the value of information and services when considering paying an award, and what is needed to adequately petition the Administrator for consideration of payment. The rule will also provide an assurance of confidentiality to those who provide information or services on a confidential basis. Furthermore, to implement the goal of the program, the rule will provide direction for providing information or services to the Agency.

Legal Authority: 42 USC 7401 et seq, 42 USC 1251 et seq

CFR Citation: 40 CFR 15

Legal Deadline: None

Abstract: The existing regulations at 40 CFR part 15 establish a special enforcement-related program under the Clean Air Act (CAA) and Clean Water Act (CWA), commonly referred to as the "Contractor Listing Program." The Contractor Listing Program authorizes EPA to bar facilities from federal contracts, grants or loans as a consequence of criminal or civil violations of the CAA or CWA. The draft proposed revisions to these regulations incorporate new authority granted by the CAA amendments of 1990. The amendments expand the criminal violations for which a facility may be listed and also give EPA the discretion to list other facilities of the owner or operator.

Legal Authority: 42 USC 7413(d)/CAAA 113(d)

CFR Citation: 40 CFR 59

Abstract: The Clean Air Act Amendments gives EPA the authority to issue on-the-spot field citations for minor violations of the Clean Air Act, with penalties of up to \$5,000 per day of violation. Section 113(d) of the Act requires the field citation program to be implemented through regulations which provide the informal hearing procedures. These hearing procedures are not required to be as rigorous as those imposed by the Administrative Procedures Act (APA), but nevertheless must provide due process. Agency guidance providing appropriate penalties for specific minor violations will be prepared for EPA employees and made available to the regulated

community. Training on the issuance of field citations will also be developed.

3872. "SUBSTANTIALLY SIMILAR" DEFINITION FOR DIESEL FUELS

Significance: Regulatory Program

Legal Authority: 42 USC 7545/CAAA 211(f)

CFR Citation: 40 CFR 80

Legal Deadline: None

Abstract: Section 211(f)(1)(A) of the Clean Air Act prohibits for use in light-duty vehicles, fuels and fuel additives which are not "substantially similar" to fuels or additives used to certify vehicles to emissions standards. Section 211(f)(1)(B) expands these prohibitions to all motor vehicles. Since the term "substantially similar" is not defined in the Act, the intent of this rulemaking is to interpret the term "substantially similar" in regard to diesel fuel and diesel fuel additives and thus make more explicit which products are prohibited by section 211(f)(1)(B). The definition of "substantially similar" enables manufacturers to determine whether their fuels or fuel additives are covered by, or excluded from, the section 211(f)(1)(B) prohibitions.

Legal Authority: 42 USC 6924/RCRA 3004; 42 USC 6927/RCRA 3007

CFR Citation: 40 CFR 264; 40 CFR 265

Legal Deadline: Final, Statutory, May 1987.

Abstract: Under RCRA, the Agency is required to promulgate standards for monitoring and control of air emissions from hazardous waste treatment, storage, and disposal facilities (TSDF), as necessary to protect human health and the environment. Phases I and II of the TSDF project limit organic air emissions as a class at TSDF that are subject to regulation under Subtitle C of RCRA. Phase I and Phase II actions are covered under a separate item in this Agenda entitled "Treatment,

Storage, and Disposal Facility -- RCRA Air Emission Standards." The residual risk values following Phases I and II may be higher than the range historically considered safe under RCRA. The Phase III project will use new data on TSDF to perform site-specific modeling of high risk facilities. Possible outcomes include the following: (1) additional RCRA 3004(n) standards for particular hazardous organic constituents; (2) a guidance document for RCRA permit writers; or (3) no additional action.

Legal Authority: 42 USC 7545

CFR Citation: 40 CFR 80

Legal Deadline: Final, Statutory, November 15, 1991. Final, Judicial, December 15, 1993.

Abstract: The Clean Air Act Amendments of 1990 require that gasoline sold in the nine worst ozone nonattainment areas be reformulated to be less polluting. Other ozone nonattainment areas may opt in to this program. EPA may delay opt-in depending on sufficiency of supply and distribution capacity. The NPRM published on 7/15/91 (56 FR 31176) also contains provisions requiring EPA to adopt anti-dumping rules for all gasoline sold outside of covered areas. Credit marketing and trading provisions will be decided in the program. The Clean Air Act Amendments contain specific formula requirements for reformulated gasoline as well as performance standards to reduce ozone-forming and toxics emissions. This

Significance: Regulatory Program

Legal Authority: 42 USC 7545

CFR Citation: 40 CFR 80

Legal Deadline: Final, Statutory, November 15, 1991.

Abstract: Since the late seventies, EPA has had a program to phase down lead in gasoline. This was a result of evidence that lead from automotive emissions, an air toxic, poses a serious health threat to the public. The Clean Air Act Amendments of 1990 ban the use of leaded gasoline in all motor vehicles beginning in January 1996. Additionally, it is required that a test procedure for determining lead substitute additives' ability to reduce valve wear and to identify other effects be established along with procedures for lead substitutes additive registration. These latter provisions are intended to assure availability of non-lead additives that can be used to protect valves in older engines designed for leaded fuel.

for Conversions and Standards.**Abstract:** This rulemaking will establish uniform provisions for state programs to require certain centrally fueled fleets to include some clean-fuel vehicles in their new vehicle purchases. It will include regulations governing the conversion of conventional vehicles to meet clean-fuel fleet vehicle requirements, heavy-duty standards for all vehicle/engine classes, and general provisions for state implementation of the Clean-Fuel Fleet program.**Timetable:**

Legal Authority: 42 USC 7607(d)(7)(B)

CFR Citation: 40 CFR 61 subpart I

Legal Deadline: None

Abstract: Section 112(d)(9) of the Clean Air Act Amendments of 1990 (CAAA) provides the EPA with the Authority not to regulate NRC-licensees under Section 112, if the agency, by rule and in consultation with the NRC, determines that the NRC regulatory program provides an ample margin of safety to protect the public health. EPA analyzed the public health risks posed by nuclear power plants to determine whether NRC's regulatory program for air emissions provides an ample margin of safety to protect the public health. EPA has determined that the NRC regulatory program results in sufficiently low doses to meet the Clean Air Act requirement of providing an ample margin of safety to protect the public health. Based on these findings, EPA will issue a final rule to rescind Subpart I of 40 CFR Part 61 as it applies to nuclear power reactors.

Legal Authority: 42 USC 7607(d)(7)(B)

CFR Citation: 40 CFR 61 subpart I

Legal Deadline: None

Abstract: In accordance with section 112(d)(9) of the Clean Air Act Amendments of 1990 (CAAA), EPA is considering whether or not to issue a final rule to rescind Subpart I of 40 CFR Part 61, as it applies to facilities licensed by the Nuclear Regulatory Commission (NRC) or NRC Agreement States which are not engaged in the generation of nuclear power (57 FR 56877, December 1, 1992). Section 112(d)(9) gives EPA the authority to decline to regulate NRC-licensees after the Administrator makes a determination, by rule, and in consultation with the Nuclear Regulatory Commission (NRC), that the regulatory program established by the NRC pursuant to the Atomic Energy Act provides an ample margin of safety to protect the public health. EPA is in the process of deciding whether or not the NRC regulatory program provides an ample margin of safety standard required by the Clean Air Act.

Legal Authority: PL 101-54, Sec 609; Clean Air Act Amendments of 1990

CFR Citation: 40 CFR 82 subpart B

Legal Deadline: None

Abstract: On July 14, 1992, EPA published a final regulation on the servicing of motor vehicle air-conditioners. That rule established that two types of equipment could be used in service: equipment that recovers and recycles refrigerant or equipment that only recovers refrigerant from the motor vehicle. The refrigerant from recover only equipment must then be recycled, on-site or sent off-site for reclamation. The July 14, 1992, final rule contains the equipment standard for recycling equipment in Appendix A, but the recover only equipment standard was proposed separately in a supplemental proposal published April 22, 1992. This rule will finalize the recover only standard as Appendix B in the motor vehicle servicing regulation.

3889. DESIGNATION OF AREAS FOR AIR QUALITY PLANNING PURPOSES

Legal Authority: 42 USC 7407(d)(3)/CAA 107(d)(3)

CFR Citation: 40 CFR 81

Legal Deadline: Final, Statutory, 00/00/00.

Section 107(d)(3) provides that EPA must promulgate a redesignation no

EPA—CAA

Final Rule Stage

later than 240 days after notification of the affected Governor that the designation should be revised.

Abstract: Section 107(d)(3) of the amended CAA authorizes EPA to notify the Governor of an affected State that, on the basis of air quality data, planning and control considerations or any other air quality-related considerations EPA deems appropriate, EPA believes the designation of an area with respect to the national ambient air quality standards should be revised. EPA has notified the Governors of several States that certain areas should be redesignated as nonattainment for PM-10 (particulate matter with an aerodynamic diameter less than 10 micrometers) and sulfur dioxide (SO₂). The affected States have responded with their recommendations concerning the designations and boundaries for these areas. Section 107(d)(3) provides that EPA is to promulgate the revised designations, making such modifications to the States' recommendations that it deems necessary. EPA proposed its redesignations for these areas in September 1992. This rule will revise the nonattainment designations for PM-10 and SO₂ in 40 CFR part 81 for the affected areas.

Legal Deadline: Final, Judicial, April 1, 1994.

Deadline is for final action or reproposal.

Abstract: On April 26, 1988, EPA announced its proposed decision not to revise the current standards. The notice also solicited comment on the alternative of adding a new 1-hour standard and certain other revisions. On or before April 1, 1994, EPA is to either: 1) take final action on the primary standard portion of the 1988 proposal; or 2) repropose.

Significance: Regulatory Program

Legal Authority: Clean Air Act, sec 110(m)

CFR Citation: 40 CFR 51

Legal Deadline: None

Abstract: This rulemaking action would set forth the criteria required under Section 110(m) of the Clean Air Act (established under Title I of the Clean Air Act Amendments of 1990) for exercising the EPA Administrator's authority for discretionary application of sanctions listed in Section 179(b) of the CAA to ensure that during the 24-month period following a finding, disapproval, or determination under Section 179(a) of the CAA, such discretionary sanctions are not applied on a statewide basis where one or more political subdivisions covered by the applicable implementation plan are principally responsible for such deficiency.

Significance: Regulatory Program

Legal Authority: 42 USC 7411/CAA 111

CFR Citation: 40 CFR 60

Legal Deadline: None

Abstract: The purpose of this action is to develop standards for regulating emissions from new and modified municipal solid waste landfills under Section 111(b). Pollutants to be regulated could include one or more designated pollutants (pollutants not regulated under Sections 108 or 112 of the CAA) thus invoking Section 111(d). Section 111(d) requires States to develop emission standards for existing landfills based on EPA guidelines.

3893. NESHAP: CHROMIUM—INDUSTRIAL COOLING TOWERS

Legal Authority: Clean Air Act Amendments of 1990, sec 112

CFR Citation: 40 CFR 63

Legal Deadline: None

Abstract: Chromium compounds are among the pollutants listed as hazardous air pollutants in Section 112 of the Clean Air Act Amendments of 1990. Industrial process cooling towers that use chromate-based water treatment programs have been identified by EPA as potentially significant sources of chromium air emissions and, as such, a source category for which national emission standards may be warranted. Emission standards would substantially reduce the amount of chromium discharged to the atmosphere from industrial process cooling towers.

CFR Citation: 40 CFR 63

Legal Deadline: Final, Statutory, November 15, 1992. Final, Judicial, February 28, 1994.

Abstract: General provisions are being developed for 40 CFR part 63 which will include standards for categories of stationary sources that emit 189 hazardous air pollutants to be regulated under Section 112 of the Clean Air Act Amendments of 1990. These provisions contain specific requirements that will apply to all sources regulated under Section 112. The general provisions are

effective for a particular source category after promulgation of a standard for that category.

3898. NATIONAL EMISSION STANDARDS FOR COKE OVEN BATTERIES

Significance: Regulatory Program

Legal Authority: Clean Air Act
Amendments of 1990, sec 112

CFR Citation: 40 CFR 63

Legal Deadline: Final, Statutory,
December 31, 1992.

Abstract: The Clean Air Act of 1990 requires coke oven emissions standards based on maximum achievable control technology (MACT) for new and existing sources, and a more stringent control limit called "lowest achievable emissions rate" (LAER) for certain existing sources to be promulgated by December 31, 1992. The Coke Oven MACT and LAER standards will establish emission limits for a variety of different aspects of coke oven facilities, including coke oven doors, lids, offtakes, and seconds of charging. The Clean Air Act also requires EPA to issue "work practice standards" with Industry compliance by November 15, 1993, and so-called "residual risk" standards to be promulgated eight years after promulgation of coke oven MACT standards. These residual risk provisions require EPA to examine the remaining risk to the public after technology-based standards are imposed and to further reduce emissions, if appropriate.

3899. ESTABLISHMENT OF GUIDANCE FOR IMPLEMENTING CLEAN AIR ACT, SECTION 112(J) PROVISIONS FOR MAKING MACT DETERMINATIONS WHEN EPA FAILS TO PROMULGATE A FEDERAL STANDARD

Significance: Regulatory Program

Legal Authority: Clean Air Act
Amendments of 1990, sec 112(j)

CFR Citation: 40 CFR 63

Legal Deadline: Final, Statutory, May
1992.

Abstract: In the event that EPA fails to promulgate MACT standards on time, States are required by the Clean Air Act to establish case-by-case MACT compliance limits for every major source of emissions that would have been subject to the MACT standard. This guidance is intended to aid the States in making those compliance determinations which the CAA specifies be equivalent to what MACT standards would have required. The guidance is intended to resolve technical issues concerning overlap with other Section 112 programs, and will provide a basis for uniform determinations to be made across a regulated industry. The MACT determinations will be enforced through the Title V permitting process.

to State and local agencies for implementation and enforcement is contained in Section 112(l). This section also gives EPA authority to approve State and local programs that are at least as stringent as the Federal program. EPA is undertaking this rulemaking to develop guidance for State and local agencies seeking approval or delegations.

Legal Authority: 42 USC

Legal Deadline: None

Abstract: In accordance with section 112(d)(9) of the Clean Air Act Amendments of 1990, EPA may rescind 40 CFR Part 61, Subpart T as it applies to Nuclear Regulatory Commission (NRC) licensees pursuant to a finding that the NRC regulatory program protects the public health with an ample margin of safety. In October 1991, EPA and NRC (and the affected NRC Agreement States) executed a Memorandum of Understanding (MOU) to address the actions to be undertaken by EPA and NRC to eliminate regulatory redundancy and to ensure uranium mill tailings disposal sites are closed as expeditiously as practicable considering technological feasibility. The Agency proposed to amend the environmental regulations pertaining to uranium mill tailings disposal sites at 40 CFR Part 192, Subpart D pursuant to Uranium Mill Tailings Radiation Control Act (UMTRCA) of 1978 on June

8, 1993. These amendments supplement Subpart D by ensuring timely emplacement of a permanent radon barrier and by requiring appropriate monitoring for non-operational uranium mill tailings disposal sites that are licensed by NRC or one of its Agreement States. The Agency anticipates amending 40 CFR Part 192, Subpart D (cont)

CFR Citation: 40 CFR 51; 40 CFR 93

Legal Deadline: Final, Statutory, November 15, 1991. Final, Judicial, November 1, 1993.

Abstract: Section 176(c) of the Clean Air Act requires transportation plans, programs, and projects which are funded or approved under Title 23 USC or the Federal Transit Act to conform to the state air quality implementation plan. EPA is required by the Clean Air Act to promulgate, with the concurrence of the Department of Transportation, criteria and procedures for determining conformity. The Clean Air Act's definition of conformity prohibits Federal agencies from engaging in or supporting in any way activities which could cause or contribute to new violations, or delaying attainment of air quality standards. The rule will help ensure that the implementation plan achieves its goal of attaining air quality standards, but these benefits are attributable to the strategies in the implementation plan rather than to this rule directly. Costs to metropolitan planning organizations may range from \$10,000 - \$25,000 for a conformity determination on a plan and transportation program.

Significance: Regulatory Program

Legal Authority: Clean Air Act as amended in 1990, sec. 182(g)(4)

CFR Citation: 40 CFR 51, subpart U, sec 51.490 to 51.494; 40 CFR 51, app W

Legal Deadline: Final, Statutory, November 15, 1992.

Abstract: In serious, severe, and extreme ozone nonattainment areas and serious carbon monoxide areas, the Clean Air Act provides for the establishment by a State of an economic incentive program where the State fails to meet a required progress milestone. Section 182(g)(4) requires the EPA to publish rules or States to follow in developing an economic incentive program for reducing ozone precursors.

3905. CONTROL TECHNIQUES GUIDELINES

Significance: Regulatory Program

Legal Authority: Clean Air Act, sec 183(a)

CFR Citation: Not applicable

Legal Deadline: Final, Statutory, November 1993.

EPA—CAA

Final Rule Stage

Abstract: The Clean Air Act requires EPA to issue control techniques guidelines (CTG) for 13, including two specifically named, source categories within three years of enactment. Currently, CTGs are being developed for chemical manufacturing distillation operations, chemical plant reactor processes, wood furniture manufacturing, coating of plastic parts-business machines, coating of plastic parts-automobiles, offset lithography, industrial wastewater treatment, volatile organic liquid storage tanks, batch processes, aerospace coating operations, and shipbuildings and repair. The wood furniture, aerospace, and shipbuilding projects are on a later schedule than the others due to a need to coordinate with Section 112 hazardous air pollutant standards being developed for the same source categories. CTGs were also being developed for automobile refinishing and cleanup solvents. Automobile refinishing will now be addressed by an available control technology (ACT) document.

Legal Authority: 42 USC 7525/CAA 206

CFR Citation: 40 CFR 86

Legal Deadline: None

Abstract: This action will address the availability of nonconformance penalties (NCPs) and specific upper limits and penalty rates for 1994 and later emission standards for heavy-duty vehicles (HDVs) and engines (HDEs). The availability of NCPs will allow a manufacturer of HDVs or HDEs, whose vehicles or engines fail to conform to certain applicable emission standards but which do not exceed a designated upper limit, to be issued a certificate of conformity upon payment of a monetary penalty. This action also addresses issues related to the selection of vehicle or engine configurations for production compliance audits (PCAs), eligibility criteria for PCAs, the measurement of emission results during PCA testing.

Legal Authority: 42 USC 7541(b)/CAA 207(b)

CFR Citation: 40 CFR 85

Legal Deadline: None

Abstract: This action would adopt an alternative testing procedure to be used in the voluntary aftermarket part certification program for certifying aftermarket parts. Currently only the full Federal Test Procedure and Emission Critical Parameters for Specified Parts are acceptable test procedures for this program. A proposed rulemaking was published on August 8, 1989. Based on the public comments received and further analysis, EPA developed a supplemental notice of proposed rulemaking which was published on January 30, 1991. Analysis of all public comments are complete and work on the final rulemaking is under way.

Abstract: The Clean Air Act Amendments of 1990 require EPA to issue regulations to implement section 209(e), which addresses the state adoption of emission standards for new nonroad vehicles and engines. This rulemaking clarifies the categories of equipment that are preempted from state regulations. The rule also sets forth criteria to be used for nonroad engine waivers.

Abstract: General Registration requirements for Motor Vehicles fuels and fuel additives have been in effect since 1975. The current ordered regulatory action will implement the additional registration requirements contained in Section 211(e) of the Clean Air Act. These provisions require that the manufacturers of fuels

currently in use and new fuels supply EPA information regarding composition of emissions produced by these products, their effects on vehicle emissions and their effect on public health and welfare.

Abstract: This regulatory action establishes NOx emission limitations for Phase I tangentially-fired, dry bottom wall-fired boilers (Group I - Section 407(b)(1)) which must be met by January 1, 1995. Emissions limits for a second group of boilers (Group II - Section 407(b)(2)), including cyclones and wet bottom wall-fired units, will be effective in 2000 and will be set in a later rulemaking. Boilers from both groups that are listed under Phase II will be subject to their relevant emissions limits after 2000. In addition, the rule will determine conditions of applications for emission averaging and alternative emission limits for both groups of boilers.

Abstract: Section 606 requires the Agency to grant or deny petitions received to promulgate regulations to accelerate the phaseout of Class I or II chemicals (CFCs, methyl chloroform, carbon tetrachloride) within 180 days of receipt. If the Agency grants a petition and proposes regulations accelerating the phaseout, it must promulgate a final rule one year after the proposal. The Agency has received two petitions to date requesting the acceleration of the phaseout, the first of which was submitted on December 3, 1991, and published a proposal to accelerate the phaseout on March 18, 1993. Section 602 requires the Agency to grant or deny petitions received to add chemicals to the list of Class I substances. If the Agency proposes to add a substance to the list in response to a petition, section 602 requires it to do so within one year of the receipt of the petition. EPA received a petition to add methyl bromide to the list of class I substance substances on December 3, 1991, and published a proposal to list it on March 18, 1993.

needed. Sources include tanks, surface impoundments, landfills, waste piles, land treatment operations and wastewater treatment facilities. Pollutants to be considered by such standards would include volatile organic compounds, particulate matter, specific toxic substances, or a combination of these. The mandate for standards development under RCRA is to protect human health and the environment. The Agency has adopted a three-phase approach: Phase I regulates organic emissions from

equipment leaks and process vents; Phase II will address tanks, containers, surface impoundments, and miscellaneous units; and Phase III will address residual risks from particular hazardous organic constituents.

3929. RISK MANAGEMENT PLANS FOR CHEMICAL ACCIDENTAL RELEASE PREVENTION

Significance: Regulatory Program

Legal Authority: PL 101-549; Clean Air Act Amendments of 1990

CFR Citation: 40 CFR 68

Legal Deadline: Final, Statutory, November 15, 1993.

Abstract: EPA must promulgate reasonable regulations and appropriate guidance to provide for the prevention and detection of accidental releases from stationary sources. The regulations must require stationary sources where a regulated substance is present in quantities greater than a threshold amount to implement a risk management plan for detection and prevention of accidental releases.

Legal Authority: 42 USC 9601-9657; 33 USC 1321(c)(2)

CFR Citation: 40 CFR 35; 40 CFR 30011

Legal Deadline: None

Abstract: In carrying out the revised National Oil and Hazardous Substances Pollution Contingency Plan (NCP), EPA has identified several provisions that may be interpreted differently than the Agency intended. In order to avoid any confusion, and to better inform the public, EPA is proposing clarifications to four sections of the NCP. None of these changes are intended to be substantive.

Legal Authority: 42 USC 9602/CERCLA 102(a)

CFR Citation: 40 CFR 302.4

Legal Deadline: None

Abstract: This action would list under 40 CFR part 302 as CERCLA Hazardous Substances the previously non-CERCLA Hazardous Air Pollutants added to Section 112 of the Clean Air Act (CAA) by the CAA Amendments of 1990. This action would also adjust the Statutory Reportable Quantities of these hazardous air pollutants.

3932. DELETION OF SACCHARIN FROM THE LIST OF HAZARDOUS WASTES UNDER RCRA AND THE LIST OF HAZARDOUS SUBSTANCES UNDER CERCLA

Legal Authority: 42 USC 6905; 42 USC 6912(a); 42 USC 6921/RCRA 3001; 42 USC 6938; 42 USC 9602

CFR Citation: 40 CFR 261.33(f); 40 CFR 261 app VIII; 40 CFR 302.4

Legal Deadline: None

Abstract: This proposed rule would remove saccharin from the list of hazardous wastes under Section 3001 of the Resource Conservation and Recovery Act (RCRA) and from the list of hazardous substances under Section 102 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This regulatory action is in response to a petition to remove saccharin from regulation under RCRA and CERCLA. The petition is based on recent studies that dispute previous scientific findings that saccharin is a possible carcinogen. It is anticipated that the proposed action would result in annual new cost savings to both government and the regulated community because saccharin would no longer be subject to regulation under RCRA and CERCLA.

Legal Authority: 42 USC 9605/CERCLA 105; 42 USC 9620/CERCLA 120

CFR Citation: 40 CFR 300

Legal Deadline: None

Abstract: Subpart K of the NCP, entitled "Federal Facilities," is a roadmap to the entire NCP for Federal facilities, and it consolidates in one subpart of the NCP references to the requirements in the other subparts that Federal agencies must follow when conducting CERCLA response actions where the release is on, or where the sole source of the release is from, their facility. It also codifies certain other provisions of Section 120 of CERCLA relating to Federal facilities.

Legal Authority: 42 USC 9605(a)(8)(b)/CERCLA 105(a)(8)(B)

CFR Citation: 40 CFR 300.425

Legal Deadline: None
Deadline is for annual update.

Abstract: This action proposes to revise the National Priorities List (NPL) for uncontrolled waste sites in the National Contingency Plan (NCP). CERCLA requires that the Agency revise the NPL at least annually. Periodic revisions will allow EPA to include sites on the NPL with known or threatened hazardous substances releases and to delete sites that have been cleaned up. By court order, several sites in updates 14 and 15 must be finalized by 7/15/93.

revisions to the National Oil and Hazardous Substances Contingency Plan for the removal of oil and hazardous substances. EPA has initiated an inter-agency review process to make changes needed to implement the requirements of the Oil Pollution Act of 1990. The revised NCP would address a number of new elements including, but not limited to, response to worst case discharges and discharges that may pose a substantial threat to public health and welfare, a Fish and Wildlife Plan, and Area Contingency Plans.

Abstract: EPA is correcting errors found in the Extremely Hazardous Substances List under Section 302 of

the Emergency Planning and Community Right-To-Know Act of 1986. The list became final in the Federal Register on April 22, 1987 (52 FR 13378). This rulemaking is to amend the list based upon errors found in the studies used to place the chemicals on the list.

3938. LIST OF REGULATED SUBSTANCES AND THRESHOLDS FOR ACCIDENTAL RELEASE PREVENTION; REQUIREMENTS FOR PETITIONS UNDER SECTION 112(R)(3) OF THE CAAA OF 1990

Significance: Regulatory Program

Legal Authority: PL 101-549; Clean Air Act Amendments of 1990

CFR Citation: 40 CFR 68

Legal Deadline: Final, Statutory, November 15, 1992. Final, Judicial, January 15, 1994.

Abstract: EPA must promulgate an initial list of at least 100 substances that, in the event of accidental release, are known to cause or may reasonably be anticipated to cause death, injury or serious adverse human health or environmental effects. EPA must establish a threshold quantity for each substance listed, by rule, considering toxicity, reactivity, volatility, dispersibility, combustibility or flammability, and the amount known to cause death, injury, or serious adverse human health effects. EPA must establish procedures for the addition and deletion of substances from the list.

Legal Authority: 42 USC 9605/CERCLA 105

CFR Citation: 40 CFR 300

Legal Deadline: None

Abstract: The rule would finalize criteria proposed on December 21, 1988 (53 FR 51421) to be applied in decisions about whether to delete sites from the National Priorities List for the purpose of deferring them to RCRA Subtitle C corrective action authorities. The Agency currently defers willing and financially able sites to RCRA Subtitle C; however, it has not, to this point, finalized its policy of deleting sites from the NPL so that RCRA can address them. Doing so will reduce duplicative oversight resources and authorities and make them available for the types of sites, i.e., abandoned sites with uncontrolled releases, that Superfund is intended to address. Adoption of this policy should not impose any significant additional demands on Federal funds or other resources. Most likely it will save Superfund oversight resources by letting RCRA address sites that meet the criteria, i.e., sites that are progressing well under RCRA Subtitle C authorities and whose deletion would not disrupt on-going cleanup activities.

Significance: Regulatory Program

Legal Authority: 33 USC 1321/CWA 311(j)(5), as amended by the Oil Pollution Act

CFR Citation: 40 CFR 112

Legal Deadline: Final, Statutory, August 18, 1992.

Abstract: The Oil Pollution Act of 1990 (OPA) expands the scope of public and private planning and response activities associated with discharges of oil. The rule would implement an OPA requirement that facility owners and operators prepare response plans to respond to a worst case discharge of oil. These plans would apply to facilities that, because of their location, reasonably could be expected to cause substantial harm to the environment by a discharge of oil into or on navigable waters, adjoining shorelines, or the exclusive economic zone.

Abstract: The Privacy Act of 1974 provides that Congress and the Office of Management and Budget be notified of proposed systems of records and that the public be given a 30-day period in which to comment on the routine uses of the system. EPA provided such notice for a new system of records named "Criminal Investigative Index and Files" on April 25, 1986, 51 FR 15830. EPA is proposing altering this system because of statutory changes in the enforcement provisions implemented by EPA as well as organizational changes.

Abstract: The Clean Water Act, Safe Drinking Water Act, and Clean Air Act authorize EPA to treat Indian tribes as states for purposes of program authorization and grant awards. The Agency promulgated regulations for implementing this authority under the Water Acts and is developing regulations under the Clean Air Act. The process for approving tribes for "Treatment as a State" (TAS) under various programs has proven to be burdensome and offensive to tribes. EPA established a working group to focus on ways of improving and simplifying the process. The Workgroup developed recommendations which were developed as Agency policy in November 1992. The purpose of this regulation will be to implement the recommendations of the Workgroup. The Agency will adopt a policy to simplify the TAS process, eliminate duplicative requirements, and improve overall procedures.

Abstract: EPA regulations at 40 CFR part 2, subpart B, provide procedures for handling and disclosing information claimed as CBI. Although these regulations have succeeded in protecting business information, changes in Agency workload, practice, and statutory authority have outstripped the ability of these regulations to cut down on unnecessary procedures, expedite activities involving confidential business information, and simplify the regulations. In addition, EPA would consolidate confidentiality provisions from other Parts of 40 CFR.

3957. ● INDIAN TRIBES: GENERAL ASSISTANCE GRANTS FOR ENVIRONMENTAL PROTECTION PROGRAMS

Legal Authority: PL 102-497, sec 11; Indian Environmental General Assistance Program Act of 1992

CFR Citation: 40 CFR 35; 40 CFR 31

Legal Deadline: Final, Statutory, October 24, 1993.

The Administrator shall promulgate regulations establishing grant application procedures within 12 months following enactment of section 11, P.L. 102-497 (enacted 10/14/92).

