## Credit Risk Diversification

### Consumer Loans versus Loans to Commercial Borrowers (as a Percent of Total Loans)

1993 - 2002

#### Loans (\$ Billions):

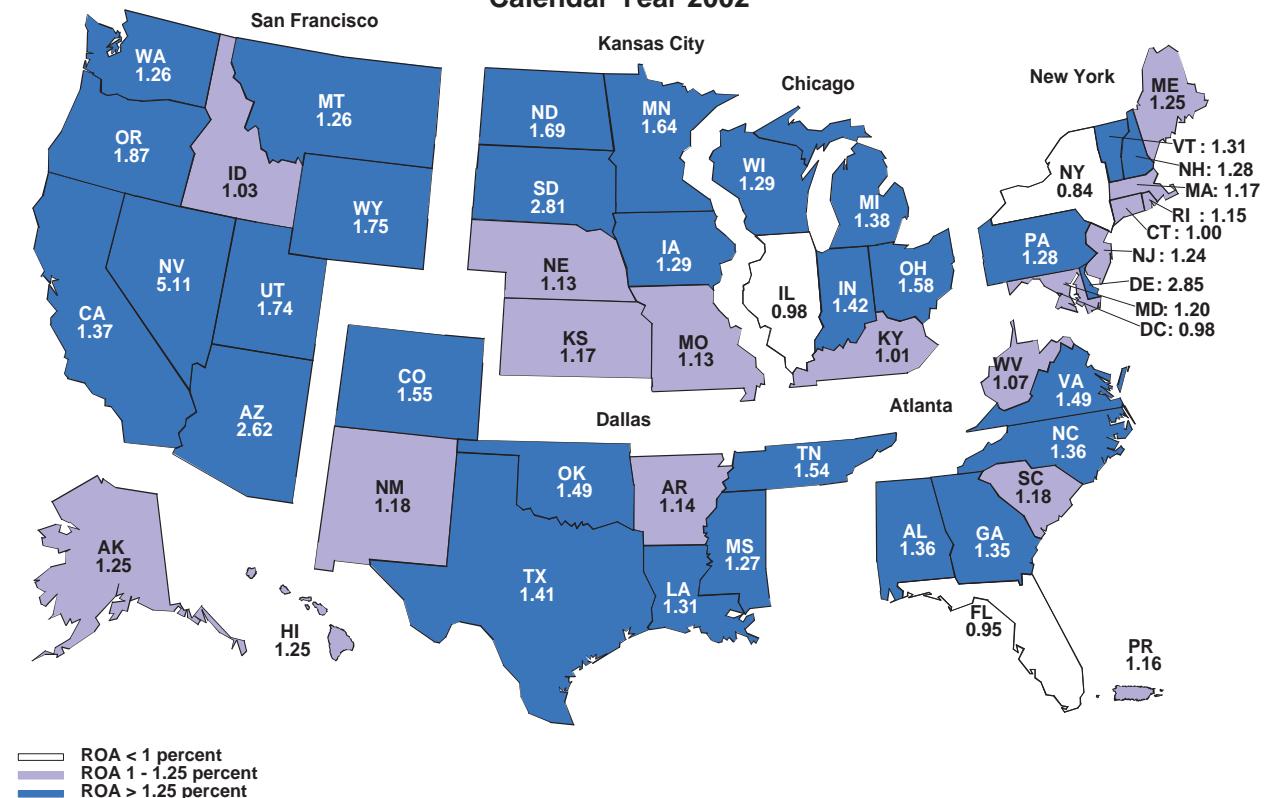

Commercial Borrowers	\$1,373	\$1,594	\$1,839	\$2,267	\$2,505	\$2,519
Consumer Loans	1,428	1,679	1,835	1,989	2,265	2,542

**Loans to Commercial Borrowers (Credit Risk Concentrated)** - These are loans that can have relatively large balances at risk to a single borrower. A single loan may represent a significant portion of an institution's capital or income. Therefore, a relatively small number of defaults could impair an institution's capital or income. These loans include commercial and industrial loans, commercial real estate, construction loans, and agricultural loans.

**Consumer Loans (Credit Risk Diversified)** - These are loans that typically have relatively small balances spread among a large number of borrowers. A number of defaults are likely but typically do not impair an institution's capital or income. These loans include consumer and credit card loans, 1-4 family residential mortgages and home equity loans.
