Net Loans and Leases to Deposits (Domestic and Foreign)

Quarterly Change in Domestic Loans vs Domestic Deposits

Commercial and Industrial
Loans to Small Businesses
1998-2002
As of June 30

## Credit Risk Diversification

## Consumer Loans versus Loans to Commercial Borrowers

(as a Percent of Total Loans)

Loans (\$ Billions):

| $\square$ Commercial Borrowers | $\$ 1,222$ | $\$ 1,447$ | $\$ 1,695$ | $\$ 2,097$ | $\$ 2,301$ | $\$ 2,300$ |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: |
| $\square$ Consumer Loans | 935 | 1,161 | 1,280 | 1,398 | 1,598 | 1,675 |

Loans to Commerical Borrowers (Credit Risk Concentrated) - These are loans that can have relatively large balances at risk to a single borrower. A single loan may represent a significant portion of an institution's capital or income. Therefore, a relatively small number of defaults could impair an institution's capital or income. These loans include commercial and industrial loans, commercial real estate, construction loans, and agricultural loans.
Consumer Loans (Credit Risk Diversified) - These are loans that typically have relatively small balances spread among a large number of borrowers. A number of defaults are likely but typically do not impair an institution's capital or income. These loans include consumer and credit card loans, 1-4 family residential mortgages and home equity loans.

## Quarterly Change in Reported Loans Outstanding

(\$ Billions)

In the second quarter of 2002, 1-4 family loans increased by $\$ 52$ billion and consumer loans increased by $\$ 13$ billion, while commercial and industrial loans decreased by $\$ 27$ billion.

## Quarterly Change in Unused Loan Commitments

In the second quarter of 2002, unused credit card commitments increased by $\$ 58$ billion and unused commitments for loans to businesses increased by $\$ 34$ billion.

*YTD ROA minus ROA for the same period one year ago equals change in basis points. Basis point $=1 / 100$ of a percent.
Results for four of the states with the highest ROAs (SD, NV, DE, \& NH) were significantly influenced by the presence of
large credit card operators.

## U.S. Treasury Yield Curves

June 30, 2001 - June 30, 2002

Source: Federal Reserve's H. 15 Statistical Release. The quarterly average rates shown above represent a 3-month average of the monthly average rates published by the Federal Reserve.

* Source: 3 month average daily closes of CBOE 30 year T-Bond index (from Yahoo, Commodity Systems,Inc.).

This publication contains financial data and other information for depository institutions insured by the Federal Deposit Insurance Corporation (FDIC). These notes are an integral part of this publication and provide information regarding the comparability of source data and reporting differences over time. The information presented in the FDIC Quarterly Banking Profile is divided into the following groups of institutions:

## FDIC-Insured Commercial Banks

This section covers commercial banks insured by the FDIC either through the Bank Insurance Fund (BIF) or through the Savings Association Insurance Fund (SAIF). These institutions are regulated by and submit financial reports to one of the three federal commercial bank regulators (the Board of Governors of the Federal Reserve System, the FDIC or the Office of the Comptroller of the Currency).

## FDIC-Insured Savings Institutions

This section covers savings institutions insured by either BIF or SAIF that operate under state or federal banking codes applicable to thrift institutions. Savings institutions in conservatorships, are excluded from these tables while in conservatorship, where applicable. The institutions covered in this section are regulated by and submit financial reports to one of two Federal regulators - the FDIC or the Office of Thrift Supervision (OTS).

## FDIC-Insured Institutions by Insurance Fund

Summary balance-sheet and earnings data are provided for commercial banks and savings institutions according to insurance fund membership. BIF-member institutions may acquire SAIF-insured deposits, resulting in institutions with some deposits covered by both insurance funds. Also, SAIF members may acquire BIF-insured deposits. The insurance fund membership does not necessarily reflect which fund insures the largest percentage of an institution's deposits. Therefore, the BIF-member and the SAIF-member tables each include deposits from both insurance funds. Depository institutions that are not insured by the FDIC through either the BIF or SAIF are not included in the FDIC Quarterly Banking Profile. U.S. branches of institutions headquartered in foreign countries and nondeposit trust companies are not included unless otherwise indicated. Efforts are made to obtain financial reports for all active institutions. However, in some cases, final financial reports are not available for institutions that have closed or converted their charter.

## DATA SOURCES

The financial information appearing in this publication is obtained primarily from the Federal Financial Institutions Examination Council (FFIEC) Call Reports and the OTS Thrift Financial Reports submitted by all FDIC-insured depository institutions. This information is stored on and retrieved from the FDIC's Research Information System (RIS) data base.