Abstract: This interim final regulation establishes the General Assistance Program and the rules and procedures under which Indian tribal governments and intertribal consortia may apply for general assistance grants to build capacity to administer environmental regulatory programs on Indian lands; and to provide technical assistance from EPA in the development of multi-media programs to address environmental issues on Indian lands. Tribes can tailor capacity-building through general assistance with additional program development and/or implementation assistance through program specific grants. During fiscal years 1990-93, \$1 4.6 million has been awarded to over 250 tribes and Alaska Native villages through the multi-media assistance program, precursor of the General Assistance Program. The Act authorizes up to \$15 million per fiscal year. The General Assistance Program enables tribes to plan, develop and establish their capability to implement programs administered by EPA on Indian lands.

Semiannual Regulatory Agenda

AGENCY: Equal Employment Opportunity Commission.

ACTION: Semiannual regulatory agenda.

SUMMARY: The Equal Employment Opportunity Commission is publishing its semiannual regulatory agenda

pursuant to Executive Order 12291, 3 CFR, 1981 Comp., p. 127, and the Regulatory Flexibility Act, 5 U.S.C. chapter 6. The agenda contains all regulations which are scheduled for review or development during the next 12 months.

FOR FURTHER INFORMATION CONTACT: Irene L. Hill, Assistant Legal Counsel for Coordination, Office of the Legal Counsel, Equal Employment Opportunity Commission, 1801 L Street NW., Washington, DC 20507; telephone (202) 663-4689.

SUPPLEMENTARY INFORMATION: The Commission identified seven current and projected rulemakings for inclusion in the agenda. Two have been published as ANPRMs. Two have been published as NPRMs. Two are currently under development or review by Commission staff, and one is reported as a new agenda item.

Signed in Washington, DC, this 25th day of August 1993.

For the Commission.

Tony E. Gallegos,
Chairman.

3964. EARLY RETIREMENT PLANS

Legal Authority: 29 USC 628

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: The ADEA prohibits discrimination on the basis of age with respect to an employee's compensation, terms, conditions, or privileges of employment. In light of recent amendments to the ADEA and several cases dealing with early retirement, questions have arisen regarding the legality of early retirement plans in

general and of specific plans. Since the use of early retirement has expanded greatly in recent years, the Commission deems it appropriate to consider the issuance of regulatory guidance in the area. The ANPRM seeks comment on issues such as voluntariness, plan structuring and eligibility to participate. The Commission is reassessing this project in light of the Supreme Court's decision in *Public Employees Retirement System of Ohio v. Betts*, 492 U.S. 158 (1989), and the enactment of

the Older Workers Benefit Protection Act, Pub. L. 101-433 (Oct. 16, 1990).

3965. POSSIBLE REVISIONS TO INTERPRETATIONS RELATING TO BENEFITS UNDER EMPLOYEE BENEFIT PLANS

Legal Authority: 29 USC 628

CFR Citation: 29 CFR 1625.10

Legal Deadline: None

Abstract: The current interpretive regulations at 29 CFR 1625.10 were framed in 1979. Since that time the ADEA has been amended in a manner that necessitates considering revisions to the regulations, for example, the lifting of the age 70 cap. Accordingly, the Commission requested public comment to determine whether revisions are necessary and, if so, the nature and scope of any such revision. The continuing viability of this project is being assessed in light of the Supreme Court's decision in Public Employees Retirement System of Ohio v. Betts, 492 U.S. 158 (1989), and the enactment of the Older Workers Benefit Protection Act, Pub. L. 101-433 (Oct. 16, 1990).

CFR Citation: 29 CFR 1603

Legal Deadline: None

Abstract: Under the Civil Rights Act of 1964 certain staff members of State and local elected officials were exempt from protection against employment discrimination. Section 321 of the Government Employee Rights Act of 1991 extends protections to the employment of persons who have been chosen or appointed by a State or local elected public official to serve on his or her personal staff, to serve the elected official on the policy-making level, or to serve as an immediate advisor with respect to the exercise of the constitutional or legal powers of the official's office. Section 320 of the Government Employee Rights Act of 1991 extends protections to certain presidential appointees who are not otherwise protected under section 17 of title VII of the Civil Rights Act of 1964. Section 320 does not cover individuals whose appointment is made by and with the advice and consent of the

Senate, advisory committee members or members of the uniformed services.

These are procedural regulations for processing such complaints of discrimination by previously exempt or uncovered individuals.

Abstract: The Equal Employment Opportunity Commission is proposing a revision to section 1605.2(c)(2) of its Guidelines on Discrimination Because of Religion. These revisions will reflect

Supreme Court precedent in Ansonia Board of Education v. Philbrook 479 U.S. 60 (1986) on religious accommodation. If adopted, this revision will clarify an employer's duty of religious accommodation and will prevent an employee or prospective employee from being discriminated against and unnecessarily penalized because of his or her religious practices.

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Ch. I

Semiannual Regulatory Agenda

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Semiannual agenda.

SUMMARY: The Federal Emergency Management Agency publishes its semiannual regulatory agenda in April and October to inform interested parties of progress on FEMA regulations. The agenda lists regulations that will be under development or review during the period October 1, 1993, to March 31, 1994.

ADDRESSES: For information about specific regulations, please contact the person listed as the agency contact in the agenda.

FOR FURTHER INFORMATION CONTACT: For general information on FEMA's regulatory agenda, contact H. Crane Miller, Office of the General Counsel, Federal Emergency Management

Agency, 500 C Street SW., Washington, DC 20472, (202) 646-3340.

SUPPLEMENTARY INFORMATION: Executive Order 12291 "Federal Regulation" directs each executive agency to adopt procedures to improve existing and future regulations. Publication of an agenda of regulations is called for at least semiannually in order to give the public adequate notice of agency rulemaking activities; also, publication of a regulatory flexibility agenda concerning rules likely to have a significant impact on a substantial number of small entities must be published in accordance with 5 U.S.C. 601 *et seq.*

In fulfillment of the requirements of Executive Order 12291 and 5 U.S.C. 601 *et seq.*, this agenda describes current and projected regulations and regulations which will be under review or development during the period October 1, 1993, to March 31, 1994. This agenda also contains information on regulations on which action was completed since the last FEMA semiannual agenda was published April 26, 1993, at 58 FR 25096 to 25104.

Public comment on the agenda, including comments by State and local governments, is invited and should be submitted to the Rules Docket Clerk, Office of the General Counsel, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472; FAX (202) 646-4536. Please refer to the title and the Regulation Identifier Number (RIN) of the rule about which you are inquiring or commenting.

The agenda is not limited to major or significant rules and contains information concerning all FEMA regulations to be developed, reviewed, or published in the next 6 months except for routine flood elevation determinations, listings of eligible communities under the National Flood Insurance Program and the National Crime Insurance Program, listings of suspended communities and similar designations under the National Flood Insurance Program, and FEMA organizational and management matters.

Dated: September 1, 1993.

John P. Carey,
General Counsel.

Abstract: Cooperative agreements are used when stimulating a public purpose (the multiple programs delivered in each comprehensive cooperative agreement are aimed primarily at stimulating civil defense). The Federal Civil Defense Act of 1950, as amended, authorizes the major portions of comprehensive cooperative agreement programs and assistance dollars, and is the major legislative authority underpinning the process. Various Civil Preparedness Guides provide complete notice to States and interested parties and complete the policy and procedural requirements.

Abstract: Section 544 of the Housing and Community Development Act of 1987 provided a new benefit to National Flood Insurance Program policyholders: Payment for demolition or relocation of an insured structure if it is located "along the shore of a lake or other body of water and is certified by appropriate State or local land use authority to be subject to imminent collapse or subsidence as a result of erosion or undermining caused by waves or currents of water exceeding anticipated cyclical levels." FEMA published interim regulations on this subject on September 23 and November 2, 1988, and commissioned an investigation through the National

Academy of Sciences to provide a basis for further regulations.

3981. ADMINISTRATIVE REMEDIES FOR FALSE CLAIMS AND STATEMENTS

Legal Authority: 31 USC 3801-12

CFR Citation: 44 CFR 19

Legal Deadline: None

Abstract: The Program Fraud and Civil Remedies Act (the Act) enacted on October 21, 1986, and codified at 31 USC 3801 through 3812, establishes an administrative remedy against any person who makes a false claim or written statement to certain Federal agencies, including the Federal Emergency Management Agency. Any person who makes a false, fictitious, or fraudulent claim or written statement to an affected agency may be liable for a penalty up to \$5,000 and an assessment up to double the amount falsely claimed. This proposed rule would comply with the Act's requirement that affected Federal agencies implement its provisions through regulations.

Significance: Agency Priority

Legal Authority: 50 USC app 2251 et seq; EO 12148

CFR Citation: 44 CFR 302

Legal Deadline: None

Abstract: This proposed rule would establish population standards for eligibility of political subdivisions to become subgrantees under the Emergency Management Assistance (EMA) Program. The rule is proposed to encourage States to provide EMA funds to jurisdictions or groupings of jurisdictions that have the necessary resource bases to establish viable agency emergency management organizations and capabilities.

Unified Agenda of Federal Regulations

AGENCY: General Services
Administration (GSA).

ACTION: Semiannual agenda.

SUMMARY: This agenda announces the proposed regulatory actions that GSA plans for the next 12 months and those actions that were completed since April 1993. This agenda was developed under the guidelines in an Office of Management and Budget memorandum dated June 14, 1993. GSA's purpose in publishing this agenda is to allow interested persons an opportunity to participate in the rulemaking process.

FOR FURTHER INFORMATION CONTACT: Rodney P. Lantier, Chief, Directives and Correspondence Management Branch, (202) 501-0666.

SUPPLEMENTARY INFORMATION: None of the regulations listed is considered a major rule under Executive Order 12291 "Federal Regulation."

Dated: August 23, 1993.

Roger W. Johnson,

Administrator of General Services.

4007. NONDISCRIMINATION ON THE BASIS OF RACE, COLOR, NATIONAL ORIGIN, AND, WHERE APPLICABLE, SEX

Legal Authority: 40 USC 476; 42 USC 2000d-1; 20 USC 1681

CFR Citation: 41 CFR 101-8.2

Legal Deadline: None

Abstract: The General Services Administration proposes this regulation to implement all of the above cited Federal laws. These statutes prohibit discrimination, in whole or in part, so that no person in the United States shall on the grounds of race, color, national origin, or sex be excluded from participation in, be denied the benefits of, or be subject to discrimination under any program activity receiving Federal assistance from the General Services Administration. In addition, the objectives of the regulation are to

streamline certain administrative procedural requirements by consolidating prohibitions of discrimination into one regulation and to make requirements clear and convenient for applicants and recipients to comply with, as well as making the regulation manageable for GSA to administer.

4009. DEFINITION OF "EQUIVALENT LEVEL OF SAFETY"

Legal Authority: PL 102-522, sec 108

CFR Citation: Not yet determined

Legal Deadline: Final, Statutory, October 26, 1994.

Abstract: Title I - United States Fire Administration Act, section 108 amends the Fire Prevention and Control Act of 1974 to require sprinklers, or an "equivalent level of safety," in all new Federal Employee Office Buildings and during renovations of such buildings if they are six stories or higher. Sprinklers (or an "equivalent level of safety") and hard-wired smoke detectors are required in federally assisted multifamily housing. The General Services Administration, the National Institute of Standards and Technology, and the Department of

Defense must issue regulations defining "equivalent level of safety." This regulation will define "equivalent level of safety" and the procedures for determining it.

Legal Authority: 63 Stat. 390, Sec 205(c); 40 USC 486(c)

CFR Citation: 41 CFR 101-20.105-3

Legal Deadline: None

Abstract: Passive environmental tobacco smoke has been classified as a Class A human carcinogen by EPA. Current FPMR's ban smoking in GSA-controlled buildings, except in designated smoking areas determined

by the occupant agency head. In view of EPA's classification of passive smoke as a carcinogen, legislation has been introduced in the Congress to ban smoking in Federal buildings and an Executive order is being considered to also ban smoking in the executive branch. Upon enactment of legislation or issuance of an executive order, GSA will revise current policy to address the EPA findings.

There should be no costs associated with the implementation of a proposed rule other than the posting of new signs prohibiting smoking.

Significance: Regulatory Program

Legal Authority: 40 USC 486(c); 40 USC 751(f)

CFR Citation: 41 CFR 201

Legal Deadline: None

Abstract: FIRMR users have mentioned some confusion regarding the interpretations of provisions regarding delegation of procurement authority thresholds. Specific concerns involve the applicability of the thresholds to certain General Services Administration (GSA) programs. GSA is examining FIRMR provisions dealing with delegations thresholds to determine their adequacy. GSA is also reviewing agency acquisition actions to determine the impact of FIRMR provisions. An interim rule will be developed to make appropriate changes. The proposed rule is expected to improve Government efficiency by clarifying regulation provisions.

Legal Authority: 40 USC 486(c)**CFR Citation:** 48 CFR 515; 48 CFR 538; 48 CFR 552**Legal Deadline:** None

Abstract: The Multiple Award Schedule (MAS) Improvement Project was initiated by the GSA Administrator in late 1990. As part of that project, GSA would prescribe a Price Reductions clause for use in Multiple Award Schedule (MAS) solicitations and contracts. This proposed modification to the clause is intended to clarify the clause's applicability and reduce contractor reporting requirements. Also, the MAS Policy Statement of October 1, 1982, (47 FR 50242, November 5, 1982) would be canceled and the regulation would be amended to prescribe a format for Discount Schedule and Marketing Data (DSMD) which is used for collecting information from offerors regarding their commercial sales and marketing practices; and prescribe a process through which contracting officers will establish MAS price negotiation objectives and determine fair and reasonable prices.

Abstract: Federal Property Management Regulation Temporary Regulation D-76, Part 101-17, Assignment and Utilization of Space, was published in August 1991. It is intended that this regulation will become permanent. Its purpose is to improve space delivery process for Federal agencies by making it more efficient, more timely, and better able to deliver quality space that supports agency mission needs. The regulation does the following: implements a new space assignment process that emphasizes client service; establishes a new comprehensive move policy that clarifies roles and responsibilities; revises the GSA location policy to be more responsive to agency mission needs; revises the standard alterations which agencies receive upon an initial move, to recognize modern office needs; and revises the space classification definitions to eliminate ambiguity. These changes will result in a more efficient space delivery process and improve the overall efficiency of Government operations. The intention

GSA

Final Rule Stage

is to extend Temporary Regulation D-76 until such time as the Final Rule, which will supersede it, is approved for publication.

Abstract: This final rule sets forth the basic policy under which the General

Services Administration (GSA) leases or delegates to other agencies the authority to lease space in privately owned buildings. It lists certain categories of special-purpose space which may be leased for up to 20 years by any agency without specific authorization from the Administrator of GSA. It designates certain types of space which may be acquired for lease terms of up to 20 years by designated agencies without further specific authorization from the Administrator of GSA. There are no major changes to this final rule as a result of agency comments on the proposed rule.

Legal Authority: 42 USC 2473; PL 85-568

CFR Citation: 14 CFR 1214.10

Legal Deadline: None

Abstract: The goal of NASA's policy on "Use of Small, Self-Contained Payloads," as stated in subpart 1214.9, is to stimulate and encourage the use of space by a wide range of users, particularly those associated with education. For a payload for flight as a domestic educational institution payload, the applying institution must be a U.S. public or nonprofit educational institution; the payload must be certified by an authorized official of the institution to be part of an educational or research project that is principally for the benefit of students, rather than nonstudents, such as faculty or research staff, payload experiments should involve students in all phases of the project, including concept development, initial planning, design, conduct, and analysis of the results of the experiments. Involvement

of faculty or other professionals in a supervisory, advisory, or consultative relationship with the students is necessary. Projects may include applied research, basic research and/or other activities which have further educational uses beyond the immediate research effort.

Semiannual Regulatory Agenda

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION (NARA)

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

36 CFR Ch. XII

Unified Agenda of Federal Regulations

AGENCY: National Archives and Records Administration.

ACTION: Semiannual agenda.

SUMMARY: This agenda announces the proposed regulatory actions that the

National Archives and Records Administration (NARA) plans for the next 12 months and those actions that have been completed since April 1993. This agenda was developed under the guidelines in OMB's Memorandum for Regulatory Contacts at Executive Departments and Establishments, dated June 14, 1993. NARA's purpose in publishing this agenda is to allow interested persons an opportunity to have more comprehensive documentation of NARA's regulatory

plans and to provide a systematic means of monitoring regulatory activity in NARA. None of the regulations listed in the agenda is considered major under Executive Order 12291 "Federal Regulation."

FOR FURTHER INFORMATION CONTACT: Mary Ann Hadyka, Acting Director, Policy and Program Analysis Division, (202) 501-5110.

Dated: August 27, 1993.

Trudy H. Peterson,
Acting Archivist of the United States.

Legal Authority: 44 USC 2104(a); 44 USC 2904; 44 USC 3101
CFR Citation: 36 CFR 1232
Legal Deadline: None
Abstract: The OMB Circular A-114 "Audiovisual Management" has been combined with OMB Circular A-130 "Information Management". Part 1232 of 36 CFR needs clarification and expansion to incorporate specific details of A-114 and its appendices that remain in effect. This regulation provides the necessary information to implement the audiovisual management requirements of A-130.

Procurement: This is a procurement-related action for which there is no statutory requirement. The agency has not yet determined whether there is a paperwork burden associated with this action.

Additional Information: The regulation is being revised in two stages. Because agencies must submit their annual audiovisual report to the Multimedia and Publications Distribution Division/National Archives Fulfillment Center by January 1, 1994, reporting requirements are being implemented in an interim final rule. The remaining provisions will be included in a NPRM to be issued later this fall. The National Audiovisual Center has been renamed to the Multimedia and Publications Distribution Division/National Archives Fulfillment Center as a result of a

reorganization effective October 1, 1992. The regulation was changed to reflect the new title on May 14, 1993.

Legal Authority: PL 97-365; 31 USC 3711; 31 USC 3716 to 3718; 5 USC 5514; 5 USC 552a; 31 USC 3701

CFR Citation: 45 CFR 1150

Legal Deadline: None

Abstract: The proposed rule amends the National Endowment for the Arts regulation for collecting debts. Principally, the amendments implement the Debt Collection Act of 1982 (PL 97-365), which amended the Federal Claims Collection Act of 1966 (31 USC 3711, 3716-3718) to authorize among other things, charging of interest penalties and administrative costs, and the use of administrative offset, private collection agencies and credit agencies by the Government. The amendments also implement governmentwide regulations issued by the Department of Justice and the General Accounting Office (49 FR 8889) and Office of Personnel Management (49 FR 27470).

Legal Authority: 42 USC 2000(d) to 2000(d)(4)

CFR Citation: 45 CFR 1110; 45 CFR 1173

Legal Deadline: None

Abstract: This proposed regulation implements title VI of the Civil Rights Act of 1984, which prohibits discrimination on the basis of race, color, or national origin in federally assisted programs and activities, with respect to programs and activities receiving Federal financial assistance from the National Endowment for the Humanities.

Programs and activities receiving Federal financial assistance from the National Endowment for the

Humanities are currently covered by a regulation implementing title VI that was issued by the National Foundation on the Arts and the Humanities in 1973 (45 CFR 1110). The proposed rule will remove NEH programs from the coverage of the earlier rule and replace it with a new part applicable only to NEH-assisted programs and activities. Programs and activities assisted by the National Endowment for the Arts remain covered under the existing regulation.

Semiannual Regulatory Agenda

OFFICE OF GOVERNMENT ETHICS (OGE)

**OFFICE OF GOVERNMENT ETHICS
5 CFR Ch. XVI**

**Semiannual Regulatory Agenda,
October 1993**

AGENCY: Office of Government Ethics.

ACTION: Semiannual agenda of substantive regulations.

SUMMARY: The following Office of Government Ethics (OGE) substantive regulations are scheduled for development or review during the period from October 1, 1993, through September 30, 1994. This agenda fulfills OGE's responsibility to publish a semiannual regulatory agenda under

Executive Order 12291 "Federal Regulation" and has been prepared in accordance with guidance received from the Office of Management and Budget. None of the OGE regulations in this October 1993 agenda will have a significant economic impact on a substantial number of small entities as defined under the Regulatory Flexibility Act, 5 U.S.C. chapter 6. In addition, none of the listed OGE regulatory actions are major rules under E.O. 12291 nor procurement-related. Furthermore, the organizational and procedural rules of OGE are not listed herein (see section 1(a)(3) of E.O. 12291).

This publication in the Federal Register does not impose a binding

obligation on the Office of Government Ethics with respect to any particular item on its agenda. The dates shown for the future steps of each action are estimates and not commitments to act by the date shown. Moreover, other substantive OGE regulatory actions, in addition to the entries listed, are not precluded.

FOR FURTHER INFORMATION CONTACT: William E. Gressman, Office of Government Ethics, Suite 500, 1201 New York Avenue NW., Washington, DC 20005-3917; telephone (202) 523-5757, FAX: (202) 523-6325.

Approved: August 27, 1993.
Stephen D. Potts,
Director, Office of Government Ethics.

Abstract: Proposed regulation will interpret section 208(a) of title 18, U.S.C., which prohibits officers and employees of the executive branch from officially participating personally and substantially in a particular matter in which there is a personal financial interest or a financial interest of a related person or organization (absent a waiver under 18 U.S.C. 208(b)). It will also list and describe interests which are considered to be too remote or too inconsequential to affect the integrity of the services of executive branch officers or employees, in accordance with 18 U.S.C. 208(b)(2). Such interests will be exempt from the restrictions of 18 U.S.C. 208(a), generally requiring disqualification. The proposed regulation will also provide guidance to executive branch agencies as to the kinds of interests that are not so substantial as to be deemed likely to affect the integrity of the services the Government may expect from an employee and which, therefore, may be waived from the general rule of disqualification under 18 U.S.C. 208(a) pursuant to 18 U.S.C. 208(b)(1). Legal Deadline: None

Abstract: Regulation revising the executive branch public and confidential financial disclosure report systems for high-level officials and certain midlevel employees, respectively, in light of the changes to the Ethics in Government Act effected by the Ethics Reform Act of 1989 (Pub. L. 101-194), as amended, including by Pub. L. 101-280 and sections 313 and 314 of Pub. L. 102-90. The new disclosure provisions apply to reports filed since January 1, 1991. Subpart I of the regulation has, effective October 5, 1992, superseded prior 5 CFR part 735, subpart D (and 5 CFR 735.106), along with executive agency regulations thereunder, and established a revised system of confidential reporting, modeled generally on the public reporting system, for executive branch agency midlevel employees with sensitive duties and special Government employees.

Legal Deadline: None

Abstract: Interpretive regulation giving guidance for the executive branch on the various substantive restrictions of the current version of the post-Government employment conflict of interest statute 18 U.S.C. 207, which became effective January 1, 1991, pursuant to title I of the Ethics Reform Act of 1989 (Pub. L. 101-194), as amended. Parts of the regulation, dealing with procedures for waivers by the Office of Government Ethics of certain senior official constraints (based on executive agency hardship), designated senior employees, and separate agency designations, have already been published in the Federal Register. The Office of Government Ethics also has continued to publish in the CFR the interpretive regulation, 5 CFR part 2637 (but now without the no-longer-effective former Senior Employee and old agency component designation listings), under the lifetime bar of the prior version of the post-employment law which still applies to executive branch employees who left the Government before January 1, 1991.

OFFICE OF MANAGEMENT AND BUDGET

5 CFR Ch. III and 48 CFR Ch. 99

Federal Regulations; OMB Circulars, OFPP Policy Letters, and CASB Cost Accounting Standards Included in the Semiannual Agenda of Federal Activities

AGENCY: Office of Management and Budget.

ACTION: Publication of semiannual agenda.

SUMMARY: The Office of Management and Budget (OMB) is publishing its semiannual agenda of upcoming activities for OMB Circulars, Office of Federal Procurement Policy (OFPP) Policy Letters, and Cost Accounting Standards Board (CASB) Cost Accounting Standards.

OMB Circulars and OFPP Policy Letters are published in accordance

with OMB's internal procedures for implementing Executive Order No. 12291. OMB policy guidelines are issued under authority derived from several sources including: Subtitles I, II, and V of title 31, United States Code; Executive Order No. 11541; and other specific authority as cited. OMB Circulars and OFPP Policy Letters communicate guidance, instructions, and information of a continuing nature to executive branch agencies. As such, OMB Circulars and OFPP Policy Letters are not regulations. Nonetheless, because these issuances are typically of public interest, they are generally published in the **Federal Register** in both proposed (for public comment) and final stages. For this reason, they are presented below in the standard format of "prerule," "proposed rule," and "final rule" stages.

CASB Cost Accounting Standards are issued under authority derived from 41 U.S.C. 422. Cost Accounting Standards

are rules governing the measurement, assignment, and allocation of costs to contracts with the United States Government.

For purposes of this agenda, we have excluded directives that outline procedures to be followed in connection with the President's budget and legislative programs and directives that affect only the internal functions, management, or personnel of Federal agencies.

FOR FURTHER INFORMATION CONTACT: See agency person listed for each entry in the agenda, c/o Office of Management and Budget, Washington, DC 20503. On the overall agenda, contact John B. Arthur, (202) 395-7250, at the above address.

Dated: September 15, 1993.

Abstract: OMB Circular No. A-130, "Management of Federal Information Resources," issued December 12, 1985, establishes policy for the management of Federal information resources, and provides certain procedural and analytic guidelines for implementing specific aspects of these policies. OMB is reviewing the Circular for consistency with the Computer Security Act of 1987 (PL 100-235) and the Computer Matching and Privacy Protection Act of 1988. On June 25, 1993, OMB completed the first of three revisions to the Circular. On September 10, 1993, OMB proposed changes to the information technology management part of the Circular. Plans are to propose changes to the computer security part of the Circular next year.

Legal Authority: 44 USC 1108

CFR Citation: None

Legal Deadline: None

Abstract: OMB Circular No. A-3, "Government Publications", last revised in May 1985, prescribes policies and procedures for approving funding for government periodicals to fulfill the requirements of 44 USC 1108, and for reporting periodicals and non-recurring publications. On August 18, 1989, OMB issued OMB Bulletin No. 89-15 which effected certain revisions to Circular A-3 in reporting requirements. OMB Bulletin No. 90-09, issued July 31, 1990, repeated these revisions to Circular No. A-3. On June 25, 1993, OMB issued revisions to Circular No. A-130, "Management of Federal Information Resources," which incorporated the requirements of Circular No. A-3 (with revisions), and therefore rescinded Circular No. A-3.

Significance: Agency Priority

Legal Authority: PL 101-576, sec 503(a) and (b), CFO Act of 1990

CFR Citation: Not applicable

Legal Deadline: None

Abstract: OMB Circular A-21 establishes Governmentwide accounting principles for the direct and indirect (allocated overhead) costs of Federal grants and contracts with colleges and

universities. The Circular divides allocated overhead costs into seven "cost pools" that form the basis of a university's indirect cost rate. Four of these pools are for administrative costs. In Fiscal Year (FY) 1989 estimated Federal payments for university overhead were about \$2.5 billion of an estimated \$9.2 billion for direct scientific research. The problem of rising overhead costs has been the subject of continuing and extensive debate.

**4161. • REDUCTION IN FORCE
PERMISSIVE TEMPORARY
EXCEPTION**

Legal Authority: 5 USC 1302

CFR Citation: 5 CFR 351

Legal Deadline: None

Abstract: These proposed regulations would give agencies greater authority to use permissive temporary exceptions to the regular order of release in reduction in force (RIF) competition. This change would assist an agency in meeting a Government obligation to an employee (such as delaying the effective date of an employee's release by RIF long enough to allow a full 60- or 120-day notice to the employee). These proposed regulations would also allow an agency to consider only subgroup standing in releasing employees during the 120-day period immediately before an installation closes.

**4162. • REDUCTION IN FORCE
EXCEPTED SERVICE TENURE
GROUPS**

Legal Authority: 5 USC 1302

CFR Citation: 5 CFR 351

Legal Deadline: None

Abstract: These proposed regulations would clarify tenure groups for

excepted service employees under OPM's reduction in force (RIF) regulations. These proposed regulations would also incorporate the definition of "undue interruption" into the retention regulations, and delete a redundant reference to critical elements found in the provisions covering competitive levels and assignment rights. These changes would assist agencies in properly determining employees' retention rights.

**4163. REPAYMENT OF STUDENT
LOANS**

Legal Authority: 5 USC 5379

CFR Citation: 5 CFR 537

Legal Deadline: None

Abstract: OPM plans to issue proposed and final regulations that will permit agencies to repay all or part of an outstanding student loan in order to recruit or retain highly qualified professional technical or administrative personnel. This is a new provision contained in the National Defense Authorization Act for Fiscal Year 1991, Pub. L. 101-510. Agencies may pay up to a maximum of \$6,000 per employee in a calendar year, or \$40,000 overall. In return, the employee must agree to remain with the agency for at least 3 years.

OPM

Proposed Rule Stage

4164. RULEMAKING TO IMPLEMENT THE HUMAN RESOURCES DEVELOPMENT (HRD) POLICY INITIATIVES ON NEEDS ASSESSMENT**Legal Authority:** 5 USC 410**CFR Citation:** 5 CFR 410**Legal Deadline:** None

Abstract: OPM is issuing final regulations in part 410 of 5 CFR in the area of training needs assessment. The needs assessment regulations will require agencies to implement a systematic process for linking organizational, occupational, and individual needs. The regulations also amend section 410.302 by inserting the word "disabled" to ensure that agencies provide safeguards against unjustified denial of developmental opportunities for employees with disabilities. The term "Other Development" is introduced in subparts B and C reflecting the view that options other than formal training should be considered in establishing developmental activities.

4170. ALLOWANCES AND DIFFERENTIALS; COST-OF-LIVING ALLOWANCE AND POST DIFFERENTIAL - NONFOREIGN AREAS

Legal Authority: 5 USC 5941

CFR Citation: 5 CFR 591, subpart B

Legal Deadline: None

Abstract: Executive Order 10,000 requires OPM to review nonforeign area cost-of-living allowances from time to time. This review is conducted by means of annual surveys. Under 5 CFR 591.205(d), OPM is required to publish proposed revisions in allowance rates in the FEDERAL REGISTER for comment, along with a detailed description of the calculation of each allowance rate. Although reductions in allowance rates are currently prohibited by a provision in Pub. L. 102-141 (October 28, 1991), OPM is required to publish the results of the summer 1992 and winter 1993 surveys and the proposed new rates if these surveys indicate that any increases in allowance rates are justified.

