Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Chemical Recovery Combustion Sources at Kraft, Soda, Sulfite, and Stand-Alone Semichemical Pulp Mills apply to new and existing chemical recovery combustion sources at kraft, soda, sulfite, and stand-alone semichemical pulp mills, for which the chemical recovery combustion sources emit greater than or equal to 10 tons per year (tpy) of any one hazardous air pollutant (HAP) or greater than or equal to 25 tpy of any combination of HAPs. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of any failures to meet applicable standards, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to 40 CFR part 63, subpart MM.

Form Numbers: None.

Respondents/affected entities: Chemical recovery combustion sources at kraft, soda, sulfite, and stand-alone semichemical pulp mills.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart MM).

Estimated number of respondents: 107 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 122,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$14,700,000 (per year), which includes \$831,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is decrease in the total estimated respondent burden compared with the ICR currently approved by OMB. This ICR includes a more accurate estimate of the number of new respondents based on EPA's recent consultations with industry trade groups, which indicated that one new facility will start up in the third year of this information collection, in addition to the one new respondent per year that is an existing facility constructing new process units. This ICR also updates the burden associated with the October 11, 2017 RTR amendments, including removing first-year costs associated with the amendments, and accounting for the remaining one-time burden for facilities that applies through October 2020.

SUPPLEMENTARY INFORMATION: On August 20, 2018, the FDIC requested comment for 60 days on a proposal to renew the information collections described below. No comments were received. The FDIC hereby gives notice of its plan to submit to OMB a request to approve the renewal of these collections, and again invites comment on these renewals.

Proposal to renew the following currently approved collections of information:

1. **Title:** Certification of Compliance with Mandatory Bars to Employment.

OMB Number: 3064-00121.

Form Number: 2120/16.

Affected Public: Individuals seeking employment from the FDIC.

Burden Estimate:

SUMMARY OF ANNUAL BURDEN

	Type of burden	Estimated number of respondents	Estimated time per response	Frequency of response	Total annual estimated burden hours
Form 2120/16	Reporting	500	10 minutes	On Occasion	83

General Description of Collection: There has been no change in the method or substance of this information collection. The change in estimates

annual burden is due to a decrease in estimated number of new hires from an annual average of 600 in 2015 to an annual average of 500 currently. This

information collection arises from the reporting requirements contained in 12 CFR part 336, subpart B of the FDIC Rules and Regulations entitled

“Minimum Standards of Fitness for Employment with the Federal Deposit Insurance Corporation”. This rule implements Section 19 of the Resolution Trust Corporation Completion Act (“Completion Act”), Public Law 103–204, by (among other things) prescribing a certification, with attachments in some cases, relating to job applicants’ fitness and integrity. More specifically, the statute provides that the FDIC shall issue regulations implementing provisions that prohibit any person from becoming employed by FDIC, who has been convicted of any felony; has been removed from, or prohibited from participating in the affairs of, any insured depository institution pursuant to any final enforcement action by any appropriate federal banking agency; has demonstrated a pattern or practice of defalcation regarding obligations to insured depository institutions; or has caused a substantial loss to federal deposit insurance funds. This collection of information implements these mandatory bars to employment through a certification, signed by job applicants prior to an offer of employment using form 2120/16.

2. *Title:* Purchaser Eligibility Certification.

OMB Number: 3064–0135.

Form Number: 7300–06.

Affected Public: Individuals and entities wishing to purchase receivership assets from the FDIC.

Burden Estimate: There has been no change in the method or substance of this information collection. The Subject Matter Experts (SMEs) from the FDIC’s Division of Resolutions and Receiverships have estimated that this information collection will affect 600 respondents annually for the next three years. This estimate is unchanged from 2015. The SMEs reached this estimate by calculating the average number of Purchaser Eligibility Certifications (PECs) completed in the past three years and rounding up.

Year	Number of PECs ¹
2015	952
2016	468
2017	369
Total	1,789
Three-Year Average	596.33

¹ SMEs within the FDIC’s Division of Resolutions and Receiverships (DRR) compiled this information by the contacting the managers that handle each asset sales category (structured transactions, cash loan sales, other real estate sales, and securities sales).

The number of PECs completed each year has been declining since 2009. If this trend were to continue, the number of respondents would be expected to continue to decrease from 369 over the next three years, which would imply that the estimated number of respondents should be lower for this collection compared to the one in 2015. The SMEs have acknowledged that 600 respondents may be a conservative estimate, but also believe that it is reasonable. This rationale stems from the fact that the current rate of bank failures is very low. The SMEs also point out that the PECs are collected from prospective purchasers and not just the winning bidders. As a result, the annual number of PECs could increase if there is an increase in the demand for the assets the FDIC sells even if the number of assets for sale decreases in line with the current trend of diminishing bank failures.

The estimated hourly burden for this information collection is 30 minutes per PEC form. The SMEs have arrived at this estimate through their personal observations of individuals completing these forms at open-outcry auction events. The table below contains estimates for the total estimated reporting burden for this information collection.

SUMMARY OF ANNUAL BURDEN

	Type of burden	Estimated number of respondents	Estimated frequency of responses	Estimated time per response (hrs)	Total estimated annual burden (hrs)
Purchaser Eligibility Certification	Reporting	600	1	0.50	300.00

Request for Comment

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the FDIC’s functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collection, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. All comments will become a matter of public record.