## COMPUTATION METHODOLOGY

Certain adjustments are made to the OTS Thrift Financial Reports to provide closer conformance with the reporting and accounting requirements of the FFIEC Call Reports. Parent institutions are required to file consolidated reports, while their subsidiary financial institutions are still required to file separate reports. Data from subsidiary institution reports are included in the Quarterly Banking Profile tables, which can lead to double-
counting. No adjustments are made for any double-counting of subsidiary data.
All asset and liability figures used in calculating performance ratios represent average amounts for the period (beginning-ofperiod amount plus end-of-period amount plus any interim periods, divided by the total number of periods). For "pooling-ofinterest" mergers, the assets of the acquired institution(s) are included in average assets since the year-to-date income includes the results of all merged institutions. No adjustments are made for "purchase accounting" mergers. Growth rates represent the percentage change over a 12-month period in totals for institutions in the base period to totals for institutions in the current period.
All data are collected and presented based on the location of each reporting institution's main office. Reported data may include assets and liabilities located outside of the reporting institution's home state. In addition, institutions may change their charters, resulting in an inter-industry migration, e.g., savings institutions can convert to commercial banks or commercial banks may convert to savings institutions. These situations can affect state and regional statistics.

## RECENT ACCOUNTING CHANGES

FASB Statement No. 133 Accounting for Derivative Instruments and Hedging Activities - establishes new accounting and reporting standards. Derivatives were previously off-balance sheet items, but beginning in 2001 all banks must recognize derivatives as either assets or liabilities on the balance sheet, measured at fair value. A derivative may be specifically designated as a "fair value hedge," a "cash flow hedge," or a hedge of a foreign currency exposure. The accounting for changes in the value of a derivative (gains and losses) depends on the intended use of the derivative, its resulting designation, and the effectiveness of the hedge. Derivatives held for purposes other than trading are reported as "other assets" (positive fair values) or "other liabilities" (negative fair values). For a fair value hedge, the gain or loss is recognized in earnings and "effectively" offsets loss or gain on the hedged item attributable to the risk being hedged. Any ineffectiveness of the hedge could result in a net gain or loss on the income statement. Accumulated net gains (losses) on cash flow hedges are recorded on the balance sheet as "accumulated other comprehensive income" and the periodic change in the accumulated net gains (losses) for cash flow hedges is reflected directly in equity as the value of the derivative changes.
Initial transition adjustments upon adoption of FAS 133 are reported as adjustments to net income in the income statement as extraordinary items. Upon implementing FAS 133, a bank may transfer any debt security categorized as held-to-maturity into the available-for-sale category or the trading category. Unrealized gains (losses) on transferred held-tomaturity debt securities on the date of initial application must be reflected as an adjustment to net income if transferred to the trading category or an adjustment to equity if transferred to the available-for-sale category.
Subchapter S Corporations -The Small Business Job Protection Act of 1996 changed the Internal Revenue Code to allow financial institutions to elect Subchapter S corporation sta-
tus, beginning in 1997. A Subchapter S corporation is treated as a pass-through entity, similar to a partnership, for federal income tax purposes. It is generally not subject to any federal income taxes at the corporate level. Its taxable income flows through to its shareholders in proportion to their stock ownership, and the shareholders generally pay federal income taxes on their share of this taxable income. This can have the effect of reducing institutions' reported taxes and increasing their after-tax earnings.
The election of Subchapter S status may result in an increase in shareholders' personal tax liability. Therefore, some S corporations may increase the amount of earnings distributed as dividends to compensate for higher personal taxes.

## DEFINITIONS (in alphabetical order)

BIF-insured deposits (estimated) - the amount of deposits in accounts of less than $\$ 100,000$ insured by the BIF. For SAIFmember "Oakar" institutions, it represents the adjusted attributable amount acquired from BIF members.

Construction and development loans - includes loans for all property types under construction, as well as loans for land acquisition and development.

Derivative contracts, gross fair values (positive/negative) are reported separately and represent the amount at which a contract could be exchanged in a transaction between willing parties, other than in a forced or liquidation sale. If a quoted market price is available for a contract, the fair value reported for that contract is calculated using this market price. If quoted market prices are not available, the reporting banks use the best estimate of fair value based on quoted market prices of similar contracts or on valuation techniques such as discounted cash flows. This information is reported only by banks with assets greater than $\$ 100$ million.

Derivatives (notional amount) - represents the sum of the following: interest-rate contracts (defined as the "notional" value of interest-rate swap, futures, forward and option contracts), for-eign-exchange-rate contracts, commodity contracts and equity contracts (defined similarly to interest-rate contracts).
Futures and forward contracts - a contract in which the buyer agrees to purchase and the seller agrees to sell, at a specified future date, a specific quantity of an underlying variable or index at a specified price or yield. These contracts exist for a variety of variables or indices, (traditional agricultural or physical commodities, as well as currencies and interest rates). Futures contracts are standardized and are traded on organized exchanges which set limits on counterparty credit exposure. Forward contracts do not have standardized terms and are traded over the counter.
Option contracts - a contract in which the buyer acquires the right to buy from or sell to another party some specified amount of an underlying variable or index at a stated price (strike price) during a period or on a specified future date, in return for compensation (such as a fee or premium). The seller is obligated to purchase or sell the variable or index at the discretion of the buyer of the contract.
Swaps - an obligation between two parties to exchange a series of cash flows at periodic intervals (settlement dates), for a specified period. The cash flows of a swap are either fixed, or determined for each settlement date by multiplying the quantity (notional principal) of the underlying variable or
index by specified reference rates or prices. Except for currency swaps, the notional principal is used to calculate each payment but is not exchanged.
Efficiency Ratio - Noninterest expense less amortization of intangible assets as a percent of net interest income plus noninterest income. This ratio measures the proportion of net operating revenues that are absorbed by overhead expenses, so that a lower value indicates greater efficiency.