4191. AMENDMENT TO SELECTIVE SERVICE REGISTRATION REQUIREMENTS

Legal Authority: 5 USC 3328

CFR Citation: 5 CFR 300, subpart G

Legal Deadline: None

Abstract: OPM will issue revised proposed and final rules delegating authority to agencies to determine whether a Federal job applicant's failure to register with the Selective Service was knowing and willful. This change was authorized by an amendment to 5 U.S.C. 3328, which imposes the selective service registration requirement as a condition of employment in Federal executive agencies. The delegation will permit faster agency decisions for interested job seekers and reduce paperwork.

Panama Canal Commission

Semiannual Regulatory Agenda

PANAMA CANAL COMMISSION (PANAMA)

PANAMA CANAL COMMISSION

35 CFR Ch. I

Unified Agenda of Federal Regulations

AGENCY: Panama Canal Commission.

ACTION: Publication of semiannual agenda of regulations.

SUMMARY: The purpose of this agenda is to report the proposed rulemaking activities of the Panama Canal Commission. This information will allow the public to participate in the rulemaking process.

FOR FURTHER INFORMATION CONTACT: For information about a particular

regulatory project, contact the person listed in the subheading "Agency Contact" for that project. For general information, contact Michael Rhode, Jr., Secretary, Panama Canal Commission, International Square, 1825 I Street NW., Suite 1050, Washington, DC 20006-5402, (202) 634-6441 TDD; or John L. Haines, Jr., Esquire, General Counsel, Panama Canal Commission, Unit 2300, APO AA 34011-2300.

SUPPLEMENTARY INFORMATION: Executive Order 12291 "Federal Regulation" and the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, require that executive agencies publish in the **Federal Register** a semiannual notice of regulations

which are under development or review or for which action has been completed. The Panama Canal Commission agenda contains certain regulations which are limited in public impact, but they are included to increase public awareness of Commission activities and to allow for increased public participation in the Agency's regulatory review and development process. This agenda was prepared pursuant to guidelines established by the Office of Management and Budget.

Dated: August 24, 1993.

Michael Rhode, Jr.,
Secretary, Panama Canal Commission.

Prerule Stage

4242. RULES FOR MEASUREMENT OF VESSELS

Significance: Agency Priority

Legal Authority: PL 96-70, sec 1601

CFR Citation: 35 CFR 135

Legal Deadline: None

Abstract: In July 1982, 48 nations, representing more than 80 percent of world shipping, began implementing a new uniform method for tonnage determination in accordance with the International Convention on Tonnage Measurement of Ships, 1969. Final implementation is scheduled for July

1994. The present Panama Canal measurement system is based upon the old national tonnage measurement system. The Panama Canal Commission is currently studying the possibility of adapting its tonnage measurement system to one which is compatible with the 1969 Convention. This would eliminate the need for vessels to be measured twice, once under the new system and again under the old system for Panama Canal assessment purposes. While no timetable for rulemaking has been established, tentative plans are to target any possible change to the Panama Canal measurement rules to the

July 1994 final implementation of the 1969 Convention by October 1, 1994.

the Agency in order to allow the public an opportunity to participate in the rulemaking process.

FOR FURTHER INFORMATION CONTACT: The public is encouraged to contact the agency official listed for the particular agenda item. For other information concerning Peace Corps' regulations or this semiannual agenda, contact Brian J. Sexton, General Counsel, Peace Corps, 1990 K Street NW., Washington, DC 20526, (202) 606-3114.

SUPPLEMENTARY INFORMATION: In accordance with Executive Order 12291 entitled "Federal Regulation" and the Regulatory Flexibility Act (5 U.S.C. 601-612), executive agencies are required to publish in the *Federal Register* semiannual regulatory agendas in April

and October of each year. The regulations being considered by the Peace Corps are not "major" rules within the meaning of Executive Order 12291, and no Regulatory Impact Analysis is required. In addition, the Peace Corps has determined, under the Regulatory Flexibility Act, that the regulations under consideration will not have a significant economic impact on a substantial number of small entities. Accordingly, no Regulatory Flexibility Analysis is required. The Agency has also determined that the regulations will not impose compliance costs or reporting burdens on the public.

Dated: July 7, 1993.

Brian J. Sexton,
General Counsel.

SUMMARY: This agenda announces the regulations the Peace Corps will have under development during the 12-month period from October 1, 1993, through September 30, 1994. The purpose for publishing this agenda is to give notice of any regulatory activity by

SUPPLEMENTARY INFORMATION: Under the President's Order on Federal Regulation, Executive Order 12291, 46 FR 13193, each agency is required to publish, in April and October, an agenda of regulations currently or soon to be under development. The Executive order requires that the agenda also include those currently effective

regulations that are being reviewed by the Agency pursuant to the Executive order. The Regulatory Flexibility Act, Public Law 98-354, 5 U.S.C. 601, has a similar agenda requirement. Under that law, the agenda must list any regulation that is likely to have a significant economic impact on a substantial number of small entities.

The Office of Management and Budget has issued guidelines prescribing the form and content of the regulatory agenda. Under those guidelines, the agenda must list all regulatory activities being conducted or reviewed in the next 12 months and provide certain specified information on each regulation. All of the items on this agenda are current or projected rulemakings.

4253. ANNUITY CONTRACTS DISTRIBUTED BY TERMINATING PLANS

Significance: Regulatory Program
Legal Authority: 29 USC 1302(b); 29 USC 1341(b)
CFR Citation: 29 CFR 2617
Legal Deadline: None

Abstract: ERISA section 4041(b) requires terminating plans to provide benefits that are payable in annuity form by purchasing and distributing to plan participants (or beneficiaries) irrevocable commitments from an insurer to pay the annuity benefits. Once the final distribution of assets in accordance with section 4041(b) is completed, PBGC's guarantee under ERISA section 4022 is extinguished. Under ERISA section 4041(b), the only specific requirement dealing with irrevocable commitments distributed upon plan termination is that they be purchased from a licensed insurance company. (Such purchases are, of

course, subject generally to the fiduciary provisions of Title I of ERISA.) Recent publicity about financial problems within the insurance industry and, specifically, about the serious problems of a few insurers, has sparked concerns about the security of pension annuities that are being, or will be, paid by an insurer pursuant to an irrevocable commitment. PBGC (with the Department of Labor) has been studying this issue. (cont)

Additional Information: ABSTRACT CONT: As part of this ongoing study, PBGC issued an ANPRM, in order to solicit comments and suggestions from the public on the following two broad issues: (1) Are current or future retirees,

who are (or will be) receiving their benefits from an insurance company pursuant to the insurer's irrevocable commitments, at risk of losing some (or all) of their promised benefits because of the insurer's financial inability to pay the full benefits? (2) If such risk does exist, or can reasonably be expected to exist in the future, what actions, either Federal or nonfederal, can be taken to reduce this risk with respect to plans terminating under Title IV? After reviewing the public comments in response to this ANPRM, as well as the other information available to it, PBGC will decide whether to proceed with this rulemaking by issuing an NPRM.

4254. MERGERS AND TRANSFERS BETWEEN MULTIEMPLOYER PLANS

Legal Authority: 29 USC 1302(b)(3); 29 USC 1411
CFR Citation: 29 CFR 2672
Legal Deadline: None

Abstract: ERISA section 4231 sets basic guidelines for mergers and transfers between multiemployer plans, including a provision for a 120-day notice to the PBGC. The PBGC's regulation on Mergers and Transfers Between Multiemployer Plans contains implementing rules. Neither the statute nor the regulation makes clear whether

or how the merger and transfer rules apply where one or more of the plans involved is terminated. This regulation would amend 29 CFR Part 2672 to clarify its application to mergers and transfers involving one or more terminated multiemployer plans and to specify the criteria that a merger or transfer involving terminated plans must satisfy in order to protect participants and beneficiaries in the affected plans, as well as the PBGC, from risk of loss as a result of the merger or transfer. The regulation would also liberalize the 120-day notice requirement for all multiemployer mergers and transfers so that such

transactions can proceed more expeditiously.

Significance: Agency Priority

Legal Authority: 29 USC 1302(b)(3); 29 USC 1431

CFR Citation: Not yet determined

Abstract: ERISA section 4261(a) provides that the PBGC shall pay financial assistance to insolvent multiemployer plans described in sections 4245(f) and 4281(d) who submit an application for the payment of assistance. The PBGC's regulation on Powers and Duties of Plan Sponsor of Plan Terminated by Mass Withdrawal (29 CFR Part 2675) specifies the information that plans described in section 4281(d) (i.e., a plan terminated by the withdrawal of all employers) are required to submit in their application for financial assistance; however, the PBGC has not prescribed regulations specifying the information that a plan subject to section 4245(f) (i.e., a plan that has not terminated by the withdrawal of all employers) is required to file. This regulation would, among other things, (1) specify the information for applications for financial assistance from plans described in section 4245(f); (2) incorporate and revise, as appropriate, the requirements in 29 CFR Part 2675 that relate to applications for financial assistance for plans described in section 4281(d); and (3) specify (cont)

Abstract: The PBGC is dividing one of its systems of records that are subject to the Privacy Act into two systems, and therefore proposing to amend its regulations to describe accurately the pertinent exemption from statutory provisions under the systems of records as so modified. In addition, the PBGC is proposing amendments to reflect its current organization and to increase its standard copying fee (which has not been modified since 1975). CFR Citation: 29 CFR 2626

Legal Deadline: None

Abstract: The Single-Employer Pension Plan Amendments Act of 1986 ("SEPPAA") added to ERISA (in

section 4049) a requirement that a "4049 trust" be set up to provide unfunded benefits not guaranteed by the PBGC to participants and beneficiaries of terminated insufficient single-employer plans; SEPPAA also added section 4062(c) to provide for employer liability to a 4049 trust. These provisions were repealed by the Pension Protection Act ("PPA"), but still apply to plans that terminated while they were in effect (roughly 1986-87). PPA also added to section 4049 a requirement that employers liable to a 4049 trust provide funding for administrative expenses of the trust before the section 4062(c) liability is collected, in accordance with regulations to be issued by the PBGC. This regulation would provide a summary procedure for collection of such administrative funding by a 4049 trustee.

Abstract: The PBGC's regulation on Payment of Premiums (29 CFR part 2610) currently requires plan administrators to retain, for six years, all records necessary to support or validate premium payments and to make those records available to the PBGC, upon request, for inspection and photocopying. The PBGC intends to propose amendments to provide for the submission to the PBGC of information in those records and for the supplementation of information submitted in premium filings. By improving the PBGC's ability to tailor

its decisionmaking to the variety of situations presented by the administration of premium requirements, the PBGC expects these changes to increase the agency's efficiency and effectiveness.

Abstract: The PBGC's regulation on Certain Reporting and Notification Requirements (29 CFR Part 2615) includes rules for notification of "reportable events" under ERISA section 4043. Significance: Agency Priority

Legal Authority: 29 USC 1302(b)(3)

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: The most significant threat of future claims against the PBGC is from very large plans (both single-employer and multiemployer). This regulation would improve the PBGC's ability to estimate its potential exposure by requiring the plan administrator of each such plan to submit information annually about the plan's funding status (regardless of current funding level). In general, the required information would be readily available to the plan administrator. The information would be submitted (in most cases) by the time the annual premium payment with PBGC Form 1 is due.

Significance: Agency Priority

Legal Authority: 29 USC 1302(b)(3); 29 USC 1322; 29 USC 1342

CFR Citation: 29 CFR 2624

Abstract: When the PBGC assumes trusteeship of a terminated pension plan pursuant to sections 4041 and 4042 of ERISA, it pays benefits to participants pursuant to plan provisions and section 4022 of ERISA. Many of the rules and procedures for benefit payments, while of interest to participants, are inappropriate for inclusion in a regulation. The PBGC already provides much of this information to participants in other appropriate forms, such as letters and

pamphlets, and will continue to do so. However, rules governing certain aspects of benefit payments are more appropriately established by regulation (or otherwise addressed through a Federal Register issuance). This regulation will enable the PBGC to process and administer PBGC-trusted plans more efficiently with resultant cost savings by filling gaps in the rules and otherwise clarifying matters that had been handled on a case-by-case basis in the past.

4262. CALCULATION AND PAYMENT OF UNFUNDED NONGUARANTEED BENEFITS

Significance: Regulatory Program

Legal Authority: 29 USC 1302(b)(3); 29 USC 1322(c)

CFR Citation: 29 CFR 2623; 29 CFR 2627

Legal Deadline: None

Abstract: The Pension Protection Act repealed ERISA sections 4049 and 4062(c). Those provisions established new employer liability to plan participants and beneficiaries in the event of a distress termination or involuntary termination by the PBGC of a plan without sufficient assets to pay all benefit commitments; the section 4049 trust was the vehicle for collecting and distributing these liability amounts. This system proved flawed in several respects, however, and Congress therefore created a new scheme by which to channel employer liability recoveries to plan participants and beneficiaries (amended ERISA section 4022(c)).

Under section 4022(c), participants no longer have a direct claim for employer liability. Instead, the PBGC's claim covers both its shortfall (unfunded

PBGC

Proposed Rule Stage

guaranteed benefits) and participants' losses (unfunded benefit liabilities in excess of guaranteed benefits). In turn, the PBGC is to pay a portion of its employer liability recovery to participants and beneficiaries. The amount to be paid is based on the PBGC "recovery ratio" (as defined in amended sec. 4022(c)(3)).(cont)

Additional Information: ABSTRACT CONT: This new statutory rule contains several ambiguities and also leaves to the PBGC the development of specific rules and procedures necessary to make this system work. The regulation will, for example, contain rules on how the PBGC will value its employer liability recoveries for purposes of computing the recovery ratio, whether the allocation of amounts payable under this provision will be done as part of the regular section 4044 asset allocation, and whether the PBGC will pay these benefits by increasing the amount of annuity payments it is making to participants or making lump sum payments.

Significance: Regulatory Program

Legal Authority: 29 USC 1302(b)(3); 29 USC 1341

CFR Citation: 29 CFR 2619

Legal Deadline: None

Abstract: The Retirement Equity Act of 1984 ("REA") requires plans to provide certain benefits, prohibits the elimination of benefit options and certain early retirement benefits and retirement type subsidies, and mandates the range of interest rates that may be used in calculating the amount of a non-consensual lump sum benefit. The Tax Reform Act of 1986 ("TRA '86") slightly modified the interest rate restrictions and extended them to the calculation of all lump sum benefits.

These rules necessitate several amendments to the PBGC's valuation of benefits regulation (29 CFR part 2619). The PBGC also plans to amend the regulation to reflect changes in the termination rules made by the Single-Employer Pension Plan Amendments Act of 1986 (SEPPAA) and the Pension Protection Act of 1987 (PPA).

Legal Authority: 29 USC 1302(b)(3); 29 USC 1341; 29 USC 1344

CFR Citation: 29 CFR 2617

Abstract: Under title IV of ERISA, a single-employer plan covered by the

termination insurance program may terminate in a "standard termination" if the plan has assets sufficient to provide for all benefit liabilities under the plan. The termination process is complete, and the PBGC's guarantee is extinguished, once the plan administrator distributes benefit liabilities by purchasing "irrevocable commitments" (annuity contracts) from an insurer or by distributing benefits in any other permitted form (generally a lump sum cash payment). The recent and highly publicized financial difficulties of certain insurers have focused public attention on the risks faced by participants whose benefits under terminating plans are to be provided through irrevocable commitments issued by such insurers. Under certain circumstances, state guaranty associations may provide some or all of the benefits otherwise lost. Nevertheless, some participants may not know (1) which state guaranty association(s) (if any) cover(s) their annuities, (2) the amount of coverage by the guaranty association(s), and (3) that a change (cont)

Abstract: Under section 4207(a) of ERISA, the PBGC has issued a regulation (29 CFR part 2647) providing

for the reduction or waiver of an employer's liability for complete withdrawal upon the employer's resumption of participation under the plan from which it withdrew. The statute also requires the PBGC to prescribe procedures and standards under which multiemployer plans may adopt their own rules abating complete withdrawal liability upon an employer's return to the plan (section 4207(b)).

The purpose of letting plans adopt their own abatement rules is obvious: a specific rule adopted by a plan may well work better under the facts and circumstances of that particular plan than the broad rules adopted by the PBGC. This regulation would permit a plan to fashion the rules it needs to encourage the return of withdrawn employers, while at the same time protecting the plan from the loss of withdrawal liability payments without a compensating resumption of contributions to the plan by a formerly withdrawn employer. Abstract: Under sections 4006 and 4007 of ERISA, the PBGC has issued its regulation governing the payment of

premiums for pension plans subject to Title IV of ERISA (29 CFR part 2610). PBGC studies of ways to simplify premium calculation and filing and to improve premium processing and accounting by PBGC have yielded suggestions for changes in that regulation. As a result, the PBGC has issued a proposed regulation to implement certain changes, relating mainly to filing due dates, treatment of short plan years, simplification of the alternative calculation method, and premium payment requirements for large plans (including what plans are considered large plans for this purpose). The purpose of the changes would be primarily to simplify the premium payment system for plans and the PBGC.

Abstract: The PBGC does not have a program for the administrative offset of debts (i.e., for satisfying debts owed to the PBGC by withholding money that is payable to or held for the debtor by other agencies of the federal government). Administrative offset may be an effective tool for collecting debts such as premium payment deficiencies, benefit overpayments, and employer liability. declares that a major disaster exists. The PBGC is similarly amending its standard termination regulation to include both an exception to the deadline for filing the standard termination notice (and, hence, the deadline for issuing notices of plan benefits) and an exception to the deadline for completing the distribution of plan assets. Such exceptions will be provided by notice issued by the PBGC's Executive Director. Because of the need for immediate action, an interim rule was published on August 24, 1993.

To do so, it had to be amended no later than September 26, 1981, to provide that it be treated as a single-employer plan, and had to file a written notice of its election with the PBGC no later than 60 days after the adoption of the amendment. This provision is now obsolete, and was repealed to simplify the PBGC's regulations.**Timetable:**

The interest and mortality assumptions are selected so that the calculated benefit values will be in line with the market costs for providing the benefits. Similarly, 29 CFR 2676 prescribes the rules for valuing benefits under multiemployer plans following a mass withdrawal of employers. The PBGC amended 29 CFR 2619: (1) to update its mortality assumptions to reflect recent actuarial practice, (2) to

uncouple the regulation's administrative expense ("loading") assumptions from its interest assumptions, and (3) to replace the interest rate structure with one based on the length of time between the valuation date and the date of each monthly payment. The PBGC at the (cont)

Abstract: The Single-Employer Pension Plan Amendments Act of 1986 ("SEPPAA") and the Pension Protection Act ("PPA") made several changes in Title IV rules and procedures that affect and, in some cases, override portions of several PBGC regulations. The PBGC amended these regulations--administrative review of agency decisions, trades or businesses under common control, certain reporting and notification requirements, employer liability, and benefit reductions in terminated plans--to conform them to current law.

Semiannual Regulatory Agenda

SMALL BUSINESS ADMINISTRATION (SBA)

SMALL BUSINESS ADMINISTRATION

13 CFR Ch. I

Improving Government Regulations; Semiannual Agenda

AGENCY: Small Business Administration.

ACTION: Publication of the semiannual agenda of regulations under review or development by the Small Business Administration (SBA).

SUMMARY: This is SBA's 29th semiannual agenda of regulations. Although not a regulatory agency, SBA has attempted to draft agendas that meet both the criteria and the spirit of the regulatory review process. This agenda is published pursuant to Executive Order 12291, the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, and Public Law 96-354, effective January 1, 1981.

FOR FURTHER INFORMATION CONTACT: For further information on agenda items, the public is encouraged to contact the

individual agency official listed for the particular item.

For information concerning SBA's overall Regulatory Review and Development Program or general semiannual agenda questions, contact Martin D. Teckler, Deputy General Counsel, U.S. Small Business Administration, 409 Third Street SW., Washington, DC 20416, (202) 205-6642.

SUPPLEMENTARY INFORMATION: The SBA agenda contains many regulations which are limited in public impact, but they are included to increase public knowledge of all SBA regulatory activities and allow for increased public participation in the review and development process.

Public comments on SBA's previous agendas have been general, and all were positive. None were directed at specific content nor were any changes suggested or recommended.

The agenda format has four parts. Part I, Pre-Rulemaking, includes investigations and reviews to be

conducted prior to deciding whether or not to propose a rule or rule change. Part II, Proposed Rules, includes rulemaking which will be proposed during the 12-month period covered by the agenda. Part III, Final Rules, includes proposed rules which will be finalized during the period covered by the agenda. Part IV, Completed Actions, includes regulations completed or withdrawn and reviews completed since the preceding agenda.

Publication of the agenda does not impose any binding obligation on SBA with regard to any specific item in the agenda. Additional regulatory action not listed on the agenda is not precluded.

The above described regulations will be developed in a manner which promotes growth in the economy while imposing no unnecessary regulatory burdens on the public.

Dated: September 7, 1993.
Erskine B. Bowles,
Administrator.

Abstract: Executive Order 12138 created a national women's business enterprise policy and prescribed arrangements for developing, coordinating, and implementing a national program for women's business enterprise. This EO states that each department and agency of the executive branch "shall take appropriate action to facilitate, preserve, and strengthen" women-owned businesses. SBA is proposing these regulations to establish a definition of "women-owned business" and to provide a process to expeditiously resolve challenges to a self-certification of a women-owned business.

Legal Authority: 15 USC 631; 41 USC 403(11)

CFR Citation: 13 CFR 120.200

Legal Deadline: None

Abstract: Section 5(b)(4) of the Small Business Act sets a limit of \$1,000 on the amount of CPC which can be obtained without competitive bid. This section was based on procurement legislation which was in effect at the time the Act was drafted (40 years ago). Since then, the amount contained in procurement regulations has steadily

increased. It is currently \$25,000. Unfortunately, the Small Business Act was never amended and remains at \$1,000. This unrealistic limit greatly impedes the field offices' ability to perform their required tasks efficiently. To correct this oversight and to prevent a recurrence, the end of the second sentence of the Small Business Act will be amended to read "... or the amount thereof does not exceed the small purchase threshold as defined in section 4(11) of the Office of Federal Procurement Policy Act (41 USC 403(11))." The Agency will use SOP 50 50 1 to set limits on amounts within the small purchase threshold.

Abstract: In a previous ruling, the Office of General Counsel stated that the Small Business Act limited the Agency's guaranty to loans only. For this reason, when a participating lender servicing a liquidation account finds a term buyer for assets acquired through foreclosure, the Agency is forced to expend funds to purchase the guaranty and establish the account as an immediate participation even if such

action is not in the government's best interest. The first sentence of section 5(b)(7) of the Small Business Act will be amended to read "...dealing with or realizing on loans made under the provisions of this Act and receivables relating thereto or emanating therefrom...." The Agency will use SOP 50 51 1 to establish operating parameters for the loan servicing offices.

Abstract: Section 319 of Pub. L. 101-121 generally prohibits recipients of Federal contracts, grants or loans from using appropriated funds for lobbying the executive or legislative branches of the Federal Government in connection with a specific contract, grant or loan. Section 319 also requires that each person who requests or receives a Federal contract, grant, cooperative

agreement, loan, or a Federal commitment to insure or guarantee a loan, must disclose lobbying activities. This Office of Management and Budget crafted common rule will implement this law.

Abstract: Under the Small Business Act, the total amount of disaster assistance a borrower may receive from SBA in connection with any one disaster is limited to \$1,500,000 unless the borrower is a major source of employment in the disaster area and SBA, in its discretion, waives the \$1,500,000 limit. The proposed rule will clarify the definition of a "major source of employment." Additionally, the rule will provide that SBA will not waive the statutory limit unless the major source of employment's damaged location(s) in the disaster area is (are) in imminent danger of going out of business as a result of the disaster and the SBA loan is necessary to avoid substantial unemployment in the disaster area. Finally, the rule will

Significance: Agency Priority

Legal Authority: 15 USC 634(b)(6); 15 USC 636(a)

CFR Citation: 13 CFR 122

Legal Deadline: Other, Statutory, January 28, 1992.

Deadline is for an interim final rule.

Abstract: This rule serves to implement the Microloan Demonstration Program whose purpose is to assist women, low-income and minority entrepreneurs, business owners, and other individuals possessing the capability to operate successful business concerns. In addition, the program is extended to assist small business concerns suffering from a lack of credit due to economic downturn. Under the program, SBA is authorized to make direct loans to intermediary lenders who in turn use the proceeds to make fixed-interest-rate microloans available to businesses.

Abstract: Under the Small Business Act, the total amount of disaster assistance a borrower may receive from SBA in connection with any one disaster is limited to \$500,000 unless the borrower is a major source of employment in the Disaster Area and SBA, in its discretion, waives the \$500,000 limit. This proposed rule provides that SBA will not waive the statutory limit unless the major source of employment's damaged location(s) in the disaster area are out of business or in imminent danger of going out of business as a result of the disaster and the SBA loan is necessary to avoid substantial unemployment in the disaster area.

Proposed Rule Stage

4369. PROTECTION OF ARCHAEOLOGICAL RESOURCES

Legal Authority: 16 USC 470aa to 470mm

CFR Citation: 18 CFR 1312

Legal Deadline: None

Abstract: The planned regulations will implement provisions of the Archaeological Resources Protection Act of 1979 by providing protection of archaeological resources on public lands in TVA custody and control. TVA will seek to protect such resources through permits authorizing excavation or removal of resources, through civil penalties for unauthorized excavation or removal, through preservation of archaeological resource collections and data, and through assuring confidentiality of information about resources when disclosure would threaten the resources. The planned

regulations will supplement existing uniform regulations by assigning specific responsibilities within TVA.

Abstract: The Agency proposes new regulations governing its implementation of the Agreement for Facilitating the International

Circulation of Visual and Auditory Materials of an Educational, Scientific and Cultural Character (Beirut Agreement of 1948). A recent decision by the United States Court of Appeals (9th Circuit) and congressional enactment of legislation effecting the Agency's implementation of the Beirut Agreement indicate that new regulations be advanced.

Legal Deadline: None

Abstract: The regulation will set forth a complete revision of 22 CFR 514. Such revision is required as current regulations are dated, contradictory, and confusing, and lack both clarity and comprehensiveness. The revision will enhance Agency oversight of the

Exchange Visitor Program as well as clarify the duties and obligations of sponsors conducting exchange programs. This action is undertaken pursuant to a thorough review of the Exchange Visitor Program, its enabling legislation, and past history. The revision will ensure that Exchange activities conducted under the aegis of the J-visa conform to United States immigration and labor laws and are consistent with both the Fulbright-Hays Act of 1961 and the Smith-Mundt Act of 1948.

Semiannual Agenda

AGENCIES: Department of Defense (DoD),
General Services Administration (GSA),
and National Aeronautics and Space
Administration (NASA).

ACTION: Semiannual agenda.

SUMMARY: This agenda provides
summary descriptions of regulations

being developed by the Civilian Agency
Acquisition Council and the Defense
Acquisition Regulatory Council in
compliance with Executive Order 12291
"Federal Regulation." This agenda is
being published to allow interested
persons an opportunity to participate in
the rulemaking process.

The Federal Acquisition Regulation
(FAR) Secretariat has attempted to list
all regulations pending at the time of
publication, except for minor and
routine or repetitive actions; however,
unanticipated requirements may result
in the issuance of regulations that are
not included in this agenda. There is no
legal significance to the omission of an
item from this listing. Also, the dates
shown for the steps of each action are

estimated and are not commitments to
act on or by the dates shown.

FOR FURTHER INFORMATION CONTACT: Ms.
Beverly Payson, FAR Secretariat, Room
4035, GS Building, Washington, DC
20405, (202) 501-4755.

SUPPLEMENTARY INFORMATION: DoD, GSA,
and NASA, under their several statutory
authorities, jointly issue and maintain
the FAR and prescribe the FAR system.
Revisions to the FAR are made through
periodic issuance of Federal Acquisition
Circulars (FACs). None of the
regulations listed in this agenda are
considered major under Executive Order
12291.

Dated: September 13, 1993.

Albert A. Vicchiolla,
Director, Office of Federal Acquisition Policy.

Abstract: The Defense Acquisition Regulations and Civilian Agency Acquisition Councils are considering amending FAR Parts 8 and 52 to provide guidance in the procurement of helium. Public Law 86-777, the Helium Act, requires that all major helium requirements be purchased from the Secretary of the Interior. This includes the procurement of helium by Federal agencies as well as by contractors for use in Government contracts. The proposed coverage will assist Government agencies and contractors in complying with the Helium Act (PL 86-777) by ensuring that contracting officers and contractors are aware of the requirement for using Bureau of Mines Helium in Government contracts.

Abstract: The Civilian Agency Acquisition Council (CAAC) and the Defense Acquisition Regulations Council (DARC) have agreed on a final rule revising subpart 4.9, Information Reporting to the Internal Revenue Service, to ensure the collection and reporting of the Taxpayer Identification Number (TIN) of certain contract modifications occurring on or after April 1, 1990, when the initial contract was entered into before January 1, 1989. In addition, the subpart has been rearranged for clarification and the provision at 52.204-3, Taxpayer Identification, has been revised to update a reference. When the IRS issued its final regulations implementing section 6050M of the Tax Reform Act of 1986 (Pub. L. 99-514), the reporting requirements included the

requirement to report certain modifications to contracts that were awarded before January 1, 1989. The Office of Federal Procurement Policy requested that the CAAC and the DARC consider revising the FAR accordingly.

Procurement: This is a procurement-related action for which there is no statutory requirement. There is a paperwork burden associated with this action.

Additional Information: FAR 46.203 provides general criteria for selecting which quality requirements shall be applicable to a particular contract. The criteria to be considered include the technical description of the item, its complexity, and its intended application. Based on these criteria, Government reliance on contractor performed inspection and testing would be sufficient for many procurements of commercial or off-the-shelf supplies. However, FAR 46.301 and 46.302 indicate that Government inspection of such supplies is required when a procurement is expected to exceed the small purchase limit, without regard to the complexity or intended application of the supplies. The proposed changes would make reliance on contractor testing and inspection for commercial off-the-shelf supplies the general rule, with standard inspection or higher-level quality requirements being the exception.

Semiannual Regulatory Agenda

COMMODITY FUTURES TRADING COMMISSION (CFTC)

COMMODITY FUTURES TRADING COMMISSION

17 CFR Ch. I

Regulatory Flexibility Agenda

AGENCY: Commodity Futures Trading Commission.

ACTION: Publication of regulatory flexibility agenda.

SUMMARY: The Commodity Futures Trading Commission, in accordance with the requirements of the Regulatory Flexibility Act, is publishing a semiannual agenda of significant rules which the Commission expects to propose or promulgate over the next year. The Commission welcomes comments from small entities and others on the agenda.

ADDRESSES: Comments should be sent to: Gerry Smith, Special Assistant to the Executive Director, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581, (202) 254-6090.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act, 5 U.S.C. 601 et seq. (RFA), sets forth a number of requirements for agency rulemaking.

Among other things, the RFA requires that:

(a) During the months of April and October of each year, each agency shall publish in the *Federal Register* a regulatory flexibility agenda which shall contain:

(1) A brief description of the subject area of any rule which the agency expects to propose or promulgate which is likely to have a significant economic impact on a substantial number of small entities;

(2) A summary of the nature of any such rule under consideration for each subject area listed in the agenda pursuant to paragraph (1), the objectives and legal basis for the issuance of the rule, and an approximate schedule for completing action on any rule for which the agency has issued a general notice of proposed rulemaking; and

(3) The name and telephone number of an agency official knowledgeable concerning the items listed in paragraph (1).

5 U.S.C. 602(a). Accordingly, the Commission has prepared an agenda of significant rules which it presently expects may be considered during the course of the next year, irrespective of their potential impact on small entities.¹

The Commission's agenda represents its best estimate of significant rules which will be considered over the next 12 months.² In this regard, section 602(d) of the RFA, 5 U.S.C. 602(d), provides: "Nothing in [section 602] precludes an agency from considering or acting on any matter not included in a regulatory flexibility agenda or requires an agency to consider or act on any matter listed in such agenda."

The Commission is publishing its October 1993 regulatory flexibility agenda as part of the Unified Agenda of Federal Regulations. The Unified Agenda of Federal Regulations is coordinated by the Office of Management and Budget pursuant to Executive Order 12291. While participation by executive agencies in the Agenda is mandatory, independent agencies, such as the Commission, participate in the Unified Agenda on a voluntary basis.

The Commission's October 1993 regulatory flexibility agenda is set forth below.

Issued in Washington, DC, on August 20, 1993, by the Commission.

Lynn K. Gilbert,
Deputy Secretary of the Commission.

¹ The Commission has published its definition of small entity to be used by the Commission in connection with rulemaking proceedings. 47 FR 18618 (April 30, 1982). Pursuant to those definitions, the Commission is not required to list many of the agenda items contained in this regulatory flexibility agenda. See 5 U.S.C. 602(a)(1). Moreover, the Commission has previously certified, pursuant to section 605 of the RFA, 5 U.S.C. 605, that certain items contained in this agenda will not

have a significant economic impact on a substantial number of small entities. Accordingly, listing of a rule in this regulatory flexibility agenda should not in any event be taken as a determination that a rule, when proposed or promulgated, will in fact require a regulatory flexibility analysis. However, the Commission hopes that the publication of an agenda, which includes significant rules, regardless of their potential impact on small entities, may serve the public generally by providing an early and

meaningful opportunity to participate in and comment on the formulation of new or revised regulations.

² In addition to publishing the regulatory flexibility agenda, the Commission also makes available to the public, on a monthly basis, a calendar and, on a weekly basis, an advisory, which lists rules that the Commission is considering or will consider in the near future.

CFR Citation: 17 CFR 4.12; 17 CFR 4.21; 17 CFR 4.31; 17 CFR 4.10

Legal Deadline: None

Abstract: The Commission will review its requirements concerning disclosure materials to be provided customers of commodity pool operators with a view toward simplifying the disclosure process, reducing any unnecessary disclosure burdens, and harmonizing the Commission's disclosure requirements with those of other domestic and international regulators. In particular, the Commission is considering whether a bifurcated disclosure format should be permissible. This would consist of a brief, basic disclosure document provided by the pool operator, with more extensive disclosure materials available upon request.

Abstract: The regulation will implement the provisions of section 217 of the Futures Trading Practices Act of 1992 which require contract markets to adopt rules to avoid conflicts of interest in deliberations and voting by members of the governing board and disciplinary and other oversight committees. The rulemaking will define the relationships between a named party in interest and a member of the governing board or committee which would require abstention from deliberations and voting. The rulemaking also will provide guidelines on situations which would require a member to abstain from voting on a significant action because of a substantial financial interest in the outcome of the vote based on positions held personally or at an affiliated firm, as well as other matters addressed by the statute. The action will potentially impact the selection and composition of contract market governing boards and committees.

Abstract: The Commodity Futures Trading Commission seeks comments on its proposal to amend and correct rules relating to proceedings last revised substantively on February 22, 1984. The proposed modifications update and streamline Commission procedures in light of the Commission's experience in the past nine years. In addition, the Commission seeks comment on whether the voluntary decisional procedure should be retained in the reparation program.

4451. PROHIBITION AGAINST INSIDER TRADING

Significance: Agency Priority

Legal Authority: 7 USC 12a(5); 7 USC 13(f)

CFR Citation: 17 CFR 1.59

Legal Deadline: Final, Statutory,
October 26, 1993.

360 days after enactment of the Futures
Trading Act of 1992.

Abstract: The proposed regulation is intended to fulfill the mandate of Section 214 of the Futures Trading Practices Act of 1992 which makes it a felony for any employee or governing board member of a self-regulatory organization, willfully and knowingly (a) to trade for his own account, in violation of a Commission regulation, or on behalf of another account, in contracts for future delivery or options thereon on the basis of any material non-public information obtained through special access related to the performance of such person's official duties as a member or employee, or (b) to disclose for any purpose inconsistent with the performance of his official duties, any material non-public information obtained through special access related to the performance of such duties. Section 214 also would prohibit any person from willfully and knowingly trading for his own account, or on behalf of any account, in

contracts for future delivery or options thereon, on the basis of material non-public information obtained from a self-regulatory organization employee or governing member. The proposed regulation is a necessary component of the statutory scheme to prosecute insider trading.

Semiannual Regulatory Agenda

CONSUMER PRODUCT SAFETY COMMISSION (CPSC)**CONSUMER PRODUCT SAFETY COMMISSION****16 CFR Ch. II****Regulatory Flexibility Act; Semiannual Regulatory Flexibility and Unified Agendas**

AGENCY: Consumer Product Safety Commission.

ACTION: Publication of regulatory flexibility and unified agendas.

SUMMARY: The Regulatory Flexibility Act (RFA) requires each Federal agency to publish, twice each year, a regulatory flexibility agenda listing the rules expected to be proposed or promulgated which are likely to have a significant economic impact on a substantial number of small entities, including small businesses, small organizations, and small governmental units. In this document, the Commission publishes its semiannual regulatory flexibility agenda.

Additionally, although not required to do so, the Commission has elected to comply voluntarily with those provisions of Executive Order 12291 which require executive agencies to publish an agenda of regulatory actions expected to be under development or review by the agency during the succeeding 12 months and which further provide that such an agenda may be combined with an agency's regulatory flexibility agenda published in accordance with the RFA.

DATES: The Commission welcomes comments on each subject area of the agenda, particularly from small entities. Written comments concerning the agenda should be received in the Office of the Secretary by December 31, 1993.

ADDRESSES: Comments on the regulatory flexibility agenda should be sent to the Office of the Secretary, Consumer Product Safety Commission, Washington, DC 20207, telephone (301) 504-0800, and should be titled "Regulatory Flexibility Agenda."

FOR FURTHER INFORMATION CONTACT: For further information on the agenda in general, contact: Allen F. Brauning, Office of the General Counsel, Consumer Product Safety Commission, Washington, DC 20207; telephone (301) 504-0980. For further information regarding a particular item on the agenda, consult the individual listed in the column headed "Contact" for that particular item.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act (RFA) (5 U.S.C. 601-612) contains several provisions intended to reduce unnecessary and disproportionate regulatory requirements on small businesses, small governmental organizations, and other small entities. Section 602 of the RFA (5 U.S.C. 602) requires each agency to publish, twice each year, a regulatory flexibility agenda containing a brief description of the subject area of any rule expected to be proposed or promulgated which is likely to have a "significant economic impact" on a "substantial number" of small entities. The agency must also provide a summary of the nature of the rule and a schedule for acting on each rule for which the agency has issued a notice of proposed rulemaking. The regulatory flexibility agenda shall also contain the name and address of the agency official knowledgeable about the items listed. Further, agencies are required to provide notice of their agendas to small entities and to solicit

their comments by direct notification or by inclusion in publications likely to be obtained by such entities.

Additionally, Executive Order 12291 requires executive agencies to publish, twice each year, a regulatory agenda of proposed regulations under development or current regulations under review and further states that such an agenda may be combined with the agenda published in accordance with the RFA. While the Commission, as an independent regulatory agency, is not required to follow Executive Order 12291, the Commission is complying voluntarily with those provisions concerning publication of a regulatory agenda.

The regulatory flexibility agenda published below lists, for a 12-month period, the regulatory activities expected to be under development or review. These include all such activities, not only those which may have a significant economic impact on a substantial number of small entities.

The agenda contains a brief description and summary of each regulatory activity, including the objectives and legal basis for each; an approximate schedule of target dates, subject to revision, for the development or completion of each activity; and the name and telephone number of a knowledgeable agency official concerning particular items on the agenda. All agency contacts have the same address: Consumer Product Safety Commission, Washington, DC 20207.

Dated: August 26, 1993.

Sadye E. Dunn,
Secretary, Consumer Product Safety Commission.

4465. AMENDMENT OF FLAMMABILITY STANDARDS FOR CHILDREN'S SLEEPWEAR

Legal Authority: 15 USC 1193 Flammable Fabrics Act; 15 USC 2079(b) Consumer Product Safety Act

CFR Citation: 16 CFR 1615; 16 CFR 1616

Legal Deadline: None

Abstract: On January 13, 1993, the Commission published an advance notice of proposed rulemaking to begin a proceeding which could result in amendments of the flammability standards for children's sleepwear garments in sizes 0 through 14, and to fabrics intended for use in such garments. The standards were issued to eliminate or reduce unreasonable risks of deaths and burn injuries to children associated with ignition of sleepwear garments. The regulatory alternatives

under consideration include amendment of the standards to exclude tight-fitting sleepwear garments and sleepwear garments in infant sizes from the requirements of the standards.

Abstract: A petition from the National Association of State Fire Marshals requests the Commission to issue a flammability standard for upholstered furniture under provisions of the Flammable Fabrics Act. The petition asserts that such a standard is needed to address risks of death and injury from fires associated with cigarette ignition of upholstered furniture. The petition describes the substance of the requested standard as the requirements of Technical Bulletins 117 and 133 issued by the Bureau of Home Furnishings and Thermal Insulation of the State of California. In August 1993, the Commission published a notice in the Federal Register inviting comments on the petition from interested parties.

CFR Citation: 16 CFR 1700.14

Legal Deadline: None

Abstract: On August 4, 1992, the Commission proposed rules to require child-resistant packaging for certain prescription and non-prescription topical preparations containing lidocaine or dibucaine. Lidocaine and dibucaine are used in drug products that are applied to the skin or mucous membranes to provide an anesthetic effect. On December 4, 1992, the Commission extended the comment period on the proposed rules until February 16, 1993. In December, 1993, the staff expects to transmit a briefing package to the Commission for consideration by the Commissioners of the agency when deciding whether to issue final rules.

Abstract: In the Federal Register of October 19, 1990, the Commission published an advance notice of proposed rulemaking to begin a proceeding which may result in the issuance of rules banning certain crib toys associated with risks of strangulation deaths and injuries. Crib toys are toys which are intended to be attached to or near a crib or playpen for use by children younger than two years of age. The Commission is aware of about two deaths a year associated with crib toys. On September 21, 1993, the staff transmitted a briefing package to the Commission concerning the issue of whether to publish a notice of proposed rulemaking. A decision by the Commission is expected in October 1993.

4472. PROPOSED AMENDMENT OF LABELING REQUIREMENTS FOR CHARCOAL

Legal Authority: 5 USC 553(e) Administrative Procedure Act; 15 USC 1262(b) Federal Hazardous Substances Act

CFR Citation: 16 CFR 1500

Legal Deadline: None

Abstract: On December 22, 1992, the Commission granted a part of a petition from Barbara Mauk requesting amendment of the regulations which require labeling of containers of charcoal intended for household use. The portion of the petition granted by the Commission requests amendment of the rule codified at 16 CFR 1500.14(b)(6) to include warnings that burning charcoal produces carbon monoxide and that carbon monoxide has no odor. The Commission directed the staff to draft a notice of proposed rulemaking for publication in the Federal Register.

Abstract: On January 19, 1983, the Commission published an advance notice of proposed rulemaking (ANPRM) soliciting comments on ways to amend the existing requirements for child-resistant packaging to improve

the effectiveness and efficiency of these requirements. On October 5, 1990, the Commission proposed specific revisions of the child test protocol and the adult test protocol. On March 5, 1991, the Commission published a notice in the Federal Register to extend the period for receipt of written

comments on the proposed amendments of the test protocols until July 1, 1991. This notice also solicited comments on additional changes to the adult test protocol. Additional testing is being conducted to address issues raised by comments on the proposed amendments. In October 1993, the staff expects to transmit a briefing package to the Commission concerning publication in the Federal Register of the test results and the revised test protocols.

CFR Citation: 16 CFR 1500.12(a)(2)

Legal Deadline: None

Abstract: On August 20, 1986, the Commission proposed a rule to declare that household products containing methylene chloride are hazardous substances under the Federal Hazardous Substances Act (FHSA). These products include some paint strippers and spray paints. The Commission's concern arises from animal tests showing that methylene chloride is a carcinogen by inhalation

and studies indicating a significant human exposure as a result of reasonably foreseeable use of products containing methylene chloride. The initiation of this rulemaking proceeding granted one part of a petition (HP 85-1) from the Consumer Federation of America. The staff provided an analysis of the comments on the proposed rule to the Commission in June 1987. In August 1987, the Commission determined that there was no uncertainty as to the application of the FHSA to this substance that needed to be resolved by rulemaking. Therefore, the Commission suspended the rulemaking and issued a statement of enforcement policy stating the Commission's view that household products that contain methylene chloride and that expose consumers to significant levels (cont)

On April 7, 1993, the staff briefed the Commission on options for further Commission action with regard to household products containing methylene chloride. On April 26, 1993, the Commission directed the staff to continue work to evaluate the safety of substitute chemicals used in paint strippers and efforts to improve current warning labels. When the evaluation is completed, the staff will report to the Commission.

Legal Deadline: None

Abstract: On June 26, 1993, the Commission proposed amendments of regulations codified at 16 CFR 1500.18(a)(7) and 1500.86(a)(5) which ban certain toys called "clacker balls." The purpose of the proposed amendments is to allow the marketing of products which are now banned by the regulations but which do not present an unreasonable risk of injury. The proposed amendment of section 1500.18(a)(7) excludes from the coverage of the banning rule products with suspending members which consist of plastic rods integrally molded to the balls and mounted on a pivot. The proposed amendment of section 1500.86(a)(5) exempts clacker balls with specified ball weight cord length and safety factors. In December 1993, the staff is scheduled to transmit a briefing package to the Commission concerning issuance of final amendments.

Semiannual Regulatory Agenda

FARM CREDIT ADMINISTRATION (FCA)

FARM CREDIT ADMINISTRATION

12 CFR Ch. VI

Unified Agenda of Regulations

AGENCY: Farm Credit Administration.

ACTION: Departmental unified agenda of regulations and review list.

SUMMARY: The Farm Credit Administration (FCA), as an independent regulatory agency in voluntary compliance with Executive Order 12291, sets forth the following agenda of regulations which it will have under development and review during the period of October 1993 through April 1994.

FOR FURTHER INFORMATION CONTACT: Cindy R. Nicholson, Paralegal Specialist, Regulation Development Division, Office of Examination, Farm Credit Administration, 1501 Farm Credit Drive, McLean, VA 22102-5090, (703) 883-4498, TDD (703) 883-4444.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) contains several provisions intended to reduce unnecessary and disproportionate regulatory requirements on small entities. The FCA is an independent regulatory agency that is exempt from the provisions of Executive Order 12291. Additionally, FCA regulations which apply to Farm Credit banks and associations and

certain other federally chartered entities generally do not and will not have a substantial impact on "small entities" as that term is defined in the Regulatory Flexibility Act.

While FCA is an independent agency exempt from Executive Order 12291, we believe that participating in this joint publication will further the public interest by including FCA in a single source of information concerning current and projected rulemaking and reviews of existing regulations.

Dated: August 19, 1993.

Curtis M. Anderson,
Secretary, Farm Credit Administration Board.

Abstract: Would respond to the findings by Congress (in section 514 of the Farm Credit Banks and Associations Safety and Soundness Act of 1992) that financial disclosure and reporting of potential conflicts of interest would enhance the safety and soundness of Farm Credit System institutions. Corporation officers and directors must already comply with certain filing and reporting requirements of the Securities Exchange Commission (SEC). The Farm Credit Administration Board determined in a review of its conflict of interest regulations that corporation filings under SEC rules are sufficient

AGENCY: Federal Communications Commission.

ACTION: Publication of the Unified Agenda of Federal Regulations.

SUMMARY: Twice a year, the Commission publishes a list in the Unified Agenda of those major items and other significant proceedings under development or review that pertain to the Regulatory Flexibility Act. The Agenda also provides the CFR citations and legal authorities which govern these proceedings. The Regulatory Flexibility Act (94 Stat. 1167; 5 U.S.C. 605) includes notations on the applicability of the Regulatory Flexibility Act to each item. The Unified Agenda will be published in the Federal Register in April and October of each year.

ADDRESSES: Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

SUPPLEMENTARY INFORMATION:

Unified Agenda of Major and Other Significant Proceedings

The Commission encourages public participation in the FCC rulemaking process. To help keep the public informed of significant rulemaking proceedings, the Commission has prepared an agenda of important proceedings now in progress. OMB will publish the Unified Agenda in the Federal Register in April and October of each year.

The following terms may be helpful in understanding the status of the proceedings included in this report:

Docket Number - assigned to a proceeding if the Commission has issued either a Notice of Proposed Rulemaking or a Notice of Inquiry in regard to the matter under consideration. Since January 1, 1978, the Commission has used docket numbers, which consist of the last two digits of the calendar year in which the docket was established, plus a sequential number, which begins at 1 with the first docket initiated during a calendar year (e.g., Docket 80-1 or Docket 83-1). The abbreviation for the responsible Bureau usually precedes the docket number, as in "MM Docket 79-164," which indicates that the responsible Bureau is the Mass Media Bureau. When a docket number consists of only five digits (e.g., Docket 29622), this indicates that the docket was established before January 1, 1978.

Notice of Inquiry (NOI) - issued by the Commission when it is seeking

information on a broad subject or trying to generate ideas on a given topic. A comment period is specified during which all interested parties may submit comments.

Further Notice of Inquiry (FNOI)

Notice of Proposed Rulemaking (NPRM) - issued by the Commission when it is proposing a specific change to the FCC Rules and Regulations. Before any changes are actually made, interested parties may submit written comments on the proposals.

Further Notice of Proposed Rulemaking (FNPRM)

Memorandum Opinion and Order (MO&O) - issued by the Commission to deny a petition for rulemaking, conclude an inquiry, modify a decision, or deny a petition for reconsideration of a decision.

Rulemaking (RM) Number - assigned to a proceeding after the appropriate Bureau/Office has reviewed a petition for rulemaking but before the Commission has taken action on the petition.

Report and Order (R&O) - issued by the Commission to state a new or amended rule or state that the FCC Rules will not be changed.

William F. Caton,
Acting Secretary,
Federal Communications Commission.

Proposed Rule Stage

4512. SATELLITE COMMUNICATIONS

Significance: Agency Priority

Legal Authority: 47 USC 303; 47 USC 553

CFR Citation: 47 CFR 25

Legal Deadline: None

Abstract: The Commission seeks to develop a record and to solicit comments on the proposed rules. These proposed rules are designed to implement recommendations made by the joint industry/government Advisory Committee on 2 degree satellite spacing; and they will codify basic applications requirements for satellite services. The proposed rules would apply to all entities including small entities who seek authorization under Part 25 of the Commission's rules to construct and operate Fixed-Satellite communications facilities. The proposed rules would establish operational and technical procedures designed to alleviate adjacent satellite interference and may increase the reporting and cost burdens on all satellite licensees. The rules codifying basic applications requirements are codifications of existing policies, will impose no additional burdens, and may, in fact, reduce the burden by eliminating several current requirements. In order to be effective, these rules must apply to all licensees and thus there is no significant alternative.

Abstract: In this stage of the proceeding, the Commission issued a Second Report and Order that modifies FCC rules and regulatory policy to enable local telephone companies to participate in the video marketplace through video dial tone. The FCC decided that local telephone companies

may make available to multiple service providers, on a non-discriminatory common carrier basis, a basic platform that will deliver video programming and other services to end users. Such a policy will advance the FCC's goals of creating an advanced infrastructure, increasing competition in the video marketplace and enhancing the diversity of video services to the American public. The FCC also issued a Recommendation to Congress recommending that the statutory telephone company-cable television cross-ownership restriction be repealed. Further, the Commission solicited comments in a Second Further Notice of Proposed Rulemaking on the issue of whether the rural exemption to the telephone company-cable television cross-ownership restrictions should be raised to 10,000 persons. As of 7/25/93, seven Section 214 applications have been filed proposing to offer video dial tone service.

Abstract: The Commission seeks to adopt rules governing the establishment of a voice and data mobile satellite service (MSS) in the 1610 - 1626.5 / 2483.5 - 2500 MHz frequency bands. Six system applications are pending. In a negotiated rulemaking conducted in early 1993, the parties could not reach a consensus regarding technical rules that would permit all six applicants to be accommodated. In this proceeding, the Commission will adopt licensing policies and procedures, and other qualification requirements. The action will permit a variety of voice and data mobile satellite services to be made available to the public.

Abstract: The Commission will consider revising the rate of return represcription and enforcement procedures and methodologies set forth in Part 65 of its Rules, 47 CFR 65. During the rulemaking, the Commission will address alternatives for streamlining the represcription and enforcement processes. The Commission will also address the

potential costs and benefits of reducing the information that reregulatees must submit as well as the extent to which less burdensome procedures can be reconciled with statutory requirements. Quantitative estimates are not possible at this time. The Commission will also consider amending Part 69 of the Rules to permit the National Exchange Carrier Association, Inc. to collect and file with the Commission information needed for the represcription process.

Significance: Agency Priority**Legal Authority:** 47 USC 154; 47 USC 721; 47 USC 303(r)**CFR Citation:** 47 CFR 25**Legal Deadline:** None

Abstract: The Commission has proposed eliminating the licensing requirement for most international receive-only earth stations in the Fixed Satellite Service. Earth Stations excluded from this proposal are those operating as satellite terminal stations (i.e., those operationally connected to a domestic common carrier and used to exchange the carrier's common carrier traffic with the Intelsat Satellite System). The Commission proposed instituting a voluntary registration program for international receive-only earth stations seeking interference protection.

Semiannual Regulatory Agenda

FEDERAL DEPOSIT INSURANCE CORPORATION (FDIC)

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Ch. III

Semiannual Agenda of Regulations

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Publication of semiannual agenda of regulations.

SUMMARY: The Federal Deposit Insurance Corporation (FDIC) is hereby publishing items for the October 1993 regulatory agenda. The agenda contains information about FDIC's current and projected rulemakings, existing regulations under review, and completed rulemakings.

FOR FURTHER INFORMATION CONTACT: Persons identified under regulations listed in the agenda. Unless otherwise noted, the address for all FDIC staff

identified in the agenda is Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.

SUPPLEMENTARY INFORMATION: Twice each year, the FDIC publishes an agenda of regulations to inform the public of its regulatory actions and to enhance public participation in the rulemaking process. Publication of the agenda is in accordance with both the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) and the FDIC statement of policy entitled "Development and Review of FDIC Rules and Regulations" (44 FR 31007, May 30, 1979; 44 FR 32353, June 6, 1979; 44 FR 76858, December 28, 1979; 49 FR 7288, February 28, 1984).

The FDIC amends its regulations under the general rulemaking authority prescribed in section 9 of the Federal Deposit Insurance Act (12 U.S.C. 1819) and under specific authority granted by the Act and other statutes.

The Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA) and the Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA) contain reforms that significantly restructure Federal deposit insurance and the regulation of financial institutions. As a consequence, many of the regulations included in this agenda are in response to FIRREA and FDICIA.

Interested persons may petition the FDIC for the issuance, amendment, or repeal of any regulation by submitting a written petition to the Executive Secretary, Federal Deposit Insurance Corporation, Washington, DC 20429. Petitioners should include complete and concise statements of their interest in the subject matter and reasons why the petitions should be granted.

Federal Deposit Insurance Corporation.
Hoyle L. Robinson,
Executive Secretary.

4569. SUPPLEMENTAL REQUIREMENTS FOR STANDARDS OF CONDUCT

Legal Authority: 5 USC app Ethics in Government Act of 1978; 12 USC 1819; 26 USC 1043; EO 12674; EO 12731

CFR Citation: 5 CFR 2635; 5 CFR 3201; 12 CFR 336

Legal Deadline: None

Abstract: A rule published by the Office of Government Ethics ("OGE") at 5 CFR 2635 replaced all agency ethics rules, including the FDIC's. OGE's rule permits supplemental rules on certain conflicts of interest unique to each agency. The FDIC plans to publish such supplemental regulations at 5 CFR 3201 relating to extensions of credit, restrictions on holding the securities of federally insured depository institutions, restrictions on the purchase of the property of failed federally insured depository institutions, restrictions on the purchase of property from federally insured depository institutions, interest in FDIC decisions, and related matters.

This supplemental rule incorporates provisions from the FDIC Employee Responsibilities and Conduct regulation (12 CFR 336). Subpart C of 12 CFR 336 will remain in effect until February 4, 1994, or until this rule is published in final form, whichever occurs first.

4571. STANDARDS FOR SAFETY AND SOUNDNESS

Legal Authority: PL 102-242, sec 132

CFR Citation: 12 CFR 303; 12 CFR 308; 12 CFR 364

Legal Deadline: Final, Statutory, August 1, 1993. Final regulations must be promulgated by 08/01/93, with an effective date no later than 12/01/93.

Abstract: Section 132 of FDICIA requires federal financial institutions regulators, including the FDIC, to prescribe by regulation certain safety and soundness standards for insured depository institutions and depository institution holding companies. Standards must be prescribed in three principal areas: (1) operational and managerial; (2) asset quality and earnings; and (3) employee compensation. Under this proposal, an insured depository institution or depository institution holding company that fails to meet any of the prescribed standards, will be required to submit and implement an acceptable plan to achieve compliance. Failure to submit or implement such a plan within the time allowed will result in an order to correct the deficiency.

FEDERAL DEPOSIT INSURANCE CORPORATION (FDIC)

Final Rule Stage

4577. POWERS INCONSISTENT WITH PURPOSES OF FEDERAL DEPOSIT INSURANCE LAW

Legal Authority: PL 102-242, Sec 303

CFR Citation: 12 CFR 332

Legal Deadline: None

Abstract: The FDIC is eliminating part 332 of its regulations (12 CFR 332) which, subject to certain exceptions, prohibits an insured state nonmember bank from doing a surety business; insuring the fidelity of others; engaging in the insuring, guaranteeing or certifying of titles to real estate; and guaranteeing the obligations of others. This action is taken because section 303 of FDICIA effectively covers the same area. That section limits the "as principal" activities of insured state banks to the activities permissible for national banks unless a state bank obtains the FDIC's consent.

Legal Authority: 12 USC 1816; 12 USC 1818; 12 USC 1819; 12 USC 1831

CFR Citation: 12 CFR 332; 12 CFR 333.3; 12 CFR 362

Legal Deadline: Final, Statutory, December 19, 1992.

Abstract: This rulemaking sets forth restrictions and prohibitions on the activities and investments of insured state banks. It is intended to insure that activities and investments of insured state banks do not present a risk to either of the deposit insurance funds, are safe and sound, and are consistent with the purposes of deposit insurance coverage.

The restrictions and prohibitions are codified at 12 CFR 362. Related adjustments to the FDIC's rules and

regulations include eliminating section 333.3, in order to place banks that are members of the Savings Association Insurance Fund under the same restrictions as banks that are members of the Bank Insurance Fund; and eliminating part 332, which also prohibits insured state nonmember banks from certain activities. These related adjustments are shown as separate agenda items.

CFR Citation: 12 CFR 303

Legal Deadline: None

Abstract: This rulemaking amends the requirements for publishing notice of the filing of an application for a merger transaction under the Bank Merger Act. This rule brings the FDIC's regulations more into conformance with those of the other federal financial institutions regulators, and lessens the paperwork and cost burdens imposed by the FDIC's notice requirements.

Legal Authority: 12 USC 1816; 12 USC 1818; 12 USC 1819

CFR Citation: 12 CFR 333

Legal Deadline: None

Abstract: This rulemaking eliminates section 333.3 of the FDIC's regulations, which makes certain prohibitions that are applicable to state chartered savings associations applicable to state banks that are members of the Savings Association Insurance Fund (SAIF). SAIF member banks will hereafter be subject to the restrictions in 12 CFR 362 in lieu of the restrictions that are eliminated with section 333.3. This rulemaking subjects SAIF member state banks and state banks that are members of the Bank Insurance Fund (BIF) to the same restrictions.