Loans secured by real estate - includes home equity loans, junior liens secured by 1-4 family residential properties and all other loans secured by real estate.
Loans to individuals - includes outstanding credit card balances and other secured and unsecured consumer loans.

Mortgage-backed securities - certificates of participation in pools of residential mortgages and collateralized mortgage obligations issued or guaranteed by government-sponsored or private enterprises. Also, see "Securities", below.

Net charge-offs - total loans and leases charged off (removed from balance sheet because of uncollectibility), less amounts recovered on loans and leases previously charged off.

Net interest margin - the difference between interest and dividends earned on interest-bearing assets and interest paid to depositors and other creditors, expressed as a percentage of average earning assets. No adjustments are made for interest income that is tax exempt.
Net operating income - income excluding discretionary transactions such as gains (or losses) on the sale of investment securities and extraordinary items. Income taxes subtracted from operating income have been adjusted to exclude the portion applicable to securities gains (or losses).
Noncurrent assets - the sum of loans, leases, debt securities and other assets that are 90 days or more past due, or in nonaccrual status.

Noncurrent loans \& leases - the sum of loans and leases 90 days or more past due, and loans and leases in nonaccrual status.

Other real estate owned - primarily foreclosed property. Direct and indirect investments in real estate ventures are excluded. The amount is reflected net of valuation allowances. For institutions that file a Thrift Financial Report (TFR), the valuation allowance subtracted also includes allowances for other repossessed assets. Also, for TFR filers the components of other real estate owned are reported gross of valuation allowances.
"Problem" institutions - federal regulators assign a composite rating to each financial institution, based upon an evaluation of financial and operational criteria. The rating is based on a scale of 1 to 5 in ascending order of supervisory concern. "Problem" institutions are those institutions with financial, operational, or managerial weaknesses that threaten their continued financial viability. Depending upon the degree of risk and supervisory concern, they are rated either a " 4 " or " 5 ". For all BIF-member institutions, and for all SAIF-member institutions for which the FDIC is the primary federal regulator, FDIC composite ratings are used. For all SAIF-member institutions whose primary federal regulator is the OTS, the OTS compos-
ite rating is used.
Reserves for losses - the allowance for loan and lease losses on a consolidated basis. Prior to March 31, 2001 reserves for losses included the allocated transfer risk reserve, which is no longer included as part of the loss reserve, but netted from loans and leases.

Return on assets - net income (including gains or losses on securities and extraordinary items) as a percentage of average total assets. The basic yardstick of bank profitability.

Return on equity - net income (including gains or losses on securities and extraordinary items) as a percentage of average total equity capital.

Risk-weighted assets - assets adjusted for risk-based capital definitions which include on-balance-sheet as well as off-balance-sheet items multiplied by risk-weights that range from zero to 100 percent. A conversion factor is used to
assign a balance sheet equivalent amount for selected off-balance-sheet accounts.

SAIF-insured deposits (estimated) - the amount of deposits in accounts of less than \$100,000 insured by the SAIF. For BIF-member "Oakar" institutions, it represents the adjusted attributable amount acquired from SAIF members.

Securities - excludes securities held in trading accounts. Banks' securities portfolios consist of securities designated as "held-to-maturity", which are reported at amortized cost (book value), and securities designated as "available-forsale", reported at fair (market) value.

Troubled real estate asset rate - noncurrent real estate loans plus other real estate owned as a percent of total real estate loans and other real estate owned.

Northeast - Connecticut, Delaware, District of Columbia Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Puerto Rico, Rhode Island, Vermont, U.S. Virgin Islands
Southeast - Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, West Virginia
Central - Illinois, Indiana, Kentucky, Michigan, Ohio, Wisconsin

Midwest - lowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota
Southwest - Arkansas, Louisiana, New Mexico, Oklahoma, Texas
West - Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, Oregon, Pacific Islands, Utah, Washington, Wyoming

[^0]:    * Notional amounts do not represent either the net market position or the credit exposure of banks' derivative activities.

    They represent the gross value of all contracts written. Spot foreign exchange contracts of $\$ 504$ billion are not included.

[^1]:    *YTD ROA minus ROA for the same period one year ago equals change in basis points. Basis point $=1 / 100$ of a percent.

[^2]:    * Other borrowed funds include federal funds purchased, securities sold under agreement to repurchase, FHLB and FRB borrowings and indebtedness.