Legal Authority: 12 USC 1823

CFR Citation: 12 CFR 357

Legal Deadline: None

Abstract: This rulemaking designates ten states as "economically depressed regions," as defined in section 13(k)(5)(C) of the Federal Deposit Insurance Act. The ten states are California, Connecticut, the District of Columbia, Maine, Massachusetts, New Hampshire, New Jersey, New York, Rhode Island, and Vermont. The eight states previously designated as "economically depressed" should no longer receive that designation. The FDIC is required by 12 USC 1823 to consider proposals for direct financial assistance by SAIF member institutions having offices located in an "economically depressed region," and meeting certain other specified criteria, before grounds exist for the appointment of a conservator or a receiver for such institutions.

Abstract: This rulemaking conforms the terms "serious risk" and "equity security" in 12 CFR 303 to the definitions of those terms in 12 CFR 362. The changes allow insured state savings associations to conduct activities and make investments without the FDIC's prior approval, provided that the activities and/or investments were permissible under an order or a written interpretation issued by the Office of Thrift Supervision. These changes place insured state savings associations on a par with insured state banks under FDIC's regulations.

the Tier 1 capital calculation for risk-based and leverage capital purposes. This amendment was developed on a consistent basis by the FDIC, the Board of Governors of the Federal Reserve System, the Office of the Comptroller of the Currency, and the Office of Thrift Supervision in response to the issuance by the Financial Accounting Standards Board ("FASB") of Statement 109, "Accounting for Income Taxes." This FASB accounting standard must be adopted by insured state nonmember banks for regulatory reporting and financial reporting purposes no later than the first quarter of 1993, or the beginning of the first fiscal year thereafter, if later.

Abstract: Section 228 of FDICIA requires insured depository institutions to give advance notice of any proposed branch closing to their Federal regulator and the customers of that branch. It is unclear from FDICIA and its legislative history exactly what Congress meant by "branch closings" and exactly how an institution should identify the "customers of a branch." This policy interprets the language of the section to clarify when and how the branch closing notice requirements will apply, and to set forth the procedure that FDIC-insured institutions should follow to comply with the branch closing notice requirements when they do apply.

Abstract: The Office of the Comptroller of the Currency, the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, the Office of Thrift Supervision, and the National Credit Union Administration, have jointly designed a uniform criminal referral form. The form facilitates compliance with financial institutions' criminal activity reporting requirements and enhances law enforcement agencies' ability to investigate and prosecute matters reported on the form. This form

replaces referral forms previously used by Federal regulatory agencies and by financial institutions. The purpose of this rule is to create a standardized reporting requirement and a single uniform reporting mechanism.

Completed Actions

There is no legal deadline for publishing a final rule. However, FDICIA requires that the rule apply to the fiscal years of insured institutions beginning after December 31, 1992.

Abstract: Each insured institution with \$500 million or more in total assets must have an annual audit of its financial statements by an independent public accountant and an audit committee of outside directors. There are more stringent criteria for audit committees of institutions with \$3 billion or more in total assets.

Management of institutions must report on and assess its responsibilities for internal controls and compliance with designated laws and regulations. Independent accountants must attest to and report on the assertions in management's reports concerning internal controls, and separately on management's assertions concerning compliance with designated laws and regulations.

Significance: Agency Priority

Legal Authority: 5 USC 551 to 557; 15 USC 717 to 717w; 15 USC 3301 to 3432; 16 USC 791a to 828c; 16 USC 2601 to 2645; 42 USC 7101 to 7352; 49 USC 1 to 27

CFR Citation: 18 CFR 38; 18 CFR 382

Legal Deadline: None

Abstract: The Commission proposed to streamline regulation of a class of nontraditional utility suppliers, called independent power producers (IPPs). The proposed regulations would: (1) authorize rates for IPPs to be determined through competitive bidding or rate negotiation subject to a price cap, thereby freeing IPPs from cost-based ratemaking while ensuring that rates fall within a zone of reasonableness; (2) authorize IPPs to

file rate schedules without having to provide extensive cost support; (3) exempt IPPs from cost-related accounting, reporting and recordkeeping requirements; (4) streamline the corporate and financial regulation of IPPs; (5) provide blanket prior authorizations to engage in certain corporate activities; and (6) adopt certification procedures to qualify as an IPP. Abstract: The Federal Energy Regulatory Commission issued a Notice of Proposed Rulemaking seeking comments on revisions of the Commission's regulations governing public utilities and qualifying facilities. The proposed rule would clarify Commission policies regarding: rate filings by public utilities under the Federal Power Act; assumption of liabilities and issuances of securities by public utilities; purchases from and sales to qualifying facilities by public utilities; and procedural and technical rules governing qualifying facilities.

The Commission is seeking to streamline the processing of its workload and to rationalize or reduce regulatory burdens on the public utilities and qualifying facilities industries. For those reasons, it is proposing to delete or revise certain of its regulations. (Docket No. RM92-12-000.)

Significance: Agency Priority

Legal Authority: 12 USC 1422a; 12 USC 1422b; 12 USC 1430(i)

CFR Citation: 12 CFR 961

Legal Deadline: None

Abstract: Pursuant to section 721 of the Financial Institutions Reform, Recovery and Enforcement Act of 1989, Pub. L. 101-73, 103 Stat. 423, the Federal Home Loan Banks must establish a Community Investment Program ("Program") which will provide funds, through Bank advances (loans) to a Bank's member institutions at interest rates equal to interest rates on Federal Home Loan Bank consolidated bonds or notes having comparable maturity dates with the advances. These advances will be used by the member institutions to provide funding for community-oriented development projects or housing. These regulations will continue the commitment of the Federal Home Loan Banks to community development lending.

Abstract: The Finance Board has adopted a regulation which revises in its entirety the current regulation concerning membership in the Federal Home Loan Bank System (FHLBank System) in response to changes made to the Federal Home Loan Bank Act (Bank Act) by the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA). The regulation clarifies membership eligibility requirements and procedures for applicants for membership in the FHLBank System. In addition, it clarifies access to noncredit services provided by the FHLBanks. The regulation also includes several sections of the current regulation concerning the transfer of the Federal Home Loan Bank stock in consolidations and reorganizations of member institutions.

Semiannual Regulatory Agenda

FEDERAL MARITIME COMMISSION (FMC)**FEDERAL MARITIME COMMISSION****46 CFR Ch. IV****Unified Regulatory Agenda**

AGENCY: Federal Maritime Commission.

ACTION: Unified Agenda of Federal Regulations.

SUMMARY: Pursuant to section 5 of E.O. 12291 and the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Commission anticipates having under consideration, during the period from October 1, 1993, to September 30, 1994, actions in the areas listed below.

FOR FURTHER INFORMATION CONTACT: For further information concerning

Commission rulemaking proceedings or the status of any matter listed below, contact: Joseph C. Polking, Secretary, 800 North Capitol Street NW., Washington, DC 20573, (202) 523-5725.

SUPPLEMENTARY INFORMATION: Section 602 of the Regulatory Flexibility Act (5 U.S.C. 602) requires the publication of an agenda of items for which regulatory agencies may propose or promulgate a rule which is likely to have a significant economic impact on a substantial number of small entities. Section 5 of Executive Order 12291 also requires executive agencies to publish a regulatory agenda; the Commission voluntarily complies with this section. The agendas include information on

regulatory activities being conducted or reviewed during the succeeding 12 months by the Commission.

The following is the Commission's unified regulatory agenda. The agenda does not necessarily include all petitions for rulemakings which are under staff review.

In addition, the Commission maintains a compilation of the status of pending rulemaking proceedings and a listing of rules that have become final since the publication of the most recent regulatory agenda. This will be made available to the public, including the press and interested persons.

Joseph C. Polking,
Secretary.

FEDERAL RESERVE SYSTEM (FRS)

FEDERAL RESERVE SYSTEM

12 CFR Ch. II

Semiannual Regulatory Flexibility Agenda

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Semiannual agenda.

SUMMARY: The Board is issuing this agenda under the Regulatory Flexibility Act and the Board's Statement of Policy Regarding Expanded Rulemaking Procedures. The Board anticipates having under consideration regulatory matters as indicated below during the period October 1, 1993, through April 1, 1994. The next semiannual agenda will be published in April 1994.

DATES: Comments about the form or content of the agenda may be submitted any time during the next 6 months.

ADDRESSES: Comments should be addressed to William W. Wiles, Secretary of the Board, Board of Governors of the Federal Reserve System, Washington, DC 20551.

FOR FURTHER INFORMATION CONTACT: A staff contact for each item is indicated with the regulatory description below.

SUPPLEMENTARY INFORMATION: The Board is publishing its October 1993 agenda as part of the October 1993 Unified Agenda of Federal Regulations, which is coordinated by the Office of Management and Budget under Executive Order 12291. Participation by the Board in the Unified Agenda is on a voluntary basis.

The Board's agenda is divided into three sections. The first, Proposed Rule Stage, reports on matters the Board may consider for public comment during the next 6 months. The second section, Final Rule Stage, reports on matters that have been proposed and are under Board consideration. A third section, Completed Actions, reports on regulatory matters the Board has completed or is not expected to consider further.

A dot (•) preceding an entry indicates a new matter that was not a part of the Board's previous agenda and which the Board has not completed.

Barbara R. Lowrey,
Associate Secretary of the Board.

Legal Authority: 12 USC 2804

CFR Citation: 12 CFR 203

Legal Deadline: None

Abstract: Regulation C implements the Home Mortgage Disclosure Act, which requires certain lenders to report information in connection with applications they receive for mortgage and other housing-related loans. One piece of data reported is the race or national origin of the applicant, according to certain categories specified in the regulation. The categories in Regulation C differ somewhat from those used by the U.S. Office of Management and Budget and other Federal entities. Lenders submit the data to the Federal banking regulators and, in the case of mortgage bankers,

the U.S. Department of Housing and Urban Development. During the next six months the Board may consider whether to issue for public comment amendments to Regulation C that conform the racial categories to the Federal standard.

The Board also may consider whether to propose technical revisions to the instructions that Regulation C provides to lenders for completing reporting form (HMDA-LAR), in order to facilitate the processing of the data by the Federal Financial Institutions Examination Council.

The revisions, if proposed and adopted, would be (cont)

Electronic Fund Transfer Act

CFR Citation: 12 CFR 205

Abstract: The Board is conducting a review of Regulation E, which implements the Electronic Fund Transfer Act, and establishes the basic rights, liabilities, and responsibilities of consumers who use electronic fund transfer services and of financial institutions that offer these services (whether or not these institutions hold the consumer's account). The review will consider whether any provisions of the regulation are in need of updating, and whether any substantive changes are necessary because of technological and other developments. The Board will also consider whether to make any legislative recommendations for statutory changes. The Board's consideration of whether to propose special rules to govern the electronic delivery of Government benefits is addressed in a separate entry on Regulation E.

Public comment will be requested on any regulatory proposals that may be developed following the review. It is not anticipated that the revisions would have a significant economic impact on a substantial number of small banks.

Abstract: During 1992, the Board's staff consulted with the other Federal banking agencies regarding the implementation of section 112, the bank auditing requirements, of the Federal Deposit Insurance Corporation Improvement Act of 1991. The section includes requirements for insured commercial banks to receive audits of their annual reports by independent public accountants, requirements for banks and their auditors to report certain information to the Board, and requirements for independent audit committees for banks. In some cases, these requirements can be satisfied by comparable arrangements at the bank holding company level. The Act generally exempts insured depository institutions from these requirements when their total assets are less than \$150 million, unless a higher threshold is chosen by the Federal Deposit Insurance Corporation (FDIC).

The FDIC has primary responsibility for implementing this mandate through regulations, and it issued a draft regulation for comment last year. The FDIC finalized its regulation in May 1993, which will apply to all FDIC-insured banks and thrifts.

Legal Deadline: Final, Statutory,
December 19, 1992.

Abstract: During 1992, the Board's staff consulted with the other Federal banking agencies regarding the implementation of section 121, the bank accounting requirements, of the Federal Deposit Insurance Corporation Improvement Act of 1991. These requirements include the implementation of disclosures of the fair market value of assets, liabilities, and certain projects, which may result in the revision of reporting requirements for banks and bank holding companies. The accounting provisions of the Act do not include exemptions for small institutions. Thus, any changes to regulations and reporting requirements would likely affect smaller State member banks.

The Federal Financial Institutions Examination Council has requested public comment on proposed reporting requirements, and the comment period expired on June 14, 1993. By the end of the year the Board is expected to consider requesting comment on certain changes to its regulations in order to implement section 121.

Abstract: Within the next two months, the Board will consider action to implement a portion of section 203(a) of the Foreign Bank Supervision Enhancement Act of 1991 that provides that the cost of examinations of branches, agencies, and representative offices of foreign banks in the United States shall be assessed against the foreign bank or its parent. Public comment will be sought on proposed methodology for assessing examination costs. Foreign banks with branches, agencies, or representative offices in the United States will be affected by the proposal.

The proposal is not expected to have a significant economic impact on a substantial number of small business entities.

Abstract: The Board is conducting a review of Regulation T, which regulates extensions of credit by and to brokers and dealers. The review will consider whether any provisions of the regulation are in need of updating and whether any substantive changes are necessary because of developments in the securities markets, including the development of new products and services and the expansion of global markets. In August 1992, the Board approved a general request for comments to aid in its review (57 FR 37109, August 18, 1992). Following evaluation of the public comments, the Board will again seek comment on any regulatory proposals that may be developed. It is not anticipated that the revisions would have a significant economic impact on the overall lending activities of a substantial number of small brokerage firms.

CFR Citation: 12 CFR 225

Legal Deadline: None

Abstract: Sections 233 and 234 of the Federal Deposit Insurance Corporation Improvement Act of 1991 require the Board and other regulatory agencies to become involved in an effort to get

banks to participate in certain types of lending activities in designated distressed communities. Banks that do the appropriate type of lending in the appropriate "distressed communities" will receive assessment credits for their FDIC insurance premiums. The law requires the Board to receive notice of the banks' intent to involve themselves in these activities, to assist the banks to define and locate the appropriate communities, and to define certain terms by regulation. To accomplish the mandates of the statute, it may be necessary to amend Regulation Y for purposes of receiving notice of the banks' and holding companies' intent to form the types of entities discussed in the law and to do the type of lending intended by the law. It may also be necessary to amend the regulation to provide the definitions of "nonprofit organization" and "small business" called for by the statute. It is not expected that any proposed regulation would have a significant economic impact on small institutions. (cont)

Legal Authority: 12 USC 1817; 12 USC 1834

CFR Citation: None

Legal Deadline: None

Abstract: Section 232 of the Federal Deposit Insurance Corporation Improvement Act of 1991 requires the Board with the FDIC to establish minimum requirements for "lifeline" transaction accounts. An insured depository institution that chooses to offer accounts that meet these requirements will be assessed deposit insurance premiums on those deposits at a rate of 1/2 the maximum assessment rate. The Act sets forth factors that the Board and the FDIC must consider in setting the account requirements, such as whether the amount of the fee, if any, that is charged for routine transactions does not exceed a minimal level.

It is expected that the Board will seek public comment within the next two months on a proposal to implement section 232. It is not anticipated that implementation of the law, due to its voluntary character, will have a significant impact on a substantial number of small institutions.

In August 1993, the Board approved issuing for public comment revisions to Regulation A to reflect these changes (58 FR 45851, August 31, 1993). The regulations will apply to

Abstract: Section 223 of the Federal Deposit Insurance Corporation Improvement Act of 1991 amended the Equal Credit Opportunity Act (ECOA) to require that upon written request a creditor must provide a credit applicant with a copy of the appraisal report used in connection with an application for a loan secured by a lien on residential real property. In addition, the enforcement provisions of the ECOA are amended to require the Federal financial supervisory agencies responsible for enforcing the ECOA to refer certain matters involving credit discrimination to the Department of Justice or the Department of Housing and Urban Development.

In December 1992, the Board issued for public comment proposed revisions to Regulation B that would implement the ECOA amendments (57 FR 57697, December 7, 1992). Abstract: Regulation E implements the Electronic Fund Transfer Act, which establishes the basic rights, liabilities, and responsibilities of consumers who use electronic fund transfer services and of the institutions (including traditional depository institutions and other entities, whether or not they hold the consumer's account) that offer these services. In February 1993, the Board issued for public comment a proposal that would apply Regulation E to electronic benefit transfer (EBT) programs established by Federal, State, and local agencies to automate the delivery of Government benefits to recipients (58 FR 8714, February 17, 1993). EBT programs involve such benefits as Aid to Families with Dependent Children, food stamps, and Supplemental Security Income. The proposal sets forth limited modifications in regard to period account statements, which would not be required if other conditions were met. (The Board's consideration of other revisions to the existing regulation, under its Regulatory Improvement Program, is discussed in RIN: 7100-AA77.) Abstract: In June 1993, the Board and other Federal financial regulatory agencies issued for public comment proposed amendments to their real estate appraisal regulations that would: (1) increase the threshold level at or below which appraisals are not required from \$100,000 to \$250,000; (2) expand and clarify other existing exemptions to the appraisal regulations; and (3) identify additional exemptions. In addition, the proposal would amend or delete existing requirements governing appraisal standards and appraiser independence (58 FR 31878, June 4, 1993).

Previously, in November and December 1990, the Board had issued for public comment proposed amendments to the appraisal regulation to lower the threshold to conform to the level at that time of the other agencies (55 FR 49057, November 26, 1990) and to adopt a final rule requiring compliance with the Uniform Standards of Professional Appraisal Practice (USPAP) (55 FR 53609, December 31, 1990; RIN 7100-AB27). Abstract: In April 1992, the Board issued for public comment proposed modifications to its risk-based capital guidelines (57 FR 14362, April 20, 1992). The first proposed modification will implement section 618(b) of the RTC Refunding Act of 1991 requiring the Federal banking agencies to lower the risk weight for multifamily housing loans from 100 percent to 50 percent. The second proposed modification will lower the risk weight for certain collateralized transactions from 20 percent to 0 percent in order to better reflect the risk of such transactions. The latter proposal would place U.S. banking organizations on a more equal footing with foreign banks subject to the Basle Accord with regard to capital

requirements for certain low-risk collateralized transactions.

It is not anticipated that the proposed revisions will have a significant impact on a substantial number of small institutions. A lower risk category for multifamily housing loans and certain collateralized transactions may help some small organizations with their capital ratios, but the impact will be small. Abstract: In August 1992, the Board approved several proposals to reduce burden that is associated with the process for seeking Board approval for a variety of transactions (57 FR 39641, September 1, 1992). In particular, the Board agreed to: (1) establish certain procedures to limit extension of the pre-acceptance period for applications;

(2) permit prospective applicants the opportunity to submit a pre-filing notice of intent to file an application; (3) eliminate the stock redemption notice requirement for bank holding companies that are and would remain well capitalized on a consolidated basis and in generally satisfactory condition following the redemption; (4) expand the authority of Reserve Banks to process all delegable applications without Board staff review; (5) modify the Board's delegation rules that pertain to competition and market concentration; (6) reduce redundant post-acceptance processing of Board action cases; and (7) increase monitoring of cases that require extended processing. In addition, the Board determined to invite comment on a proposal to establish a general consent procedure for investments in bank premises by State member banks. Section 24A of the Federal (cont)

Abstract: In February 1993, the Board issued for public comment a proposed limitation on deferred tax assets for risk-based and leverage capital purposes (58 FR 8007, February 11, 1993). This proposal is in response to the adoption, by the Financial Accounting Standards Board, of Statement No. 109 (FASB 109) which provides new accounting guidance on deferred tax assets. This proposal will affect the treatment of these assets for capital purposes for all State member banks and bank holding companies regardless of size. However, it is not expected that the proposal will have a significant economic impact on a substantial number of small banking organizations, as the vast majority of small banking organizations currently have very limited amounts of net deferred tax assets as a component of their capital structures. Following review of the public comments and comments received by the other Federal banking agencies on these proposals, the Board is expected to take further action by year-end.

Abstract: In January 1993, following review of the public comments, the Board issued a final rule implementing sections 202-204 and 206 of title II of the Federal Deposit Insurance Corporation Improvement Act of 1991 which, among other things, require prior approval of the Board for the establishment of branches, agencies, commercial lending companies, and representative offices by foreign banks in the United States (58 FR 6348, January 28, 1993). It is not expected that the final rule will have a significant economic impact on small institutions.

The Board also requested additional public comment on those portions of the final rule that deal with representative offices of foreign banks. Abstract: In May 1992, the Board amended Regulation O to implement provisions of the Federal Deposit Insurance Corporation Act to permit smaller banks (deposits under \$100 million) to increase their aggregate insider lending limit from 100 percent to 200 percent of unimpaired capital and unimpaired surplus, for the one year period ending May 18, 1993. In May 1993, the Board approved extending the provision for six months, through November 18, 1993, and requesting additional comments on making the provision permanent, modifying or permitting it to expire.

Following review of the public comments, the Board is expected to take further action by November 18, 1993. Although the rulemaking will apply to all banks with deposits under \$100 million, it should not have a significant economic impact on smaller banks.

Abstract: On August 18, 1993, the Board approved issuing for public comment a proposed joint regulation, promulgated by the Board and the Treasury Department pursuant to section 21(b) of the Federal Deposit Insurance Act, as amended by the Annunzio-Wylie Anti-Money Laundering Act of 1992 (58 FR 46024; August 31, 1993). The proposed regulation would establish recordkeeping requirements for wire transfers by all financial institutions including nonbank financial institutions, such as broker/dealers in securities, check-cashing businesses, money-transmitting businesses, and businesses that issue or redeem money orders or travelers' checks.

This proposal may have a significant economic impact on a substantial

Abstract: In February 1990, the Board approved issuing for public comment a proposed regulation, which implements section 914 of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989, requiring banks and bank holding companies to provide notice to the Federal Reserve System 30 days before adding any individual to the institution's board of directors or employing any individual as a senior executive officer under certain circumstances (55 FR 6787, February 27, 1990). Notice would be required if the institution is failing to meet minimum capital standards or is otherwise in a troubled condition, has undergone a change in control within the past two years, or has received a bank charter within the past two years. The regulation defines "senior executive officer," "troubled condition," and "change in control." The proposal is not expected to have a significant economic impact on a

Legal Authority: 12 USC 4301 et seq

CFR Citation: 12 CFR 230

Legal Deadline: None

Abstract: Sections 261 to 275 of the Federal Deposit Insurance Corporation Improvement Act of 1991 require depository institutions to provide a schedule of terms, rates, and fees for deposit accounts offered by the institution. The law also sets forth rules for advertisements for deposit accounts.

On July 14, 1993, the Board approved issuing for public comment proposed amendments to Regulation DD regarding the calculation of the annual percentage yield (APY) (Federal Register cite unavailable). The proposal would require institutions to use a new formula to calculate the APY for accounts where consumers receive interest payments (by check or transfer to another account) more frequently than interest is compounded. The formula would also be used if interest is not compounded but the consumer receives interest periodically during the term of the account. The amendments will apply to both large and small institutions. The economic impact on small institutions will depend upon the variety of deposit products offered, the extent of the disclosures, and the

options for compliance offered by the final rule. (cont)

Legal Authority: 12 USC 4402(1)(B); 12 USC 4402(9)

CFR Citation: 12 CFR 231

Legal Deadline: None

Abstract: Section 401 et seq of the Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA) contains provisions to validate netting contracts between and among financial institutions for the purpose of improving efficiency and reducing systemic risk in the banking system and financial markets. The FDICIA defines "financial institution" to include securities brokers or dealers, depository institutions, futures commission merchants, and any other institution as determined by the Board, such as broker-dealer affiliates that engage in netting.

In May 1993, the Board requested public comment on the expansion of the "financial institution" definition to include entities not covered by FDICIA (58 FR 29149, May 19, 1993). Small entities will be affected only to the extent that they engage in netting activities in the financial markets and would benefit by being considered financial institutions for purposes of the FDICIA netting provisions.

Following review of the public comments, the Board is expected to

take further action within the next three months.

Abstract: In October 1992, the Board requested comment on a proposal to change the opening time for the Fedwire funds transfer service from 8:30 a.m. Eastern Time (ET) to 6:30 a.m. ET (57 FR 47080, October 14, 1992). The earlier opening time would facilitate changes to the settlement practices of the futures and options markets that would reduce risk in those markets, and it would also permit a reduction in the risk associated with the settlement of foreign exchange transactions.

The Board also requested comment on whether the Fedwire securities transfer service should open concurrently with the funds service at 6:30 a.m. ET and on the costs and benefits of extended Fedwire hours for depository institutions, their customers, and the financial markets.

In July 1993, the Board announced a delay in final action on the proposal pending a staff study further analyzing the complex issues raised by commenters (58 FR 40430, July 28, 1993). The Board is expected to take further action by February 1994. Small entities should not be affected by this proposal, because they would be unlikely to choose to open their (cont)

Legal Authority: 12 USC 221 et seq

CFR Citation: None

Legal Deadline: None

Abstract: The Board's payments system risk policy requires depository institutions to establish a maximum limit, or net debit cap, on daylight overdrafts in their Federal Reserve accounts. Institutions that incur a significant amount of daylight overdrafts must use a self-assessment process to establish their caps. On August 4, 1993, the Board approved requesting public comment on revisions to the self-assessment procedures, as they are set out in the Board's "Guide to the Payments System Risk Policy," to reduce the burden of conducting a self-assessment and to expand the assessment to cover operating controls and contingency procedures (58 FR 44677, August 24, 1993). This proposal would not have a significant economic impact on small depository institutions because those institutions generally do not incur significant daylight overdrafts or perform self-assessment. Following review of the public comments, the Board is expected to take further action by year-end.

4694. PROPOSALS TO MODIFY THE PAYMENTS SYSTEM RISK REDUCTION PROGRAM (DOCKET NUMBER: R-0693)

Legal Authority: 12 USC 221 et seq

CFR Citation: None

Legal Deadline: None

Abstract: In May 1990, the Board requested comment on a proposed change to its policy on payments system risk to assess a penalty fee on the maximum daily daylight overdraft incurred by certain institutions without regular discount window access. The Board proposed that the penalty rate be the same as the current penalty rate for overnight overdrafts.

On August 11, 1993, following review of the public comments, the Board approved a structure under which Reserve Banks would assess a penalty fee for the average daily daylight overdrafts incurred by institutions without regular discount window access, specifically bankers' banks that do not maintain reserves, Edge and agreement corporations, and limited-purpose trust companies (58 FR 44672, August 24, 1993). The Board determined to seek further comment on the size of the daylight overdraft penalty rate. The Board proposes that the rate equal the overnight penalty rate plus the Federal funds rate, adjusted to take account of the Fedwire operating day.

It is not expected that this action will have a significant economic impact on a substantial number of small entities. (cont)

Legal Authority: PL 102-242

CFR Citation: 12 CFR 208; 12 CFR 225

Legal Deadline: Final, Statutory, June 19, 1993.

Abstract: Section 305 of the Federal Deposit Insurance Corporation Improvement Act of 1991 requires each Federal banking agency to revise its risk-based capital standards for the depository institutions it regulates in order to ensure that those standards take adequate account of interest rate risk (IRR), concentration of credit risk, and the risks of nontraditional activities. In August 1992, the Federal banking agencies issued jointly for public comment an advance notice of proposed rulemaking (ANPRM) for each of these risks. The IRR proposal described a supervisory risk measure, and would have required additional reporting by all commercial banks and imposed additional capital requirements on banks identified as having risk beyond a threshold level. For nontraditional and concentration risk, the ANPRM simply requested comments about how the Board might proceed.

On March 31, 1993, following a review of the comments and after staff discussions with the other agencies, the Board approved for comment a notice of proposed rulemaking for IRR. This proposal would allow institutions to use internal risk models to measure IRR (if the models are acceptable to examiners) and would

Also, in an effort to reduce the burden on small institutions, the proposal would exempt an estimated 8,000 institutions from any additional reporting. The proposals will be issued jointly for public comment, following review by the other banking agencies. Following the public comment period, final action on the proposals is expected by year-end.

CFR Citation: 12 CFR ch II

Legal Deadline: Final, Statutory, August 1, 1993.

Abstract: Section 132 of the Federal Deposit Insurance Corporation Improvement Act of 1991 directs each Federal banking agency to prescribe standards regarding operations, management, asset quality, earnings, stock valuation (to the extent feasible), and employee compensation. In July 1992, the Board requested public comment on an interagency advance notice of proposed rulemaking (57 FR 31336, July 15, 1992). After considering the public's comments, a notice of proposed rulemaking was developed that contains broad principle-based standards that leave the method for meeting such standards largely in the province of management. The proposed standards are specific enough to identify emerging safety and soundness problems and require submission of a compliance plan before those problems become serious; however, the standards do not specify each operational and managerial procedure an institution must have in place. The Board believes that well-managed institutions generally should not find it necessary to amend their operations in order to comply with the operational and managerial standards.

Abstract: In January 1993, an interagency task force of the Federal financial institutions regulatory

agencies designed a uniform interagency criminal referral form to facilitate compliance with financial institutions' criminal activity reporting requirements, to enhance law enforcement agencies' ability to investigate and prosecute the matters reported in the criminal referrals, and to develop and maintain a new interagency database. This uniform criminal referral form will replace the various criminal referral forms that are currently being used by financial institutions. The purpose of the rule, which was issued for public comment, is to create a uniform criminal referral reporting requirement for all domestic and foreign financial institutions operating in the United States. The

proposal would codify existing Board policy and procedures and would not impose any additional regulatory burden. On May 26, 1992, following review of the public comments, the Board adopted the proposal in substantially the form proposed (Federal Register cite unavailable).

Abstract: In December 1990, the Board, along with the other Federal financial institutions regulatory agencies, issued an interim common rule and request for public comment regarding those applicable provisions of the Uniform Standards of Professional Appraisal Practice (USPAP) that are required to be incorporated into each agency's real estate appraisal rules (55 FR 53609, December 31, 1990). The provisions were published as an interim rule because the agencies' existing appraisal regulations already require compliance with the USPAP, as mandated by title XI of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989.

The USPAP was undergoing revision when the agencies initially promulgated their appraisal regulations. This proposal will permit the agencies to consider and receive comment on the revisions to USPAP. It is not expected that the proposal will have a significant economic impact on a substantial number of small entities.

Abstract: In order to lower the risk weight for certain presold residential construction loans from 100 percent to 50 percent so as to more accurately reflect the risk of these assets, the Federal Financial Institutions Examination Council (FFIEC), in February 1992, issued for public comment a proposed change to the instructions to the Reports of Condition and Income (Call Report) to include these loans in the definition of loans secured by one-to-four family residences (57 FR 4027, February 3, 1992). This change would place these assets in the 50 percent risk category under the Board's risk-based capital guidelines. It also would serve to implement section 618(a) of the RTC Refunding Act of 1991, which requires the Federal banking agencies to lower the risk weight on certain presold residential construction loans to 50 percent.

Subsequently, the legal staffs of the other Federal banking agencies agreed to not amend the Call Report, but to implement the change of risk weight instead through a revision to their respective risk-based capital guidelines. Abstract: In the April 1993 Agenda, the Board stated that it would consider issuing for public comment proposed amendments to its appraisal standards provisions in Regulations H and Y that would permit appraisers to use the Departure Provision in the Uniform Standards of Professional Appraisal Practice (USPAP) and would eliminate those portions of the Board's appraisal standards that are similar to or

duplicative of the USPAP standards. Staff was developing this proposal as part of the Board's ongoing program to reduce regulatory burden on depository institutions, and the proposal is not expected to have a significant economic impact on small institutions.

In June 1993, the Board, along with the other Federal financial institutions regulatory agencies, proposed for public comment amendments to the agencies' regulations regarding appraisals of real estate including the above proposals (58 FR 31877, June 4, 1993; Docket Number: R-0803).

Abstract: In December 1992, the Board issued for public comment a proposal to exempt three categories of collateralized loans from the aggregate insider lending limit under Regulation O and section 22(h) of the Federal Reserve Act. The exemptions are based on minimal risk of loss to the lending institution. The Board requested comments on these and other similar categories that might be exempted. The purpose of the exemptions is to make the aggregate insider lending limit more consistent with the single borrower lending limit, which contains the proposed exemptions and additional exemptions as well. In April 1993, the Board, after reviewing public comments, adopted the three exemptions with modifications (58 FR 26507, May 4, 1993).

It is expected that the final rule will reduce the regulatory and recordkeeping burden on banks and increase the ability of banks to make loans and other extensions of credit that pose little or no risk to the bank.

Abstract: A provision of Regulation Y permits a State bank subsidiary of a bank holding company to engage through a nonbank subsidiary in any activity that is permissible under State law for the bank subsidiary itself, subject to the same limits as if the bank engages in the activity directly. (A similar rule applies to national bank subsidiaries regarding activities permissible for such banks under Federal law.) The Board received comments on this provision in connection with its general request for comments in May 1983 regarding the proposed revision of Regulation Y. Some of the commenters challenged the Board's authority to issue this provision, although it has been part of Regulation Y since 1971. In taking final action on the revision of Regulation Y, the Board deferred consideration of the comments on this provision and allowed the existing rule to remain in effect in the interim (49 FR 794, January 5, 1984).

Additional Information: ABSTRACT CONT: Garn-St Germain Act and certain recent court decisions (53 FR 48915, December 5, 1988). The Board also held an informal public hearing on this matter on April 7, 1989. The Board has not proposed revising its current rule regarding subsidiaries of national banks in a holding company. A determination to reverse the Board's State bank rule could have an adverse impact on small banks that are subsidiaries of holding companies because they might be required to restructure their nonbanking activities or to take other action.

The issue of the validity of the Board's State bank rule was recently raised in litigation involving the permissibility of insurance activities of a nonbank subsidiary of Citicorp's Delaware bank. In that case, the U.S. Court of Appeals for the Second Circuit found that the Bank Holding Company Act does not apply to nonbank companies owned by holding company banks. The U.S. Supreme Court subsequently declined to review an appeal on this matter.

The Board is not expected to take action on this matter during the next six months.

Semiannual Regulatory Agenda

AGENCY: Federal Trade Commission.

ACTION: Semiannual regulatory agenda.

SUMMARY: The following agenda of Commission proceedings is published in accordance with section 22(d)(1) of the Federal Trade Commission Act, 15 U.S.C. 57b-3(d)(1), and section 610(c) of the Regulatory Flexibility Act, 5 U.S.C. 610(c). Each projected date reflects an assessment by the FTC staff of the likelihood that the specified event will occur during the coming year. No Commission determination on the need for or the substance of a trade regulation rule or any other procedural option should be inferred from the notation of projected events in this agenda.

Several agenda items concern rulemaking proceedings that may affect a substantial number of small businesses as that term is used in the Regulatory Flexibility Act. Whether any such proceeding is likely to have a significant economic impact on such entities will depend upon the Commission's final determinations respecting the need for and the substance of a trade regulation rule.

Except for notice of completed actions, the information in this agenda represents the judgment of Commission staff based upon information now available. These views should not be regarded as a final staff position nor should they be attributed to the Commission itself. The Commission will independently address the issues presented on the rulemaking record in each proceeding.

Agenda items include the projected timing of certain future actions. In most

instances, the dates of future events are listed by month, not by a specific day. Acquisition of new information, change of circumstances, or changes in the law may alter the information set forth in this agenda.

In addition to these agenda items, the Commission has determined to conduct a systematic review of all current FTC regulations and guides on a recurring 10-year cycle. This review will be modeled on the review conducted under the Regulatory Flexibility Act review process and will be a permanent feature of the Commission's regulatory oversight process.

FOR FURTHER INFORMATION CONTACT: Further details may be obtained from the agency contact person listed for each particular proceeding.

By direction of the Commission.

Donald S. Clark,
Secretary.

4704. AMENDED FEDERAL DEPOSIT INSURANCE ACT

Legal Authority: 12 USC 1811 et seq, Federal Deposit Insurance Act.

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: On December 19, 1991, the Federal Deposit Insurance Corporation Improvement Act of 1991, Pub. L. No. 102-242, 105 Stat. 2236, 12 USC 1811, was signed into law. This law assigns to the FTC new responsibilities for certain non-federally insured depository institutions (DIs) and private deposit insurers of such DIs. The law imposes certain disclosure requirements on DIs, requires private deposit insurers to obtain annual audits from independent auditors using generally accepted accounting techniques, and requires private deposit insurers to file copies of the annual audit reports with each DI they insure and with each state in which such DIs receive deposits. DIs must also provide copies of their insurer's audit reports to current or prospective customers upon request. The FTC is required to prescribe, by regulation or order, the manner and content of three affirmative disclosures required of DIs that lack Federal deposit insurance. Such DIs must: (1) include in all periodic account statements and certain other documents a notice that the institution is not federally insured and that the Federal government does not guarantee that depositors "will get back their money" if the institution (cont)

However, on October 8, 1992, the Departments of Commerce, Justice, and State, The Judiciary, and Related Agencies Appropriations Act, 1993, Pub. L. No. 102-393, 106 Stat. 1828, was signed into law. This law, which contains the Commission's appropriation for fiscal year 1993, provides that none of the funds made available to the Commission shall be available for expenses authorized by Section 151 of the FDICIA, unless legislation amending Section 151 of FDICIA is enacted into law during fiscal year 1993 and only upon notification to the Appropriations Committees. Thus, as of September 1, 1993, implementation and enforcement of FDICIA by the Commission was on hold. Section 151 of FDICIA nonetheless continues to be in effect with respect to all affected entities.

4705. REGULATORY REVIEW

Significance: Agency Priority

Legal Authority: 15 USC 41 et seq

CFR Citation: 16 CFR 41 et seq

Legal Deadline: None

Abstract: The Commission is conducting a ten-year review of current rules and guides to identify any that should be modified or rescinded. At the beginning of each year, the Commission will publish a notice in the Federal Register listing the specific rules and guides to be reviewed during that year. See 58 FR 11554 (February 26, 1993). During the year, the Commission will publish separate notices in the Federal Register for each such rule or guide, soliciting comments about its costs and benefits and regulatory and economic impact. Where rulemaking timetables have been established for such items, they are included in this Agenda. However, no determination about whether to modify or rescind a rule, regulation, guide or interpretation or any other procedural option should be inferred from the Commission's decision to publish a request for comments. In certain instances, the reviews will also address other specific matters or issues, such as reviews mandated by the Regulatory Flexibility Act, 5 U.S.C. 601 et seq.

Legal Authority: 15 USC 45; 15 USC 46(g); 15 USC 57(a)

CFR Citation: 16 CFR 453.

Legal Deadline: None

Abstract: The Funeral Industry Practices Rule, which became fully effective on April 30, 1984, seeks to increase consumer access to accurate information about prices and legal requirements prior to and at the time

of purchase of funeral goods and services. The rule: (1) requires funeral directors to provide consumers with written itemized pre-sale disclosures; (2) prohibits misrepresentation of legal and cemetery requirements and the preservative or protective value of embalming, caskets, and vaults; (3) prohibits funeral directors from requiring a casket for cremations, or any other tie-in arrangements; (4) prohibits funeral directors from charging for goods and services not

specifically ordered, such as embalming, unless required by law; and (5) requires funeral directors to give, on request, price information over the telephone. The Rule provides that no later than four years after its effective date, the Commission will begin a rulemaking proceeding to determine whether the Rule should be amended or terminated. (cont)

4707. REVIEW OF THE PREMERGER NOTIFICATION RULES AND REPORT FORM

Significance: Agency Priority

Legal Authority: 15 USC 18a Clayton Act

CFR Citation: 16 CFR 801 to 803

Legal Deadline: None

Abstract: The Premerger Notification Rules and the Antitrust Improvements Act Notification and Report Form were adopted pursuant to Section 7A of the Clayton Act. Section 7A requires firms of a certain size contemplating mergers or acquisitions of a specified size to file notification with the Federal Trade Commission (FTC) and the Department of Justice (DOJ) and to wait a designated period before consummating the transaction. It also requires the FTC, with the concurrence of the Assistant Attorney General for Antitrust, to promulgate rules requiring that notification be in a form and contain information necessary to enable the FTC and DOJ to determine whether the proposed acquisition may, if consummated, violate the antitrust laws. These rules are continually reviewed in order to improve the program's effectiveness and reduce the paperwork burden on the business community. The Commission plans to propose modifications to the Premerger Notification and Report form during the next fiscal year. In September 1985, The Commission proposed to amend the Rule's treatment of acquisition (cont)

Legal Authority: 15 USC 45 Federal Trade Commission Act; 15 USC 57(a) Federal Trade Commission Act

CFR Citation: 16 CFR 419

Legal Deadline: None

Abstract: The Commission's trade regulation rule concerning games of chance became effective on October 17, 1969. The Rule establishes requirements for food and gasoline retailers in conducting and advertising games of chance by requiring disclosure of odds-of-winning and prize information in broadcast and print advertisements, as well as in point of sale information. In January, 1983, the Commission granted a temporary partial exemption to allow supermarkets and gas stations to advertise their games on radio and television without disclosing full information on prizes and odds-of-winning. In addition, the Commission also published an Advance Notice of Proposed Rulemaking on whether to make the broadcast exemption permanent. Finally, the Commission has proposed to reduce the recordkeeping requirements of the Rule from three years to one year in keeping with the goals of the Paperwork Reduction Act, and requested public comment on other possible areas where amendments to the Rule may be appropriate. The Rule benefits consumers by allowing contestants to enter games of chance with full knowledge of all material information to enable equal competition for (cont)

Legal Authority: 15 USC 41 et seq, Federal Trade Commission

CFR Citation: 16 CFR 436

Legal Deadline: None

Abstract: On December 21, 1978, the Commission issued a Trade Regulation Rule applicable to franchises and other business opportunity ventures. The Franchise Rule took effect on October 21, 1979. The Rule requires franchisors to give pre-sale disclosures to prospective investors before they pay money or become legally bound to pay. The disclosures provide material information and are designed to assure that potential investors have the information they need to investigate the franchise offer so they can make an informed investment decision. The Commission is considering whether to amend its Franchise Rule. In particular, the Commission is considering whether to amend the Rule's earning's claim

and preemption provisions. On February 5, 1991, the Commission deferred this decision and continues to seek academic and other studies of the impact of streamlined earnings claim disclosure requirements and any inconsistencies in State franchise laws. The record was held open until August 6, 1992, for receipt of this evidence and related comments.

Significance: Agency Priority

Legal Authority: 15 USC 4401

CFR Citation: 16 CFR 307

Legal Deadline: None

Abstract: The Comprehensive Smokeless Tobacco Act of 1986 requires health warnings on all packages and advertising for smokeless tobacco. The initial regulations allowed the warning on promotional materials to be rotated on the basis of the date the materials were disseminated, or the date of order or manufacture, and exempted utilitarian items. In 1991, the Commission amended its regulations to delete the exemptions for utilitarian

items, and decided to require that the warnings on utilitarian items be rotated according to the date of dissemination, rather than the date of order or manufacture. At the same time, the Commission determined to modify the rotation method for promotional materials to require that the warnings rotate according to dissemination date. On January 15, 1993, the FTC concluded that inadequate public comment was received on the amended rotational plan for promotional items. Thus, the Commission deleted the amended requirements for promotional items, and offered the identical rotational plan for a 30-day public comment period. On May 14, 1991, the Coalition on Smoking OR Health petitioned the Commission to enforce the Smokeless Tobacco Act (cont)

Abstract: The Mail Order Merchandise Rule requires mail order sellers to possess a reasonable basis for any claims made concerning shipping dates and, in the absence of any specifically stated date, to ship the ordered merchandise within thirty (30) days of receipt of an order. In the event of delays in shipment, the rule establishes notification procedures whereby buyers have the option either to agree to the delay or to cancel the order and receive a prompt refund. On October 11, 1989, the Commission commenced a rulemaking to amend the Rule to cover orders placed by telephone, and to change the Rule's definition of "properly completed order" for credit sales to the time the seller receives sufficient information to charge the buyer's account. The Notice of Proposed Rulemaking was published on November 28, 1989. The deadline for filing written comments was January 29, 1990. Public hearings were held on March 28, 1990, and April 19, 1990. The record closed on September 10, 1991. Both the staff and Presiding Officer in the rulemaking recommended that the Commission amend the Rule to cover telephone order merchandise and change the definition of "properly completed order" as proposed (cont)

Five post-record comments were placed on the public record on November 8, 1991. After summarizing the comments staff sent its final recommendation to the Commission on July 2, 1992. Two interested parties made oral presentations before the Commission on November 3, 1992. On November 18, 1992, and March 1 1993, the Commission tentatively determined to amend the Rule to cover telephone-order merchandise; to define the term "telephone" to include any direct or indirect use of the telephone to order merchandise; to amend the definition of "receipt of a properly completed order" for credit sales to refer to the time sufficient information is received to charge the buyer's account; to increase the shipment or notice deadline for orders accompanied by applications for first-time credit from 30 to 50 days; and to delete the rebuttable presumptions from section 435.1(b)(3). The Commission voted to amend the Rule on September 3, 1993. The effective date is March 1, 1994.

Legal Authority: Sec 324 of the Energy Policy and Conservation Act; PL 94-163 (1975)

CFR Citation: 16 CFR 305

Legal Deadline: None

Abstract: The Energy Policy and Conservation Act is designed to enable consumers to conserve energy by comparing the energy use of competing appliances and use that information in purchasing decisions. The statute requires the Commission to issue a labeling rule prescribing the disclosure of the estimated annual cost of operation (or another measure of energy use) for at least 13 categories of major household appliances. The statute also requires that the disclosures be based on standardized test procedures prescribed by the Department of Energy (DOE). In 1979, the Commission promulgated the Appliance Labeling Rule, which was amended in 1987 and 1990. The rule covers eight appliance categories: (1) refrigerators, refrigerator-freezers and freezers; (2) dishwashers; (3) clothes washers; (4) water heaters; (5) room air conditioners; (6) furnaces; (7) central air conditioners and heat pumps; and (8) fluorescent lamp ballasts. In 1992 FPLA was amended to require the statement of net quantity of contents to be expressed in terms of both customary inch-pound units and SI metric units; these amendments

Abstract: Section 203(c)(1) of the Petroleum Marketing Practices Act requires the Commission to prescribe, by rule, a uniform method by which the octane rating of automotive gasoline can be certified from the refiner through the chain of distribution, and

a uniform method of displaying its octane rating at the point of retail sale. In 1979, the Commission issued the Octane Certification and Posting Rule, which fulfills these requirements. The Rule enables consumers to buy gasoline with an octane rating that is high enough to prevent inefficient and harmful "engine knock" and to avoid buying a gasoline with an octane rating that is needlessly higher than the requirements of their automobiles. The Rule establishes standard procedures for determining, certifying and posting (by means of a label on the fuel dispenser) the octane rating of

automotive gasoline intended for sale to consumers. The certification requirement may be satisfied by industry documents (shipping receipts, delivery tickets, etc.), on which the octane rating is noted, or can be accomplished with a one-time letter of certification. Additional Information: ABSTRACT CONT: gasoline refiners and importers to retain octane rating test records and gasoline distributors and retailers to retain octane certification records for one year. Section 1501 of the Energy Policy Act of 1992 directs the Commission to amend the Octane Rule to require certification and posting of octane ratings (or other automotive fuel ratings) for all alternative liquid automotive fuels and gives the Commission the authority to amend the Octane Rule to require the certification and posting of the cetane rating of diesel fuel oils. On July 21, 1993, the Commission amended the Octane Rule to require sellers of alternative liquid automotive fuels to determine, certify and post an "automotive fuel rating" consisting of the common name of the fuel along with a disclosure of the amount, expressed as a minimum percentage by volume, of the principal component of the fuel. Sellers will be permitted to disclose other components, if desired. The amendments go into effect on October 25, 1993. The Commission deferred a decision on whether to require the certification and posting of cetane ratings for diesel fuel oil.

4715. RULE PURSUANT TO THE TELEPHONE DISCLOSURE AND DISPUTE RESOLUTION ACT OF 1992

Significance: Agency Priority

Legal Authority: PL 102-556

CFR Citation: 16 CFR 308

Legal Deadline: Final, Statutory, July 26, 1993.

Abstract: The Telephone Disclosure and Dispute Resolution Act of 1992, Pub. L. No. 102-556, was signed into law on October 28, 1992. Titles II and III of the Act direct the FTC to promulgate, within 270 days of enactment, a rule governing the advertising and operation of, as well as billing and collection procedures for pay-per-call services. Pay-per-call services, most commonly provided through 900 telephone numbers, involve a charge to the consumer which is assessed on the basis of the completion of the call and for which the consumer generally is billed on the monthly telephone bill. Title II of the statute requires that disclosure of the cost of a pay-per-call service be made both in advertising and in a preamble message. Advertisements for pay-per-call services that offer a prize must disclose the odds of receiving the prize. In the case of a pay-per-call service that provides information about a Federal program, both the preamble and advertising must disclose that the service is not authorized, endorsed, or approved by any Federal agency. Pay-per-call services, and advertisements for such services, cannot be directed at children under 12, unless the service is a bona fide (cont)

Advertisements primarily directed at individuals under the age of 18, and the preambles to all pay-per-call services, are required to state that persons under 18 must have parental consent to use the service. Pay-per-call services may not be provided through an 800 telephone number, or any other number designated by the FCC as a toll-free number. Moreover, pay-per-call providers are liable for refunds to consumers who have paid for services that violate regulations prescribed pursuant to the Act. In addition, the Commission is authorized to prescribe other regulations it deems necessary to prevent abusive practices or to prevent evasion of these requirements. Title III of the Act directs the FTC to prescribe rules establishing procedures for the correction of billing errors with respect to telephone-billed purchases. The final rule was published in the Federal Register on August 9, 1993 (58 FR 42364), and will become effective on November 1, 1993.

INTERSTATE COMMERCE COMMISSION (ICC)

INTERSTATE COMMERCE
COMMISSION

49 CFR Ch. X

[Ex Parte No. 420; Sub-No. 25]

Semiannual Regulatory Flexibility
AgendaAGENCY: Interstate Commerce
Commission.ACTION: Publication of regulatory
flexibility agenda.

SUMMARY: The Interstate Commerce Commission, in accordance with the requirements of the Regulatory Flexibility Act, is publishing a semiannual agenda of: (1) Current and projected rulemakings and (2) existing regulations being reviewed to determine whether to propose modifications through rulemaking. Listed below are the regulatory actions to be developed or reviewed during the next 12 months. Following each rule identified is a brief description of the rule including its purpose and legal basis.

FOR FURTHER INFORMATION CONTACT: A contact person is identified for each of the rules listed below.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act, 5 U.S.C. 601

et seq. (RFA), sets forth a number of requirements for agency rulemaking. Among other things, the RFA requires that, during the months of April and October of each year, each agency shall publish in the Federal Register a regulatory flexibility agenda which shall contain:

(1) A brief description of the subject area of any rule which the agency expects to propose or promulgate which is likely to have a significant economic impact on a substantial number of small entities;

(2) A summary of the nature of any such rule under consideration for each subject area listed in the agenda pursuant to paragraph (1), the objectives and legal basis for the issuance of the rule, and an approximate schedule for completing action on any rule for which the agency has issued a general notice of proposed rulemaking; and

(3) The name and telephone number of an agency official knowledgeable concerning the items listed in paragraph (1).

Accordingly, a list of proceedings appears below containing information about subject areas in which the Commission is currently conducting rulemaking proceedings or may institute such proceedings in the near future. It

also contains information about existing regulations being reviewed to determine whether to propose modifications through rulemaking.

The agenda represents the Commission's best estimate of significant rules which will be considered over the next 12 months. However, section 602(d) of the RFA, 5 U.S.C. 602(d), provides: "Nothing in [section 602] precludes an agency from considering or acting on any matter not included in a regulatory flexibility agenda or requires an agency to consider or act on any matter listed in such agenda."

The Commission is publishing its October 1993 regulatory flexibility agenda as part of the Unified Agenda of Federal Regulations. The Unified Agenda of Federal Regulations is coordinated by the Office of Management and Budget pursuant to Executive Order 12291. Independent regulatory agencies, such as the Commission, participate in the Agenda on a voluntary basis.

Decided: August 11, 1993.
By the Commission, Chairman McDonald, Vice Chairman Simmons, Commissioners Phillips, Philbin, and Walden.
Sidney L. Strickland, Jr.,
Secretary.

Abstract: The Interstate Commerce Commission proposes to revise its standard licensing application form and

corresponding regulations concerning application procedures at 49 CFR parts 1003, 1160, 1162, and 1166. The proposal would replace the comprehensive licensing form currently in use with six transportation mode-specific licensing forms to be used respectively by applicants for motor property carrier, motor property "fitness only," motor passenger, property broker, household goods freight forwarder, and water carrier authority. The recommended revisions to the licensing form and procedures are intended to rationalize and simplify the licensing process and will incorporate recent revisions to the Commission's safety fitness policy adopted in Safety Fitness Policy, 8 ICC 2d 123 (1991), petition to reopen denied (not printed), served December 26, 1991, 56 FR 67002 (December 27, 1991). The proposal is expected to reduce significantly the burden hours associated with the licensing application process.

Abstract: The Commission reopened this proceeding and requested public comments on the advisability of developing and implementing a comprehensive electronic tariff filing (ETF) system that would support automated functions such as electronic data interchange (EDI) and rate analyses. Such an ETF system, which would require the development and use of a variety of standard electronic formats for tariff information, would benefit carriers and shippers by permitting tariff automation, and would allow the Commission to process tariff filings more efficiently. The Commission also requested comments on the form such a system should take if one is developed, and on the processes that should be utilized to develop it. More fundamentally, the Commission seeks comments on such topics as the need for a comprehensive ETF system, its purpose, its potential costs, and its potential usefulness to shippers, carriers, and other affected parties. Also, in these times of budgetary restraint it is important for the Commission to assess, after consideration of comments by the interested public, the desirability, validity, and feasibility of enactment of these or similar proposals before (cont)

NATIONAL CREDIT UNION ADMINISTRATION (NCUA)

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Ch. VII

Semiannual Agenda of Regulations

AGENCY: National Credit Union Administration (NCUA).

ACTION: Semiannual agenda of regulations.

SUMMARY: Pursuant to its ongoing policy of reviewing regulations, NCUA is publishing a list of current and projected rulemakings, reviews of existing regulations, and completed actions as of August 27, 1993. NCUA will also include this agenda in the Unified Agenda of Federal Regulations.

DATES: This information is current as of August 27, 1993.

ADDRESSES: National Credit Union Administration, 1775 Duke Street, Alexandria, VA 22314-3428.

FOR FURTHER INFORMATION CONTACT: For each regulation listed, the person(s) named in the listing at the above address, unless otherwise noted, or listed telephone number.

SUPPLEMENTARY INFORMATION: The purpose of this agenda is to enable credit unions and the public to follow regulatory development and review at NCUA and to enable interested parties to more effectively participate in that process. The agenda is divided into three parts: (1) Actions completed since the last agenda; (2) actions proposed but not completed; and (3) actions planned

but not yet proposed by the NCUA Board.

The agenda is published pursuant to NCUA Interpretive Ruling and Policy Statement Number 87-2 ("Developing and Reviewing Government Regulations," 54 FR 35231; September 18, 1987). Executive Order No. 12291 does not require independent executive agencies such as NCUA to publish a regulatory agenda, but NCUA has voluntarily decided to do so by including this agenda in the Office of Management and Budget's next publication of its Unified Agenda of Federal Regulations.

Approved by the NCUA Board on August 23, 1993.

Becky Baker,
Secretary of the Board.

CFR Citation: 12 CFR 745

Legal Deadline: None

Abstract: On May 15, 1990, the FDIC issued final rules on deposit insurance (55 FR 20111). The FDIC rules differ in some respects from NCUA's current rules and/or policies. NCUA staff will be analyzing the changes and clarifications to deposit insurance coverage rules made by the FDIC, in order to determine whether changes in NCUA's insurance regulation are warranted. Staff is also reviewing the entire section for a general update.

Legal Deadline: Final, Statutory, September 19, 1993.
NCUA must issue a final rule within 90 days of the effective date of the Federal Reserve Board's rule, June 21, 1993.

Abstract: The Truth in Savings Act of 1991 (TISA) requires the NCUA to promulgate a rule implementing TISA and, with a few exceptions, following the Federal Reserve Board's Regulation DD. Pursuant to TISA, NCUA's rule will apply to all credit unions, whether or not federally insured. The proposed rule requires credit unions to make certain disclosures concerning the dividend rates payable on depository accounts and the fees assessable against depository accounts, and prescribes the circumstances under which such disclosures must be made.

Legal Authority: 12 USC 1757(6); 12 USC 1766(k); PL 97-35; PL 99-609; PL 101-144

CFR Citation: 12 CFR 701.32; 12 CFR 705

Legal Deadline: None

Abstract: The rule is intended to increase the number of participating credit unions, to make the program more accessible to participating credit unions, to provide technical assistance to credit unions that may not receive loans, and to reduce the regulatory burden. The amendments, among other things, reduce paperwork requirements, modify the definitions of low-income members and participating credit unions, clarify technical assistance issues, and eliminate requirements for a community development committee.

Semiannual Regulatory Agenda

NATIONAL INDIAN GAMING COMMISSION (NIGC)

NATIONAL INDIAN GAMING COMMISSION

25 CFR Ch. III

Semiannual Regulatory Agenda

AGENCY: National Indian Gaming Commission.

ACTION: Publication of semiannual regulatory agenda.

SUMMARY: The National Indian Gaming Commission is today publishing an agenda of its open and anticipated rulemaking actions. The agenda is a general announcement to the public

intended to provide advance notice of rulemaking actions in which the public may wish to participate. The Commission invites questions and public comment on individual agenda entries.

FOR FURTHER INFORMATION CONTACT: Susan Carletta, National Indian Gaming Commission, Suite 250, 1850 M Street NW., Washington, DC 20036, (202) 632-7003, ext. 34.

SUPPLEMENTARY INFORMATION: In accordance with Executive Order 12291 "Federal Regulation" and the Regulatory Flexibility Act (5 U.S.C. 605), executive agencies are required to publish semiannual regulatory agendas

in the Federal Register in April and October of each year.

The regulations being considered by the Commission are not "major" rules within the meaning of E.O. 12291, and no Regulatory Impact Analysis is required. The Commission also has determined, under the Regulatory Flexibility Act, that the regulations under consideration will not have a significant economic impact on a substantial number of small entities. Accordingly, no Regulatory Flexibility Analysis is required.

Anthony J. Hope,
Chairman, National Indian Gaming Commission.

4757. REVIEW OF PETITIONS FOR CERTIFICATE OF SELF-REGULATION UNDER THE INDIAN GAMING REGULATORY ACT

Significance: Agency Priority
Legal Authority: 25 USC 2701 et seq
CFR Citation: 25 CFR 581
Legal Deadline: None

Abstract: This rule will provide procedures for a tribe to petition the Commission for a certificate of self-regulation of class II gaming. The rule

will implement the statutory standards that must be met in order for the Commission to grant such a petition. The rule also will implement the Commission's authority to remove a certificate of self-regulation for just cause.

Nuclear Regulatory Commission

Semiannual Regulatory Agenda

NUCLEAR REGULATORY COMMISSION (NRC)

NUCLEAR REGULATORY COMMISSION

10 CFR Ch. I

Regulatory Agenda

AGENCY: Nuclear Regulatory Commission.

ACTION: Semiannual publication of NRC regulatory agenda.

SUMMARY: The Nuclear Regulatory Commission (NRC) is publishing its semiannual regulatory agenda in accordance with Public Law 96-354 "The Regulatory Flexibility Act" and Executive Order 12291 "Federal Regulation." The agenda is a compilation of all rules on which the NRC has recently completed action or has proposed or is considering action. This issuance updates any action occurring on rules since publication of the last semiannual agenda on April 26, 1993 (58 FR 24002).

ADDRESSES: Comments on any rule in the agenda may be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch. Comments may also be hand delivered to the One White Flint North Building, 11555 Rockville Pike, Rockville, Maryland, between 7:30 a.m. and 4:15 p.m., Federal workdays. Comments received on rules for which the comment period has closed will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before the closure dates specified in the agenda.

The agenda and any comments received on any rule listed in the agenda are available for public inspection and

copying for a fee at the Nuclear Regulatory Commission's Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC 20555. Single copies of the NRC quarterly agenda can be purchased from the Superintendent of Documents, U.S. Government Printing Office, Post Office Box 37082, Washington, DC 20013-7082. Customers may call (202) 512-2303 or (202) 512-2249.

FOR FURTHER INFORMATION CONTACT: For further information concerning NRC rulemaking procedures or the status of any rule listed in this agenda, contact Michael Lesar, Chief, Rules Review Section, Rules Review and Directives Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555; telephone (301) 492-7758. Persons outside the Washington, DC, metropolitan area may call, toll-free: (800) 368-5642. For further information on the substantive content of any rule listed in the agenda, contact the individual listed under the heading "Agency Contact" for that rule.

SUPPLEMENTARY INFORMATION: Although publication of the agenda is only required semiannually, in April and October, the NRC has chosen to update and publish its agenda each quarter. However, the information contained in this semiannual publication is updated to reflect any action which has occurred on rules since publication of the last NRC semiannual agenda on April 26, 1993 (58 FR 24002). Within each group, the rules are ordered according to the Regulation Identifier Number (RIN).

The information in this agenda has been updated through August 27, 1993. The date for the next scheduled action under the heading "Timetable" is the

date the rule is scheduled to be published in the **Federal Register**. The date is considered tentative and is not binding on the Commission or its staff. The regulatory agenda is intended to provide the public early notice and opportunity to participate in the NRC rulemaking process. However, the NRC may consider or act on any rulemaking even though it is not included in the regulatory agenda.

Rulemakings Approved by the Executive Director for Operations (EDO)

The EDO initiated a procedure for review of the regulations being prepared by staff offices that report to him to ensure that staff resources are allocated most effectively to achieve NRC's regulatory priorities. This procedure requires EDO approval before staff resources may be expended on the development of any new rulemaking. Furthermore, all existing rules must receive EDO approval prior to the commitment of additional resources.

The NRC agenda lists rulemaking actions. Of these, no rulemaking items are considered to be priority or major as defined in section 1(b) of Executive Order 12291.

Nine rules potentially will have a "significant economic impact on a substantial number of small entities" as defined in the Regulatory Flexibility Act.

Dated at Bethesda, Maryland, this 23rd day of August 1993.

For the Nuclear Regulatory Commission,
David L. Meyer,
Chief, Rules Review and Directives Branch,
Division of Freedom of Information and
Publications Services, Office of
Administration.

NUCLEAR REGULATORY COMMISSION (NRC)

Prerule Stage

4760. NIGHT FIRING QUALIFICATIONS FOR SECURITY GUARDS AT NUCLEAR POWER PLANTS

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 73

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations to ensure that security force effectiveness at nuclear power plants is not dependent on the time of day. Security guards currently are required to perform night firing for familiarization only. There is no requirement for standards to measure their effectiveness. The proposed rule would require that security guards at nuclear power plants qualify for night firing. The only alternative to rulemaking is to retain the current status.

Part 73, Appendix B, Part IV, would be amended to require reactor security guards to qualify annually in an NRC-approved night firing course with their assigned weapons. The proposed amendment would standardize training and qualification in night firing and prepare power reactor guard forces to respond more effectively in the event of an incident occurring in limited lighting conditions. The cost to industry should be relatively modest since licensees already operate daylight firing training and qualification facilities and programs.

4761. CODES AND STANDARDS FOR NUCLEAR POWER PLANTS (ASME CODE, SECTION XI, DIVISION 1, SUBSECTION IWE AND SUBSECTION IWL)

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 050

Legal Deadline: None

Abstract: The proposed rule would incorporate by reference Subsection IWE, "Requirements for Class MC Components of Light-Water Cooled

Power Plants," and Subsection IWL, "Requirements for Class CC Concrete Components of Light-Water Cooled Power Plants," of Section XI (Division 1) of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code (ASME Code). Subsection IWE provides the rules and requirements for inservice inspection, repair, and replacement of Class MC pressure retaining components and their integral attachments in light-water cooled power plants. Subsection IWL provides the rules and requirements for inservice inspection and repair of the reinforced concrete and post tensioning systems of Class CC components.

Incorporation by reference of Subsection IWE and Subsection IWL will provide systematic examination rules for containment structure for meeting Criterion 53 of the General Design Criteria (Appendix A of 10 CFR part 50) and Appendix J of 10 CFR part 50. (cont)

Timetable: Next Action Undetermined

Small Entities Affected: None

Government Levels Affected: None

Additional Information: ABSTRACT CONT: Age-related degradation of containments has occurred, and additional and potentially more serious degradation mechanisms can be anticipated as nuclear power plants age.

If the NRC did not take action to endorse the Subsection IWE and Subsection IWL rules, the NRC position on examination practices for containment structure would have to be established on a case-by-case basis and improved examination practices for steel containment structures might not be implemented. The other alternatives of incorporating these detailed examination requirements into the American National Standard ANSI/ANS 56.8-1981 or into Appendix J are not feasible.

Incorporating by reference the latest edition and addenda of Subsection IWE and Subsection IWL will save applicants/licensees and the NRC staff both time and effort by providing uniform detailed criteria against which the staff can review any single submission. Adoption of the proposed amendment would permit the use of improved methods for containment inservice inspection.

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 050

Legal Deadline: None

Abstract: The advance notice of proposed rulemaking (ANPRM) was published to request public comment on the need for additional regulatory requirements and to obtain an improved understanding of alternatives to regulatory requirements. Based upon comment analysis, the staff recommended to the Commission that this rule be withdrawn. The Commission has approved withdrawal of this rulemaking.

Recent inspections and discussions with the industry and licensees indicate that there is still some disagreement between industry and the NRC staff regarding commercial grade procurement and dedication. The NRC staff has conducted meetings with the industry and individual licensees to resolve the areas of disagreement. Final issuance of the notice of action will be issued following resolution of the areas of disagreement.

Abstract: The proposed rule would amend the Commission's regulations pertaining to specific Privacy Act exemptions. This proposed rule would add exemption (j)(2) of the Privacy Act to the regulations that describe exempt systems of records. These amendments would make NRC's regulations consistent with the majority of statutorily appointed Inspectors General and would clearly link each system of records to the specific exemption(s) of the Privacy Act under which each system is exempt.

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 039

Abstract: The proposed rule would amend the Commission's regulations governing well logging operations. The proposed rule would allow the continued use of sealed sources that were approved by accepted prototype testing before July 14, 1989. The proposed rule would also permit the continued use of previously evaluated and approved sealed sources by NRC well logging licensees. The proposed rule is necessary because the current regulations unintentionally excluded the use of sealed sources previously approved by prototype testing.

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 032

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations to reinstate the annual reporting requirement for transfer of products containing small quantities of radioactive material to persons exempt from licensing requirements. Submittal of transfer reports on a 5-year reporting basis has made it difficult for the NRC staff to identify trends in distribution of materials to persons exempt from licensing requirements. Reinstating the annual reporting requirement will provide the NRC with more complete and accurate information on exemptions granted under 10 CFR 30 and improve the Commission's capability to assess potential effects of aggregated exposures to the public from a number of exempted practices. Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 050

Legal Deadline: None

Abstract: The NRC is considering amending its regulations to increase assurance that nuclear power reactor licensees will have adequate funds for decommissioning and other safety-related activities. This rulemaking will consider the need for amending the NRC's regulations to require power reactor licensees to either: (1) guarantee any unfunded decommissioning liability with a surety bond letter of credit, or other guarantee method currently allowed in 10 CFR 50.75(e)(1)(iii); (2) provide for a financial test guarantee mechanism similar to the one contained in 10 CFR Part 30, Appendix A; or (3) provide a certification to the NRC from the licensee's rate-making authority that it will allow unfunded decommissioning obligations to be collected in rates, notwithstanding the operating status of the facility.

4768. AMENDMENT TO 10 CFR 51.51 AND 51.52, TABLES S-3 AND S-4, ADDITION OF RADON-222 AND TECHNETIUM-99 RADIATION VALUES, AND ADDITION OF APPENDIX B, "TABLE S-3 EXPLANATORY ANALYSIS"

Legal Authority: 42 USC 2011; 42 USC 2201; 42 USC 4321; 42 USC 5841; 42 USC 5842

CFR Citation: 10 CFR 51

Legal Deadline: None

Abstract: The proposed rule amends the Table of Uranium Fuel Cycle Environmental Data (Table S-3) by adding new estimates for potential releases of technetium-99 and radon-222 and by updating other estimates. The proposed rule's Appendix B to Subpart A (narrative explanation) also describes the basis for the values contained in Table S-3, explains the environmental effects of these potential releases from the LWR Fuel Cycle, and postulates the potential radiation doses, health effects, and environmental impacts of these potential releases. The proposed rule would also amend 10 CFR 51.52 to modify the enrichment value of U-235 and the maximum level of average fuel irradiation (burnup in megawatt-days of thermal power per metric ton of uranium). The narrative explanation also addresses important fuel cycle impacts and the cumulative impacts of the nuclear fuel cycle for the whole nuclear power industry so that it may be possible to consider these impacts generically rather than repeatedly in individual licensing proceedings, thus reducing potential litigation time and costs for both NRC and applicants. Additional Information: ABSTRACT CONT: The proposed revision of 10 CFR 51.51 and the addition of Appendix B was published for public review and comment on March 4, 1981 (46 FR 15154). The final rulemaking was deferred pending the outcome of a suit (Natural Resources Defense Council, et al. v. NRC, No. 74-1486) in the U.S. Circuit Court of Appeals. The U.S. Court of Appeals (D.C. Circuit) decision on April 27, 1982, invalidated the entire Table S-3 rule. The Supreme Court reversed this decision on June 6, 1983.

The proposed rule to provide an explanatory narrative for Table S-3 has been revised to reflect new modeling developments during the time the rulemaking was deferred. Final action on the Table S-3 rule was held in abeyance until new values for radon-222 and technetium-99 could be added to the table and covered in the narrative explanation. The rule is being reissued as a proposed rule because the scope has been expanded to include radiation values for radon-222 and technetium-99 and the narrative explanation has been extensively revised from that published on March 4, 1981 (46 FR 15154).

Legal Authority: 42 USC 2201; 42 USC 2210; 42 USC 5841; 42 USC 5842

CFR Citation: 10 CFR 140

Legal Deadline: None

Abstract: The proposed rule would revise the criteria for an extraordinary nuclear occurrence (ENO) to eliminate the problems encountered in the Three Mile Island ENO determination. The revised criteria should be established in the event they are needed.

There are no alternatives to this rulemaking, as the current ENO criteria are already codified in Subpart E of 10 CFR Part 140. The only way to modify these criteria, as this rule seeks to do, is through rulemaking.

There is no safety impact on public health or safety. The ENO criteria provide legal waivers of defenses. Industry (insurers and utilities) claims that a reduction in the ENO criteria could cause increases in insurance premiums. The final rule will also respond to PRM-140-1.

Abstract: The proposed rule would shorten and simplify existing Commission procedural rules applicable to domestic licensing proceedings by comprehensively restating, revising and reorganizing the statement of those rules to reflect current practice. The changes in this proposed rule would enable the Commission, directly and through its adjudicatory offices, to render decisions in a more timely fashion, eliminate the stylistic complexity of the existing rules, and reduce the burden and expense to the parties participating in agency proceedings. In 1987, the Commission deferred consideration of this proposal which would have revised the Commission's procedural rules governing the conduct of all adjudicatory proceedings other than export licensing proceedings under 10 CFR part 110, pending consideration of other, more limited revisions to the rules of practice. In 1989, former Chairman Zech requested that this proposed rule be updated for reconsideration by the Commission, and more recently, the Administrative Conference of the United States has drafted Model Rules.

Legal Authority: 42 USC 10101

CFR Citation: 10 CFR 60

Legal Deadline: None

Abstract: The proposed rule would eliminate several inconsistencies with the EPA standards to be developed for the disposal of HLW in deep geologic repositories. The Nuclear Waste Policy Act of 1982 (NWSA) directs NRC to promulgate criteria for the licensing of HLW geologic repositories. Section 121(c) of this Act states that the criteria for the licensing of HLW geologic repositories must be consistent with these standards. The proposed rule is needed in order to eliminate several inconsistencies with the EPA standards, thus fulfilling the statutory requirement.

Because the NWSA directs NRC to eliminate inconsistencies between Part 60 and the EPA standard, the alternatives to the proposed action are limited by statute.

Because the Federal Court invalidated the EPA standards, action on this rule is undetermined. Congress has authorized the National Academy of Sciences to recommend HLW standards to EPA for specific application to Yucca Mountain. The EPA must propose a new standard by 1995.

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 020; 10 CFR 061

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations to: (1) improve information contained in manifests accompanying shipments of waste to low-level waste (LLW) disposal facilities licensed under Part 61; (2) develop a uniform manifest for national use; (3) require that operators of these disposal facilities store manifest information in electronic recordkeeping systems; and (4) require that operators submit, on a machine-readable medium, reports of shipment manifest information.

To ensure safe disposal of LLW, the NRC must understand the mechanisms and rates by which radioactivity can be released from LLW and into the environment. To do this, the NRC must understand the chemical, physical, and radiological characteristics of LLW. This task is greatly complicated by the heterogeneous nature of LLW; it exists in a variety of chemical and physical forms and contains roughly 200 different radionuclides in concentrations that can range from a few microcuries to several hundred curies per cubic foot. Each year there are thousands of shipments to LLW disposal sites. (cont)

The rulemaking, through development of a uniform manifest, would also improve safe and expeditious movement of LLW from generators through processors or collectors to disposal facilities. Emergency accident procedures would be enhanced through use of a single uniform manifest.

The NRC does not expect that the rulemaking will increase disposal costs. The final rule is dependent upon a coordinated rulemaking effort with the Department of Transportation.

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 050

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations by clarifying the linkage between the need for "reasonable assurance that adequate protective measures can and will be taken in the event of a radiological emergency" indicated in Section 50.47(a) and 16 planning standards outlined in Section 50.47(b). In addition, the rulemaking will clarify the term "range of protective" actions. Other issues to be clarified include monitoring of evacuees, actions for recovery and reentry, notification of the public, evacuation time estimates, and exercise frequency.

In a December 23, 1988, memorandum to the EDO from SECY, the staff was directed to review the "...NRC's

emergency planning regulations and proposed revisions designed to eliminate ambiguity and clarify the regulations to include what constitutes the exercise scope prior to the full power licensing...." The staff outlined the proposed rulemaking in a memorandum from the EDO to the Commission dated June 29, 1989.

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 073

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations to require periodic updates of FBI fingerprint checks for reinvestigation of individuals granted unescorted access to nuclear power plants or access to safeguards information. The proposed rule would require that licensees who operate a nuclear power plant submit fingerprint cards for applicable personnel to the NRC for criminal history checks every 5 years. Authorization for unescorted access would be retained by an individual pending results of the criminal history check on that individual's fingerprints.

Legal Authority: 42 USC 10101

CFR Citation: 10 CFR 060

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations concerning additional preclosure regulatory requirements for high-level waste geologic repositories. Several issues associated with preclosure regulatory requirements have been raised due to different interpretations of the rulemaking record for 10 CFR Part 60. These involve: (1) the lack of clearly prescribed requirements for the establishment of a controlled use area intended to protect public health and safety in the event of a postulated radionuclide release and (2) the definition of structures, systems, and components important to safety for which certain design and quality assurance criteria apply. In order to meet the milestones mandated by the Nuclear Waste Policy Act of 1982, as amended, and milestones pertaining to DOE's production schedule in the Mission Plan amendments, guidance is needed from NRC on these matters to enable DOE to proceed with the siting of a geologic repository. Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 050

Abstract: The proposed rule would amend the Commission's regulations concerning fracture toughness requirements to resolve issues that have resulted from technological improvements and from other issues. The "Pressurized Thermal Shock (PTS) rule" (10 CFR 50.61), was modified in 1991 to be consistent with the embrittlement correlations given in Regulatory Guide 1.99, Revision 2. However, the need for further clarifications to the PTS rule has been identified.

Appendix G to 10 CFR Part 50 provides fracture toughness requirements for ferritic materials of pressure-retaining components of the reactor coolant boundary of light-water nuclear power reactors.

Appendix H to 10 CFR Part 50 contains requirements for RPV material surveillance programs that are intended to monitor fracture toughness property changes in RPV materials due to irradiation embrittlement.

4782. RADIOLOGICAL CRITERIA FOR DECOMMISSIONING OF NUCLEAR FACILITIES

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 020

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations to codify the basic principles and radiological criteria which would allow decommissioned lands and structures to be released for unrestricted public use. In the final rule on General Requirements for Decommissioning Nuclear Facilities (53 FR 24018) dated June 27, 1988, the need and urgency for guidance with respect to residual contamination criteria was expressed. At that time, it was anticipated that an interagency working group organized

by the Environmental Protection Agency would develop necessary Federal guidance. However, in the absence of significant progress by the interagency working group, the Commission has directed that the NRC expedite rulemaking because the requirements, once final, will provide licensees with an incentive to complete site decommissionings. The rule would establish basic radiological criteria for release of lands and structures. Measurables, in the form of surface and volume radioactivity concentrations and site radioactivity inventory values, would be provided in supporting regulatory guidance. (cont)

safety requirements for radiographic operations. The proposed rule would revise 10 CFR Part 34 to clarify the requirements in section 34.27 and conform Part 34 with the approach developed by the Conference of Radiation Control Program Directors, Inc. (Part E of the "Suggested State Regulations for Control of Radiation"), and the State of Texas in Part 31 of the Texas Regulations for Control of Radiation. Comments and suggestions from regulatory groups, users, and manufacturers will be considered in the overall revision. The NRC will also consult Canadian atomic energy control regulations that relate to radiography. The proposed rule is necessary because of frequent misinterpretations of the provisions of Part 34 and the need to clarify the requirements of 10 CFR 34.27. The staff is currently preparing an options paper which will examine the issues, set priorities, and provide direction for the proposed rulemaking. Abstract: The proposed rule would amend the Commission's regulations concerning the reporting of defects and noncompliance to clarify the applicability of these provisions to materials and fuel cycle licensees. Because of the wide diversity in the types of licensees covered under these regulations, the requirements have been misinterpreted by the licensees. The proposed rule would clearly define the applicability of these provisions to the different types of licensees and would take into account the differences between different classes of licensees. The proposed rule is being developed in response to an NRC internal audit and to a parallel review of these regulations as they apply to materials licensees.

Additional Information: ABSTRACT: (cont)

The ASME B&PV Code provides rules in Section III, Division 1, for the construction of components of light-water-cooled nuclear power plants. Section XI, Division 1, provides rules for the inservice inspection of those components. Requiring licensees to expedite implementation of Appendix VIII would improve the quality of inservice inspections in a timely manner. Expanding the scope of Section 50.55a to include safety-related snubbers would ensure that these components are tested to quality standards commensurate with the importance of the safety functions to be performed. The ASME OM Code provides rules for the inservice testing of pumps, valves, and snubbers. This proposed amendment would permit the use of improved methods for the construction, inservice inspection, and inservice testing of nuclear power plant components. Further, these actions would save applicants/licensees and the NRC staff both time and effort by providing uniform detailed criteria against which the staff could review any single submission. There is no reasonable alternative to rulemaking action.

Legal Authority: 42 USC 2201; 42 USC 5841

Abstract: The proposed rule would amend the Commission's regulations to add incident reporting requirements to Part 72 to make it consistent with other regulations in 10 CFR Chapter I. On August 16, 1991 (56 FR 40757), the Commission published a final rule that deleted certain incident reporting requirements from Part 20 and replaced them with new incident reporting requirements in Parts 30, 40, and 70. However, incident reporting requirements were not added to Part 72. The only alternative to this rulemaking that would assure that the specified incidents are reported is to impose these reporting requirements by order or license condition. However, establishing reporting requirements by rulemaking is necessary to provide consistency throughout the Commission's regulations.

Legal Authority: 42 USC 2201; 42 USC 5841

Abstract: The advance notice of proposed rulemaking (ANPRM) was published to request public comment on amendment of the Commission's regulations to decouple source term and dose calculations from reactor siting and to permit the use of updated source term insights for future light water reactors. The NRC is presently in the process of reviewing advanced reactor designs. The DOE has also indicated that it intends to seek review for an early site permit, as permitted by 10 CFR Part 52, in 1993. The only alternative to rulemaking would be to continue present staff practice utilizing an outdated source term formulation derived from Technical Information Document (TID) 14844, issued in 1962, coupled with the use of the guideline dose values in 10 CFR Part 100, not only for reactor siting, but for plant design as well.

Abstract: The proposed rule would amend the Commission's regulations concerning regulatory requirements for licensing of high-level waste geologic repositories. The relationship described in Section 60.21 of the siting criteria in Section 60.122 (defined in terms of potentially adverse and favorable conditions) and the performance objectives in Sections 60.112 and 60.113 has been the subject of conflicting interpretations. The proposed rule would resolve the conflicting interpretations of the terms "adequately investigated" and "adequately evaluated" which are used with reference to the potentially adverse conditions in Section 60.122. Legal Authority: 42 USC 2201; 42 USC 5841**CFR Citation:** 10 CFR 020; 10 CFR 035**Legal Deadline:** None

Abstract: The proposed rule would amend the Commission's regulations to revise the patient release criteria contained in 10 CFR 35.75, and the applicability of the dose limits for members of the public in 10 CFR 20.1301. The Commission has received two petitions for rulemaking, PRM-20-20 and PRM-35-10, to amend its regulations regarding radiation exposure that members of the public may receive from patients who have been medically administered radioactive materials, and the criteria under which this patient may be released from confinement. The petitioners believe that the current requirements of Parts 20 and 35 would cause patients to be confined unnecessarily beyond the time needed for medical reasons. Therefore, if the Commission concludes that the dose limits and other restrictions should be

relaxed, it will proceed with this rulemaking.

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 050

Abstract: The proposed rule would amend the Commission's regulations to require PWR plants to address the NRC's safety concerns regarding the ability of each plant to limit leakage from the pump seals during conditions such as station blackout and loss of component cooling water or service water. Seal failures experienced so far have had the benefit of available emergency core cooling systems. A LOCA from seal failures coupled with common cause failures that disable ECCS was found to be a significant contributor to public risk. This issue has been given a high priority for resolution through rulemaking.

In addition to development of a rule, the NRC staff intends to prepare a regulatory guide that will provide the methods acceptable for complying with the proposed RCP seal rule.

Legal Authority: 42 USC 2214

CFR Citation: 10 CFR 170; 10 CFR 171

Legal Deadline: None

Abstract: The advance notice of proposed rulemaking (ANPRM) was published to request public comment on changes to NRC's fee policy and associated legislation. This action responds to the requirements of the Energy Policy Act of 1992 that the NRC review its policy for assessment of annual fees, solicit public comment on the need for changes to this policy, and recommend to the Congress the changes in existing law that the NRC finds are needed to prevent the placement of an unfair burden on NRC licensees. The NRC is also announcing the receipt of and requesting comments on a petition for rulemaking submitted by the American Mining Congress (PRM-170-4) that requests that the NRC conduct

NRC

a rulemaking to evaluate its fee policy. Because the issues raised by the petitioner concern the same subjects as the fee policy review, the NRC is including the petition in this Federal Register notice.

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 076

Legal Deadline: Other, Statutory, January 1995.

Energy Policy Act of 1992

Abstract: The proposed rule would amend the Commission's regulations by adding a new part to the Code of Federal Regulations (10 CFR Part 76). The Energy Policy Act of 1992 (the Act) authorized the establishment of a new government corporation, U.S. Enrichment Corporation (USEC), for the purpose of conducting a uranium enrichment enterprise. The Act directs the NRC to issue standards by rulemaking as necessary to govern the gaseous diffusion plants at Portsmouth, Ohio, and Paducah, Kentucky, in order to protect the public health and safety from radiological hazard, and provide for the common defense and security, including adequate safeguards. The standards are to be in effect within 2 years. This new part will include as certification standards pertinent parts of existing regulations as they are applied to similar facilities licensed by the NRC.

Abstract: The proposed rule would amend the Commission's regulations to provide that requests for hearing in certain materials license proceedings be filed within 30 days of actual notice of the amendment application. The proposed rule would eliminate an ambiguous provision in the Commission's current regulations and would ensure that hearing requests are filed as promptly as possible in order to resolve any concerns or objections to the pending application in a timely manner.

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 040

Abstract: The proposed rule would conform the Commission's regulations governing uranium mill tailings to the Environmental Protection Agency (EPA) standards promulgated under the Uranium Mill Tailings Radiation Control Act. In accordance with Section 112(d)(9) of the Clean Air Act Amendments of 1990, the EPA may rescind 40 CFR Part 61, Subpart T as it applies to NRC licensees subject to a finding that the NRC regulatory program protects the public health with an ample margin of safety. In October 1991, NRC, EPA, and the affected NRC Agreement States, executed a Memorandum of Understanding to address the actions to be undertaken by EPA and NRC to eliminate regulatory redundancy and to ensure that uranium mill tailings disposal sites are closed as expeditiously as practicable considering technical feasibility. The EPA has proposed amendments to the regulations pertaining to uranium mill tailings disposal sites in permanent radon barrier and to require monitoring for 40 CFR 192, Subpart D, to ensure timely emplacement of a permanent radon barrier and to require monitoring for nonoperational uranium mill tailings disposal sites that are licensed by NRC or one of its Agreement States (June 8, 1993; 58 FR 32174). The NRC is required to conform its regulations governing uranium mill tailings to EPA's generally applicable standards promulgated under the Uranium Mill Tailings Radiation Control Act. NRC noted its intention to amend Appendix A of 10 CFR Part 40 to conform to EPA's planned amendments to 40 CFR 192, Subpart D, in an Advance Notice of Proposed Rulemaking entitled, "Licensing of Source Material" (October 28, 1992; 57 FR 48749).

CFR Citation: 10 CFR 019; 10 CFR 020

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations by (1) deleting the term "Controlled area," (2) revising the definition of "Occupational dose" to delete reference to the "restricted area" to clarify that the occupational dose limit and associated provisions such as training and badging requirements apply to workers who are exposed to radiation and/or radioactive material when engaged in licensed activities regardless

of whether those activities are in a restrictive area, and (3) revising 10 CFR 19.12 to ensure that training commensurate with the hazards present will be provided to all workers who become occupationally exposed, not just individuals who will be working in or frequenting any portion of a restricted area. This rule would neither restrict a licensee's ability to control access to areas for purposes other than radiation protection, such as for security reasons, nor will it permit members of the public to receive exposures in excess of the public dose limit even if permitted access to a restricted area.

Abstract: The proposed rule would, in conjunction with a corresponding rule change by the U.S. Department of Transportation, update the United States Federal regulations for the safe transportation of radioactive material to incorporate new licensing information developed since 1972. The proposed rule would respond to the need for a: 1) new crush test; 2) new deep immersion test; and 3) new limit on low specific activity material shipments. The action will be handled as a routine updating of NRC transportation regulations. There is no reasonable alternative to rulemaking. Proposed changes to 10 CFR Part 71,

based on current IAEA regulations, have been issued for public comment.

Abstract: The proposed rule would amend the Commission's regulations for the possession of industrial devices containing byproduct material to require device users to report to the NRC initially and then on a periodic basis. The report would indicate that the device is still in use or to whom the device has been transferred. The proposed rule would be the most efficient method, considering the number of general licensees and the number of devices currently in use, for assuring that devices are not improperly transferred or inadvertently discarded. The proposed rule is necessary to avoid unnecessary radiation exposure to the public that may occur when an improperly discarded device is included in a batch of scrap metal for reprocessing. The proposed rule would also avoid the unnecessary expense involved in retrieving the manufactured items fabricated from contaminated metal.

Abstract: The final rule would amend the Commission's regulations dealing with discrimination against persons who, on the grounds of sex, are excluded from participation in, denied the benefits of, or subjected to discrimination under any program or activity licensed by the NRC. The Commission has decided that Section 401 of the Energy Reorganization Act, which prohibits sex discrimination, applies only to the Commission and does not apply to NRC licensees and/or applicants. Because this decision invalidates 10 CFR 19.32 and 10 CFR 2.111, action is being taken to amend these sections and to incorporate appropriate language to clarify that these sections do not apply to licensee employees.

The rulemaking would result in publication of specific criteria for timeliness in the decontamination and decommissioning of material facilities. Abstract: The proposed rule would amend the Commission's regulations to update the criteria used in decisions regarding power reactor siting, including geologic, seismic, and earthquake engineering considerations for future nuclear power plants. The proposed rule would allow NRC to benefit from experience gained in the application of the procedures and methods set forth in the current regulation and to incorporate the rapid advancements in the earth sciences and earthquake engineering. The proposed rule primarily consists of two separate changes, namely, the source term and dose considerations, and the seismic and earthquake engineering considerations of reactor siting.

A second phase of this rulemaking action is described in the proposed rule titled, "Acceptability of Plant Performance for Severe Accidents; Scope of Consideration in Safety Regulations (RIN 3150-AE38)."

The Commission is also proposing to deny the remaining issue in a petition for rulemaking (PRM-50-20) filed by Free Environment, Inc., et al. (cont)

Abstract: The proposed rule would amend the Commission's regulations governing the storage of spent fuel at nuclear power reactor sites in NRC-certified casks under a general license. Five spent-fuel storage casks have been certified and are currently listed in 10 CFR 72.214. The proposed rule would approve and list an additional cask: Cask TN-24 from Transnuclear Inc. A Safety Evaluation Report has been completed for this cask. An operating nuclear power reactor licensee may choose from any of the listed casks to store spent fuel at the reactor site under a general license.

This cask, as well as Cask VSC-24, was included in the propose proposed rule entitled, "List of approved Spent Fuel Storage Casks: Additions." The proposed rule was divided into two separate rulemakings (one proposed and one final) due to a delay from Transnuclear, Inc., in allowing the release of proprietary information in accordance with Section 2.790(c). The final rulemaking, which adds Cask VSC-24, was published in the Federal Register on April 7, 1993 (58 FR 17948).

Abstract: The proposed rule would amend the Commission's regulations by revising the current decommissioning financial assurance requirements to allow non-electric utility reactor licensees who meet stringent financial criteria tests to provide self-guarantee as a means to comply with the decommissioning regulations. Under the current decommissioning regulations, non-electric utility reactor licensees are permitted to provide financial assurance of decommissioning funds through (1) prepayment or external sinking fund in the form of a trust, escrow account, government fund, certificate of deposit, or deposit of government securities; (2) surety method or insurance in the form of a surety bond, letter of credit, or line of credit; or (3) parent company guarantee. These funding methods do not permit non-electric utility reactor licensees to provide financial assurance by submitting a self-guarantee that meets or exceeds the criteria for a qualifying parent company guarantee.

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 110

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations to conform with the export control guidelines of the multilateral Nuclear Suppliers Group (NSG) and of the International Atomic Energy List of the Coordinating Committee for Multilateral Export Controls (COCOM), in which the United States participates, and treaty obligations between the United States and Canada. The proposed rule would amend general license regulations for the export of dispersed tritium, bulk tritium, americium-242m, californium-249, californium-251, curium-245, curium-247, and 16 different alpha-emitting radionuclides, including compounds and mixtures containing these radionuclides with a total alpha activity of 1 curie per kilogram or greater. In regard to the radionuclides, devices containing less than 100 millicuries of alpha activity per device would be

exempt. Other exports of these alpha-emitting radionuclides would continue to be generally licensed for member states of the NSG, but would require specific licensing to other countries. (cont)

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 026

Legal Deadline: None

Abstract: The proposed rule would amend the NRC's regulations to modify the current Fitness-for-Duty Program (FFD) requirements. The proposed amendments would apply to all licensees authorized to construct or operate a nuclear power reactor and all licensees authorized to possess or transport Category I nuclear material. The proposed rule is intended to reduce unnecessary burdens by reducing the random testing rate for licensee employees and to ensure the continued protection of public health and safety.

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 055

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations to: (1) delete the requirement that each licensed individual pass an NRC-administered requalification examination during the term of license; (2) require that facility licensees submit to the NRC their annual requalification operating tests and comprehensive requalification written examinations 30 days prior to the conduct of these tests and examinations; and (3) include facility licenses in the "Scope" of Part 55. The proposed rule would also improve operational safety at each facility by redirecting NRC examiners to inspect and oversee facility requalification programs rather than conducting requalification examinations, while reducing both licensee and NRC costs to administer the program.

Abstract: The proposed rule would amend the Commission's regulations to clarify the timing of notification to the NRC of Spent Fuel Management and Funding Plans by licensees of those nuclear power reactors that have been shut down before the expected end of their operating lives. The proposed rule would require that a licensee submit its notification either within 2 years after permanently ceasing operation of its reactor or no later than 5 years before the reactor operating license expires, whichever event occurs first.

Abstract: The proposed rule would amend the Commission's regulations by revising certain sections to conform with the nuclear whistleblower protection provisions of the Energy Policy Act of 1992. The new nuclear whistleblower protection provisions of the Energy Policy Act of 1992, which was enacted on October 24, 1992, amend Section 210 of the Energy Reorganization Act of 1974. The

legislation extends the period in which to file a claim and extends protection to new classes of employees and employers. Because there were two Section 210's in the Energy Reorganization Act, the new legislation rennumbers the whistleblower protection provision as Section 211. In addition, the new legislation requires that employers post the whistleblower protection provisions in a prominent place at the work site. These additional requirements and scope changes are being reflected in the proposed rule.

4830. PROCEDURES INVOLVING THE EQUAL ACCESS TO JUSTICE ACT: IMPLEMENTATION

Legal Authority: 5 USC 504

CFR Citation: 10 CFR 001; 10 CFR 002

Legal Deadline: None

Abstract: The proposed rule would have implemented the Equal Access to Justice Act by providing for the payment of fees and expenses to certain eligible individuals and businesses that prevail in agency adjudications when the agency's position is determined not to have been substantially justified. This proposed rule was issued by the Commission in 1981. A draft final rule was sent to the Commission in June 1982, but Commission action was suspended pending a decision by the Comptroller General on the availability of funds to pay awards to intervenor parties. Because of the considerable time period that has transpired since the proposed rule was published, the Commission is withdrawing this proposed rule and replacing it with a new proposed rule entitled, "Equal Access to Justice Act: Implementation" (RIN 3150-AE61). This new proposed rule was published in the Federal Register on August 2, 1993 (58 FR 41061)

Abstract: The advance notice of proposed rulemaking (ANPRM) was published to request public comment on a proposal to amend NRC regulations to address disposal of radioactive wastes that contain sufficiently low quantities of radionuclides that their disposal does not need to be regulated as radioactive. The NRC has already published a policy statement providing guidance for filing petitions for rulemaking to exempt individual waste streams (August 29, 1986; 51 FR 30839). The Commission has determined that this rulemaking is unnecessary. A notice of withdrawal was published in the Federal Register on August 24, 1993 (58 FR 44620).

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 011; 10 CFR 025

Legal Deadline: None

Abstract: The final rule amends the Commission's regulations to revise the fee schedule for background investigations of licensee personnel who require access to National Security Information and/or Restricted Data and access to or control over Special Nuclear Material. These amendments comply with current regulations that provide that NRC will publish fee adjustments concurrent with notifications of any changes in the rate charged the NRC by the Office of Personnel Management for conducting investigations.

Semiannual Regulatory Agenda

RESOLUTION TRUST CORPORATION (RTC)

**RESOLUTION TRUST CORPORATION
12 CFR Ch. III**

Semiannual Agenda of Regulations

AGENCY: Resolution Trust Corporation.

ACTION: Publication of semiannual agenda of regulations.

SUMMARY: The Resolution Trust Corporation (RTC) is hereby publishing items for the October 1993 regulatory agenda. The agenda contains information about the RTC's current and completed rulemakings.

FOR FURTHER INFORMATION CONTACT: Persons identified under regulations listed in the agenda. Except as

indicated, the address for all staff identified in the agenda is Resolution Trust Corporation, 801 17th Street NW., Washington, DC 20434-0001.

SUPPLEMENTARY INFORMATION: The RTC was created on August 9, 1989, as an instrumentality of the United States by title V of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA). Under FIRREA, the RTC was given powers to adopt such rules, regulations, standard policies, procedures, guidelines, and statements as the Corporation considers necessary or appropriate to carry out its mission. Twice each year, the RTC publishes an agenda of regulations to inform the public of its regulatory actions and to

enhance public participation in the rulemaking process. Publication of the agenda is in accordance with the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Interested persons may petition the RTC for the issuance, amendment, or repeal of any regulations by submitting a written petition to the Secretary, Resolution Trust Corporation, Washington, DC 20434. Petitioners should include complete and concise statements of their interest in the subject matter and why the petitions should be granted.

Dated: August 25, 1993.

Resolution Trust Corporation.
John M. Buckley, Jr.,
Secretary.

Proposed Rule Stage

4853. QUALIFIED FINANCIAL CONTRACTS

Significance: Agency Priority

Legal Authority: 12 USC 1821(d)(1); 12 USC 1821(d)(4)

CFR Citation: 12 CFR 1622

Legal Deadline: None

Abstract: This regulation will provide a "safe harbor" for qualified financial contracts (QFCs) with respect to the

"written agreement" requirements of the Federal Deposit Insurance Act; will require RTC, as receiver, to notify, within a prescribed timeframe, the counterparties to QFCs of the transfer of their contracts, and that doing so would prevent the counterparties from exercising their liquidation or acceleration rights; and to impose upon the depository institutions that enter into QFCs certain recordkeeping requirements.

12 USC 1441a(b)(11)(A); 12 USC 1821(d)(2)

CFR Citation: 12 CFR 1627

Legal Deadline: None

Abstract: RTC functions in distinct capacities when acting as receiver or conservator for a savings association and when acting in its Corporate capacity. To recognize this functional distinction and to provide for service of process on those RTC officials who are most likely to be able to facilitate a prompt and constructive response, the regulation designates RTC's agents for service of process when acting in its various capacities. The action will impose no cost upon the public or the agency, since legal process must already be served upon some agent. It will confer a benefit by clarifying the manner of serving RTC in its various capacities and facilitating a prompt response.

Regulatory Flexibility Agenda

AGENCY: Securities and Exchange Commission.

ACTION: Publication of regulatory flexibility agenda.

SUMMARY: The Securities and Exchange Commission is publishing an agenda of its open and anticipated rulemaking actions, pursuant to chapter 6 of the Administrative Procedure Act and according to guidance given by the Office of Management and Budget. The agenda is a general announcement to the public intended to provide advance notice of rulemaking actions which may have a significant economic impact on a substantial number of small entities. Information in the agenda is believed to be accurate as of August 13, 1993, the date on which compilation of the data was completed for transmittal to the Regulatory Information Service Center. The Commission invites questions and public comment on individual agenda entries.

DATES: Public comments are due by December 31, 1993.

ADDRESSES: Persons wishing to submit written comments should file three copies of their comments with Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 5th Street NW., Room 6184, Stop 6-9, Washington, DC 20549. All submissions should refer to File No. S7-25-93 and will be available for public inspection and copying at the Commission's Public Reference Room, Room 1026, at the same address.

FOR FURTHER INFORMATION CONTACT: Kevin M. Kirchoff, Senior Counsel, Office of the General Counsel, Securities and Exchange Commission, 450 5th Street NW., Room 6146, Stop 6-6, Washington, DC 20549, (202) 272-2428. Each specific item on the agenda indicates the names and addresses of persons to contact with regard to such item.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act (RFA)¹ requires each Federal agency, during April and October of each year, to publish in the Federal Register an agenda identifying rules which the agency expects to propose or adopt that are likely to have a significant economic impact on a substantial number of small entities.²

The RFA specifically provides that publication of the agenda does not preclude an agency from considering or acting on any matter not included in the agenda and that an agency is not required to consider or act on any

matter which is included in the agenda.³ The inclusion of a rule in the Commission's agenda reflects only its staff's preliminary judgment that the rule, if adopted or as it exists, may have a significant economic impact on a substantial number of small entities.⁴ This preliminary judgment may be changed after further analysis.

The Commission's staff completed the compilation of data for this edition of the agenda in August 1993, prior to transmittal of the data to the Regulatory Information Service Center for inclusion in the Unified Agenda. Information in the Commission's agenda, therefore, is believed to be accurate as of August 13, 1993. The agenda includes new entries, entries carried over from previous publications, and rulemaking actions which have been completed (or withdrawn) since publication of the April 1993 agenda. New entries are indicated with a bullet next to their Sequence Number. Priority items are identified under the heading "Significance," followed by the words "Agency Priority."

The Commission's October 1993 regulatory flexibility agenda is set forth below. The Commission invites public comment on the individual entries in its agenda.

Dated: September 9, 1993.

By the Commission,
Jonathan G. Katz,
Secretary.

Abstract: The Division of Investment Management is reviewing the requirements of Form N-1A, the registration form for all open-end management investment companies registering under the 1933 and 1940 Acts. The review will focus on ways to update and improve the disclosure requirements of the form, particularly for money market funds. The Division will also be addressing the incorporation by reference rules in the investment company registration forms as a result of questions raised by the district court for the Southern District of New York.

Abstract: Rule 10b-6 prohibits persons engaged in a distribution of securities from bidding for or purchasing, or inducing others to purchase, such securities, any security of the same class and series as those securities, or any right to purchase any such security, until they have completed their participation in the distribution. Rule 10b-7 governs stabilizing activities to facilitate distributions of securities and Rule 10b-8 governs certain activities during distributions of securities through rights. The Commission has proposed a comprehensive review of Rules 10b-6, 10b-7, and 10b-8. This review will examine both the domestic application of those rules and well as the extraterritorial effect of their application on multinational securities distributions. This review also would address such issues as distribution and stabilization practices in the U.S. and abroad, and the impact of the rules on activities that are customary and lawful in foreign jurisdictions.

4873. SECURITIES TRANSACTIONS SETTLEMENT

Legal Authority: 15 USC 15(c)(6)

CFR Citation: 17 CFR 240.15(c)(6)

Legal Deadline: None

Abstract: The proposed rule is designed to reduce the risk inherent in settling securities transactions by reducing the number of trades to be settled; enhancing the liquidity of the corporate securities markets by permitting sellers to move from these to other markets on a more timely basis; bringing the market for corporate securities into closer conformity with the government securities and derivatives markets; and increasing harmonization with international markets. Among several alternatives, the following were considered: retaining T+3 settlement but requiring a daily mark-to-market; and requiring their participants to settle trades by T+3. Although these alternatives were considered, the gravity of the change to T+3 requires an affirmative statement by the Commission. The change to T+3 may result in an increase in a broker-dealer's cost of financing the purchase of customer securities until the broker-dealer receives payment from its customers, and conversion to T+3 will require large and small broker-dealers to upgrade their computer systems.

Abstract: The staff of the Division of Investment Management is considering recommending to the Commission amendments to Form N-1A, the registration form used by mutual funds under the Investment Company Act of 1940 and the Securities Act of 1933, that would significantly shorten and simplify prospectuses for those registrants that hold themselves out as money market funds. The changes the staff is considering would provide investors with more easily understandable information about money market funds in prospectuses, while continuing to make more detailed information available through the Statement of Additional Information ("SAI"). Such amendments are also

intended to reduce the cost to funds of preparing, printing, and distributing prospectuses. The proposals would also make conforming rule and form amendments and revisions to staff guides to Form N-1A.

4875. SIMPLIFICATION OF REGISTRATION STATEMENTS FILED BY, AND ADVERTISING RULES FOR, UNIT INVESTMENT TRUSTS

Legal Authority: 15 USC 80a-8; 15 USC 77g; 15 USC 77j

CFR Citation: 17 CFR 239.16; 17 CFR 274.12

Legal Deadline: None

Abstract: On March 9, 1987, the Commission repropoed for public comment Form N-7, a new form for registering unit investment trusts (UITs) and their securities under the Investment Company Act of 1940 and the Securities Act of 1933. Form N-7 was originally proposed by the Commission on May 14, 1985. Adoption of Form N-7 would: (1) codify the disclosure requirements for UITs into one form; (2) codify the disclosure standards that have been developed for UITs; and (3) shorten and simplify the prospectus used in connection with the sale of units in both the initial offering and in the secondary market maintained by the sponsor. The requirement for audited financial statements would be eliminated under certain circumstances. Under the reproposal, the requirement that registrants include certain third-party financial statements in the registration statement would be extended to insurers as well as guarantors of portfolio securities of the trust.

The Division of Investment Management is also undertaking to develop for recommendation to the Commission a rule proposal setting forth a uniform method of computing UIT yields. (cont)

Additional Information: ABSTRACT CONT: Currently, UITs advertise their performance by means of an "estimated current return," which shows estimated cash flow. However, in a market environment characterized by fluctuating interest rates, estimated current return may not accurately convey the yield of UITs. A uniform method of computation would permit investors to make more informed investment decisions by enabling them to compare the performance of different trusts. The staff is studying a proposal for a uniform method of computing UIT yields submitted by the Investment Company Institute.

Abstract: Absent an exception, every solicitation of a proxy, authorization or consent with respect to any security issued or to be issued by a registered investment company is subject to rules adopted pursuant to the Securities Exchange Act of 1934 and the Investment Company Act of 1940 concerning solicitations of proxies. Solicitations to which the rules apply may not commence unless each person solicited is furnished or has previously been furnished with a proxy statement containing specified information prepared in accordance with certain rules and the material has been filed with the Commission. The existing proxy rules were adopted in piecemeal fashion and have been the subject of frequent changes. This has led to some duplicative and, in certain cases, complex requirements. To the extent that a proxy statement contains repetitive material or is overly

There does not currently exist a basis upon which to quantify the reduced costs and burdens of the revisions, if any, that might result from the staff review. However, if revisions were proposed that applied to all registered investment companies soliciting proxies, unless the solicitation is excepted, such revisions could have a significant economic impact on a substantial number of small entities.

Abstract: The Division of Investment Management is considering whether to recommend that the Commission propose a rule that would codify many exemptions from provisions of the Investment Company Act granted to two-tier real estate limited partnerships. Exemptions pursuant to section 6(c) of the Act have generally been granted where: 1) The two-tier partnership invests in limited partnerships engaged

in the development and building of housing for low- and moderate-income persons; 2) the limited partnership interests are sold only to suitable investors; and 3) requirements for fair dealing by the general partner of the issuer with the limited partners of the issuer are included in the basic organizational documents of the partnership. The regulation would reduce the number of exemptive relief applications received by the Office of Investment Company Regulation.

The proposals would provide an exception to permit specialists to equalize the opening price of a foreign security on a U.S. exchange with its price in the principal foreign market, to exclude from application of the rule transactions in nonconvertible corporate bonds effected on an exchange, and to codify a no-action position relating to certain liquidations of index arbitrage positions. The proposed amendments redesignate certain current provisions of Rule 10a-1. The amendments, if adopted, also would clarify Rule 3b-3's definition of ownership of a security.

Abstract: The Division of Investment Management is considering whether to recommend that the Commission propose (i) a rule that would define the conditions under which an open-end management investment company may issue multiple classes of securities representing interests in the same portfolio, and (ii) certain related disclosure requirements. The Commission granted several exemptions from provisions of the Investment Company Act to permit open-end investment companies to issue multiple classes of securities, with each class subject to a different distribution arrangement. The Division is considering whether to codify elements of prior exemptive orders. The rule, if adopted, might reduce the number of exemptive relief applications received by the Office of Investment Company Regulation.

Abstract: The Commission has proposed, and received comments on, amendments to rules 12b-1 and 17d-3 under the Investment Company Act of 1940. The proposed amendments to rule 12b-1 would clarify and enhance standards for the approval or continuation of Rule 12b-1 distribution

plans; place limits on certain practices that have developed under the rule, and prohibit funds using these plans from holding themselves out as no-load funds. The proposed amendments to rule 17d-3 would allow a mutual fund, under certain conditions, to enter into joint distribution agreements with affiliated funds, other affiliated persons, and the fund's principal underwriter. The Division of Investment Management withdrew the proposal from the Unified Agenda to consider it in the context of a comprehensive study of the Act. The Division now is reconsidering the proposal, in light of the study's recommendations, as a separate rulemaking proposal.

Abstract: The Commission is proposing to adopt comprehensive revisions to its Rules of Practice. This proposal stems from the work of the Task Force on Administrative Proceedings which examined the rules and procedures governing Commission administrative proceedings. Following passage of the Securities Enforcement Remedies and Penny Stock Reform Act, the Task Force expanded its work to include developing recommendations to implement the Commission's new powers under the Act. Among the major proposals in the proposed Rules of Practice are: new procedures for the conduct of temporary cease-and-desist order proceedings; new rules governing the collection and distribution of disgorgement required by Commission order; a streamlined discovery process; an expanded role for prehearing conferences; an expanded availability for summary disposition of matters of law; and production of documents, pursuant to subpoena, prior to the start of a hearing.

Legal Authority: 15 USC 78o(c)(3); 15 USC 78w

CFR Citation: 17 CFR 240.15c3-3

Abstract: Because the borrowing of government securities plays an important role in the government securities market, the Commission believes that, for purposes of the customer protection rule, the categories of instruments that broker-dealers can provide to customer lenders of government securities should be expanded to include certain instruments currently not listed in the rule. Therefore, the Commission has proposed an amendment to the customer protection rule that would allow broker-dealers to provide, in addition to the instruments currently listed in the rule, certain other securities as the collateral in government securities borrowings.

Abstract: In response to the October 1987 market break and as a part of its comprehensive market break study, the Division of Market Regulation examined the specialist financial responsibility rules and specialist financial surveillance systems of the various exchanges. As a result, the Commission has proposed amendments to the net capital rule that, among other things, will make the rule applicable to certain specialists that are now exempt from the rule. In addition to the consequential overall financial accountability and discipline that results from the application of the net capital rule, the Commission believes it would be desirable to have a uniform measure whereby it may review the financial health and liquidity of all specialists at all exchanges.

Abstract: In response to the October 1987 market break and as a part of its comprehensive market break study, the Division of Market Regulation examined the appropriate levels of minimum net capital required of registered broker-dealers. As a result, the Commission has proposed amendments to the net capital rule that, among other things, would raise the minimum net capital required of various classes of registered broker-dealers. The Commission believes that these higher levels of required net capital are justified based upon the risks posed by undercapitalized firms to customers and to the securities system as a whole. On November 24, 1992, the Commission amended the net capital rule to raise the absolute minimum net capital required of certain registered broker-dealers. The increases to the minimum net capital levels are to be implemented over a period of eighteen months. In addition, the two methods of computing deductions for equity securities positions, or haircuts, were standardized. Certain changes were also made to the computation of aggregate indebtedness.

Abstract: Rule 15c2-11 governs the submission or publication of quotations by brokers or dealers for certain over-the-counter securities. Currently, the rule applies principally to the initiation or resumption of quotations in the National Daily Quotation Service, which is also known as the "pink sheets." The Commission has proposed amendments to the rule that would substantially narrow the piggyback exception so that self-piggybacking would be excepted under defined conditions and every broker-dealer generally would be required to obtain and review the specified information before submitting a quotation for a covered security. An additional amendment would encourage the creation of one or more central information repositories by permitting

SEC

broker-dealers, under certain conditions, to rely on the presence of required issuer information in such a repository instead of maintaining those files internally. The amendments would further the Commission's efforts to combat fraud and manipulative conduct in the penny stock market.

The proposed amendments would permit the stabilizing price in an offering of a foreign security to reflect the price of the security in the foreign market that is the principal market for such security, if the stabilizing activity otherwise complies with the rule. Adjustments of stabilizing bids based on exchange rate fluctuations between the currencies of the markets on which the security is being stabilized would also be permitted. The amendments would also deem foreign stabilizing transactions during an offering of a foreign security in the United States made in compliance with comparable foreign regulations not to be in violation of Rule 10b-7.

Abstract: The Commission proposed for comment Rule 17Ad-16 under the Securities Exchange Act of 1934. Rule 17Ad-16, if adopted, would require a transfer agent to provide written notice to securities depositories when terminating or assuming transfer agent services on behalf of an issuer or when changing its name or address. The proposed rule would address a continuing problem affecting prompt securities certificate transfer and increase the efficiency of the National System for the Clearance and Settlement of Securities Transactions as set forth in section 17A of the Act. Transfer agents with no name or address changes and with no change in the issues for which they provide services will not be affected by this rule and will not need to file a notice. The Division expects a majority of small transfer agents and in-house transfer agents to fall into this category. Compliance costs would be minimal for transfer agents even when the rule applies. A transfer agent that changes its name or address or terminates or assumes transfer agent services on behalf of an issue need only file a short notice with one of three registered securities depositories explaining the change.

Abstract: The Commission had proposed, and received comments on, amendments to Rule 12d3-1 that would facilitate the acquisition by investment

companies of the equity securities of foreign securities firms. The Division of Investment Management withdrew the proposal (RIN 3235-AD19) from the Unified Agenda to consider it in the context of a comprehensive study of the Investment Company Act of 1940. After again considering the proposal as a separate rulemaking proposal, the Commission has proposed revised amendments to Rule 12d3-1 that would permit registered investment companies more flexibility, than under the current rule or the prior proposal, to purchase the securities of securities-related businesses by eliminating the rule's marginability and investment grade conditions for such acquisitions.

Abstract: The proposal provides an exemption from the payment of fees for certain securities transactions. Many transactions occurring after regular trading hours involve portfolio trades. These transactions when executed overseas, currently may be exempt from section 31 transaction fees pursuant to Rule 31-1(e). The amendment to Rule 31-1, as proposed by the Commission, would provide a limited exemption from the payment of section 31 fees for sales involving 15 securities or more at one aggregate price occurring on or

off an exchange in listed securities after regular trading hours. By aligning the fee exemption for after-hours portfolio trading to match the treatment for overseas trading, the proposal should promote the public interest and equal protection of markets because it will remove an incentive for executing these trades overseas.

Abstract: The Commission had proposed, and received comments on, new Rule 6c-10 under the Investment Company Act of 1940 which would provide a registered open-end management investment company, other than a registered insurance company separate account, and certain related persons with exemptions from the Act to the extent necessary to permit the fund to impose sales loads on a deferred basis. The Commission had also proposed amendments to Form N-1A, the registration statement for funds, to accommodate the deferred sales loads that would be permitted if Rule 6c-10 is adopted. The Division of Investment Management withdrew the proposal [previous RIN: 3235-AD18] from the Unified Agenda to consider it in the context of a comprehensive

study of the Act. The staff is now reconsidering the proposal as a separate rulemaking proposal.

Abstract: The Commission proposed rules providing, under appropriate conditions, comparable treatment for investment companies organized as limited partnerships as for investment companies organized as corporations. Proposed Rule 2a19-2 would exempt certain general partners of an investment company organized as a limited partnership from being considered "interested persons" of the investment company, its investment adviser, or its principal underwriter, solely on the basis of their status as partners or co-partners. Proposed Rule 2a3-1 would exempt certain limited partners of an investment company organized as a limited partnership from being considered "affiliated persons" of the investment company, other partners of the investment company, its investment adviser, or its principal underwriter, solely on the basis of their status as partners or co-partners. This item is a reconsideration of an item that was previously on the Unified Agenda and withdrawn (see prior RIN 3235-AD83). These rules, if adopted, should eliminate the need for certain limited partnership investment companies to file (cont)

Abstract: The Commission has proposed for public comment amendments to rules 10f-3, 17a-7, 17e-1, 17f-4, and 22c-1 under the Investment Company Act of 1940. The proposed amendments would eliminate requirements in these rules that directors annually review certain arrangements and procedures, and require instead that directors make and approve changes only as the board deems necessary. The proposals are intended to substitute more meaningful requirements for the current annual review requirements, which are not necessary to further the purposes of the rules or to protect investors.

Abstract: The Commission has adopted amendments to Form N-1A, the registration form used by mutual funds to register under the Investment Company Act of 1940 and to register securities under the Securities Act of 1933. These amendments improve disclosure regarding the performance of mutual funds and the individuals responsible for that performance. The amended form requires a fund to provide in its prospectus a new Financial Highlights table and disclosure about its portfolio manager(s). Funds are also required to provide a management's Discussion of Fund Performance (narrative analysis and performance graph) in either the prospectus or annual report to shareholders. Conforming amendments to rule 34b-1 under the 1940 Act and Form N-14 under the 1933 Act were also adopted.

Abstract: Rule 10b-6 prohibits persons engaged in a distribution of securities from bidding for or purchasing, or inducing others to purchase, such securities, any security of the same class and series as those securities, or any right to purchase any such security, until they have completed their participation in the distribution. On April 8, 1993, the Commission adopted a new exception to Rule 10b-6 and a new companion rule, Rule 10b-6A(T) under the Securities Exchange Act of 1934 to permit "passive market making" in connection with certain distributions of securities quoted on NASDAQ during the period when Rule 10b-6 would otherwise prohibit such activity. The new provisions would apply to a firm commitment distribution of securities that qualify for the two business day "cooling-off" period of Rule 10b-6. A passive market maker's bids are limited by the level of bids of market makers who are not participating in the distribution. The new exception and new rule were adopted in response to a petition for rulemaking filed by the National Association of Securities Dealers.

Abstract: Subject to certain exceptions, Rule 10b-2 prohibited any person participating or otherwise financially interested in a distribution of securities from compensating any person for soliciting another person to purchase on a national securities exchange, any security of the same issuer whose securities are the subject of the distribution. In view of the significant changes that have taken place in the securities markets since the rule's adoption and the coverage of other antifraud and anti-manipulation provisions of federal securities laws, particularly Rules 10b-5 and 10b-6 under the Securities Exchange Act of 1934, the Commission rescinded Rule 10b-2.

Abstract: The Oversight Board is required by statute to provide regulations establishing procedures for ensuring that any individual who is performing, directly or indirectly, any function or service on behalf of the Resolution Trust Corporation meets minimum standards of competence, experience, integrity, and fitness. Existing regulations are included in rules governing employee responsibilities and conduct, which were superseded for the most part, effective February 3, 1993, by the governmentwide rule issued by the Office of Government Ethics. Although the existing minimum standards, codified at 12 CFR 1505.40, remain in effect, the Thrift Depositor Protection Oversight Board will prescribe a new separate rule under its independent statutory authority.

Abstract: The Oversight Board is required by statute to promulgate regulations governing conflict of

interest, ethical responsibilities, and post-employment restrictions applicable to members, officers, and employees that are no less stringent than those applicable to the Federal Deposit Insurance Corporation. Pursuant to this requirement, the Board will issue regulations supplementing the governmentwide standards of conduct rule issued by the Office of Government Ethics, which superseded the Oversight Board's existing rule on February 3, 1993.

INDEX TO ENTRIES THAT MAY AFFECT SMALL ENTITIES

The Regulatory Flexibility Act (5 U.S.C. 601) requires that agencies publish regulatory agendas identifying those rules that may have a significant economic impact on a substantial number of small entities. Agencies meet that requirement by including the information in their submissions for the Unified Agenda of Federal Regulations.

The following index lists the regulatory actions that agencies in the Unified Agenda believe may have effects on small businesses, small governmental jurisdictions, or small organizations. The Sequence Number (Seq. No.) of the entry identifies the location of the entry in this edition of the Agenda. For further information, see the Regulatory Information Service Center's Introduction to the Unified Agenda in Part II of this issue.

INDEX TO ENTRIES THAT MAY AFFECT GOVERNMENT LEVELS

Executive Order 12612 of October 26, 1987, entitled "Federalism" (3 CFR 1987 Comp., p. 252) directs Executive departments and agencies to identify proposed regulatory provisions that have significant federalism implications. As part of this effort, agencies include in their submissions for the Unified Agenda of Federal Regulations information on whether their regulatory actions have an effect on various levels of government.

The following index lists the regulatory actions that agencies in the Unified Agenda believe may have effects on local, State, or Federal levels of government. The Sequence Number (Seq. No.) of the entry identifies the location of the entry in this edition of the Agenda. For further information, see the Regulatory Information Service Center's Introduction to the Unified Agenda in Part II of this issue.
